American Railroad Journal.

New York, Saturday, January 2, 1864.

☞ The *postage* on the AMERICAN RAILROAD JOURNAL is only *twenty cents per annum*, payable *quarterly in advance* at the Post office where the paper is received.

A Glance at the Past Year.

At the commencement of the present year we took a popular view of its future. On referring to our article of the 3rd of January last, it will be found we indulged in expectations which have been more than realized, and we venture to predict as favorably of the year of our Lord 1864. A review of the events of 1863 will not be inappropriate on the present occasion. We may divide our retrospect under the heads of diplomatic, military, financial, and internal affairs. Until the usual volume of the State Department makes its appearance, it would be impossible to form an accurate opinion of the manner in which our foreign relations have been conducted; and although it is quite probable some just grounds for criticism will arise, as they did on the appearance of the previous volumes, yet we must admit we have avoided many perils which a less ingenious Secretary than Mr. Seward could hardly have escaped.

With France, quite unexpectedly we are on the best terms, and we have now its distinct avowal that it has intended, and now intends nothing injurious to our interests. The Emperor is certainly innocent of all open breaches of neutrality towards us, and so far we must admit he has behaved with unexpected fairness. The Secretary of State has guarded against every chance of collision on our part, and even the invasion of Mexico has been left to the accidents of time.

Our relations with England have been far more delicate. The affair of the Alexandra and the rams came very near involving us in serious difficulties, but Mr. Seward's policy has been effectual in repressing those unfriendly movements.

And whether (time will show,) his instructions to Mr. Adams, or the improving condition of our affairs, or the unflinching determination of our people have been the cause, it is now evident that the whole policy of the British Government towards us has entirely changed. But it cannot be denied that the moral and material aid given to the rebel cause in England has protracted the war, increased our debt and greatly damaged our commerce. We have really been fighting two enemies at the same time, one open and desperate, the other bitter and envious. When the impartial historian records the events of the last three years, he will not fail to condemn the unfriendly conduct of the Government of England towards the United States. We have nothing, however, to apprehend in future from that quarter.

With all other nations we have had no embarrassments of any consequence, and we trust that those European powers who can see a justification of war between Germany and Denmark, for the possession of an insignificant Duchy or two, not as large as many ordinary counties in this State, will begin to think, that the loss of thirteen rebel States was quite as injurious to our nationality as a thousand Schleswig and Holsteins could be to those European powers.

Our military career has been generally prosperous, and at the end of the year we have seen the enemy driven from his strongest holds, and cooped up with the remains of his unwilling armies in positions from which he is sure to be expelled. The form of a Government alone remains to the rebels. Its Congress is composed of refugees, representing not more than parts or strips of a few States; it has no currency of any value, no mint, no coins; it collects no taxes; its armies cannot now be filled up even from the conscript rolls; their piratical rams and cruisers are detained in British ports, however tardy comes this act of justice; and its treasury is hopelessly insolvent. It is not in the nature of things that resistance can be much longer maintained. And as we have learned experience, we do better in our campaigns; the real generals of the war begin to loom up in the West and South, and we find our emergencies are producing great men at last.

Our blockade, in spite of the inefficiency of the Navy department, has been maintained with unexampled success, and we may at last say, the enemy has not now a single port into which a false neutrality can run a single cargo of supplies. We may confidently predict also, that the present year will witness the utter destruction of the rebel cause.

Of our financial successes we have again and again spoken. And though no partizans of the Secretary, or any other politician, we have cordially and openly supported his measures. With no other could we have succeeded. The old system would have utterly failed. Our National debt would have been twice as great as it is now; our currency would have been almost worthless. Bank bills that never could be redeemed, and at heavy discounts everywhere, would have made up a discordant and depreciating medium of exchange; the creditor interests of the country demanding payment in gold would have ruined the debtors, and real estate and all other properties forced to a sale, would have fallen one half or more in reputed value.

The most lively imagination cannot depict the scenes of wretchedness that would have occurred in the North, had Mr. Chase been any other statesman than he was. But he created a legal tender, for gold was no longer in circulation, by which debts could be paid, and the men and supplies for the contest could be obtained; he appealed to the people, and not to the banks to fill the National Treasury; he devised a system of taxation which was searching but not unjust, and which has been cheerfully borne; and armies of a million of men, and a navy six hundred vessels strong have been

procured, sustained, and supported with ease, and without the aid of a dollar from abroad. When we contemplate these results, we may thank heaven and take courage. It is a wondrous spectacle, and surpasses any ever chronicled in the history of finance.

Notwithstanding all this, however, it is predicted by many desponding yet shrewd men, that as paper money always produces reverses, and is sure to destroy any system which is based upon it, a crash is at hand which will be no less than universal bankruptcy. We confess we have no such apprehensions. That prices may fall when gold becomes the master of all business is quite probable, but that any serious disaster to the country is to occur by no means seems so certain. At all events we may be able to offer a few reasons why we may escape it.

The examples of the abuse of paper money are found in the history of revolutionary France, and our own revolutionary history.

Neither of these cases are parallel to our own. Neither the one nor the other had any commerce, or revenue of a fixed or productive character, from which to derive the means for the payment even of interest, much less the principal of their debts. This is fatal to all National loans. It is not necessary to name any other cause than these very obvious ones. But in both cases also the sources of internal revenue were equally inadequate.

In our own, there is this striking difference: Our resources are illimitable, the operations of industry are continually enlarging in their area, and remunerative at the most rapid rate. Our population also increases beyond that of any other country. We have naturally the most prolific soil, and its extent is boundless. Land is cheap and easily tilled. We have countless rivers and lakes supplying transportation over thousands of miles at a minimum cost; thousands of miles of railways that compete with both rivers and lakes, a splendid climate, endless variety of products, and a mineral region that is exhaustless. We have a large commerce, and enormous fleets of steamers and sailing vessels ready to resume their former routes when this war is over; and on the Pacific coast when the great iron shod route is completed, we shall have the monopoly of the East India trade beyond all question, and shall compel even Europe to take the products of the East from us at second hand, and with an American profit added to the cost.

Our National debt is therefore protected from depreciation or repudiation in all possible ways, and rests upon a basis that the old confederation, revolutionary France, and no other country in the world possesses. Europe has gone the length of its tether so far as expansion creates National power, and is constantly at wit's ends to defray even its peace expenditures. Our country is yet in its youth, and will not have arrived at its maturity till we shall see our new territories as densely populated as our Atlantic coasts.

And as regards the immediate return from a paper currency to a metallic standard, we are by no means certain that this will produce a convulsion, though it may affect private interests.

The Government has afloat about three hundred and fifty millions of paper dollars, or legal tender notes. This amount is not greater than the country bore in local bank currency before the rebellion broke out; while the circulation of the latter has decreased. The Southern bank circulation has so literally, and so far has nationally and practically become extinct. Nor is the Government currency pressing upon the people so as to excite apprehension, or occasion a want of confidence. On the contrary, it is preferred to all other kinds of currency, has several times been above par, and is so at this moment in several commercial centres in the West. It is everywhere hoarded, and in the confederacy is nearly at par with gold.

As soon as the Government absorbs this currency, which in the course of two years is likely, from its being funded, or returned in taxes, it will at once have arrived at the specie standard. With a hundred millions of gold at its command from the customs, all care of its punctuality with regard to its interest will cease.

The circulation which is to succeed it will be that of the National banks; and as they will begin, and it is presumed continue their business on the prospect of an early return to specie payments, they will be ready to do so. The moment this specie can be had, but few will want it.

And as regards the supposed consequent depreciation of property, we do not see that so clearly. Gold stands to-day at 152. In March last it was as high as 173, and it fell in the month of August to 122. Here was a change in its value of fifty-one per cent., but what disturbance did it produce. Nothing perceptible in prices, or values, certainly not one-half. Here then was an instance where our National currency was 22 per cent. nearer the par of gold than it had been for some time, and yet no bankruptcies, convulsions, or ruinous consequences followed.

We may therefore fairly argue, that a fall of 50 per cent. again will be equally as harmless in its effects, and the change will have been produced so gradually as to be scarcely perceptible. This is the opinion of the ablest thinkers in this country, and we are inclined to adopt it. And finally, it is evident that very great care is taken everywhere to pay off old debts and avoid new ones, so that if we err it will be on the side of prudence, and this alone would prepare the country for a change, even if our former suppositions are not correct. We think, therefore, that we are in the best position we can well be to meet it. Some of our statisticians calculate that there is more specie in the country now than there ever was before, and of this there is little doubt, while authoritative works assert there are now in the country from four to *seven* hundred millions of dollars. If these were in circulation, or deposited in banks, they would at the rate of 1 to 3, the usual rule of proportion, sustain an issue of bank paper to the extent of from 18 to 21 millions of dollars, and yet some people are alarmed at the present issue by the Government, which is at a small premium, and while money is still loaned at 7 per cent. in the wealthiest port of the Union.

The railway system has greatly flourished the past year. The companies have got out of debt, or largely diminished their indebtedness. Their earnings are increasing, their dividends have become regular and inviting. New projects have been rapidly perfected, and the old system of bonding and borrowing for construction is giving way to the cash principle. All through the new States additional lines are being laid out, every facile and remunerating route is being explored and improved, and the great Union Pacific is begun at both termini, and being constructed with a rapidity unknown hitherto in this country. The past year has been therefore the most prosperous ever known to the American Railways, and their management and profits are ascertained to be more satisfactory than those in all Europe, except in a few instances. These railways of ours are bringing our vast prairies to the Atlantic, and transferring our Atlantic cities to the prairies. It is not now so far in time between Chicago and New York, as it once was between New York and Philadelphia, and as a 1,000 miles is to 88, so is the commercial advancement of the present day, to what it then was.

Besides, the canal policy which the great Clinton inaugurated for the interior of States, is about to be enlarged by a connection of our inland seas with the great ocean, so that a steamer of 500 tons burthen may sail from Liverpool, and moor along side a wharf in fresh water in the middle of the continent. Is there any other country in the world that has such a navigation as this?

It is with these extended and liberal views, standing fast and firm to the interests of the country, intent, devoutly intent, upon promoting them, the American Railroad Journal commences a New Year, which has brought us as it has others, a full share of the prosperity of the times. We have reasons to believe that our views which have always been frankly, and we hope, clearly expressed on finance, navigation and internal improvements, will continue to meet the approbation of our friends and subscribers.

Resources of Michigan.--Saginaw Valley.

If any one will look at the Map of Michigan it will be perceived that on the Western shore of Lake Huron, the great bay of Saginaw indents the peninsula, being the largest body of water in the State, sixty miles in length, and in its widest part thirty miles in breadth. Into this empties the river of the same name, thirty miles in length, with a uniform depth of water of from 25 to 30 feet. It has affluent and confluent streams more than ten in number of which the Flint, Shiawassee and Cass, are the principal ones, the former of which, boats can ascend for twenty miles and more. The counties bordering on and enclosing these streams are some of the finest in Michigan with excellent soil and great mineral wealth. It is not singular therefore that this part of our Northwestern territory should have attracted attention from its earliest settlement, held consecutively by the French and the English until it became ours in 1796, then a part of the United States as one of its territories in 1805 and a member of the Union in 1837. While it has been steadily advancing in wealth and population, still the wave of emigration swept by it with such prodigious force, as to leave its natural resources almost unnoticed until recently, when their further development has created so much surprise as to induce further examination, and now heavy investments by enterprising capitalists. We are not in the least surprised at the information we now obtain from general report, as well as actual observation, that it bids fair to advance with enormous strides to the

highest position among its inland neighbors. Its commercial advantages were fully acknowledged. It is surrounded by navigable waters, and has direct communication with the Ocean, and by our canals with the city of New York, its eastern border being only 700 miles distant. The climate is mild and equable. The soil is fertile, its forests are magnificent. It offers every possible inducement for settlement and cultivation. We quote from a cotemporary the following remarks:

"The most valuable pine timber in this country is found in Michigan. Since the days of the Jesuit Missionaries in 1660, and Alexander McKenzie, its "virgin copper" has been noted, till now its copper mines are yielding an immense revenue. No finer iron is seen in this country than is found in Michigan in the upper Peninsula. Coal mines are opened and worked in various parts of the State. Immense beds of gypsum or plaster have been found in the State. The geological report recently published, and the geological maps show these beds of lime-stone as cropping out in high bluffs on the Saginaw Bay, at a point which has long been called 'Plaster Point.'"

Recently gypsum and in its purest forms Alabaster have recently been discovered on Trawas Bay, a part of the Saginaw. This is one of the most valuable of our minerals, and a great fertiliser. Plaster as it is called after being properly ground, is in demand all over the Western States, and the Saginaw quaries while being easily worked are inexhaustible. Connected with this formation is the attendant one of salt, the existence of which has been long suspected. The manufacture of this article has now been gone into extensively, and any one who has passed up the river within the past season, has seen from the deck of the steamer, that the shores are crowded with salt boiling establishments, where tall chimnies rise up in every direction filling the vallies with their evaporations. Millions of dollars are invested in these works, and their products furnish unfailing freights to the lake steamers. The salt wells pour out their brine to the very surface, and in some instances the expensive application of pumps is unnecessary. This is so much saved to the manufacturer. East Saginaw is rapidly becoming another Syracuse, and has many natural advantages over the latter city. Ten years ago it was the haunt of the animals of the forest; it is now populous, and contains well built streets graded and paved, which as well as its dwellings are lighted with gas. Its active commerce is indicated by the fact that it possesses a regular Exchange, where salt and lumber are quoted and sold, with as much regularity as the cereals are at the Commercial Exchange in this city. Here the dealers in these articles from all parts of the Country habitually resort in the course of their business. Orders from the West, from the lakes, from the St. Lawrence are taken and executed in the promptest manner. These staples always in demand more valuable with the increase of population, are certain to make East Saginaw one of our most populous and wealthy cities. The manufacture of barrels and the work now doing in the ship yards, are incidentals of great importance in the future to this flourishing place. What in fact induced imigrants at an early day to pass by Michigan to the western prairies, is now found to be the greatest inducement to its settlement. Its forests contain the finest timber in the Union, and its pine is already celebrated. So its harder trees, maple, and especially black walnut are cotering largely into the forms of cabinet ware and furniture. More than fifty species of forest trees are to be found on the Saginaw and its tributaries, and from there every kind of wood useful in the arts is easily obtained. Besides salt, and gypsum, coal as is above stated, is worked in the Peninsula. Two years ago there were 72 lumber mills in the Saginaw Valley, now increased to hundreds. The agricultural products are equally various and are increasing under the impetus of a large foreign as well as domestic market. In short with all these advantages of climate, soil, production and navigation the Saginaw Valley bids fair to become famous. Its improvement has of late years been very rapid, and the Census report records its progress in unmistakeable language.

We are not surprised to learn therefore that our shrewdest capitalists have turned their attention to the Penninsular State. Within the past three months, Erastus Corning has purchased over 130,000 acres of land in Michigan. The Fairbanks of St. Johnsbury, John W. Brooks and John M. Forbes of Boston, and J. W. Pickersgill of New York, and men of that class, have purchased at recent sales more than 500,000 acres of land in that State.

One company from the City of New York has within six months invested $500,000 on the Saginaw River, and another from the same city $50,000.

We would refer those who wish more definite and scientific information in respect to the salt discoveries in the Saginaw Valley to Hunt's Merchants' Magazine, No. 2, for September, 1863: also to a work published by Rey Haddock of *The Detroit Tribune*, giving full statistics of the pine, mineral salt and plaster of the State of Michigan.

Erie Railway.

The earnings and expenses of this road for the fiscal years ending September 30, 1862 and 1863, have been as follows:

Earnings:	1862.	1863.
From Passengers..	$1,096,196 60	$1,670,082 58
" Freights	6,642,914 68	8,432,234 47
" Mails, etc. ..	124,861 40	143,800 18
Total.....	$7,863,972 68	$10,246,117 23
Expenses, viz:	1862.	1863.
Transportation exp.	$4,391,393 89	$5,704,370 85
Taxes	74,220 30	155,653 22
Other items	166,507 42	197,614 00
Total.....	$4,632,121 61	$6,057,638 07
Net earnings.	3,231,851 07	$4,188,479 16

Compared with 1862, the gross earnings of 1863 show an increase of $2,382,144 55; with an increase in expenses of $1,425,516 46—making the increase in net earnings $956,628 09.

Pittsburg and Connellsville Railroad.

The gross revenue of this road for the year ending October 31, 1863, was $215,537 49. The expenses of maintenance, working, and administration were $120.358 40. The net revenue of the year was $95,220 09. The whole number of passengers carried was 262,841, with a revenue therefrom of $100,626—143,510 passengers carried the previous year, with a revenue of $56,258. The freight transported amounted to 143,792 tons yielding a revenue of $110,436—against $85,763 tons carried the previous year, with a revenue of $59,992.

Northern Illinois Railroad.

We have received a copy of the Second Annual Report of this company, embracing the construction and operating of the road for the year ending September 30, 1863.

The proportion of revenue credited in account with the Racine and Mississippi Railroad, amounts to.....		$51,288 91
And the expenses of maintaining track and other charges, to....	$10,342 19	
Taxes	1,915 42	
		12,257 61
Leaving net revenue for the year		$39,031 30
Out of which there has been paid:		
Interest.....	$18,710 17	
Coupons matured Oct. 1, on bonds sold	18,840 00	
		37,550 17
Balance to credit of revenue, interest and dividend.....		$1,481 13

From the report we learn that the receipts of the road during the winter of 1862-'63 were not so favorable as might have been expected, in consequence of the failure of the crop of 1862. Since harvest this year, however, the receipts show a large increase, and the development of the business of the road is most satisfactory, and affords reliable assurance of continued prosperity, and improvement in the value of the property. Some important improvements have been added to the road, which were necessary items of construction not accomplished at the time of the last report. The fencing of the road is now complete—26 miles having been built in the last season. Additional side tracks have been put in at Savanna and Lanark; and extensions made to the river tracks at the former place. Depot grounds have been generally improved by ballasting, At Freeport, additional depot grounds have been secured, and a water tank and coal platform erected. At Savanna a large freight house has been constructed, and equipment for the convenience of the river business has been added. The charter for the ferry between Savanna and Sabula, and steam ferry boat have been acquired by the company. The property was taken at a fair valuation. In connection with the ferry business, three barges for transportation of grain in bulk were built, also a floating elevator for transferring the grain from the barges to the cars. There has also been constructed a wharf boat and landing barge with covered freight house upon it; also a dock boat for ferry landing. These arrangements have all been in full operation since harvest, and have worked efficiently. A new ferry boat has been contracted for, to be built on the Ohio river during the winter. The present boat is old, and has not sufficient power for the business. The new boat will have ample power, and is to be constructed specially to resist any moderate amount of floating ice. It is under consideration to purchase cars for the road, and it is proposed to have some built during the winter in the shops at Racine. The increased earnings from each new car would in a short time supply the means necessary to be expended in the gradual construction of rolling stock.

In last year's report it was explained, that the means for construction had been obtained by loan on the 1st mortgage bonds deposited as collateral security. The advances have now been fully repaid, with interest, by sale of the bonds. The

coupons and interest are paid to 1st of October. The current receipts of the road are more than sufficient for the interest on the bonds.

When the time comes for the re-organization of the Racine and Mississippi Railroad, the Northern Illinois must naturally enter into an arrangement for consolidation, so that the line may be owned complete from the Mississippi to Lake Michigan. Beyond the Mississippi, west, and north, and south, connections will unquestionably be made with the Northern Illinois, and when that is accomplished, or any one of these connections, the line will at once become one of the leading routes of the northwest. It will become an important connection between the lake ports and the Union Pacific Railroad. It is the only route, says the report, which can offer equal facilities for the interchange of business at the three leading ports of Lake Michigan—Chicago, Racine and Milwaukee—and, looking to the future, it is not less important as the direct route to Green Bay. The position of this property is such as ought to commend it to capitalists as affording a most favorable opportunity for legitimate enterprise in the development of railroad property, where a moderate amount of investment would enhance the value of previous expenditures, on a scale in proportion to the value of a comparatively local line, and the value of an important trunk line.

BALANCE SHEET.

Construction and general expenses	$525,147 46
Ferry, elevator and barges	19,613 83
Supplies	5,104 79
Bills receivable	9,824 57
Real estate	9,856 50
Open accounts receivable	50,068 28
Cash	307 41
	$619,922 84
Capital stock	$65,975 00
First mortgage 8 per cent. bonds	500,000 00
Revenue, interest and dividend	5,105 99
Open accounts payable	41,683 11
Bills payable	7,158 74
	$619,922 84

The office of the company is at Freeport, Illinois. The officers and directors are:

President.—G. A. THOMSON.

Directors.—Elijah Northey, Enoch Chamberlain, L. H. Bowen, H. A. Mills, Duncan Mackay, Thomas Long, Chancellor Martin, Edward P. Barton, Frank Smith, William Shannon, Marshall M. Strong, R. A. Knapp, G. A. Thomson.

Superintendent of Construction.—R. W. SMITH.

Secretary and Treasurer.—HYATT SINCLAIR.

New England Mutual Life Insurance Co.

The members of the New England Mutual Life Insurance Company held their twentieth annual meeting in Boston on the 21st ult., at which there was a large gathering. The Directors submitted the yearly report, from which are taken the following items, which cannot fail to be interesting to a majority of our readers. The number of members now constituting the company is six thousand five hundred, who are insured to the amount of $20,000,000. Sixteen hundred new members were added to the list during the year 1863, who were insured to the amount of nearly $5,000 000. The increase of the company's funds the past year was $426,000, after preparing for every indebtedness. The business of the company has more than doubled since 1858, and the liabilities are amply covered by a reservation of more than $2,000,000. The prosperous condition of the company's affairs gives to the present members a return of 40 per cent. of their last five years' premiums, amounting to $750,000 in cash. The following gentlemen were unanimously re-elected Directors: Willard Phillips, Charles P. Curtis, Thos. A. Dexter, Marshall P. Wilder, Sewell Tappan, Charles Hubbard, William B. Reynolds, George H. Folger, Francis C. Lowell, Jas. S. Amory, Homer Bartlett.

Railroad Earnings--Weekly.

The earnings of the Chicago and Alton Railroad for the 3d week of December, 1863, were:

	1863.	1862.
Passengers	$16,663 10	$10,821 40
Freight	20,468 29	20,651 37
Sundries	1,475 73	1,227 97
Total	$38,607 12	$32,700 74
Increase	5,906 38	

The earnings of the Galena and Chicago Union Railroad for the 3d week of Dec., 1863, were:

	1862.	1863.
Freight	$26,387 21	$24,193 95
Passengers	6,661 89	12,697 10
Mails, etc.	2,250 00	1,800 00
Total	$34,299 10	$38,191 05
Increase		$3,891 95

The earnings of the Milwaukee and Prairie du Chien Railroad for the 3d week in December, 1863, have been:

From Freight	$11,631 19
" Passengers	6,546 15
" Mails and Rents	993 50
Total	$19,178 34
Same week, 1862	15,328 59
Increase	$3,847 75
Total from Jan. 1, 1863	$1,207,974 45
Same period, 1862	1,148,861 13
Increase	$59,113 32

The approximate earnings of the Marietta and Cincinnati Railroad, in the 3d week of December, 1863, were:

	1863.	1862.
Passengers	$5,618 88	$2,910 60
Freight	8,577 43	7,400 68
Mail, express & telegraph	907 00	922 32
Total	$15,103 31	$11,233 60
This month to date	$48,185 56	$34,555 28

The earnings of the Chicago and Rock Island Railroad for the 3d week of December, 1863, were $46,906 00
Do., 1862 36,423 00
Increase $10,483 00

The earnings of the Chicago and Northwestern Railway for the 3d week in December, 1863, were $30,542 25
Do., 1862 20,633 20
Increase $9,909 05

The earnings of the Michigan Central Railroad for the 3d week of Dec., 1863, were $59,632 00
Same period, 1862 55,703 00
Increase $3,929 00

The earnings of the Michigan Southern and Northern Indiana Railroad for the 3d week of Dec., 1863, were $71,373 00
Do., 1862 54,424 00
Increase $18,949 00

The traffic of the Great Western Railroad for the week ending Dec. 25, 1863, was as follows:

Passengers	$21,205 89
Freight and live stock	35,280 44
Mails and sundries	1,225 82
Total	$57,712 15
Corresponding week of 1862	51,661 35
Increase	$6,050 80

The earnings of the Grand Trunk Railway for the week ending December 19, 1863, were:

Passengers	$23,776 56
Freight and live stock	5,400 00
Mails and sundries	67,145 35
Total	$96,321 91
Corresponding week, 1862	94,283 18
Increase	$2,038 73

What Constitutes a Common Carrier.

The attributes of a common carrier have been so often defined that it would seem difficult to raise a new question on the point. Yet it has been recently shown that it is possible to do so, the turning point in an action brought by one Mallory against the Tioga Railroad Company, being on the question whether a railroad company, permitting their tracks to be used by the cars of another person, was a common carrier of such cars.

The defendants are a railroad corporation operating a railroad from Blossburgh in Pennsylvania, to Corning New York, a distance of forty miles. The plaintiff was a miner of coal at Blossbugh which he was in the habit of transporting over the defendants' roads sometimes on the cars of the defendants, but generally on those furnished by him, in which case he also furnished brakemen to go on the train under the control of the defendants' conductor, and the cars were loaded and unloaded by the plaintiff. When the plaintiff furnished his own cars, the defendants charged for freight one dollar per ton of coal; when the cars were furnished by defendants the charge was one dollar and twenty cents per ton. On the 21st day of June 1854, the plaintiff's cars loaded with coal, while being transported from Blossburgh to Corning, and about ten miles from the former place in Pennsylvania, were thrown from the track while passing a curve, and fifteen of the cars were more or less broken in pieces, and the contents spilled and partially lost. The action was brought against the defendants as common carriers; the complaint alleging that the defendants received from him, and undertook to carry from Blossburgh to Corning certain cars laden with coal; which the defendants failed to transport. On the occasion in question, the plaintiff furnished his own cars and brakemen, and loaded the cars, agreeing to pay a freight of one dollar a ton to the defendants. On the trial the plaintiff claimed that the defendants were common carriers, but was overruled by the court on that point. He then gave evidence for the purpose of showing negligence on the part of the defendants, and offered to prove specific facts for that purpose. This evidence was objected to and excluded. The court non-suited the plaintiff, and refused to submit to the jury the question of the defendant being a common carrier. Exceptions were taken by the plaintiff to the decision.

By the Court, James C, Smith J. I have come

to the conclusion that the defendants in receiving from the plaintiff his cars loaded with coal, and undertaking to transport them over their railroad from Blossburgh to Corning assumed the liabilities of common carriers.

That they were carriers generally cannot be questioned. The constant employment being the transportation of property and passengers upon their railroad for hire. It is claimed however by the defendants that their undertaking with the plaintiff was special and not within the scope of the general business, and that the law does not cast upon them the duty of common carriers in respect to it for two reasons.

1st. They undertook merely to furnish motive power to draw the plaintiff's cars laden with his property, over their railroads he to load and unload them; and 2dly the plaintiff was to provide brakemen to accompany his cars on the route.

In support of their claim the defendants cite the case of Wells *vs.* Steam Navigation Company. (2 Comstock 207.) There however the defendants engaged to tow the plaintiff's boat on the Hudson River which is a common highway; and the court held that the defendants were not carriers generally, that the property transported was not in their possession or under their control, and that they were not bailees of any description. This brief statement of the points on which that case turned, shows that it widely differs from the case in hand.

Yet in order to allow the defendants all the aid which they can legitimately derive from that decision, I concede that notwithstanding the defendants in the case at bar were carriers generally, and were the proprietors of the route over which the goods were to be transported, in both which respects their case differs from that of the "Steam Navigation Company." Yet if as claimed by them they simply entered into a special engagement outside of their general business, to provide the plaintiff with sufficient motive power to draw his cars over their road, under the care and control of his servants, they did not thereby assume the obligations of carriers. But the case proved is in my judgment materially different from the one thus hypothetically stated.

In the first place, if I correctly apprehend the testimony, the undertaking of the defendants to carry the plaintiff's cars loaded with his coal over their road, was strictly within the scope of the business which they as a corporation were permitted to carry on. The act of the Legislature of the State of Pennsylvania by which they were incorporated, and under which they constructed that part of their road lying in that state authorized them to "charge and receive tolls, and for freight in and for the transportation of goods, * * and for the conveyance of passengers," and among other rates prescribed one "on empty cars," and another "on all passengers excepting only such as are necessarily engaged in conducting the cars." It also directed that "no person * * shall place any car or other carriage" on the defendants' railroad," without a permit or license first had and obtained from said company, subject to such rules and regulations as shall from time to time be established by said company to govern the use of said railroad." And it provided "that all persons using the said road shall use those cars, wagons and conveyances which shall be adapted thereto, which said cars wagons and conveyances to be used thereon, for the transportation of persons or commodities shall be prescribed by the said company." That part of the railroad lying in New York was operated by the defendants under an agreement with the Corning and Blossburgh Company, a corporation created by the laws of the latter state, and by which such portion of the road was constructed and owned. By that agreement the defendants bound themselves to operate the entire road from Blossburgh to Corning, for the purpose of transporting passengers and property, specifying coal among other things, and for that purpose to furnish and keep in repair the necessary motive power engines, machinery and cars (but the agreement expressly provided that they should not be bound to furnish coal cars). In 1854 the plaintiff was engaged in mining and marketing coal, and had large quantities of it carried over the defendants' road, some of it in defendants' cars but principally in his own. When he furnished cars he also furnished brakemen who were under the charge of the defendants' conductor, and he loaded and unloaded the cars whether furnished by the defendants or himself. The price paid for freight per ton was one dollar and twenty cents if the defendants furnished cars, and one dollar when the plantiff furnished them. On the 21st of June 1854, the defendants undertook to transport over their road from Blossburgh to Corning, forty six cars loaded with coal belonging to the plaintiff. On their way fifteen of the cars were thrown from the track, and this action is brought to recover the damages thus occasioned. It is apparent from this statement not only that the carriage of loaded cars belonging to others over the defendants' road for hire was a part of the business expressly authorized by the act of their incorporation, and provided for by their agreement with the Corning and Blossburgh Company, but that they had been engaged in thus transporting cars for the plaintiff, during several months prior to their undertaking to carry the train in question.

But independently of the special provision of the act of incorporation, and the agreement above referred to, I am of the opinion that the defendants' undertaking was in the line of their general business. It was certainly competent for them as carriers to undertake to transport the cars of the plaintiff, whether loaded or unloaded upon trucks or platform cars belonging to themselves; and in such case they would clearly have been liable as carriers. The mere fact that the plaintiff's cars were run upon their own wheels, instead of being placed upon platform cars of the defendants does not in my judgment take the cars out of the scope of the defendants' business as carriers, or relieve them from liability as such. If the injury had occurred in consequence of a defect in the running gear of the plaintiff's cars, which the plaintiff ought to have guarded against, the cars would have been materially different for the reason that a carrier is not liable for a loss occasioned by the negligence or fraud of the owner. But I am unable to perceive in the nature of the undertaking, any sound reason for holding that the defendant did not contract with the plaintiff as carriers.

In the next place the plaintiff's cars while being thus transported over the defendants' road, were not under the care and control of the plaintiff's servants. The entire train was controlled and managed by the employee of the defendant. The plaintiff merely furnished brakemen whose duties as the term implies related exclusively to the running of the train, and not to the care or guarding of the plaintiff's property; and they were in all respects under the control of the defendants' conductor. They had no efficient means of protecting the property of their principal against the consequences of negligence or fraud, and the circumstances that they accompanied the train merely to assist in running, does not in any respect absolve the defendants from their liability as carriers. If a servant of the owner happen to go with the goods but there is no intention to let him meddle with the care of them, the carrier will be answerable for loss (Marsh Ins. B, 1, ch. 7 § 5 Abbott on Ship part 3, ch. 2 § 3, Story on Bail § 538).

So if a man travel in a stage coach, and take his portmanteau with him, though he has his eye upon the portmanteau yet the carrier is not absolved from his responsibility, but will be liable if the portmanteau is lost. (Per Chambre J. in Robinson *vs.* Dunmore 2 Bos. & Pull 418.) It was said by Bronson J. in Hollister *vs.* Nowlen (19 Wend 237) that "when there is no fraud the fact that the owner accompanies the property, cannot affect the principle on which the carrier is charged in case of loss." He likened the liability of a carrier to that of an innkeeper, and cited the remark in Calye's case (8 Co. 63) that "it is no excuse for the innkeeper to say that he delivered the guest the key of the chamber in which he lodged, and that he left the door open, but he ought to keep the goods and chattle of his guest there in safety."

The defendant's possession of the plaintiff's cars while on the route was none the less complete by reason of the circumstance that they were loaded, and to be unloaded by the plaintiff. In this respect the case is precisely like that of a stage coach proprietor carrying the trunk of his passenger.

I have now considered all the circustances relied upon by the defendant, to take this case out of the rule that the carrier is liable for loss unless he shows that it was caused by inevitable accident or the public enemies. I fully appreciate the force of the suggestion that the rule is rigorous and sometimes severe, and that courts have in various instances refused to extend it to new cases, but nevertheless the rule is too well established to be questioned, and I regard this case fully within its policy which as was said by Lord Mansfield in Forward *vs.* Pittard (1 T. R. 27) is "to prevent litigation collusion and the necessity of going into circumstance impossible to be enraveled."

If these views are correct there should be a new trial.

New trial granted.

Portland and Halifax Railroad.

In the revived scheme of connecting Portland with Halifax by rail, *via* Bangor and St. John, N. B. (300 of the 582 miles of which are now built), Bangor is especially interested, and several large meetings have been held there to forward the project. The St. John *Presbyterian* says:

"That the movement to carry the extension from Bangor toward the Aroostook, and not directly towards Calais, will strike the St. Andrew's line at a distance of 70 miles from St. John. So when the line is built, St. John will be nearer Aroostook by rail than Bangor will be, by the difference between 111 miles and 70 miles."

Railroads of the United States.

A tabular statement showing the length and cost of each work at the end of the financial year closing nearest 1st January 1864.

(Not including City Passenger Railroads.)

1. Maine.

Corporate Titles of Companies.	Mileage—Total.	Mileage—Completed.	Cost of Road and Equipm't.
1. Androscoggin	68.00	68.00	$1,252,677
2. Atlantic and St. Lawrence (54 m. in N. Hamp. and 16.20 m. in Vt.)	149.00	149.00	7,654,098
3. Bangor, Oldtown and Milford	12.50	12.50	247,412
4. Calais and Baring	6.00	6.00	226,160
5. European and North American (including late Penobscot Railroad)	90.72	.....	380,000
6. Great Falls and South Berwick	6.00	6.00	172,232
7. Kennebec and Portland (main line)	50.00	50.00	
Yarmouth Extension	13.00	13.00	2,871,269
Bath Branch	9.50	9.50	
8. Lewy's Island	16.50	16.50	315,397
9. Machiasport (Franklin)	7.50	7.50	110,000
10. Maine Central (a consolidation of late Androscoggin and Kennebec, and Penobscot and Kennebec R. R's.	109.81	109.81	4,211,878
11. Portland and Oxford Central	28.50	21.50	430,000
12. Portland, Saco and Portsmouth	53.50	53.50	1,580,184
13. Somerset and Kennebec	37.00	37.00	783,763
14. York and Cumberland	52.00	18.50	1,090,317
Total attributed to Maine	709.53	578.31	$21,324,387
Deduct parts of roads in other States	70.20	70.20	3,606,174
	639.33	508.11	$17,718,213
Add parts of roads in other States	1.26	1.26	70,103
Actual total in Maine	640.59	509.37	$17,788,316

2. New Hampshire.

1. Ashuelot	23.76	23.76	$506,000
2. Boston, Concord and Montreal	93.54	93.54	2,850,000
3. Cheshire (10.50 miles in Mass.)	53.64	53.64	3,839,713
4. Cochecho	28.12	28.12	848,400
5. Concord	34.53	34.53	1,500,000
6. Concord and Portsmouth	49.90	49.90	350,000
7. Contoocook River	14.64	14.64	200,000
8. Eastern of New Hampshire	16.55	16.55	525,205
9. Great Falls and Conway	46.50	20.09	433,404
10. Manchester and Lawrence	26.89	26.89	1,065,345
11. Manchester and North Weare	19.43	19.43	200,000
12. Merrimac and Connecticut Rivers	29.30	29.30	698,258
13. Northern	69.20	69.20	
Bristol Branch	13.00	13.00	3,068,400
14. Peterboro and Shirley (included in Fitchburg, Mass	.....	.....	.....
15. Sullivan	24.70	24.70	1,250,000
16. White Mountains	20.78	20.78	200,000
17. Wilton	15.43	15.43	226,979
Total attributed to New Hampshire	581.91	555.50	$17,761,706
Deduct parts of road in Massachusetts	10.50	10.50	758,650
	571.41	545.00	$17,003,056
Add parts of roads attrib'd to other States	116.32	116.32	4,127,215
Actual total in New Hampshire	687.73	661.32	$21,130,271

3. Vermont.

1. Connecticut and Passumpsic Rivers	110.30	110.30	$2,577,712
2. Rutland and Burlington	119.54	119.54	4,204,051
3. Rutland and Wash'n (11.18 m. in N. Y.)	44.73	44.73	1,771,683
4. Rutland and Whitehall	6.88	6.88	
Hydeville Branch	1.51	1.51	255,700
5. Southern Vermont	8.00	8.00	200,000
6. Vermont and Canada	55.50	55.50	1,378,695
7. Vermont Central	117.00	117.00	
Branches	2.00	2.00	8,522,610
8. Vermont Valley	28.69	28.69	1,301,885
9. Western Vermont	59.00	59.00	
Bennington Branch	5.50	5.50	1,083,500
Total attributed to Vermont	553.65	553.65	$21,295,837
Deduct parts of road in New York	11.18	11.18	442,921
	542.47	542.47	$20,852,916
Add parts of roads attributed to other St's.	26.70	26.70	1,311,771
Add parts of Grand Trunk of Canada	17.00	17.00	911,347
Actual total in Vermont	586.17	586.17	$25,076,034

4. Massachusetts.

Corporate Titles of Companies.	Mileage—Total.	Mileage—Completed.	Cost of Road and Equipm't.
1. Agricultural Branch	28.36	15.03	$352,276
2. Amherst, Belchertown and Palmer	19.50	19.50	85,000
3. Berkshire (Housatonic)	21.14	21.14	$600,000
4. Boston and Lowell (Main Line)	26.76	26.76	
Woburn Branch	1.86	1.86	2,428,593
5. Boston and Maine (37.22 m. in N. H. and 1.26 m. in Maine)	74.26	74.26	
Medford Branch	2.23	2.23

1835	918	1845	4,522	1855	17,398		

INTEREST AND DIVIDENDS.

The Cleveland, Painesville and Ashtabula (Lake Shore) Road has declared a cash dividend of 5 per cent, and a scrip dividend of 11 per cent, payable 2d of January; and the Cleveland Columbus and Cincinnati Road a cash dividend of 5 per cent., and a scrip dividend of 20 per cent., payable 1st of February. These scrip dividends represent the surplus of previous years, invested in the permanent property of the roads. In the case of the Cleveland, Columbus and Cincinnati, the scrip of 20 per cent. raises the capital to the limit of the charter of $6,000,000.

The Dubuque and Sioux City Railroad Company have declared a semi-annual dividend of 3½ per cent on the preferred stock payable to the Eastern Stodkholders at the Banking House of Messrs. Schuchardt & Gebhard, No. 21 Nassau-st. New York. and to the Dubuque Stockholders, only at the Treasurer's office in Dubuque.

A dividend of 2½ per cent. on the preferred stock of the Elmira and Williamsport Railroad Company will be paid at the office of the Pennsylvania Railroad Company Philadelphia, on and after January 2, 1864.

The Metropolitan Railroad has declared a dividend of 3 per cent. free of Government tax, payable Jan. 6 to stockholders of 30th ult.

The New Bedford and Taunton Railroad Company have declared a dividend of 3 per cent. payable Jan. 2.

The Salem and South Danvers Railroad Company an interest dividend of 6 per cent to Nov. 1.

The Terre Haute and Richmond Railroad Company will pay, 2d January, at the office of the Farmers' Loan and Trust Company, a dividend of 7 per cent., free of tax.

The coupons on the first mortgage bonds of the Dubuque and Sioux City Railroad Company due Jan. 1, will be paid at the office of Schuchardt & Gebhard, 21 Nassau-st.

The Worcester and Nashua Railroad Company have declared a dividend of $1.50 per share, payable Jan. 1.

The July coupon of the first Mortgage Bonds (extended) of the Northern Railroad, New York, will be paid, less Government tax, Jan. 1, at 58 Washington street Boston.

The coupons on the Bonds of the State of Missouri, issued to the Hannibal and St. Joseph Railroad Company, which mature January 1, will be paid at the Bank of Commerce in this City.

George T. M. Davis, No 47 Excnange place, will pay on and after the 1st of January, interest of the First Mortgage Bonds of the St. Paul and Pacific Railroad Company. The Government tax is paid by the Company.

The coupons of the Evansville and Crawfordsville Railroad Company (formerly the Evansville and Illinois Railroad Co.) due on the 1st January, 1864, will be paid at the office of the Farmers' Loan and Trust Company 56 Wall st.

The Paterson and Ramapo Railroad Company will pay, 2d January, a dividend of 3½ per cent., at the office of Stimson, Fronk & Co. 44 Exchange Place; and the Paterson and Hudson River Railroad Company will pay, 2d January a dividend of 4½ per cent., at the same office.

The Brooklyn City and Newton Company will pay, 2d January, the interest coupons of their mortgage bonds.

Coupons of the first mortgage bonds of the Joliet and Chicago Railroad Company, due January 1, 1864, and coupons of the first mortgage preferred bonds of the Dubuque and South-western Railroad Company, due January 1, 1864, will be paid by M. K. Jesup & Co., No. 59 Exchange Place, on and after January 2, 1864, less the Government tax of 3 per cent.

The coupons on the bonds of the Chicago and Alton Railroad Company, due Jan. 1, will be paid by G. S. Robbins & Son, 54 William street.

Interest on bonds of the Grand Rapids and Indiana Railroad, due January 1, 1864, payable in New York, will be paid in current funds, at the office of King, Sutton & Co., 62 William street.

The coupons of the income bonds of the Mississippi and Missouri Railroad Company, due Jan. 1, 1864, will be paid, on presentation at the Corn Exchange Bank.

The coupons of the first mortgage bonds, series A, of the St. Louis, Alton and Terre Haute Railroad Co., due Jan. 1, will be paid at the Bank of North America.

The coupons of the Cleveland and Pittsburgh Railroad Company will, after Jan. 1, 1864, be paid at the Ocean Bank in this city.

The coupons of the first mortgage bonds of the Allegheny Valley Railroad Company, due January 1st, 1864, will be paid to the bondholders residing in Philadelphia, on presentation at the office, 309 Walnut street.

The Athens County, Ohio, coupons, due 1st prox., will be paid less 3 per cent. Government tax, by William Hoge & Co., No. 58 Wall-st.

The interest on the bonds issued by the State of Michigan, due in New York on the 1st day of January, 1864, will be paid at the Metropolitan Bank in that City.

The interest due on the Mortgage Bonds of the Western Maryland Railroad Company will be paid at the banking house of Wainwright & Co., Baltimore.

The interest due 1st January on the bonds of the city of Portsmouth, Ohio, and on the bonds of the county of Scioto Ohio will be paid by Thompson Brothers, 2 Wall street.

The interest coupons on the bonds of Belmont County, Ohio, due January 1, and the bonds of said county maturing at the same time, will be paid on presentation at the Nassau Bank.

The coupons of the eight per cent loan of the State of Minnesota, due Jan. 1, will be paid at the office of M. P. Myers & Co., No. 6 Broad street.

The holders of the Dayton and Michigan Railroad Company's Mortgage Bonds, are notified that the interest coupons falling due on the first day of January, 1864, and signed Preserved Smith, Secretary, will be paid at the Bank of America, and the coupons of said mortgage bonds maturing on the first day of January, 1864, and signed J. G. Telford, President, will be paid on presentation at the office of Winslow, Lanier & Co.

American Railroad Journal.

Saturday, January 2, 1864.

☞ The *postage* upon the AMERICAN RAILROAD JOURNAL is only *five cents per quarter*, if paid *in advance* at the Post office where the paper is received

Stock Exchange and Money Market.

The past year closed tranquilly on the Money Market. This is in part owing to a habit of long standing in this city to do as little business as possible about the time of the holidays. The usual bustle of Wall and William streets is transferred to Broadway, where gifts for the season attract the attention of crowds, and are disposed of in large quantities. In a few days, however, the old spirit of speculation will re-enter its old tabernacle, and we shall doubless have to record the customary conflicts between the two great parties in the street—those who operate for a fall, and those who work for a rise.

The year closed on a continued demand for 7 per cent. interest on the part of the lenders; and

in many instances, where parties are to be ferried over the holidays, a larger price was demanded and paid. For all legitimate purposes, where the risk is nothing in the ordinary acceptation, money has been plentiful throughout the year. On mortgages the rate has been quite uniform at 6 per cent.; and the greater portion of existing mortgages, carrying the legal rate of 7 per cent., have been reduced 1 per cent. voluntarily by the mortgagees. This concession has been felt in lightening the burthen of taxation.

Gold has been very steady at its last advances, which is probably due to the heavy imports which the country seems to require. There are numerous articles we do not produce, and cannot do without; and as twelve hundred millions of dollars have been paid out by the Government, and large dividends are declared by our numerous successful companies of all descriptions, our people were never more able to buy, and apparently never more willing. Some branches of trade appear to thrive beyond all expectation, especially those which affect the personal convenience or taste of our population. Government stocks remain firm, and seem to be general favorites. U. S. sixes of 1881, registered, upon which the interest has just been paid, are in demand at 104 to 105; the coupon 6s of 1881 bring 110; and the 5s of 1865 sell at 127. The 5-20's are being rapidly absorbed, and it is now announced that the receipts of the Treasury are fully adequate to all demands upon it. This is a satisfactory condition of things, and shows good management on the one hand, and loyalty and confidence on the other. While the principal powers in Europe are endeavoring to borrow money wherever it is to be had, and not very particular as to price, while as yet at peace, the U. S. Government finds no difficulty in obtaining all it requires among its own citizens.

State stocks and bonds have been rather dull, and bank stocks do not enter much into the material for speculation, being generally held by parties who like steadiness and security rather than large profits.

Railroad shares are still in high favor. The earnings of our trunk and auxiliary lines continue to be on the increase. Many, esteemed almost worthless a few years since, and which had carried down all who had largely invested in, or trusted them, have redeemed themselves in a remarkable manner, and are now considered valuable. The fact is, our railway system is a great success; and, as the country increases in population and production, it will become permanently prosperous. We notice that numerous companies are being organized to construct new lines, connecting established commercial centres, and creating new ones. In the Northwestern States a large number of these lines are about to be built.

Among those eliciting public attention at the present time, is the Chicago and Great Eastern Railway. Subscription books for a loan of $2,000,000 are now open at the banking house of Messrs. Schuchardt & Gebhard, No. 21 Nassau street. The map and prospectus of this company present the project in a very clear and perspicuous manner. The construction of a railway from Chicago to Logansport, on the Wabash, of only 110 miles, opens a connection with roads already built, so that the proposed line will be an uninterrupted one, save with a single change of cars to Baltimore, 826 miles; between Chicago and Philadelphia, 856 miles; and from Chicago to New York 911 miles. It will also furnish the shortest route between Chicago, and Cincinnati and Louisville. There are seven main trunk lines leading into the former city from the Northwest, West and Southwest, and only three lines extending from it to the East. It is therefore easily demonstrable that the new project offers a great success to its supporters, and will be of immense advantage to our Western friends.

It will be observed by reference to our customary tables, that all of our well managed railroads are in favor with monied men.

The Illinois Central appears to be enjoying extraordinary prosperity. It has recently paid into the Treasury of the State of Illinois the sum of $264,344 09, or 7 per cent. of its gross earnings, for the year ending April 30th, last. The gross earnings must therefore have amounted to $3,776,329 25, and will be found next April to have increased even on this last sum. Its stock is quoted at 117 to 118.

The increase of our foreign commerce is not checked by the war, though too much of it is done under foreign flags. It is a melancholy fact that our own ships have been almost driven from the ocean, although our navy is composed of about six hundred vessels; yet the presence of these strangers in our harbor adds to the receipts of the customs in various ways, which do not apply to our own ships. Our trade with England and Germany continues brisk, while with France it has seriously declined.

It is understood that the French merchants are not as enterprising or daring as those of England, or Germany, and it is asserted that the latter are more numerous, and prosperous in their commercial transactions in this port, than those of any foreign nation.

The imports into the port of New York from January 1, to December 31, 1863, have been $182,517,881, against $169,785,114 in 1862, and $125,788,682 in 1861. The exports of specie during the same periods have been: in 1863, $49,882,575; in 1862, $59,437,021; and in 1861, $4,216,250.

The deposit line in our city banks has fallen off the past week almost two millions, a circumstance easily explained by the continuous subscriptions to the Government loans. No less a sum than $2,558,400 were paid into the assistant Treasury's office on Monday last. The reserve of specie in this city seems to be impregnable to the assaults of the remitters and agents, purchasing with bills for the foreign market, as the aggregate amount in our banks and Mr. Cisco's great national iron safe is $38,191,000.

It is evident from the steadiness of this reserve, that the export demand is supplied from other sources than the banks. It is a curious fact that this large amount should have remained so entirely undisturbed. It shows that the banks have a large portion of their capital or earnings in this shape, and not within reach of their customers, and not a deposit fund subject to their checks.

Our latest advices from abroad are of some interest to us, as they show clearly that the foreign Money Market is by no means in a settled condition, and that a rupture between Germany and Denmark is imminent. German troops are on their march to the Duchies, Denmark has a large force to resist them, and the British Minister sends word to the Danish Government that England will not stand by and see its interests put in jeopardy. Some one will have to give way, or war is inevitable. The Napoleonic Congress now dwindles down into a petty meeting of small powers, happy to be invited to any place, which for a time puts them on an equality with their superiors, but knowing at the same time that "their room is better than their company."

We note also that the liberal party in France favored by the freedom of debate in the Imperial Assembly, are beginning to call in question the conduct of the Government with unusual boldness. All political revolutions in France have been preceded by an outbreak of tongues.

Every great speech and every great leader in a Paris journal which vigorously assails the Government, is equivalent to a barricade. We look, therefore, with interest to the political opposition now showing its head against the Government.

Thus as we are gradually emerging from our troubles and trials, we see other nations on the brink of theirs. As our continent emerges from the boisterous sea which has been breaking over it, Europe appears to be about to be submerged. This war over, the republican principle sustained, our free institutions triumphant, there will be no other such country to be found in the world, more peaceful, more stable, more prosperous, more pleasant to live in, or so likely to influence the conduct and secure the respect of all foreign nations. This is our destiny.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Illinois coupon 6s, 1870, 103; North Carolina 6s, 53; Atlantic and Great Western (Ohio division,) 1st mort., 96; Brooklyn City Water Loan, 110; Mariposa Mining Co. 1st mort., 101; Copake Iron Mine, 9; Wyoming Valley Coal Co., 93; Quartz Hill G. R., 17@17¾.

Pennsylvania Railroad Company.

The Board of Directors of this Company have elevated Mr. Lombaert to the Vice Presidency. Colonel Thomas R. Scott, Vice President, will perform all the duties of the President, and Mr. Lombaert will be the responsible Vice President of the Company. At present there are two Vice Presidents, Mr. Lombaert and Col. Thomas R. Scott, who serve in the place of the actual President, Mr. J. Edgar Thomson, who is at the present time in Europe, where he will remain for about three years, to advocate the interests of this corporation.

Interesting Emigration Statistics.

The following table, compiled from official sources, exhibits the increased emigration since 1820:—

Number of arrivals for ten years ending Sept. 30, 1829	128,502
Number of arrivals for ten years ending Sept. 30, 1839	538,381
Number of arrivals for ten years ending Sept. 30, 1849	1,427,337
Number of arrivals for eleven years ending Sept. 30, 1862	2,968,194
Total	5,062,414
The number previous to 1822	34,000
Estimated arrivals since 1863	50,000
Grand total	5,646,414

The average amount of money brought by these emigrants is estimated at $75, making in all the sum of $424,000,000 thus imported. Deducting from this amount $21,000,000, or five per cent. of the whole amount, for sums remitted to friends and relatives at home, it leaves over $400,000,000 contributed to the capital of the country by emigration.

Protection from Draughts.

Messrs. E. S. & J. Torrey, No. 72 Maidenlane, offer to housekeepers, a contrivance called the "weather strip, and door and window moulding," by which cold, rain, dust and snow may be effectually excluded from their dwellings. It is not only a comfort, but an economy, as its use saves a considerable amount of fuel. The reputation of the vendors, the Messrs. Torrey, is a guarantee of the value of the article recommended.

Western Railroads.

The Nashville and Decatur Railroad is about to be re-opened from one end to the other. The Memphis and Charleston, (between Decatur and Stevenson,) will also be rebuilt, and the Nashville and Chattanooga is being repaired with new rails throughout. As fast as the Federal troops advance and hold their ground, the old railways are put in good order.

Car Indicator.

Messrs. Crommelin & Crisp, of Washington, have invented a machine, which when applied to cars, hotel dining rooms, theatres, &c., records with great accuracy the number of persons who enter them and depart. If practicable, for numerous similar attempts have hitherto failed, it will act as a correction of "knock downs," and be equal to a policeman on constant duty.

Chicago and Great Eastern Railroad.

The directors of this company are: W. D. Judson, Amos Tenney, Charles Judson, John W. Reid, New York; John Brandt, Jr., Richmond, Ind. The officers are: President, W. D. Judson; Treasurer, Amos Tenney; Secretary, L. H. Walkley, Richmond, Ind.; Chief Engineer, Joseph E. Young, Chicago, Illinois.

New Arrangements.

We hear on the best authority, that under the lead of Mr. Garrett, the able President of the Baltimore and Ohio Railroad Company, it is in contemplation to run four daily (extra) trains between this city and Washington, not taking up any way passengers even at Philadelphia or Baltimore. This will be a great accommodation to through travelers between the two cities.

Commercial Marine of Buffalo.

Some idea may be formed of the lake commerce of Buffalo, from the fact there are now laid up for the winter in its harbor.

Side wheel steamers	6
Propellers	42
Tugs	26
Barks	34
Brigs	13
Schooners	126
Sloop	1
	248

In 1861 the number was 163; 1862, 230; 1863, 248.

Harlem Railroad.

The United States Government having taken three locomotives from the Harlem Railroad Company, has so reduced its motive power, that it has been obliged to discontinue one of its afternoon trains between New York and White Plains. It has, however, three new locomotives in process of construction.

Chicago & Great Eastern Railway Company,

FIRST MORTGAGE BONDS,

FOR $2,000,000.

SUBSCRIPTION BOOKS OPENED WITH

Messrs. SCHUCHARDT & GEBHARD,

BANKERS,

No. 21 NASSAU ST., NEW YORK.

THE CHICAGO AND GREAT EASTERN RAILWAY COMPANY now offer for sale ONE MILLION ONE HUNDRED THOUSAND DOLLARS of their FIRST MORTGAGE BONDS, in sums of One Thousand Dollars each, maturing in thirty years, bearing interest at the rate of seven per cent. per annum, payable in the City of New York on the first days of April and October in each year.

These Bonds are secured by a First and only Mortgage on the property, income and franchises of the Railway Company, executed to Frederick Schuchardt and Henry Morgan of the City of New York, Trustees.

The remaining Nine Hundred Thousand Dollars of the Bonds are set apart and remain in the hands of the said Trustees, for the purpose of being exchanged for the indebtedness of the Chicago and Cincinnati Railroad Company, running from La Crosse to Logansport; this effected, the $2,000,000 will form a First and only Mortgage on a line of road 110 miles in length, extending from Chicago to Logansport, where it connects with the Cincinnati and Chicago Air-Line Railroad, forming the shortest line by 40 miles between Chicago and Cincinnati, and by 36 miles the shortest line between Louisville and Chicago.

It will also open, in connection with Roads now in operation, entirely new and very direct lines from Chicago to New York, Philadelphia, Baltimore, and all Eastern Cities. The distance between Chicago and New York by this route being shorter than by either of the existing lines via Dunkirk or Buffalo.

The road is now under contract, and the most strenuous efforts are being made to have it open for traffic during the summer of 1864.

The interest on the Bonds maturing during the progress of the work has been provided for, and will remain on deposit with the Bankers of the Company, Messrs. SCHUCHARDT & GEBHARD, No. 21 Nassau st., to whom the Company refer for further particulars, and where subscription books for this loan have been opened.

4t1 W. D. JUDSON, President.

The Reciprocity Treaty.

The period limiting the duration of what is called the Reciprocity Treaty is close at hand, and whether, and how, it is to be renewed is becoming a subject of discussion both in the United States and the British Provinces contiguous. In the Canadas, party spirit has begun to show itself in regard to it; the friends of the South calling loudly for its discontinuance, while others, prudently regarding it in a purely commercial light, desire and advocate its continuance.

This treaty was negotiated in 1854, by James Buchanan, while our minister abroad under the instructions of Mr. Marcy, Secretary of State.

The treaty was considered to have procured us great advantages, as it secured to our hardy fishermen the right "of fishing for all kinds of fish on the sea coasts and shores and in the bays, harbors and creeks of Canada, New Brunswick, Nova Scotia, Prince Edward's Island, and the islands adjacent, and also of the Magdalen islands," and of drying their nets and curing their fish there, provided they did not interfere with the rights of private property, or with the British fishermen in the peaceable use of the said coasts in their occupation for the same purpose. This privilege however, was for a sea fishery only and did not permit the taking of shad or salmon.

A reciprocal right of fishing was granted by our Government to British fishermen on our coasts and shores, north of the 36th parallel.

By the same treaty, the citizens of the United States were allowed to navigate the St. Lawrence river and the canals, the same as British subjects: in return these last were permitted to navigate Lake Michigan with the same freedom as Americans. But the clause which gave the treaty its immediate and most practical importance, was that which allowed the productions of the British Provinces, and the United States to be reciprocally imported by them free of duties. The following is the list of articles which were declared to be free, and which have ever since the time of the treaty been the staples of this reciprocal commerce, viz:

Grain, flour and breadstuffs of all kinds.
Animals of all kinds.
Fresh, smoked, and salted meats.
Cotton, wool, seeds, and vegetables.
Undried and dried fruits.
Fish of all kinds.
Products of fish and all other creatures of the water.
Poultry, eggs.
Hides, furs, tails undressed.
Stone or marble, crude or unwrought.
Slate, butter, cheese, tallow, lard, horses.
Manures, Ores of metals of all kinds.
Coal, pitch, tar, turpentine, ashes.
Timber and lumber of all kinds round or sawed, and unmanufactured in whole or in part.
Fire wood, plants, shrubs, trees.
Pelts, wool, fish oil, rice, broom corn and bark.
Gypsum ground and unground.
Hewn or wrought, or unwrought burr or grind stones.
Dye stuffs. Flax hemp and tow unmanufactured.
Unmanufactured tobacco, and rags.

It was also agreed that no export duty should be charged on lumber floated down the St. Johns. (This article was inserted for the benefit of the Maine lumbermen).

The treaty was to continue in force for 10 years or to cease upon twelve months' notice. It also appears that articles 3 and 4 were liable to a temporary suspension by either party, in relation to the products so admitted free and the use of the canals, but the right has never been exercised by either party.

In the month of June next, then, the treaty expires by its own limitation, unless it is renewed by previous agreement between the two Governments.

It has been a question warmly agitated which of the parties to this treaty have gained most by it. Many Canadians and some of the Canadian presses, such as the Kingston *News* maintain, that the results are unfavorable to their interests, and call for its abrogation. Others perhaps more sagacious, anxiously desire its renewal.

It is a curious fact that one of the principal points which it was thought at the time we had made, was that the treaty had given us the right of boat fishing, and so it did; that is to say our fishermen could have occupied the shores and coasts not in the possession of British fishermen, to dry their nets and cure their fish; in other words have established stations on the land and fished from thence in greater security.

But the fact is, our people have never taken advatage of the treaty in this respect; there is no American boat fishing in existence there. The privilege of fishing three miles off the shore we enjoyed under existing National law, and there is no sea fishing within that distance of any valne as every one acquainted with the fisheries, well knows. On the contrary a Nova Scotian well acquainted with the subject writes to an influential journal in London as follows:

"The idea that we conceded any real or beneficial privilege to the American fishermen by the Reciprocity Treaty is a delusion; they had all they wanted in this respect before. That American statesmen thought they were getting a benefit, I have no question, but they are undeceived now, and if there are no stronger ties than these fishing privileges to hold them to the treaty, you may rely upon it the notice for its repeal will be given the next year. Now I contend that previous to the

treaty being passed, the American fisherman could catch fish in the gulf and bays of these provinces upon equal terms with ourselves, and he had the advantage of 20 per cent. over our own fishermen in his own markets; that advantage under the treaty he lost by its provisions. We now enter his markets on equal terms, and living nearer the fishing grounds, and being enabled to fit out vessels and supplies cheaper than he, *we can more than compete*, and would *finally drive him out of the business or force him to settle in the Colony.*"

The same writer makes the following admissions with regard to the effect the treaty has had on Nova Scotia, which certainly offers but a poor return to us for the advantages we have given her. He says "The treaty opened for us (Nova Scotia) a free market with a nation of thirty millions of people for everything we had, or could produce for sale; coal, fish, oil, potatoes, boards, woods of all kinds; in fact all the productions of the soil and the sea, and these almost without an exception were subject to a duty of not less than twenty per cent previous to the treaty, and as the Nova Scotians *had no other market* for the larger portion of these productions, we were compelled to export them to the United States and pay the duty. Can any sensible man believe that under such circumstances the treaty has not been of immense advantage to the Province?"

These extracts are proof enough of the fact that the treaty has been highly beneficial to the British provinces. The question now recurs, what have been its benefits to us. The following is a favorable view of this side of the question from a gentleman of Milwaukee. He affirms that the exports from the United States into the Provinces were in

1852 ..... $10,500,160
1853 13,140,642

And the imports were:

1852 ..... $6,110,299
1853 7,550,718

During the two years following the treaty our exports were:

1856 ..... $29,029,349
1857 24,262,482

And the imports were:

1856 ..... $21,310,420
1857 22,104,296

The exports from the U. S. into Canada were:

1861 ..... $21,069,388

And the imports were:

1861 ..... $14,386,427

It has been said in reply, that most of the articles however which we export to Canada, and are not expected from duties under the treaty, contribute largely to the Canadian revenue, but if they do, they nevertheless pay the American exporter a profit. We also do the same thing in regard to their imports into the United States, not excepted by the same treaty, and the navigation of Lake Michigan by British vessels is more than a compensation for the use of their canals, and the river St. Lawrence. But the fact is, that the number of British vessels which navigate all the lakes is very inconsiderable compared with ours. We are in fact the carriers of nearly the whole productions of the Lake Coasts and the West. The imports from the Canadas to the port of Milwaukee in 1862 were of the value of $4,400 only, of which $3000 were horses, imported for the use of our government, while the exports from that port to Canada were $2,500,000 of which more than one-half were in American vessels.

The Montreal *Witness* is of the opinion that the reciprocity treaty can not be altered so as to admit manufactured goods into Canada and the other provinces, as this "would never be allowed by the Mother Country, and it also expresses the opinion that if this is the *sine qua non*, the treaty will have to fall," and the plan even then would be impossible without a Customs Union.

Should the treaty be allowed to expire without renewal, it is difficult to say what would be result. Without the Western trade, the Canadian railways supported by Western products, would evidently be ruined. The only countervailing influence the Provinces could exert would be to take off the tolls on their canals, which might retain the traffic by steamers or sailing vessels to a certain extent.

On the other hand, we might levy a light duty on their exports to the United States not enough to drive them away, and yet sufficient to increase our revenue.

The subject certainly is one of great importance, and will probably come up for discussion during the present session of Congress, where we hope it will be well and carefully considered. We have a great number of good friends on the other side of the St. Lawrence who are doing all they can to increase the connections of business with the United States, yet for all that, it may be questioned if we are called on to consult British interests.

We are aware of the fact that a formal report was prepared a few years since by the United States Commissioner Mr. Hatch on this subject, but it was not received as a full solution of the question.

Pittsburg and Connellsville, and Baltimore and Ohio Railroad Companies.

An important decision was very recently made in the U. S. Circuit Court at Pittsburg, in a case between these two companies, involving the validity of the late election of the Board of Directors in the first named Company. It appears from the Baltimore papers, that on the 7th of December last a meeting of the stockholders took place at eleven o'clock, instead of twelve o'clock, the hour regularly designated and according to usage. It was at once perceived that an opposition to the former board was contemplated and under protests of different parties, the temporary organization was completed, and the election was voted to be proceeded with. Various proxies were offered, and among them was that of the Baltimore and Ohio Railroad Company, which represented 17,800 shares. An old Stock Ledger of the Connellsville Company was referred to by the Inspectors of Election in which the Baltimore and Ohio Company had credit for only 700 shares which they offered to receive as authority for votes to that extent.

The proxy of the Baltimore and Ohio Railroad Company then produced the Stock Register of the Pittsburg and Connellsville Railroad Company, stating to the said Judges that the Stock Ledger which they had before them as a guide, had not been used or had any entry made in it for five or six years past, as was known to the Secretary of the Company then present; and that the Stock Register which he, the said proxy, then produced, was in fact, and had been for years past, the only Stock Ledger of the Company, and he tendered his ballot marked with 17,800 shares, and also the Stock Register, as evidence of his right to vote such stock.—The Judges of Election still refused to receive the ballot.

The proxy of the Baltimore and Ohio Railroad Company then tendered the same ballot, endorsed with the same number of shares as before, and produced in support of his right to vote said number of shares the last voting list of the Pittsburg and Connellsville Railroad Company, prepared by its own officers, and one of the books of that Company, and which was an abstract of the Stock Register, as evidence of his right to vote the number of shares endorsed on said ballot. But the Judges again refused to receive the ballot as tendered.

During the proceedings, the City of Pittsburg, by its proxy, tendered a vote for, and voted 10,000 shares of the Stock standing in its name upon this "Stock Ledger," used by the Judges of Election, although the greater part, if not all, of this Stock had been seized and sold under execution, or assigned by the City of Pittsburg, and although the purchasers of parts of that Stock—holding it by regular transfer and appearing in the Stock Register and last voting list—tendered their votes in vain.

W. S. Bissell, holding 500 shares M. O'Hara, holding about 500 shares, Mr. Howley, holding about 866 shares; Mr. Howley, also, holding 100 shares, tendered their votes for the ticket nominated for the Baltimore and Ohio Railroad Company, which shares were shown to be their property by the Stock Register and voting list already referred to; but they were refused a vote because their names did not appear as stockholders on the Stock Ledger, used as a guide by the Judges of Election in which no entry had been made for five years.

In connection, and simultaneously with these proceedings, a communication from John Lee Chapman, Mayor of Baltimore, was presented and read, instructing the stockholders that he appointed Wm. W. Taylor, Joseph R. Marston, and J. W. Stevenson, Jr., Directors of the Pittsburg and Connellsville Railroad Company on the part of the City of Baltimore.

The Deputy Marshal of the Circuit Court of the United States for the Western District of Pennsylvania then appeared and read the following orders of that Court, obtained in a proceeding in which J. H. B. Latrobe, of Baltimore, and D. Ritchie, Esq., of Pittsburg, were counsel for the Baltimore and Ohio Railroad Company:

"The Baltimore and Ohio Railroad Company *vs.* The Pittsburg and Connellsville Railroad Company, a body corporate by an Act of the General Assembly of the State of Maryland, have exhibited in the Circuit Court of the United States for the Western District of Pennsylvania, sitting as a Court of Equity, their Bill for relief, and to command the Pittsburg and Connellsville Railroad Company, a body corporate by an Act of the General Assembly of the Commonwealth of Pennsylvania, and the Directors of the said last mentioned Company, and the judges and officers of the meeting of stockholders and of the election to be held at the office of the said last mentioned Company, in Pittsburg, on the 12th day of November, A. D., 1863, and of the annual meeting of the stockholders and of the election to be held at said office on the 7th day of December, 1863, and of any such meeting and elections thereafter, not to vote to accept or reject a certain Act of the

General Assembly of the Commonwealth of Pennsylvania, approved the first day of April A. D., 1863, entitled 'An Act to repeal the seventh section of an Act authorizing the laying out of a State road from the borough of Orwigsburgh, Schuylkill county, to intersect a public road leading from Easton to Mauch Chunk, and for other purposes—or on any question touching the business and affairs of said Pittsburg and Connellsville Railroad Company, otherwise than by allowing one vote to be given for each share of stock by the holders thereof, in person or by proxy.

"These are, therefore, to command the said Pittsburg and Connellsville Railroad Company, and Benjamin H. Latrobe, Thomas S. Blair, Cyrus S. Markle, John A. Caughey, J. R. Marston, Wm. W. Taylor, A. Miller, H. Burgwin, John S. Dilworth, Daniel R. Davidson, W. S. Haven and James Parker, Jr., the Directors of said Pittsburg and Connellsville Railroad Company, and the judges and officers of election to be held at the office of said Company, in Pittsburg, on the 12th day of November A. D., 1863, and of any election, thereafter, not to vote, or to receive or count any vote to accept or reject the said Act of Assembly, or on any question touching the business and officers of said Pittsburg and Connellsville Railroad Company, otherwise than by allowing one vote to be given for each share of stock by the holder thereof, in person or by proxy.

"Supplemental order made on the 12th day of November, A. D., 1863.

"And these are further to command the said Pittsburg and Connellsville Railroad Company, and the said Directors of said Company and the said officers and judges of said meetings and elections, in all cases in which the said stockholders are called upon to vote, to be guided in their estimating the number of votes to which each voter is entitled, by the Stock Ledger of the said Pittsburg and Connellsville Railroad Company, and the order of this court heretofore made."

The proxy of the Baltimore and Ohio Railroad Company then moved that the election of the said Directors should be postponed until two o'clock P. M., an hour not then arrived, in order that the meeting of stockholders there present might take up and consider two laws of the Commonwealth of Pennsylvania relating to the Pittsburg and Connellsville Railroad Company, one of which changed the scale of voting in said Company, and one of which authorized the extension of the road into certain counties of the State of Pennsylvania, and on this he demanded a vote by stock.

The motion was ruled out of order, upon the ground that no notice had been given that these questions would come before the meeting. The proxy of the Baltimore and Ohio Railroad Company contended that as the meeting was an annual and general meeting of the stockholders, no notice was required to give it jurisdiction over these questions; and he then moved for the rejection of the said laws and demanded a vote by stock. The motion was ruled out of order, and an appeal was demanded, with the further demand that the vote on the appeal should be taken by stock. This motion was ruled out of order, because it was alleged that there was no second to the motion. The proxy of the Baltimore and Ohio Railroad Company contended, however that his motion required no seconding, because he represented a majority of the whole stock of the Company.

These motions being ruled out of order, the voting proceeded. The proxy of the Baltimore and Ohio Railroad Company tendered a ballot for the Directors nominated by him, which ticket was endorsed with the number of shares actually owned by the Baltimore and Ohio Railroad Company, when the transfer books were last closed, which took place a short time before the said annual meeting. The number of shares endorsed upon the said ticket was 17,800 shares. The Judges of Election referred to a book before them, marked "Stock Ledger," and said that in said book the Baltimore and Ohio Railroad Company appeared only as the holder of 700 shares, and asserted that, in adopting this book, they were obeying the order of the United States Circuit Court, and they offered to receive a ballot endorsed for 700 shares, but refused to receive the ballot endorsed for 17,800 shares.

The vote was then taken and the following ticket nominated by Mr. Davidson was declared elected, viz: James Park, Jr., Thomas S. Blair, C. P. Markle, A. Miller, J. A. Caughey, Wm. S. Haven, H. B. Goe, W. W. Taylor, Joseph R. Marston, Joel C. Strawn, Daniel R. Davidson and George Nickle.

16,900 votes were counted in its favor and the other ticket was reported to have received but 250 votes. Thus in consequence of the decision of the Inspectors the ticket was declared elected though by an actual apparent minority. A protest was prepared, signed and presented to the chairman of the meeting which he refused to receive.

The next morning, application was made to the Circuit Court of the United States for the Western District of Pennsylvania for an order restraining the Directors claiming to be elected, under this proceeding of the previous day from doing any act as such Directors and asking also that the Directors voted for by the stockholders holding an actual majority of the stock at such election might be declared to be the Directors for such Company. This order stood for hearing in the Circuit Court of the United States at Pittsburg on 20th December, 1863.

On hearing arguments on that day, on proofs and allegations, the Court decided that the election was illegal, and declared the gentlemen named in the opposition ticket to be really elected, a majority of the stockholders having tendered their votes for the same. The following are, therefore, the directors of the Pittsburg and Connellsville Railroad for the ensuing year: Wm. S. Bissell, Wm. Bingham, John Fleming, Jos. Pennock, G. L. B. Fetterman, William Baldwin, Pittsburg; Cyrus Myers, Somerset county; Benjamin Deford, Wm. E. Murdock, Benjamin H. Latrobe, Joseph R. Marston, Wm. W. Taylor, Baltimore. Immediately after the decision of the Court, United States Marshall Murdock served the order of the Court on the sitting Board. The new Board will take possession forthwith. It is reported that an appeal will be taken to the United States Supreme Court.

Railroad and Steamboat Accidents.

The total number of serious accidents in the United States on railroads, in 1863, was 935; of which 264 resulted in death, and 671 in wounds. This does not include accidents where no lives were lost, accidents to individuals which were caused by their own carelessness or design, or deaths or injuries resulting from the recklessness of persons in crossing or standing upon railroad tracks where trains were in motion. The total number of casualties by steamboat accidents during the year was 340, of which 255 were killed and 85 wounded.

The following table exhibits the number of railroad accidents, with the number of persons killed and injured by such casualties during the last eleven years:—

Years.	Accidents.	Killed.	Wounded.
1853	138	234	496
1854	193	186	589
1855	142	110	539
1856	143	105	629
1857	126	130	536
1858	82	119	417
1859	79	129	411
1860	74	57	315
1861	63	101	459
1862	99	264	877
1863	89	264	671
Total	1,228	1,699	5,939

The following table shows the number of steamboat accidents and the killed and wounded during the last eleven years:—

Years.	Accidents.	Killed.	Wounded.
1853	31	319	158
1854	48	587	225
1855	27	176	107
1856	29	358	127
1857	30	322	82
1858	27	300	107
1859	21	342	146
1860	29	597	134
1861	19	69	88
1862	16	220	70
1863	20	255	85
Total	297	3,545	1,329

Liability of Corporations for Wilful Injuries by their Servants.

The responsibility of masters for the acts of their servants is an important doctrine of the law. Doubt has been entertained as to their liability for anything but mere negligence, but it is now held that masters are liable for even the wilful acts of their servants, in matters concerning which they have a general authority to act.

This rule is well illustrated in the case of Vandiver against the Pennsylvania Railroad Company, which was an action brought by Sarah Vandiver to recover damages for the loss of her husband, who she charged was ejected from the cars of the company, by reason whereof he was injured and died. The material facts of the case were these: On the 6th day of December, 1856, John Vandiver, the husband of the plaintiff took his seat in a car of the Pennsylvania Railroad Company, as a passenger from Philadelphia to Parkesburg. Soon after leaving the river the conductor of the train and the agent of the state commenced to collect the tickets or fare of the passengers. When they reached the seat occupied by Mr. Vandiver they demanded his passage money or his ticket, but he was unable to find the latter, although he declared he had purchased a ticket in Philadelphia at the office of the company. He was somewhat under the influence of liquor at the time, but knew what was going on. The conductor told him he must show his ticket or pay the price of passage, or they would be required to put him off the cars. After leaving him for some minutes while they collected the fare from the other passengers they returned to him, and he being still unable to find his ticket and not paying the passage money, they took him to the rear of the car and assisted him off. In getting from the car to the ground he fell across the rail of the south track; his head and shoulders alighting on the ballasting of the road between

the two southern rails. After being assisted to rise by the conductor and agent, he walked after his hat which had blown down the south side of the embankment—when down the slope some half way pitched headlong down the bank and lay there apparently without motion. This occurred at what was called the Paschall station, or some one hundred yards west of it, and about four o'clock in the afternoon. Between sundown and dark he was found at or near the same place, and being unable to walk, and was taken over the railroad to the stable of Mr. Bonsall where he was laid on hay, and where he stayed all night. Early on Sunday morning when he was visited by Mr. Bonsall, he seemed to have recovered consciousness, asked for water, told them when they attempted to lift him not to hurt him, and with the help of those present walked to the house.

He complained of his left side, did not appear to have the use of his left arm, and moaned as though in great pain. His clothes were not torn nor were they dirty, and a slight spot of blood on his cheek showed the only external wound upon him. He remained at the house of Mr. Bonsall until the following Monday morning, when he was placed in a car and conveyed to Parkesburg, and from thence to his own house, where he arrived Monday evening. While he was at Bonsall's no attention was paid to his wounds. He ate but little, and during that time he appeared to be in his right mind. Soon after he reached home a physician was called in, and on examination it was found that he was fearfully bruised on his head and shoulder and down his back. He died on Monday morning, a week thereafter, and a *post-mortem* examination disclosed a series of injuries, which from their aspect were, in the opinion of the physician, sufficient to produce his death.

Feb. 10, 1862. The opinion of the Court was delivered by

Read, J.—A great deal of the difficulty originally felt in holding corporations liable for the acts of their agents within the scope of their authority, arose from the supposition that it was necessary their appointment should be under the seal of their principals.

The decisions both in England and America have satisfactorily disposed of this technical doubt, and it is now clearly the law, particularly with regard to what are called trading corporations, that no such evidence of authority is required. A private corporation is liable for the acts of its agents within the scope of their authority in the same way, and it would appear in the same form as any individual person is.

"A master," says Smith, in his Master and Servant, 2 ed. p. 183, "is ordinarily liable to answer in a civil suit for the tortions or wrongful acts of his servant, if those acts are done in the course of his employment in his master's service. The maxims applicable to such cases being *respondeat superior*, and that before alluded to *qui facit per alium facit per se*. This rule, with some few exceptions, which will hereafter be pointed out is of universal application, whether the act of the servant be one of omission or commission, whether negligent, fraudulent, or deceitful, or even if it be an act of positive malfeasance, his master is responsible for it *civiliter* to third persons." At page 187, citing several English and American authorities, he says: "Actions against railways and steam packet companies, also necessarily involve similar principles, as such companies can only act through the instrumentality of servants."

In the Philadelphia, Wilmington and Baltimore Railroad Company *vs.* Quigley, 21 Howard 202, the Supreme Court of the United States, held that an action on the case for a libel could be brought against a corporation; and Mr. Justice Campbell in delivering the opinion of the Court thus defines its liability for the acts of its agents. "With much wariness and after close and exact scrutiny into the nature of their constitution have the judicial tribunals determined the legal relations which are established for the corporation by their governing body and their agents with natural persons with whom they are brought into contact or collision. The result of the case is, that for acts done by the agents of a corporation, either *in contractu* or *in delicto* in the course of business, or of their employment the corporation is responsible, as an individual is responsible under similar circumstances. At a very early period it was decided in Great Britain as well as in the United States, that actions might be maintained against corporations for tortions; and instances may be found in the judicial annals of both countries of suits for torts, arising from the acts of their agents of nearly every variety." Similar doctrine is maintained in Addison on Wrongs p.p. 721, 722. In Moore *vs.* Fitchburg Railroad Company and another 4 Gray, 465, it was held that a corporation may be sued for an assault and battery committed by their servant acting under their authority. There the conductor put out a passenger who had paid his fare, and the Court ruled that if the company gave the conductor the power to act according to his discretion in all such cases as should arise, and in the exercise of that discretion he wrongfully exercised the power, or removed a passenger, it would be the act of the company, and they would be liable. In this case the suit was against the corporation and the conductor. The Court held the joinder was right, and although the conductor was acquitted they would not interfere with the verdict against the company. The English cases prior to 1860, are collected in a convenient form in a leading article in the 6 Jurist N. S. part 2, p. 143. "The old doctrine that a corporation aggregate has no soul, and therefore is incapable of a malicious intention, has been described by Erle, C. J., as being rather quaint than substantial; and accordingly in these days when substance is preferred to form and utility to quaintness, it has been held that corporations, especially those of a trading character have souls, and therefore may be guilty of malice. The number and importance of corporate bodies established for the purpose of trade in modern times, and transacting their business through the agency of servants, have rendered it necessary to relax the old rules existing on the subject, and to extend to them the maxim *respondeat superior*, as if they were private individuals; the only special limitation engrafted upon their liability, being that the act complained of should be within the scope and purpose of the incorporation. Thus after being liable to an action for a false return to a *mandamus*, (Yarborough *vs.* Bank of England, 16 East 6,) for the negligence of their servants; (Scott *vs.* the Mayor &c., of Manchester, 2 H. & N., 204; 3 Jur. R. part 1, p. 690,) for an assault; (the Eastern Counties Railway Company *vs.* Broom, 6 Exch. 314–15: Jurist part 1, p. 297,) for false imprisonment; (Chilton *vs.* the London and Croydon Railway Company, 16 M. & W. 212,) to an indictment for non-feasance; (Regina *vs.* the Birmingham and Gloucestershire Railway Company, 3 Q. B. 223,) and for misfeasance; Regina *vs.* the Great North of England Railway Company, 9 Q. B. 315; 10 Jurist part 1, p. 755,) it was decided that an incorporated company might be sued for a libel contained in a message transmitted by their telegraph, the company being incorporated for the purpose, (*inter alia*) of transmitting messages, (Whitefield *vs.* South Eastern Railway Company, 4 Jurist N. S. part 1, p. 683,) and that they might also be guilty of acts maliciously committed, with a view to injure individuals of rival companies, (Green *vs.* the London General Omnibus Company, 6, Jurist N. S. part 1, p. 228.") So in Cowley *vs.* the Mayor &c., of Sunderland, 30 Law J. Rep. Exch. 127, February 5th, 1861, the corporation were held liable to an action for an injury done by a wringing machine erected by them; placing them on the same footing as an individual under such circumstances.

These cases have been followed by two very important cases decided in the Courts of Exchequer and Queens Bench in the beginning of last year. The first Seymour *vs.* Greenwood was decided on the 22d of January 1861, and is reported in 30 Law J. Rep. Exch. 189, and was affirmed in the Exchequer Chamber Id. 327.

In this case the plaintiff was a passenger in the defendants' omnibus, and was removed by the conductor a servant of the defendant in such a manner that the plaintiff fell into the road and was severely injured. The allegation was that the plaintiff was drunk and refused to pay his fare; and the court thought the conductor was obeying the lawful commands of his master in removing a troublesome passenger. The conductor went into the omnbus and took the plaintiff who was inside by the collar with both hands, and backed himself out of the omnibus, drawing the plaintiff along with him. The plaintiff was then on the step and the conductor on his feet in the road; and he then threw the plaintiff on to the road to the right hand. The omnibus was stopped when he threw the plaintiff down. The plaintiff fell, the conductor did not. A Hansom cab came up in the same direction as the omnibus and the driver tried to draw up, but something under the cab caught the plaintiff, and the cab went over his foot and struck his head at the same time. Pollock, C. B. said: "I do not believe he intended to do any mischief but his want of care clearly was the cause of the mischief, and therefore I think the effect of the evidence is, that the servant by carelessly executing his master's commands caused the mischief complained of, and that is what I should have found had I been on the jury. There is no doubt that the law on this subject was once very much confused, and when McManus *vs.* Crickett 1 East 107 was decided, the law had not been settled. I think the view we take of this case is quite in conformity with all the more recent decisions. Public safety and private convenience require that we should so decide; for if we were to hold that a railway company is not to be responsible for the act of its servant causing damage to a third person

unless it be an act done in the mere negligent obedience to the orders of the company there would be no protection to the public." "I have no doubt" said Martin B., "that if the conductor used unnecessary violence in removing the plaintiff the master would be responsible. If by an act done by a servant within the scope of his ordinary employment, another person is injured that person may maintain an action against the master; and the act of removing the plaintiff from the omnibus, was within the scope of the conductor's ordinary employment." "The criterion is not whether the master has given the authority to do the particular act, but whether the servant does it in the ordinary course of his employment."

The plaintiff died while the rule to set aside the verdict was pending, and the court ordered the judgment to be entered in his name *nunc pro tunc* as of Easter Term when he was living.

In Goff *vs.* The Great Northern Railway Company 30 Law J, Rep. (Q. B.) 148, February 13th 1861 the written opinion of the court was delivered by Mr. Justice Blackburn in which the prior decisions on the subject were deliberately and carefully reviewed. It was held that, "a railway company though it be a corporation is liable to an action for false imprisonment if that imprisonment be committed by the authority of the company; and it is not necessary that the authority should be under seal." Then as to the evidence of such authority it was held that the doctrine enunciated by the Court of Exchequer Chamber in 1853 in Giles *vs.* The Taff Vale Railway Company 2 Ellis & Bl. 822, gives the correct rule and all prior decisions conflicting with it, were considered as overruled on that point." It is not necessary to enter into this question, as in the present case it was proved by the defendants that they had expressly authorized and instructed their officers or agents to put passengers out of their cars in cases like the present.

Two errors only were argued or pressed by the counsel of the plaintiff in error. About the first alleged error that the court erroneously held that the company were liable for the acts of their agents in this case, there can be no doubt that the court below were right in their exposition of the law which is in strict conformity with the authoritive statement of the law by the latest and best authorities, and is founded upon the clearest principles of public policy and private convenience. A railway company selects its own agents at its own pleasure, and it is bound to employ none except capable, prudent and humane men. In the present case the company and its agents were all liable for the injury done to the deceased.

The other error that the court should have instructed the jury to find for the defendants is not sustained, and I think that the court went farther in expressing their opinion upon the evidence than I would have done; for it appears to me that there was persuasive evidence sufficient to convince a jury that the deceased died of the wounds which he received, when his hands were forcibly removed by the agent, and he fell on the track of the road between the rails on the ballasting. There was therefore no error committed by the court, and we do not see that the former reversal on the question of damages has materially improved the condition of the defendants and it would hardly be to their interest to have another trial.

Judgment affirmed.

Railroads of the United States, January 1, 1864.

Statement showing the actual mileage and cost of the railroads in each State, etc.:

States.	Mileage—Total.	Mileage—Completed.	Cost of Road and Equipm't.
Railroads in the Loyal States.			
Maine	640.59	509.37	$17,788,316

INTEREST AND DIVIDENDS.

The Illinois Central Railroad Company has declared a dividend of 4 per cent, payable on the 1st of February. The transfer books are to be closed on the afternoon of the 18th inst.

The New York and New Haven Railroad Company have declared a dividend of $3, free of Government tax, payable on and after February 15.

The New York, Providence and Boston Railroad Company have declared a dividend of 6 per cent, free of Government tax, payable on demand at M. Morgan's Sons, No. 37 William street.

The half-yearly interest due the 1st instant on the funded debt of the State of Indiana will be vanced to holders by Messrs. Winslow, Lanier & Co.

The Little Schuylkill Railroad Company will pay a semi-annual dividend of three per cent, free of all taxes, on the 18th inst.

Messrs. Duncan, Sherman & Co. will pay, on demand, the following coupons: Chicago City, municipal; Chicago City, water loan; Albany City; Detroit and Milwaukee Railroad, funded; Detroit and Pontiac Railroad; Buffalo and State Railroad.

Field, Morris & Co., No. 345 Broadway, will pay the coupons upon the City Debt of Evansville Ind.

The Philadelphia City Passenger Railway Company (Chestnut and Walnut) has declared a dividend of $2 25 per share.

The interest on the bonds and stocks of the corporation of this city, due February 1, will be paid on and after that day at the Broadway Bank.

The Beaver Meadow Railroad Company announce a semi-annual dividend of five per cent., payable on and after January 11th, inst., at the office of the company.

The East Mahanoy Railroad Company have declared a dividend of three per cent., payable subject to the deduction of United States tax, on demand.

The Susquehanna and Wyoming Valley Railroad and Coal Company, have declared a dividend of ten per cent. free of Government tax, payable on or after the 28th inst.

The Minnesota Mining Company will pay, 20th January, a dividend of $3 per share.

The Central Mining Company will pay, January 18, a dividend of $2.50, or 10 per cent.

The Panama Railroad Company have declared a dividend of four per cent. out of the earnings of the road for the three months ending 31st, and one per cent. out of the earnings of steamers, sailing vessels, &c., payable on and after the 5th of January.

The interest coupons of the bonds of the Mariposa Company, falling due on the 1st day of Jan. next, will be paid on that day, in gold, on presentation at the office of the Company.

The January interest on Kansas State Bonds will be paid at Metropolitan Bank, New York City.

The Jersey City Water Loan, interest coupons, due Jan. 1, will be paid, on presentation, at the Merchants' Bank, N. Y., or at the Mechanics' and Traders' Bank, Jersey City.

The New Jersey Zinc Company has declared a dividend of four per cent on preferred, and two per cent on common stock, payable on the 1st of January.

Railroad Earnings--Weekly.

The traffic of the Great Western Railroad for the week ending January 1, 1864, was as follows:

Passengers	$18,551 42
Freight and live stock	30,539 28
Mails and sundries	1,226 63
Total	$50,317 33
Corresponding week of 1863	51,886 02
Decrease	$1,568 69

The earnings of the Grand Trunk Railway for the week ending December 26, 1863, were:

Passengers	$23,685 29
Freight and live stock	5,400 00
Mails and sundries	71,050 37
Total	$100,085 66
Corresponding week, 1863	90,798 49
Increase	$9,287 17

Boston and Worcester, and Western Railroad Companies.

The controversy which has been so long pending between these companies, has been at length amicably settled, and on terms satisfactory to both parties. Messrs. Twichell & Chapin, the respective Presidents, accomplished the good work. The settlement covers all points in dispute, and liquidates all arrearages and balances.

American Railroad Journal.

Saturday, January 9, 1864.

☞ The *postage* upon the AMERICAN RAILROAD JOURNAL is only *five cents per quarter*, if paid *in advance* at the Post office where the paper is received.

Stock Exchange and Money Market.

It must be admitted that there has been an active demand for money the past week at 7 per cent., and a considerable shifting of loans. It is a curious fact that the operators in Wall street are frequently troubled in carrying their stocks from one day to another, thus showing that a great many of them are working beyond their own capital, and also the spirit of speculation which prevails among them. It is not to be wondered at, that they are very often caught, and sometimes compelled to default upon their contracts. Whatever sums the fortunate may gain in their ventures, the unfortunate have to lose, and this explains why so many well-known faces dis-

appear from the street, and so many new ones take their place.

Gold has been very steady for the last week, fluctuating between 151 and 152, without gravitating below or rising above these figures, and this notwithstanding the payments of interest by the Government, and the certainty that several millions are to be paid out next month.

The course of trade has been quite equable for months past, and our imports and exports have been large. The country seems to desire the finest and choicest products of the old world, and to be able to pay for them without difficulty. It is useless to attempt to control the tastes or the wants of those who have the means to pay for them, and sumptuary laws may do for the confederates but not for the flourishing North.

Many persons, (and those who as a rule predict evil, are most generally sure of their predictions,) look forward to a general crash when the finale comes in the shape of peace, and the restoration of the Union. And it is very possible it may. Forewarned and forearmed are said to be almost the same thing, and if so we have plenty of time to prepare for the coming shock. This intention is probably seen in the readiness, if not anxiety shown by the possessors of money to invest it in Government stocks, for the nation, with its industry and enterprise, its population, its rivers, canals, lands, and railways will outlast all individualities, and while the world stands they will stand, in the relations and importance they now maintain. Those who incur debts in paper to be paid hereafter in gold, may be losers, if they have not the gold to pay. Merchants with large surplus stocks may suffer, but it is to be hoped the profits that they now are making are large enough to leave a margin to meet the loss when it comes. In short, if our people are as sagacious in this as in other things, we believe they may be able to encounter the financial change, or accommodate themselves to it without serious injury.

This seems to be the prevailing feeling, for every one is driving on to make hay while the sun shines, and to be ready to get it in doors before there is a change of weather. We find accordingly that the railway market sustains itself most buoyantly, and it may be supposed that those who have made largely by its advance, will not feel any coming depression. Those who hereafter lose their margins will be found not to be permanent holders of anything, and they will doubtless bear their reverses with philosophy. There has been the last week quite a general rise in railway shares, and the market has been active as it always is in such cases. The variations in railway shares will be found on reference to our tables.

Governments was also strong. Registered 6s, sold on Tuesday at 104 to 105. Treasury notes 106 to 106¾. Certificates found favor at 102 and ⅜ for gold, and the leading State stocks were firm and quiet. The National Banks are increasing with great rapidity, and bid fair to obtain all the circulation, from their having a national redemption in the form of payments of taxes and other Government dues except duties. This will keep them at par, or nearly, and must give them an enormous advantage over the local bank issues, which always have been at a discount, if not in discredit, at a distance from their place of issue. The business of discounting bank notes, so profitable hitherto, will be cut up, and millions of dollars will thereby be saved to the people. This is an immense advantage.

One of the objections made by the old and respectable banks to the new system, is the merging of their time honored names into new ones, where their designation will only be by numbers. This may be easily obviated by stamping the new notes across the face with a few words of description, such as, "late the National Bank," or "for, merly the Bank of North America." This will answer all the purpose of the former appellation, and may carry with it a certain amount of extra confidence to the holder.

We notice a large increase in the capitals of our City Fire Insurance Companies, chiefly in this city, the sum of two millions having been added to the former amounts. This is an indication of an increase of prosperity, in the fact that they are making large dividends, and also of the increase of insurable property, and of prudence on the part of the owners.

Much anxiety is being expressed as to the financial movements of the Treasury Department, and the correlative action of Congress in regard to increased taxation. We have understood and still understand that the Secretary intends to hold to his determination to make his present issues of legal tenders no larger than they are. It is true that from appearances, a larger circulation might be sustained, for the interest of money is still high, and legal tenders are in many places at a premium; but on the other hand the rise in prices in many articles of necessity keeps on, and it is better to be taxed heavily and have our necessaries of life cheap, than to escape taxation and be ruined in prices. This certainly is the feeling of all classes but the very rich, to whom in fact the whole subject is a matter of but little moment. It would be presumptuous in us to offer any plan of finance when there is so much ability in the Treasury Department, and as we believe in both houses of Congress.

Nor do we think it necessary to repeat the rumors afloat, as to what decision these parties may come. It will be time enough to express an opinion when our future financial policy is determined by those who are to shape it. We have only to express our perfect conviction, that the Country is able to meet all its engagements, that its present income is equal to its present expenditures, that a large part of the proposed appropriations for the army and navy may be left out by Congress with perfect safety, and that particularly the 140 millions asked for by Mr. Wells may be cut down one half. We do not want a navy of six hundred ships when this war is over. We do not want them now. We believe that many millions of expenditure could also be saved, by a revision of the contracts by which steamboat owners have been acquiring immense fortunes. We trust that the proper committees in Congress will probe all these transactions to the quick. We are willing to expend everything for the cause but nothing for favorites.

We were in error last week when alluding to the first mortgage bonds of two millions to complete the connections of the Chicago and Great Eastern railway, in stating that this sum was to be applied to complete the route from Chicago to Logansport, 110 miles. If we now understand it, it is only necessary to build a link from Chicago to La Cross, Indiana a distance of 62 miles, the balance of the line to Logansport being already in operation. Messrs. Schuchardt & Gebhard, at whose office these valuable securities are offered to the public, will doubtless meet little difficulty in the negotiation for the required sum.

The delivery of fourteen millions five per cent legal tender notes to the Banks having taken place, it is believed they will be in great demand. Every one who has money to pay at a future day, or wishes to accumulate for any particular object will seek these notes, which carry interest, and are nevertheless available at any emergency for immediate use as legal tender. We imagine this policy, touches the right spot with its needle. We believe a very large amount of greenbacks are held and hoarded throughout the Country which will be exchanged for these 5 per cent legal tenders, if they can be got. This will give our circulation a sufficient enlargement for all the wants of the Country without any further direct issue of notes from the Treasury, a policy which Mr. Chase will, if he is wise, persist in.

The balance in Mr. Cisco's vaults on Tuesday last was $36,992,691 67.

Illinois Central Railroad.

At a meeting of the directors of this company held in this city on the 5th inst., it was resolved hat a dividend of four per cent in cash, free of government tax, upon the stock and cancelled bonds scrip of the company is declared, payable on the 1st of February to the registered holders of stock and scrip on the 18th inst. This dividend is in lieu of and in advance of two coupons in the full paid stock, and by terms of the contract terminates the obligation to pay interest to the full paid shareholders. The cancelled bonds scrip now amounts to $1,750,000, which the directors recommend the holders at the annual meeting of the company in May next to change into the more convenient form of Scrip Stock or full paid shares. The dividends hereafter will be made uniform. The present half-yearly division in cash is made double that of July, (paid 1st August,) by reason of the flattering results of the business of the entire year, which amounts to $4,500,000 in traffic, $2,400,000 in land sales, and $1,400,000 in cash collections on previous Land Sales, of which $800,000 is applicable to the Mortgage Interest of the Company. The Land Mortgage is now reduced to $14,300,000—originally $17,000,000—by actual collections on the principal of the Land Sales. The interest charge upon this Mortgage, which, for six years or more was a heavy burden upon the net traffic of the road, is now reduced to $1,000,000, or only $200,000 in excess of the interest collected from the Land Notes held by the Company. The increase of gross traffic for the year is $1,000,000 or one-third more than in 1862. The transfer books for the dividends close on the 18th inst.

Complimentary Dinner to Walter Shanly, Esq., M. P. P. for Granville C. E.

The constituents of this gentleman gave him a public dinner at Spencerville on the 30th ult., in token of his services as their representative in Parliament. This gentleman has numerous friends in the Northern States who have long recognised his abilities as an Engineer, and his advocacy of measures tending to cement the commercial relations between our country and his own, through the means of internal improvements.

Chicago and Alton Railroad.

We learn that the Chicago and Alton Railroad Company have concluded a perpetual lease of the Joliet and Chicago Railroad, the conditions being very advantageous to the former, besides insuring a reduction on the compensation it has paid for the use of the latter during the past year of $50,000. This negotiation virtually places the entire route from Chicago to Alton permanently under the control of the Company.

Allegheny Valley Railroad.

The Pittsburg *Chronicle* states that the Allegheny Valley Railroad Company has issued $600,000 of second mortgage bonds, $300,000 of which is to complete its extension to the mouth of the Mahoning river, in Armstrong county, and $300,000 for further extension. Surveys are to be immediately commenced of the branch line from Franklin to Mahoning, and it is expected to open the road as far as Brady's Bend, if not to Franklin during the present year.

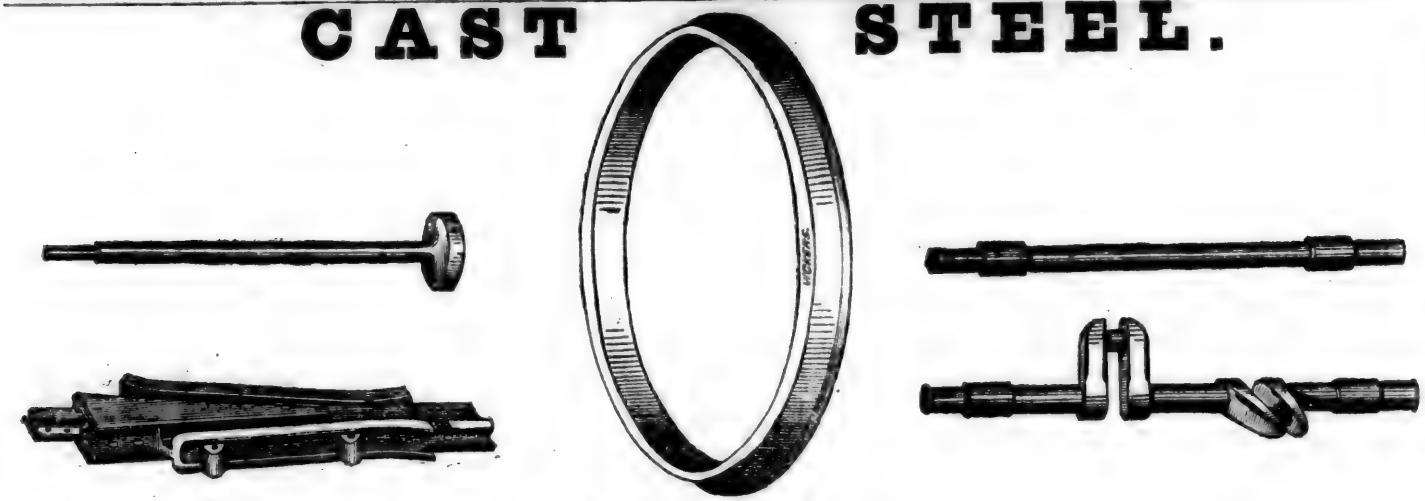
Chicago & Great Eastern
Railway Company,
FIRST MORTGAGE BONDS,
FOR $2,000,000.

SUBSCRIPTION BOOKS OPENED WITH
Messrs. SCHUCHARDT & GEBHARD,
BANKERS,
No. 21 NASSAU ST., NEW YORK.

THE CHICAGO AND GREAT EASTERN RAILWAY COMPANY now offer for sale ONE MILLION ONE HUNDRED THOUSAND DOLLARS of their FIRST MORTGAGE BONDS, in sums of One Thousand Dollars each, maturing in thirty years, bearing interest at the rate of seven per cent. per annum, payable in the City of New York on the first days of April and October in each year.

These Bonds are secured by a First and only Mortgage on the property, income and franchises of the Railway Company, executed to Frederick Schuchardt and Henry Morgan of the City of New York, Trustees.

The remaining Nine Hundred Thousand Dollars of the Bonds are set apart and remain in the hands of the said Trustees, for the purpose of being exchanged for the indebtedness of the Chicago and Cincinnati Railroad Company, running from La Crosse to Logansport; this effected, the $2,000,000 will form a First and only Mortgage on a line of road 110 miles in length, extending from Chicago to Logansport, where it connects with the Cincinnati and Chicago Air-Line Railroad, forming the shortest line by 40 miles between Chicago and Cincinnati, and by 36 miles the shortest line between Louisville and Chicago.



It will also open, in connection with Roads now in operation, entirely new and very direct lines from Chicago to New York, Philadelphia, Baltimore, and all Eastern Cities. The distance between Chicago and New York by this route being shorter than by either of the existing lines via Dunkirk or Buffalo.

The road is now under contract, and the most strenuous efforts are being made to have it open for traffic during the summer of 1864.

The interest on the Bonds maturing during the progress of the work has been provided for, and will remain on deposit with the Bankers of the Company, Messrs. SCHUCHARDT & GEBHARD, No. 21 Nassau st., to whom the Company refer for further particulars, and where subscription books for this loan have been opened.

4t1 W. D. JUDSON, President.
Dec. 23, 1863. No. 27 William st., New York.

CAST STEEL.

MANUFACTURED BY

NAYLOR, VICKERS & CO., SHEFFIELD, ENGLAND.

CAST STEEL TYRES WITHOUT WELD,

Reversible Crossings and Frogs, Disc Wheels, Pistons and Piston Rods without weld, Crank and Straight

AXLES, AND EVERY DESCRIPTION OF STEEL FOR RAILWAY PURPOSES.

STEEL CROSSINGS have been in use more than three years with very little perceptible wear, in places where the ordinary ones had to be replaced every four months. They have been estimated to be good for ten years in the worst places.

THE **"VICKERS" TYRES are in constant and extensive use on almost all** the Railways in Great Britain, and also on many roads in other parts of Europe. Their chief advantages are:—1. Their Durability: they will outlast any Iron Tyre without being turned, and for this reason are cheaper than Iron Tyres (free of cost). 2. Their Safety: being without a weld they are not liable to break, and Steel is proved to be a stronger and tougher metal than any other. 3. Their Uniformity: they do not wear in flat places nor "laminate." 4. They are not injuriously affected by frost, and are guarantied to stand the severest climate.

STEEL AXLES will be found economical, because they may with safety be made much lighter than those of Iron. They will wear longer and "smoother," and will consume much less oil; nor are they liable to granulate from constant use.

For CIRCULARS, GIVING FULL PARTICULARS AND TESTIMONIALS, PRICES, etc., apply to **NAYLOR & CO.,**

421 Commerce street, Philadelphia; 99 John street, New York; 80 State street, Boston.

OFFICE OF THE ILLINOIS CENTRAL R. R. Co., New York, January 5, 1864.

Resolved, That a dividend of FOUR PER CENT., in cash, free of government tax, upon the Stock and Cancelled Bonds scrip of this Company is declared, payable on the first day of February to the registered holders of stock and scrip at the close of business on the 18th inst.

This dividend is in lieu of and in advance of two Coupons in the full-paid stock and by terms of the contract terminates the obligation to pay Interest to the full-paid-share-holders.

Resolved, That the transfer books be closed on the 18th instant, and re-opened on the third day of February.

By order of the Board.
412 THOMAS E. WALKER, Treasurer.

PATENT
SOLID EMERY WHEELS.
THE New York Emery Wheel Company, after a long series of experiments have so perfected the method of manufacture of their improved wheels as to be able in future to fill promptly all orders for wheels in quantities. Our invention is pronounced by all who have used our improved wheel to be superior in every respect to any method heretofore known for combining emery for cutting, grinding or polishing purposes. Our Emery oil stones are superior to the Arkansas stone. Emery hones, knife sharpeners, etc., constantly on hand. Send for circular and price list. Address JOSIAH BARTLETT. Office No. 61 Beekman st., (up-stairs,) New York.

Steam Pressure, Hydraulic and Vacuum Gauges.

Our attention has been called to the very complete and scientifically constructed pressure, hydraulic and vacuum gauges manufactured at the celebrated Prussian works at Buckaw Magdeburg by Schaffer & Budenburg, and for sale at their agency 61 Cedar Street N. Y. They have been in use for several years in the United States, and are recommended by a large number of persons who have used them "for their unsurpassed accuracy and endurance." These recommendations are signed by boiler and engine builders, engineers and locomotive manufacturers, and are unanimous in the expressions of approval.

☞ MR. JAMES W. LOW has in press and is about publishing his Railway Directory for 1864. This year his work is got up with great care and correctness, and he has combined the Telepraph Companies with it, which as they are now forming a very important item in the enterprises of the day will prove interesting to the Railway public. The book when ready will be sent as usual to the Railroad officers.

Philadelphia and Reading Railroad.

The managers submit the following report of the receipts and expenditures for the year ending November 30, 1863, with the Treasurer's general balance sheet, exhibiting the financial condition of the Company at that date. (Here follows transportation and income account, which, we condense as follows:)

RECEIPTS.

From travel, 576,861, equal to 211,970 through passengers		$566,520 38
From freight on m'd'se, 652,363 tons.	673,142 61	
" " " coal, 3,065,262 tons at $1.59 8-10 per ton.	4,897,200 04	
From United States mail	21,309 34	
From other sources	94,729 65	
Gross receipts		$6,252,902 02

EXPENSES.

Transportation	$1,588,156 32	
Roadway	374,211 99	
Dumpage, rents, taxes, profit and loss, insurance, &c	583,633 43	
		2,545,001 74
Receipts over expenses		$3,706,900 28
Interest on bonded debt.	$653,454 00	
Interest on bonds and mortgages	33,972 00	
Renewal Fund: 5 cents per 100 tons on 740,315,180 t'ns transported one mile during the year	370,157 59	
New cars and engines	729,797 98	
New machines for workshops	21,078 07	
New coal barges	77,888 00	
Real estate	238,019 29	
		2,124,368 93
Dividend fund during the year.		$1,582,531 35

Which has been disposed of as follows:

Sinking funds	$210,830 30	
State tax on capital	43,136 90	
Dividends on preferred stock	108,626 00	
		362,593 20
Balance of dividend fund, 1863.		1,219,938 15
Add " " " 1862.		951,321 14
Total reserved fund		$2,171,259 29

The season of 1863 has been one of unprecedented prosperity to those engaged in the production and transportation of coal. Owing to the freshet of June, 1862, and the subsequent demand, it was found impossible to accumulate the usual stock of coal for the winter consumption of the Atlantic cities. The season of 1863, from this cause, opened with a bare market, and, although there has been an increased production during the year just closed of 1,800,000 tons, there is, in consequence of the increased demand, no stock in first hands for sale, in any of the great markets.

The following tabular statement in detail for each branch of traffic shows the comparative results of the year:

	1862—Passengers.	Tons.	1863—Passengers.	Tons.	Increase.	
Travel	150,970		211,972		Increase.	40.4
	$403,564		$566,520		$162,956—	
Merchandise		451,733		647,263	Increase.	43.3
		$523,416		$673,143	149,727—	28.6
Coal		2,879,419		4,897,200	2,017,781—	70.1
		2,310,991		3,065,261	754,270—	32.6
Mail		19,618		21,309	1,691—	8.6
Miscellaneous		85,813		94,730	8,917—	10.4
Gross receipts		$3,911,380		$5,252,902	$2,341,072	59.7
Gross expenses		1,816,055		2,916,159	1,100 104	60.6
Net profit		$2,095,775		$3,336,743	$1,240,968	59.2

Gross expenses including renewal fund, in the year 1862, were 46.42 of gross receipts.
" " " in the year 1863, were 46.64 " "

The receipts and expenses per passenger and per ton, have been as follows, viz:

	1862. Cost.	Received.	1863. Cost.	Received.	Increase.
Per passenger	$1 10.4	$2 67.3	$0 91.3	$2 67.3	.22
Merchandise, per ton	53	1 15.8	0 50.3	1 08.2	
Coal	35.8	1 24.6	0 47	1 59.8	

It will thus be seen that the additional charge for transportation has only equalled the increased cost, and that no greater sum has been collected from the public than was necessary to maintain the same proportion to the expenses as in the previous years.

The result of the year's business, as condensed from transportation and income account, may be stated thus:

Gross receipts		$6,252,902 02
Deduct working expenses, including renewal fund		2,916,159 33
Receipts over cost of working road.		$3,336,742 69
From which deduct—		
Interest on bonded debt.	$653,464 00	
Interest on bonds and gages	33,972 00	
Cost of new cars and engines	729,797 98	
Cost of new machines for workshops	21,078 07	
Cost of new coal barges	77,880 00	
Cost of real estate	238,019 29	
		1,754,211 34
Leaving for net profit or divid'd fund		1,582,531 35
This has been credited as follows:		
Sinking funds	$210,830 30	
State tax on capital	43,136 90	
Dividend on preferred stock	108,626 00	
		362,593 20
Balance carried to reserved fund, '63.		1,219,933 15
Amount to credit of reserved fund, 1862, per report of Nov. 30, 1862	$990,956 21	
From which is deducted for sundry drawbacks on traffic for '62, paid	39,635 07	
		951,321 14
Total reserved fund		$2,171,259 29

The sum heretofore annually required for the sinking funds is materially reduced, in consequence of the market price of the bonds being above par. A condition of some of the mortgages is, that such appropriations are required only when the bonds can be purchased at or under par, while in others, the amount stated must be annually invested, either in the bonds of the company, or Government securities. The last annual report stated the balance then due the sinking funds to be $391,458 34

Appropriation for 1863, was	210,830 00
Amount required to Nov. 30, 1863	$702,288 34

As some classes of the bonds to which the sinking funds still apply, have been selling much above their par value, it has been deemed wise to make deposits in the United States Mint at an interest of five per cent., payable on ten days' notice. This is intended to continue only until the bonds can be bought at a suitable price. As other of the bonds of the Company could be purchased at or near par, the investments in some of the sinking funds have been anticipated. Appropriations have, therefore, been made as follows, viz:

Purchase of bonds for sinking funds, now due	$150,997 51
Deposit in United States Mint	400,000 00
Purchase of other bonds of the Co.	274,258 74
	$825,256 25

It will thus be seen that the appropriations exceed the requirements $122,965 91.

This Company has been subjected in past years to great embarrassment, and been compelled to make heavy sacrifices to meet at maturity obligations for which no proper provision had or could be made. The wisdom of reducing the debt, by purchasing the securities before maturity, or by the accumulation of a fund to meet it, cannot be doubted.

The bonded debt has been still further reduced during the fiscal year:

By conversion of Lebanon Valley 7 per cent bonds into stock	28,000 00
By conversion of Lebanon Valley 1857 -'86 6 per cent. bonds into stock.	936,500 00
By real estate bonds paid	972 16
	$964,672 16

Also, since the close of the fiscal year:

Bonds of Lebanon Valley 7 per cents have been converted into stock	$15,000 00
Bonds of 1857–'86 have been converted into stock	1,024,000 00
	$1,039,000 00

Some of the holders of the bonds issued into 1844, and payable July 1, 1860, and which originally were entitled to be converted into stock, (at the option of the holder,) till they matured, and which were extended to July 1, 1880, still claim the right of conversion, on the ground that the bonds were extended before the option of conversion expired, and that the extension carried with it all the original privileges, as well as security. The managers could not acquiesce in this view. The question will not be finally decided within the next few months. Should the decision be in favor of the right to convert, the privilege will inure to all holders of this class of bonds, and the stock will be issued to such of them as request it.

Anticipating the great demand that would be made for largely increased transportation facilities, the Board of Managers determined to purchase and manufacture cars and engines sufficient, in their opinion, for the business. Large as these acquisitions have been, they were found entirely inadequate to meet the demand. So great an increase of rolling stock necessarily required additional sidings, work-shops, &c., which, owing to the great difficulty in obtaining materials and labor, have not yet been so far completed as such an augmentation of business demands.

During the year, thirty-two additional canal barges have been purchased for the transportation of coal from Richmond, through the Delaware and Raritan Canal, to New York. A regular and constant supply of tr nsports at the wharves at Richmond is of the first importance, not only in facilitating the shipments of coal, but in giving regularity and stability to the rates of freight.

The chief items of expenditures which have been thus made are as follows, viz:

Cars and engines	729,797 98
Machinery and workshops	21,078 07
Real Estate	238,019 29
Coal barges	77,880 00
	$1,066,775 34

The stocks and bonds held by the company have been increased chiefly by investments in the lateral railroads, to increase the business and profits of the main line.

In pursuance of the policy of obtaining control of the various lateral coal railroads, which has so repeatedly secured your approval, the managers entered into negotiations for the purchase on lease of the Minehill and Schuylkill Haven Railroad. As this work was under lease to the Schuylkill Navigation Company, the negotiation naturally involved some arrangement with the latter company. The agreements are not yet executed. The pending negotiations will probably result substantially as follows, viz:

1st. This company is permanently to lease the Minehill and Schuylkill Haven Railroad at an annual rent of eight per cent. on the capital stock.

2d The profit or loss on this lease and others now held by this company are to be divided with the Schuylkill Navigation Company in proportion to the coal tonnage which may be received from such lateral railroads. The coal tonnage received between April 1st and December 15th of each year, it is assumed shall be divided between the two works in the proportions of forty-five per cent. to the Schuylkill Navigation Company, and fifty-five per cent. to this company, until the tonnage of the canal reaches 1,750,000 tons. This division is substantially that which has existed for many years. Should either company have more than its proportion, it is to pay the other twenty-five cents per ton of coal on such excess.

Owing to the interruption to business, caused by the invasion of the State, in July last, and the general scarcity of laborers, the pier at New Castle and the Junction Railroad have not been completed this year, as was expected. Three and a half miles of the Junction Railroad are now in daily use, for the passage of a portion of the city coal trade, and for the passenger trains between New York and Washington. The remainder of the line, about one mile in length, will be completed during the coming summer.

The reports of the General Superintendent and Chief Engineer are appended.

The expenditures and investments to which reference has been made, have absorbed the cash resources of the company.

In pursuance of the resolutions of the stockholders, the amount appropriated to the sinking funds during the year has been represented by a dividend of seven per cent., payable in stock—the preferred stockholders receiving common stock or money, at their option.

The operations of the year may be thus briefly recapitulated:

1st. Net profits, after paying interest on debts and renewal fund		$2,649,306 68
2d. Acquisition of property made necessary by a largely increased business		1,066,775 34
3d. Investments in lateral railroads.		573,255 45
4th. Decrease of debt by purchase of bonds, par value		404,100 00
Deposit in United States Mint.		400,000 00
		$2,444,130 79

The capital stock has been increased by the dividends just declared, an amount not exceeding $948,342 93.

5th. A diminution of bonded debt by conversion into stock of $2,003,500 00.

The Managers respectfully submit that a policy which has produced these results should be continued.

By order of the Board of Managers.

CHAS. E. SMITH, President.

New York State Canals.

ANNUAL REPORT OF THE AUDITOR.

The following is a synopsis of the Annual Report of the Auditor of the Canal Department:

There was in the treasury and invested, belonging to the Canal Fund, Sept. 30 1862	$4,580,303 83
Received during the fiscal year ending 30th Sept. 1863.	6,722,268 45
Total receipts, and available and unavailable balances	$11,311,572 28
Payments during the year	4,395,955 07
Leaving a balance, 30 Sept. 1863 of	$6,915,617 21

Of the above balance, there was on deposit in banks, to the credit of the Treasurer of the State, on account of the Canal Fund:

In solvent banks, available	$4,123,084 98
In broken banks, unavailable	105,003 80
Total in banks	$4,228,088 78

In the custody of the Auditor, securities invested on account of the Canal Fund, viz:

Bank Fund stock	$12,743 15	
General Fund stocks	525,221 23	
Canal stocks	105,785 00	
Comptroller's stock	2,000,000 00	
School Fund bonds	40,000 00	
Real estate, &c., Bank of Corning	3,799 00	
		2,687,528 48
Champlain canal appropriation overdrawn		61,733 71
Total balance, September 30, 1863		$6,977,350 92

The above sum belongs to the several constitutional Sinking Funds, under article 7, pledged to the payment of the principal and interest of the stock debt of the State, including the $200,000 for the support of the Government, the appropriated and unappropriated remainder of the canal revenues of the fiscal year, the Repair Trust Fund, and the available and unavailable balances of the several canal appropriations, the particulars of

which will be found in the above-named document.

Receipts during the year:		
From tolls collected on all the canals		$5,028,431 32
Rent of surplus waters		1,165 00
Interest on current canal revenues		58,016 50
Miscellaneous receipts		30,888 53
Total		$5,118,501 35
Payments during the year:		
To Canal Commissioners, for repairs	$149,347 09	
To contractors, for repairs	353,993 02	
To Sup'ts, for repairs	156,038 63	
To collectors, for salaries, clerk hire, pay of inspectors and expenses of Collectors' offices	56,774 51	
To Weigh-Masters	9,164 07	
For Salaries chargeable to annual revenues, refunding tolls, printing, and other miscellaneous payment	45,565 20	
		770,882 52
"Surplus revenues"		$4,347,618 83
Payments to S. Fund, under § 1, art. 7	$1,700,000 00	
Payments to S. Fund, under § 2, art. 7	350,000 00	
Under § 3, art. 7	1,116,242 66	
Payments to the Treasury, under § 3, art. 7, to defray the expenses of Governm't.	200,000 00	
Payments to Sinking Funds, for advances.	198,309 68	
		3,564,552 34
Remainder appropriated and unappropriated		$783,066 49
Deduct appropriations by act. chapter 310, Laws of 1863		475,000 00
Remainder to be appropriated, &c.		$308,066 49

The following are comparative statements for four years:

	1860.	1861.
Rec'pts from tolls, &c.	$2,415,588 39	$3,402,628 30
Payments to superintendents & contractors of repairs	378,285 89	367,606 84
Payments by Canal Commissioners for repairs	231,753 23	224,957 28
Paym'ts to collectors, weigh-masters, and assistant collectors.	96,889 04	70,456 85
Refunding tolls, salaries, &c	40,048 62	43,765 17
Total expenses	$746,976 78	$706,786 14
Net receipts	$1,668,611 61	$2,695,842 16
	1862.	1863.
Rec'pts from tolls, &c.	$4,854,989 67	$5,118,501 36
Payments by superintendents, and to repair contractors	$428,088 62	$510,031 65
Payments by Canal Commissioners for repairs	236,318 16	149,347 09
Payments to collectors and their assistants and weigh-masters.	66,454 20	65,938 58
Refunding tolls, salaries of officers &c.	42,537 34	45,565 20
Total exps. for the yr.	$773,398 32	$770,882 52
Net receipts	$4,081,591 35	$4,347,618 83

The net as well as the gross receipts are larger than at any former periods since the canals were first completed and opened. The expenses of ordinary repairs and collections of the last year correspond very nearly with those of the three previous years. The net receipts of 1863 exceed those of 1860 $2,678,007 22, and those of 1861 $1,651,976 67, which, with the differences between 1863 and 1862, make a total of $4,596,011 36 in excess of what the tolls would have been had they remained stationary at the figures of 1860.

The condition of the Canal Debt Sinking Fund under section 1, article 7, at the close of the fiscal year, was as follows:

Sept. 30, 1862 balance on hand	$1,533,371 98
Received during the fiscal year	2,336,113 76
Total	$3,869,488 74
Paid during the year	$1,041,501 02
Balance on hand Sept. 30, 1863	$2,827,987 72

Schedule of Stocks issued, and when payable, secured by this Sinking Fund.

Rate of int.	When due.	Amount.	Annual int'st.
6 pr. ct.	1st July, 1864.	$400,000 00	$24,000 00

		$442,585 49	$24,629 28

Recapitulation of balances of the Sinking Funds.

Amount under section 1, article 7	$2,827,987 72
Amount under section 3, article 7	1,421,923 99
Amount under section 12, article 7	355,232 87
Total	$4,605,144 58
Annual interest charged thereon	1,307,208 48
Balance applicable to payment of principal	$3,297,941 10

Recapitulation of the canal stock debt of the State, paying interest on and after September 30, 1863.

	Principal.	Annual Int.
Under art. 7, sec. 1, of the Constitution	$8,427,724 76	$464,723 48
Under art. 7, sec. 3	11,940,000 00	707,000 00
Under art. 7, sec. 10.	442,585 49	24,629 28
Under art. 7, sec. 12.	2,258,000 00	135,480 00
Total	$23,068,310 25	$1,331,832 76

The principal of the canal stock debt of 1846, which has a preference in payment under section 1, article 7, was, at the close of the fiscal year, $8,427,724 76. Four millions of that debt, drawing five per cent interest quarterly, matures January 1, 1874, leaving $4,427,724 76 of the principal to be paid, as it matures between this time and the 1st of October, 1868, when $1,294,000 falls due. This is the last payment required until January, 1874. By the statement above given of the condition of the Sinking Fund under section 1, article 7, it will be seen there was a balance of this fund on hand of $2,827,987 72.

After paying the interest for the current fiscal year, there will remain, applicable to the payment of the principal $2,363,264 24, which added to the balance of the annual contribution of $1,700,000, on the 1st day of October next, after providing for the interest during the fiscal year commencing on that day, there will remain $3,706,540 76 of this fund to reimburse principal. The amount of stock secured by this fund, which matures in 1864 and 1865, is $3,123,724 76.

Of the Canal Repair Trust Fund on the 30th Sept., the principal and accrue l int'st was	$93,501 42
Increase during the year	38,527 40
Total	$132,028 82
Diminution during the year	18,815 98
1862, Sept., 30th principal and interest invested	$113,212 84

The statements of canal stocks purchased, cancelled, and paid up show that there has been purchased $1,307,721 28 of Canal and General Fund stocks, for a premium in the aggregate of $60,731 45, which is an average on the whole sum of a little over 4 64-100 per cent. It is shown above that $713,300 of the canal stocks purchased have been cancelled. In addition to this, the Commissioner of the Canal Fund hold $525,221 28 of General Fund stock, and $69,200 of canal stock as investment.

The canals have not impoverished the General Fund. They are now rendering service to the State by furnishing funds for bounties to volunteers at half the interest banks would have charged.

DEFICIENCIES AND DEFFERRED PAYMENTS.

The net receipts of canal tolls for each of the fiscal years stated below, after paying the expenses of collection, superintendence, and ordinary repairs, were as follows:

For the fiscal yr. end'g Sept. 30, 1857	$1,589,015 60
" " " " 1858	993,325 97
" " " " 1859	962,000 67
" " " " 1860	1,669,611 61
Total net receipts of 4 years	$5,213,953 85

which is about $1,586,046 15 less than the four years' required contribution of $1,700,000 a year to the sinking fund, under section 1, of article 7, and leaves the tolls indebted to that fund in that sum.

The deficiency of canal tolls to meet the annual constitutional charge of $350,000, under section 2 of article 7, to the General Fund Debt Sinking Fund, have been as follows:

For the year ending Sept. 30, 1857	$87,500
" " " " 1858	350,000
" " " " 1859	350,000
" " " " 1860	350,000
" " " " 1861	350,000
Total	$1,487,500

The Constitutional Sinking Fund, under section one, is entitled to and should have had set apart

to it the full annual contribution of $1,700,000, commencing on the 1st of October, 1856. This has not been done.

The Constitutional General Fund Debt Sinking Fund, under section 2, is entitled to and should have had set apart to it the full annual contribution of $350,000, commencing on the on the 1st day of October, 1847. But this has not been done. The aggregate of these deficiencies now amounts to $3,073,548 15, beside the quarterly interest payable to the General Fund.

On the 30th of September last, the balance of the canal debt of 1846 was $8,427,724 76. Four millions of this debt, carrying 5 per cent interest, matures Jan. 1, 1874, and $4,427,724 76 at different periods between the 30th of June, 1864, and the 1st of October, 1868. Three years' contribution of $1,700,000 a year, will accumulate a fund sufficient to pay the stock debt due in January, 1874, and the interest from October, 1868. If there be no intervening deficiencies, the accumulations of this $1,700,000 fund from the 1st of October, 1868, will amount to $8,500,000.

The balance of this fund in the Treasury on the 1st of October last was $2,827,987 72, subject to the payment of the quarterly interest on the whole debt, and the reimbursement of $1,600,000 of stock due in 1864. The annual interest on this debt is $464,843 48. In October, 1864, the capital of this fund will be quite adequate to the reimbursement of all the stock that will mature up to the 1st of October, 1868, and in 1865 the reimbursement to the treasury of the $1,487,500 deferred payments may be commenced, and completed in 1866, without interfering "with the just rights of the creditors holding the canal debt," secured by the priorities recognized by the first section of the seventh article.

Amount of canal funds deposited in banks, available		$4,123,084 93
Amount of canal funds deposited in banks, unavailable		105,003 80
Total available and unavailable		$4,228,088 78
The appropriations for superintendence, collection and ordinary repairs of the canals, for the fiscal years of 1863 and 1864 have been		$1,600,000 00
For extraordinary repairs and improvements		630,000 00
Total		$2,230,000 00

The receipts of toll on the Erie Canal from the Schenectady to the Lockport offices inclusive, in 1862, were $653,856 73, and at least fifty per cent. of this amount was paid on Western and Canadian products and tonnage.

The whole amount of tolls on tonnage contributed by the lateral canals, with the entire receipts of the latter, including the Champlain, make an aggregate of $1,045,248 04.

The full amount of tolls for the season of 1862, paid into the Treasury, after deducting the tolls refunded by the collectors, was		$5,172,021 16
Tolls received at		
Buffalo office	$3,075,784 99	
Tonawanda office	51,327 27	
Oswego office	466,610 76	
Whitehall office	63,021 13	
		3,655,744 15
Balance collected at other offices on all canals		$1,415,277 01

The just conclusions to be drawn from the facts given are that of the whole of our canal revenue in 1862 not to exceed $1,200,000 of it was paid on the products of this State and on property going north and west left within it. Take away from us the external traffic, and we should have barely enough revenue, if our internal traffic can be maintained, to keep our public works in tolerable condition of repair.

During the past four years, the canal revenues have fallen short of the constitutional charges upon them to pay the principal and interest of the old 1846 debt, and the interest on the new debt by $4,490,000, and taxes to the amount of $5,570,758 82, have been applied as far as needed to make good these deficiencies.

The unpaid claims for awards in 1862 are $116,143 88, and for sums due to contractors, $104,779 04, which ought to be promptly paid. There are claims for interest also on sundry drafts and awards. Altogether the unpaid claims are estimated at $700,000, to meet which are $300,000 now in the treasury.

The rates of toll on the canals 1862 and 1863 have been alike, except in two or three unimportant particulars. The rates on the great leading staples of agricultural production have been brought to the standard they were in 1857, and left there. The nominal receipts of gross tolls for the navigation season will reach very nearly $4,551,571 which will be in excess of any other year, except 1862.

The indications of a falling off in the traffic on the canals during the season of 1864, compared with the three preceding years of 1861, 1862, and 1863, are marked and ominous of a strong and heavy reaction in the toll receipts on the canals.

The tonnage movements on the canals in 1860, 1861, and 1862, were unusually large, but there has been a very considerable falling off in 1863, and especially in shipments from Buffalo to tide water, which very materially affects the toll receipts on the Erie Canal.

In 1862, the receipts from the 1st of September to the close of navigation, amounted to $2,369,476. In 1863, the receipts for the like period were $1,972,782, showing a comparative loss of $396,794. The receipts from the opening of navigation, in 1862, to September 1, were $2,819,467. 09, and for the like period, in 1863, $2,672,529, showing a comparative loss of $146,938. These exhibits do not give a favorable omen as to our future revenue prospects.

Receipts of tolls from Sept. 1, 1863, to close of navigation		$1,972,682 00
Estimated receipts of tolls from the opening of navigation, in the Spring of 1864, to the 1st of September, same year		2,170,823 00
		$4,143,505 00
Deduct appropriation for collection, superintendence and ordinary repairs		800,000 00
Total estimated net revenue		$3,343,505 00
This sum is charged under the constitution with the following paym'ts:		
Under § 1, art. 7, with	$1,700,000 00	
Under § 2, art. 7, with	350,000 00	
Under § 3, art. 7, with	710,000 00	
Under § 3, art. 7, with	406,242 65	
Under § 3, art. 7, with	200,000 00	
		3,366,242 65
Estimated deficiency		$122,737 65

The auditor may have put his estimate of the receipts from the opening of navigation, in 1864, to September, too low. He does not believe it. The great danger is that the actual receipts will fall below rather than exceed the estimated amount.

Copake Iron Mines.

The stock of this company, after examination by the respective Committees of the Stock Exchange, has been added to the list daily called at the Board. The issue stock, all of which is taken, amounts to 50,000 shares of $50 each, making a total nominal value of $2,500,000. The mines, by the statement of the Company, are situated at Copake, Columbia County, New York, on the Harlem Railroad. The property of the Company consists of 1,000 acres of land, about fifty of which are said to be an almost solid mass of rich iron ore to an ascertained depth of at least 45 feet. The Company, who have an office at No. 7 Nassau street, over the Continental Bank, are confining themselves to the production of the ore.

Pittsburg, Fort Wayne & Chicago Railway.

The following is a statement showing the financial condition of this company at the close of October 31st ult., showing net profits of $14,195 63 during the first ten months of the present year, and a balance of $169,475 48, to the debit of income account at the above named date.

The earnings show an increase of $1,168,900 15, or 38 8-10 per cent. and the expenses of operating and maintaining the railway and equipment an increase of $899,915 34, or 56½ per cent, over the same items last year. The per centage of earnings absorbed by expenses during the time in question was 59 6-10 per cent.

General Account, October 31, 1863.

Morris and Essex Railroad.

The Morris and Essex Railroad Company of New Jersey have completed the purchase of the Hoboken extension, for $1,050,000. There is also to be added the sum of $200,000, to be paid the New Jersey road, for the bridge over the Passaic, at Newark, and the branch road from the terminus at the bridge to the connection at East Newark.

The Company receive the following equivalents:

1. The Passaic bridge and branch road to East Newark, $200,000.

2. The road from East Newark to Hoboken ferry, including everything appertaining to the road, except the passage through the tunnel, $322,892 80. To this must be added the amount expended since the schedule was made.

3. The passage-way through the tunnel—$139,859 23. This secures the right of passage till Nov. 1, 1873. At the end of this time the Long Dock Company have the right to refund this Company $116,550, principal paid by us for such passage-way, and in that case our right of passage-way will be perpetual on payment of a fixed rate for passage and freight.

4. The extensive and valuable tract of land in Hoboken, at the terminus of the road on which the depot and other buildings now stand, this land across which our track is laid 1,100 feet in length—603 feet on the west and 486 feet on the east, by river, including over 13 acres of land $501,108.

5. The fifth item is a tract lying in front of the tract last named, extending east into the river. This tract, now mostly under water gives a river front of 480 feet, and extending out into the river to the utmost length for which such a track could be used for piers, abutments or wharves—gives desirable facilities to the company, to be used as they may wish for ferries, for the transportation from their depot in Hoboken to New York, of their own passengers and freight.

6. The sixth item is that of $15,000, allowed for the equipments of the road furnished by Mr. Stevens, and which being an approximate estimate, may be somewhat, but not considerably altered, on a more accurate appraisement.

Railroad Earnings--Weekly.

The traffic of the Great Western Railroad for the week ending January 8, 1864, was as follows:

Passengers	$17,176 34
Freight and live stock	23,198 14
Mails and sundries	1,193 93
Total	$41,568 41
Corresponding week of 1863	63,924 17
Decrease	$22,355 76

The earnings of the Galena and Chicago Union Railroad for the 1st week in Jan., 1863, were:

	1863.	1864.
Freight	$18,922 64	$1,889 63
Passengers	7,504 78	7,488 74
Mails, etc	1,100 00	1,300 00
Total	$27,527 42	$10,678 37
Increase		$16,849 05

The approximate earnings of the Marietta and Cincinnati Railroad, in the 4th week of December, 1863, were:

	1863.	1862.
Passengers	$8,936 16	$4,642 04
Freight	10,834 06	7,963 14
Mail, express & telegraph	907 25	1,383 51
Total	$20,677 47	$13,988 69
This month to date	$68,863 03	$48,543 92

The Michigan Central Road earned the first week in January:

1863 ..... $46,121 | 1864 ..... $35,548
Decrease $10,573

The Cleveland and Toledo Road earned the first week in January:

1863 ..... $31,484 | 1864 ..... $27,503
Decrease $3,861

The earnings of the Grand Trunk Railway for the week ending January 2d, 1864, were:

Passengers	$22,391 72
Freight and live stock	5,700 00
Mails and sundries	60,964 24
Total	$83,055 96
Corresponding week, 1863	95,146 75
Increase	$2,090 79

☞ We have received from Leonard, Scott & Co., 38 Walker street, the December number of Blackwood's Edinburgh *Magazine*. The great article of this number is a review of Professor Tyndall's theories, expressed in the title of his work, "Heat considered as a mode of motion." At this moment when the subjects of steam, and fuel, and the relations of heat to power are being largely discussed, the review in question comes in good time to give interest to the discussion. Professor Tyndall's views are, however, warmly opposed by some of our most eminent practical thinkers. Since they assert they can produce motion without heat, as in the case of a cylinder charged with many atmospheres of cold air, which will without ever increasing its temperature lift enormous weights.

Cedar Valley, and St. Paul and Pacific Railroads.

A correspondent of the Milwaukee *Wisconsin*, writing from St. Paul, under date of December 24th, says;

"A letter has been received from Mr. Chamberlain, in which he gives the information that he had closed a contract for 150 box cars, 30 flat cars, 3 passenger cars, and 4 caboose and baggage cars, for the use of the Cedar Valley Railroad. Contracts are being entered into for a sufficient quantity of cross ties to lay the southern portion of the road, and it is apparent that the road will be finished to the State line during the ensuing year.

"Litchfield & Co., contractors on the St. Paul and Pacific Railroad, assisted by the Hudson Bay Company, have concluded the purchase of 10,000 tons of railroad iron in England at $35 per ton. This is exclusive of 25 per cent. duties, and the cost of transportation from England. This immense purchase is hypothecated on the real estate bonds of the company, arising from their share of the land grant for railroad purposes. Should all this vast amount of iron be applied to a legitimate purpose, it would be ample to complete the road 120 miles west from St. Cloud, or if the unnecessary detour to Crow Wing could be avoided—and it ought to be,—it would complete the road very nearly to Georgetown. As the contract requires all the iron thus purchased to be delivered in this country by the 1st of next May, we see no reason why the road should not be completed to Georgetown in 1864."

Business Failures during the Year 1863.

We give below a statement of the amount of business failures during the year 1863, as compared with 1862, in the cities of Philadelphia, New York, Brooklyn, Boston, and the whole of the Northern States, together with the British Provinces. It will be seen that the amount for the year 1862 exceeds that of 1863 by nearly $16,000,000. This is accounted for chiefly by the check given to speculation, the heavy rise in the prices of goods, and the disposition shown by merchants, in view of the uncertain prospect the future presented, to profit by the opportunities afforded, and place themselves in shape to meet any emergency. The number of failures have diminished in uniform ratio throughout the Northern and Western States.

	1862.	1863.
N. Y. City and Brooklyn	$7,491,000	$2,035,000
Philadelphia	1,310,000	442,000
Boston	2,013,000	1,138,000
Balance Northern States	12,235,300	4,289,000
British Provinces	3,292,588	2,568,000
Total Northern States & British Provinces	$26,341,838	$10,467,000

The list of failures embraces those only in the legitimate line of trade, and does not include speculators in gold, stocks, produce, etc. The large number of houses that have, from various causes, either failed or ceased business in the prominent cities since the war began, has left the trade in the hands of comparatively few, whose ample means enabled them to lay in their stocks in the beginning of the year at low figures. The rapid advance in price of all merchandise, with a steady but not excessive demand, has made the year's business a more than usually profitable one to importers and jobbers; while the purchases have not been on so large a scale as in peaceful times, the enhanced value of goods has increased the amount beyond precedent. The retail trade has been equally prosperous.

American Railroad Journal.

Saturday, January 16, 1864.

Stock Exchange and Money Market.

The rise in gold at the beginning of the week was in consequence, as had been alleged of the large shipments amounting to one million of dollars. This is probably true, but the fact is suggestive. In another issue of the JOURNAL we shall show on the best English authority, that the drain of specie to Egypt and the East Indies to purchase cotton in 1862, was equal to $300,000,000 and during the present year it will amount to $433,000,000. How is this enormous sum to be obtained except from the United States, it is not easy to say. No one country in the world is so good a customer of England as our own. None where her agents do a larger business, or use their home credits to greater advantage. There are Bankers in this city whose connections with friends abroad, enable them quite irrespective of their personal responsibility to raise on unaccepted bills at 60 to 90

days and even at longer date, millions of dollars a week, whether the state of trade justifies such transactions or not. We presume that Exchange to the extent of fifty millions of dollars could be put in the street at twenty four hours' notice, if it was possible to negotiate them all at once. It is a business almost entirely founded on credit. A Banker draws on his London or Paris Correspondents for £100,000. He receives for this gold, or paper on which he obtains gold. He ships it to his correspondent and when it falls due, draws again, and so on as long as he chooses.

Settling day comes at last, but may not for years, and while the foreign house has had the gold all this time, the agent here has made a small interest or commission, if he does his business through an Exchange broker, and makes money without any immediate risk. The loss, if it occurs falls on the principal abroad, or if he fails also, on the American Merchant who remitted the last bill. It would be no new thing to have our foreign bills return upon us unpaid. We are of the opinion that this is one of the causes of the rise in gold at this moment. And there is good reason for thinking so. The condition of the Bank of England just now is such as to require all the aid it can get directly or indirectly, as will be seen from the following statement, which is exactly what might be expected while the drain of specie to the East is so enormous, as to have more than doubled the rate of interest in England within a short period. The bullion reserve in the Bank of England on the 30th of July 1862, was £18,448,443, on the 1st January 1863, it was but £14,102,169, and the rate of discount had advanced 100 per cent. between these two periods. On the 16th December last, the reserve of specie had again declined to £13,675,474, and the rate of interest had further advanced 100 per cent or from 4 to 8 per cent. In fact 9 per cent was asked at the Bank, and given. So that the rate of money had advanced 300 per cent in fifteen months. What should we have thought if the regular legitimate interest of money had gone up in this country from 7 per cent to 21 per cent. within the same time, and if our Banks exacted it, and every body had to pay it. We imagine it would have at least made a sensation if it had not very seriously affected the stability, and the solvency of many institutions and men of business. In the same ratio the deposits fell off in the Bank of England. In 1861 they were, as compared with securities lodged, but £3,332,391 short, of those securities, but in 1863 they were short full £8,832,053, showing that the balances of customers had decreased by the difference of the two sums. When it is also considered that the gross amount of bills drawn yearly in England, is computed to be at least five thousand millions of dollars, and that on this sum without including renewals, at 2 per cent. the discount amounted to $100,000,000, and at 8 per cent $400,000,000, we may imagine that when this enormous amount of paper is forced in by a pressure or panic, the interest alone is more than can be paid in specie.

While those persons among us take pleasure in exaggerating our own difficulties during this war for our National existence, they may as well reserve some of their sympathies for our foreign neighbors. On the other hand, the true men of this Country who stand shoulder to shoulder for the best and noblest cause that ever called on men for support, may very safely conclude that our condition is quite as stable, and likely to come to a better conclusion, than even that which has been held up so often for the administration of our financiers. A war in Europe would certainly topple down that fabric already in peril by its being over weighted by a single staple. We make these remarks purely in the spirit of commercial calculation, and we are but repeating what has already found its way in the press of England.

The principal feature of our own market just now is the anxiety shown by our large operators, with regard to the policy of the Secretary of the Treasury. It seems that the bounties to be paid our soldiers for re-enlistments are not provided for in previous estimates. The large sums paid are in fact an economy, for the greater our armies, the sooner will the war be ended, less of life will be lost, and the extent of current expenditure will be limited. Those who wish a further inflation of paper money, which pays debts and large profits, desire a fresh issue of legal tender currency. But we hope they are not to get it, and that Mr. Chase will not change his determination so recently and decidedly expressed, that he will issue no more of this kind of promises to pay. We admit the amount issued thus far is not more than the business of the Country can carry; we know that money is scarce comparatively speaking, and that some parties in want of it, are actually agreeing to pay the interest of their loans in gold, a contract that may or may not bear the taint of usury; we also know that as to the amount of legal tender currency afloat large as it is, it is not very much more than the Bank currency of the Country was before the war, and that here in this great commercial city, while the Banks can hold nearly thirty millions of gold, they cannot obtain in all their business more than sixteen millions of legal tenders, which at the clearance house are to them the same as gold. Yet notwithstanding if we wish to return to specie payments, and to the standard money value of the commercial world, we must reduce and keep down the amount of paper money afloat. The funded debt of a government never affects its currency, when it is redeemed in gold, and therefore it is better now to borrow, than to issue notes. If the war could have been carried on upon a specie basis, as some eminent bullionists, such as Mr. Gallatin, and others assert, it can certainly be ended with twice that amount in legal tenders, approximating (as they become absorbed by the funding system) to the dollar of specie, and to which in August last they approached as near as 22 per cent. A stringent money market is therefore in our opinion a wholesome symptom, and the first and inevitable step in the return to specie payments.

The market has very naturally been feverish, yet not so much so as to affect Government securities which stand firm as a rock, and are again attracting investments from abroad, and no wonder. It is now generally believed in Europe that the persistency and the unanimity of the North are about to be crowned with success. The investment in United States stocks which pay interest in gold, and of which the principal is payable in gold, offers an enormous profit present and prospective, and when once the current of confidence flows back upon us from Europe, we shall have no difficuly in resuming specie payments as early as the most sanguine could hope.

The Government agent reports the sale of $2,220,250 five-twenties, January 11. Deliveries of bonds are made to December 15. The sales for the past week were over $12,000,000. Less than $40,000,000 remain unsold.

The five per cent. notes have all been delivered to the banks who loan them to their customers upon interest, and take them in deposit at par. The Secretary of the Treasury has, however, given notice that if the coupons are cut off they cannot be received at the Sub-treasury for 5-20's.

The aggregate exports of product merchandize for the week ending on Tuesday, were $2,474,055, exclusive of specie.

The business of the Sub-treasury was: Receipts, $6,056,481 08—for Customs, $124.000; Payments, $5,679,700 04; Balance, $38,946,837 15.

The deposits for 5-20's were $2,100,000, on Tuesday.

The coupons on the mortgage bonds of the Central Pacific Railroad Company of California, will be paid on and after the 1st of February, in gold coin, less government tax, at the office of Eugene Kelly & Co., 36 Wall street.

The Ætna Fire Insurance Company has declared a semi-annual cash dividend of 4 per cent., payable on demand. Also a scrip dividend of 50 per cent., payable on the 15th proximo. Also an interest dividend of 6 per cent. in cash, payable on demand. All free of Government tax.

The Erie Railway Company have declared a semi-annual dividend of four per cent. on the common capital stock, free of the U. S. income tax. Also a dividend of three and one-half per cent. on the preferred stock, the company assuming and paying the U. S. income tax out of the undivided earnings belonging to the preferred stock account. Both payable at the Treasurer's Office, Erie Place, on the first day of February.

The Long Island Railroad Company have declared a quarterly dividend of one and a half per cent., free of Government tax, payable on the 1st day of February, at the Bank of North America, New York.

The Marietta and Cincinnati Railroad Company have declared a semi-annual dividend of three per cent. on the first preference shares. Also a dividend of three per cent. on the second preference shares, will be paid in shares of the same class. These dividends are payable on the 10th of February.

The Milwaukee and St. Paul Railroad Company have declared a semi-annual dividend, of three and a half per cent., on the preferred stock, payable, less Government tax, on the 1st of February.

The Central Railroad Company of New Jersey have declared a quarterly dividend of 2½ per cent., payable on the 15th inst.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ The Liverpool Chamber of Commerce is endeavoring to make itself a financial centre, so as to render it more independent of London. It therefore proposes to establish a clearing house, and branch banking houses in different parts of the city, to encourage the negotiation of foreign bills of exchange drawn directly on and payable in Liverpool, and to receive remittances also payable there. Correspondents abroad are to be offered advantages if they shape their business accordingly.

Atlantic and Great Western Railway.

It appears that the Atlantic and Great Western Railroad is now completed to Galion, Ohio, forming a connection with the Pittsburg, Fort Wayne and Chicago at Mansfield, and with the Bellefontaine and Indianapolis at Galion. The works between Galion and Cincinnati are also nearly completed. This line will join the Ohio and Mississippi Railroad at Cincinnati, thus connecting St. Louis with New York by one continuous track of six eet gauge—a distance of twelve hundred miles.

☞ We would call the attention of the Railroad and Steamship Companies, to the advertisement of TILLOTSON & Co., in another part of the paper. Although but a new concern in the supply business, they have by attention and promptness to orders, placed themselves on a footing with the first class houses in this line. They have also Agencies of English Manufacturers that are very important for Railroad officers to examine into.

A call at their rooms No. 16 Broadway will prove not only agreeable but very interesting.

Philadelphia and Reading Railroad.

The business of the Philadelphia and Reading Railroad Company for the month of November, 1862 and 1863, has been as follows:

	1863.	1862.
Received from coal.	$618,855 78	$356,406 54
Do. merchandise.	54,234 54	46,644 60
Do. travel, etc. ..	73,864 45	63,505 85
	$746,954 77	$466,556 99
Transport'tion, roadway, dumpage, renewal fund, and all charges	289,154 78	182,931 81
Net profit for the m'th	$457,799 99	$283,625 68
Do. previous 11 mos.	2,878,942 70	1,812,149 13
Total net profit for 12 months	$2,336,742 69	$2,095,774 81
Increase for 1863		$1,240,967 88

For the last three official years the gross earnings of the Philadelphia and Reading Railroad thus compare:

Month.	1862-'63.	1861-'62.	1860-61.
Dec.	$454,826 29	$278,219 41	$249,032 05
Jan.	335,685 07	192,215 87	161,106 15
Feb.	361,834 46	217,161 20	160,538 46
March ..	396,771 22	244,422 65	191,266 25
April ...	429,929 43	258,674 14	252,154 28
May	505,516 92	283,996 37	263,917 49
June....	464,809 33	254,284 87	270,051 27
July	451,884 57	388,724 69	289,986 81
Aug. ...	574,485 83	414,707 17	265,358 15
Sept. ...	714,302 10	448,994 22	234,456 04
Oct.	815,902 03	463,872 64	276,208 91
Nov.....	746,954 77	466,556 99	291,762 87
Total..	$6,252,902 02	$3,911,830 22	$2,905,838 73
Incr'se.	$2,341,071 80	$1,005,991 49	

Incr'se in 2 years, $3,347,063 29 or 115.21 per ct.

☞ Small turbine wheels are beginning to be applied to do the heavy hand work in kitchens, wherever there is a sufficient head of water. The apparatus is easily attached to any water pipe.

Convention of Railroad Managers.

A meeting of railroad managers was recently held in Chicago for the purpose of taking into consideration the propriety of moving in the matter of advanced transportation rates for Government freight. A memorial was adopted setting forth that everything which enters into the cost of transportation has increased so that the expenses of railroads are now 35@50 per cent greater than at the time the present rates were adopted, and they are no longer remunerative. A resolution to hold a convention on the subject, at Washington, on the 13th of January, was adopted, and the following gentlemen were appointed to represent the Chicago railroads therein: W. H. Osborne, Illinois Central Railroad: R. N. Rice, Michigan Central, James Robb, Chicago and St. Louis; S. W. Chapman, Cincinnati and Chicago Air Line; M. L. Sykes, Michigan Southern; Wm. B. Ogden

Chicago and Northwestern; G. W. Cass, Pittsburg, Fort Wayne and Chicago.

Location of the Pacific Railroad.

Governor Evans of Colorado who speaks from personal observation, has addressed the managers of the Pacific Railroad, on the subject of its location. We publish a full report of his remarks in the JOURNAL, both for their intrinsic merit, and because they fully bear us out in our previous expressed opinions on the value of this territory.

ANNUAL REPORT OF THE AUDITOR OF THE State of New York, on the condition of the Canal Department.

We give a synopsis of this minute and valuable report, at as great length, as our crowded space will admit. It is a document which will not only attract attention, but become the basis of future legislation on the subject of which it so ably treats.

Contracts for Exemption from Liability for Negligence.

WHAT IS A FREE PASSENGER.—REDUCTION OF FARE.—CONTRACTS MAY BE MADE WITH PASSENGERS RIDING AT A REDUCED RATE, FOR THEIR ASSUMPTION OF ALL RISKS.

In the highly important case of Bissell against the New York Central Railroad Company, the Court of Appeals of this State has decided that railroad companies may relieve themselves from all liability for negligence, by special contract with persons riding on trains with freight shipped by them, free of extra charge. The facts of the case were as follows: The plaintiff sued as administratrix for the negligent killing of her husband while a passenger on the defendants' railroad. Bissell, the decedent, made in the name of his firm, Taylor & Bissell, a written contract with the defendants at Buffalo, which recited that in consideration that the defendants would transport certain stock, at what the contract styled the reduced rate of $70 per car load, the freighters agreed to take upon themselves the risk of injuries the cattle might receive by escaping, maiming themselves, and other risks therein enumerated. Taylor & Bissell undertook to load, tranship, and unload the cattle at their own risk, the defendants furnishing necessary laborers to assist. It was further agreed "that the persons riding free to take charge of the stock, do so at their own risk of personal injury from whatever cause." Two car loads of cattle were shipped under this contract, and Bissell took passage in a car attached to the stock or cattle train which carried them. He was furnished with a ticket headed "Cattle Dealer's Ticket on Passenger Train," by which the defendants directed their conductors to "pass Taylor & Bissell, owners of two cars of live stock from Buffalo to Albany." On the back of this ticket was printed "Notice. The owner of stock receiving this ticket assumes all risk of accident, and expressly agrees that the company shall not be liable under any circumstance, whether of negligence by their agents, or otherwise for any injury to the person, or for any loss or injury to the stock of said owners, shipped by stock or freight trains."

There was a motion for a non-suit which was denied under exception by the defendants. The judge charged that if the jury should find that the death of Bissell was caused by the gross or culpable negligence of the defendants their verdict should be for the plaintiff; to which the defendants took an exception. The plaintiff had a verdict for $5,000. The judgment thereon having been affirmed at general term in the seventh district, the defendants appealed to this Court.

SELDEN, J.—The following positions appear to be settled in regard to the duties and responsibilities of railroad corporations engaged in the transportation of persons and property in this State.

1. In regard to the transportation of goods they are subject to the absolute responsibility which rests upon common carriers, and therefore are insurers of the safe carriage and delivery of the goods, except against accidents towards the production of which no human agency has contributed.

2. In the transportation of living animals they are relieved from the responsibility for such injuries as occur in consequence of the vitality of the freight, so far as injury could not by the exercise of diligence and care be prevented; in other respects their responsibility in regard to stock is the same which rests upon them in regard to goods. (Clark *vs.* Rochester and Syracuse Railroad Company, 14 N. Y., 570.)

3. In regard to the transportation of passengers they are not in any respect insurers, but are answerable for any injuries to their passengers against which the utmost skill and foresight could guard. (Bowen *vs.* New York Central Railroad Company, 18 N. Y., 408.)

4. This responsibility embraces not only want of care and foresight on the part of the immediate agents of the corporation, but also any defects arising from want of care or skill in the manufacturers of the machinery or materials used in the structure or operation of the road, whether discoverable by any exercise of care and skill on the part of the immediate agents of the road or not. (Hegeman *vs.* the Western Railroad Company, 3 Kern., 9.)

5. The companies cannot limit their responsibility by any notice, though expressly brought to the knowledge of those whose persons, or whose property they carry; but they may secure such limitation by express contract with those persons. (Dorr *vs.* New Jersey Steam Navigation Company, 1 Kern., 485.)

6. Such limitation may be agreed upon in relation to the safety of property under any circumstances, whether carried gratuitously, or for reward; and in relation to the safety of persons when they are carried gratuitously. (Wells *vs.* New York Central Railroad, 24 N. Y., 181; Perkins *vs.* Same *id.*, 196.)

7. In such contracts the companies may lawfully be relieved from all responsibility for negligence or misconduct of their subordinate servants and agents; the question being as yet unsettled what servants or agents if any, are to be regarded as so directly representing the company, that a contract relieving the company from responsibility for their negligence or misconduct may not lawfully be made. (Cases cited above.)

8. Whenever the companies are authorized to relieve themselves by contract from liability for the negligence of their agents, no distinction is made in regard to the degrees of negligence against which they may stipulate. (Same cases; also Wells *vs.* Steam Navigation Company, 4 Seld, 375.)

The questions which arise in this case are:

1. Did the contract on which Mr. Bissell was traveling when the accident occurred, in its terms throw upon him the risk of personal injury from such circumstances as caused his death?

2. If the contract embraced such a case, was it valid and binding?

In regard to the first question, I think he must be regarded as traveling by virtue as well of the ticket as of the contract. They were both delivered at one time, and together constitute the contract. Each may be referred to in arriving at the terms of the whole contract which was in effect, but one and not two.

That which is called the ticket was a part of the contract which Bissell might or might not have entered into. The effect of it was to give him the privilege of riding on the stock train, or on the passenger train at pleasure; and when he made that part of the contract he was bound by all its terms as well as the company. The conditions as to the personal risk under the head of "notice," on that ticket are not confined to such risk when riding on the passenger train, but extend to all personal risks when riding on any train under the contract treating it as one. The language is "the owner of stock *receiving this ticket* assumes all risk of accident;" and that risk as stated covers all injury to stock or person without reference to the train by which the person should be carried.

I do not, however, regard this as material, because the terms of the other portion of the contract appear to me equally broad. The expression "at their own risk of personal injury from whatever cause," in connection with the other words of the contract cannot be held to exclude any injury which the party might receive, however occasioned while riding or acting under the contract, and against which the company had a right to protect itself by contract.

The remaining question is, was the contract valid? And first, was Bissell "riding *free* to take charge of the stock," within the meaning of those terms as used in the contract? It is not claimed that he paid anything for his passage aside from the $70 per car load which he paid for carrying the cattle. He was therefore doing exactly what the parties intended when they used the terms "riding free," and was bound by the contract to ride at his own risk as to personal injury. So far as the parties to the contract were concerned he was "riding free;" whether in view of the law he was carried by the company gratuitously so as to authorize the company to relieve themselves from the consequences of negligence in his transportation, if their power to do so was limited to passengers thus carried is another question. If it were necessary to decide that question, I am not prepared now to say what my conclusion would be. But I do not regard it as necessary.

The principle being established that railroads may by contract relieve themselves from the negligence of their servants in the carrying of passengers when carried gratuitously, I can discover no rule of law, or of public policy to prevent their doing it on any other terms which may be agreed upon between them and their passengers, and which shall furnish a consideration to the passengers for the risk which they assume.

All the arguments which have been urged against the propriety and safety of allowing car-

riers to make such contracts apply with as much force to cases where passengers are carried gratuitously as where they are carried for reward. So far as the public are concerned the question of reward is one of indifference; and so far as the parties are concerned, if they are allowed to make the contract at all, they are the judges of the amount of consideration which will compensate them for assuming the risk, whether the whole fare or half, or an eighth, or any other proportion, or other consideration. I apprehend it is entirely safe to leave them to fix the terms. (1 Kern, 192.) I refer of course to actual contracts, and not to attempted limitations of the carriers' responsibility by means of endorsements upon tickets not assented to by the passengers who receive them. If there was no limitation to the power of railroad companies in making such contracts there would be great danger of public inconvenience in the establishment of such rule; but even then after finding the law to be settled, that such companies could protect themselves against liability by express contract, I should doubt the propriety of attempting to prescribe by judicial decision, how great the consideration should be to render such contracts valid.

The legislature however has not left the matter at large, but has probably done all which is required for the protection of the public, or of individuals in this respect by guarding them against the necessity of negotiating with any railroad company on this subject. On the offer by a passenger of the fare prescribed by law, the company is bound to transport him and to assume all the risks which fall within the appropriately stringent rules above adverted to; and in case of refusal such company is made liable for all damages resulting from such refusal. (Laws of 1850, ch. 40 § 36.) But if any one wishes to travel with greater economy than by paying the fare which the legislature has prescribed (or in the absence of legislation which usage established, 3 Paige 75), as the reasonable compensation for the transportation and risk, and prefers to pay less or to pay nothing, and to assume the risk himself I do not think there is either danger or impropriety in allowing it to be done; and there is no principle upon which my mind can rest to justify the position that courts shall recognize such a contract as valid, when the company in consideration of the passenger's assuming the risk agrees to carry such passenger without fare and declare it void when for the same consideration the company agreed to carry him for half fare. The two cents a mile which the defendant is allowed by law to charge for carrying way passengers, and three cents a mile for other passengers is what the law adjudges, (in the absence of usage fixing a less sum,) to be a reasonable compensation for the expense of carrying the passenger including the risk imposed by law of his qualified insurance against injury. To hold that the defendant and the passenger may lawfully agree that the former shall be relieved from the risk and the latter assume it, and then to add that no such agreement shall be valid unless the defendant gives to the passenger for assuming the risk, the full compensation which the law allows it to receive for risk and transportation united would not seem to be reasonable. I should regard it as far more rational to deny to the parties all power to contract on the subject.

Like all contracts to render such a one valid it is indispensible that it have some consideration which it would not have if the passenger paid the full fare fixed by law. That is all which the company is allowed to receive for the service and the risk united, and it can no more demand the full compensation of both for the service alone than it could demand the fare for a hundred miles for carrying a passenger fifty miles. If the service is reduced the amount of reward must be reduced in proportion; and if the company is relieved from the risk, it must make compensation for that relief by the reduction of fare or otherwise. The amount of which compensation like the consideration for all contracts must be left to the agreement of the parties. The law has wisely for the protection of passengers guarded them against any necessity for negotiation on this subject. If they choose to do it voluntarily I can discover no ground for saying that they may not make such terms as they please. I entertain no doubt therefore that the contract in this case was valid.

It appears from the case that the defendants' superintendent testifies on the trial that "the price of fare for cattle freight was uniform all one rate." From this it has been urged by the plaintiff's counsel that Bissell was neither "riding free" nor at a reduced rate of fare at the time of the accident. I have already given my interpretation of the contract in this respect which does not accord with this position but whether such interpretation is correct or not, the position of the counsel cannot be made available now it not having been presented on the trial. The trial appears to have proceeded on the ground that the intestate was traveling on a free ticket, and that the only question in doubt was whether the negligence of the defendants' agents was such as to render the defendants liable notwithstanding the intestate was "riding free" under an engagement on his part so to ride "at his own risk of personal injury from whatever cause." If he in fact paid as a passenger the full fare allowed by law or the usual fare if less than that allowed by law without reduction on account of his engagement to assume such risk, in my opinion the engagement would be without consideration and not binding upon him or his representative. That question will doubtless be open to the plaintiff on a new trial, but as it was not presented so far as the case shows at the former trial it cannot be considered here.

It is insisted that if the contract was valid it only relieved the defendants from responsibility for the negligence of the persons having charge of the train on which Bissell was riding. This is a mere question of interpretation of the contract. The question is what did the parties intend by the words which they have used? The principle being established that parties may lawfully enter into contracts of this nature, there is no limit to the extent and variety of modification which may be given to such contracts. The passenger may assume all risks arising from the condition of the track or from the condition of the locomotives or of the cars, or all risks from the negligence of the agents of all of them or any class of them. There is no danger which the party may encounter resulting from the journey which he may not assume the responsibility of, and he may assume all or any portion of it.

This contract in itself exemplifies all this. In regard to the stock the owner assumes certain defined risks confined to a very narrow circle and all the risks beyond those are still charged upon the company. On the other hand with regard to "his own risk of personal injury," he assumes it by words as comprehensive as the language affords, "from whatever cause;" and he "expressly agrees that the company shall not be liable under any circumstances whether of negligence by their agents or otherwise for any injury to the person." I can image no injury which the passenger could receive as the consequence of his journey against which the company has power to protect itself by contract which is not embraced by these terms and which he has not assumed. The terms of the contract in this case supply what was wanting in the case of Wells *cs.* The Steam Navigation Company (*supra*) to exempt the carrier from responsibility for the negligence of agents.

The 36th section of the general railroad law which has already been adverted to, has been relied upon as establishing the defendants' liability in this case. That section is in the following words: "Every corporation shall start and run their cars for the transportation of passengers and property at regular times to be fixed by public notice; and shall furnish sufficient accommodations for the transportation of all such passengers and property as shall within a resonable time previous thereto be offered for transportation at the place of starting, and the junctions of other railroads and at several stopping places established for receiving and discharging way passengers and treights for that train; and shall take transport and discharge such passengers and property at, from, and to such places on the due payment of the freight or fare legally authorized therefor; and shall be liable to the party aggrieved *in an action for damages for any neglect or refusal in the premises.*"

The agreement based upon this statute if it proves anything proves too much. If that section is applicable to this case to sustain the position for which it is cited notwithstanding the terms of the contract under which the intestate was carried I do not see why it would not render railroad companies absolutely "liable to the party aggrieved in an action for damages for any neglect" in the transportation of persons or property. It would seem to make them insurers of the safety of passengers as they were at common law of the safety of freight, against all damages not arising from the act of God or the public enemies, and to superadd to that stringent rule of liability a prohibition against the modification of it by contract. Such an application of the statute would show all the decisions of this court sustaining the right of railroad companies to reduce the extent of their liability by express contracts to have been erroneous. But if the statute should receive an interpretation more favorable for the carriers as not increasing their liability, it can have no force in support of the argument in aid of which it is invoked, unless it is held to prohibit contracts by carriers reducing their liability; which would render it equally in conflict with the decisions above mentioned. The true object of this statute has as it appears to me, been correctly declared in this court viz, "to bring these railroad lines within the general principle of common carriers with such variations as the nature of the business required.'

(2 Kern., 250) I do not think it was any part of that object to add to their general responsibility as carriers or deprive them of the power which they possessed prior to its passage of making contracts in regard to such responsibility.

There are several exceptions in the case which properly present the principal points which I have considered and which are well taken.

The judgement should be reversed and a new trial granted.

Address of Gov. Evans of Colorado on the Location of the Pacific Railroad.

Delivered before its Managers, December 28, 1863.

GENTLEMEN:—I appear before you to urge the importance of locating your road upon a route that shall pass through Colorado Territory. In doing this I shall confine my remarks to a consideration of the question as affecting the interests of your company alone. I shall discuss it as a railroad man speaking to railroad men, who have in charge, for the General Government and their stockholders, the greatest enterprise of the kind that has ever been undertaken. Fortunately the interests of the people of the country at large, represented by the General Government, requiring the location to be made so as to foster the general prosperity and accommodate the largest possible number of the people, are identical with those of the stockholders requiring it to be so located as to secure the greatest amount of traffic and travel when completed.

Every intelligent railroad man will, I think, admit the correctness of the following propositions regarding the location of the Pacific Railroad:

First: Its main trunk line, on which is to be carried all the business of its branches, should extend as far east as is practicable.

Second: The trunk line should be located so as to leave no inducement for those interested in either branch to extend it westward of the junction.

Third: It should be on the route on which the country is best adapted to settlement, and its construction, maintenance, and protection.

Fourth: It should be on the route where the largest amount of good lands are open to preemption under the land grant to said company.

Fifth: It should reach the base of the Rocky Mountains at such point as to secure the business both of New Mexico on the South and Idaho on the North.

Sixth: It should pass through the most extensive coal districts, and especially if found in conjunction with an abundance of good iron ore.

Seventh: It should pass through the immensely rich mining regions of Colorado and Nevada Territories and the large settlements in Utah, especially as they are on the line of the most fertile valleys and the best watered and timbered country in the Rocky Mountains.

Eighth: If practicable, it should pass the snowy range through a tunnel, instead of surmounting it on the surface, in order that the range may collect the snows above, instead of upon its track.

Believing that I have your assent to each of these propositions, I proceed to indicate the route which, from extensive inquiry, I conclude fully meets them all.

My remarks will be better understood by reference to the accompanying map, made, as far as possible, from actual surveys and from my own and the reports of other explorations of the country along the line indicated.

It will be observed that this line, including what is called the Iowa branch which being under the same management and control with the main trunk line may be regarded as a part of it, begins, where already fixed by the President, at or near Omaha City in Nebraska Territory. Thence following down the Missouri River a few miles, it strikes the wide level bottom of the Platte River, following up that stream nearly west 25 miles to the mouth of Salt Creek; thence up that stream by a broad level bottom, and passing the great Salt Springs 40 miles to its most southwesterly source; thence over a rolling country southwesterly 75 miles to the great bend of the Republican River, making in all to this point a distance of only about 140 miles to the proposed point of junction with the Kansas branches; thence up the valley of the Republican nearly due west over 100 miles to the 100th degree of west longitude, the place indicated in the bill for the commencement of the main line of the road; thence following the valley of the same stream nearly due west to its source, about 200 miles; thence nearly due west over a rolling country 100 miles to Denver City, making from the Missouri River to Denver, 540 miles; thence up Vasques Fork to the Snowy Range, about 50 miles, where a practicable point for tunneling has been found by actual surveys,* or up the South Fork of the Platte through the South Park, or up the Boulder Creek as may upon actual surveys be found the most practicable; thence through the Snowy Range to the valley of the Grand or Blue River in the Middle Park, about 25 miles; thence down Grand River and through the vallies of the White River or that of the Bean River which run parallel to Green River; thence up the valley of the Uintah River and down the Timpanagus River to Provo City, 40 miles south of Great Salt Lake, in Utah Territory, a distance by actual measurement from Denver of 425 miles, making from the Missouri River to Provo City, a distance of only about nine hundred and sixty-five miles; thence, by the most feasible route by way of the Washoe mines, in Nevada Territory, to San Francisco, in California. As any route likely to be adopted will pass Provo, I do not deem it of importance to speak of the route beyond that point at present.

The alignment of this route will show it to be as short, if not shorter, and as direct as any other that is practicable between Omaha and Provo City.

It will be observed that this line would join the branches from Kansas City and Leavenworth and that of the Hannibal and St. Joseph, from Atchison, at the great bend of the Republican, over one hundred miles east of the 100th degree of west longitude, the place indicated in the bill for the junction of its branches. It would, therefore, give to your road the entire business of those branches for that distance, which would otherwise be lost to it. The great advantages of this are too apparent to need elucidation. The local business of the road on the plains, which must be a pastoral country for all time, would be as well secured by one as by two or more parallel lines. It would shorten those branches so as to render the probability of their extension westward very remote.

It would place the line far enough South to avoid any just ground of complaint from the people on account of its location being sectional or partial to local interests, while the management being in the hands of its stockholders would secure to those great interests which furnish the means of its construction every advantage that could be derived from a different location. And by this route alone can Chicago and the Northern route to the East secure beyond the danger of its early diversion the important trade and travel of the Territories of Colorado and New Mexico.

With the bridge across the Mississippi, and the one that must be constructed over the Missouri River, cars can run by this route from Chicago, and even from the East to San Francisco, without breaking bulk, or reloading, which will doubtless secure the Eastern freight and travel without danger of diversion. The character of the country west of Sioux City is such that the branch from that point would be of far more practicable value to your company, if it should follow down the valley of the Missouri to Omaha, while it would also be of more importance to the country at large, and be cheaper of construction.

Thus it will be seen the route indicated meets the indications of my first and second propositions most fully.

By reference to Lieut. Bryan's report of an exploration for a wagon road route from Fort Riley to Bridger's Pass, published in the Executive Documents from the War Department for 1857, and the statement of Mr. Ebert, Civil Engineer, who was a member of the party that made a railroad survey up the Republican from St. Joseph, Mo., in 1860, which I had the honor of filing with your Secretary at the meeting of the Commissioners of the Union Pacific Railroad Company in Chicago in 1862, as well as from various other authentic sources, it may be learned that the country on the Republican is by far the best watered, best timbered, and most fertile of any belt extending across the plains. It is, therefore, better adapted to extensive settlement. And the timber being of better quality and more abundant, ii is better adapted to the construction and maintenance of the road; while the valley, being wide and level, like that of the Platte River, offers no greater difficulty in grading.

The lands on this route nearly all the way, unlike those on the north side of the Platte River, have not generally been taken up by private parties in anticipation of your location.

At the great Salt Springs, which are among the best and most extensive in the county, would be developed by this location a large settlement and an extensive and profitable traffic for the road. At the junction of the branches, on the great bend of the Republican, would be built up an important city, which might be on your own lands, and the branches passing through coal fields at no great distance east from this point, could supply fuel in abundance and at cheap rates for the road and for the use of settlements.

Leaving the mining region for comment at another place, this route meets most fully the indications in my third, fourth and fifth propositions.

The excellent roads along the eastern base of the Rocky Mountains being equal to the best graveled or macademized roads in the States, would give your road if centrally located, the best opportunity of securing the trade of that entire region. But by reference to the map of the United States, it will be seen that there is much more danger of losing the trade from the South than from the North. The mountain range extends in a northwest direction to the mines in Idaho, while it runs nearly south to New Mexico from the place where the line I propose strikes the base of the mountains. To locate the road north of this route would certainly lose it the trade and travel of New Mexico, while even a more southerly route would secure that from Idaho.

But the wealth of the mineral regions in Colorado Territory, through the centre of which the line I propose would pass, their rapid development, and the fact that they have already in a very short period of time induced extensive permanent settlements, and developed an immense trade, is an argument in favor of this route of the first importance.

While in Nevada Territory I believe they have the richest silver mines, I am confident that in Colorado Territory are the most extensive as well as the richest gold mines yet discovered. And they are inexhaustible, so far as can be ascertained, and therefore will call to them permanent and prosperous settlements.

And it is not an unreasonable proposition that in five years from this time Colorado will produce more gold than California. In proportion to her population, she is doing so to-day.

As an evidence of her great prosperity it is only necessary to state the facts that her people mostly went there poor, and are generally well off now. But little capital has been taken there from abroad, and yet her extensive permanent improvements are a wonder. And while importing her entire supply of goods and machinery and a large part

---

* The notes of this survey which was made by Surveyor-Gen. Gase, in 1862, showing the practicable grades from Denver City to a point west of the Snowy Range, I filed with your Secretary at the meeting of the Commissioners at Chicago. It is reported that a better route has since been found.

of her subsistence at great expense, her exports of gold are sufficient to keep the balance of exchange constantly in her favor. During the past year Exchange on New York in Colorado has ranged at from two to five per cent discount, and is firm at the last figure to-day. This is a state of exchange that never obtained in California.

From statistics collected by Mr. T. L. Mackoy, at the toll-gate on the South Fork of the Platte River, I am able to estimate pretty accurately that the emigration into Colorado during the past Spring, Summer, and Autumn exceeded 15,000 souls. The tonnage of freight by wagons did not fall short of 15,000 tons, and the cattle driven into the country for grazing and stock raising exceeded 20,000 head.

When we add to the inducements for the development of the last year the fact that the mines heretofore are attracting large amounts of capital from the East for working them, which has heretofore been wanting, it is fair to presume that a much more rapid increase in wealth, population and trade will be the result next year.

To avoid by passing around it such a center of business for your road and leave it to one side to stimulate, as it certainly would, the construction of a rival line when you can pass through and secure it all would not seem to be the part of railroad wisdom. And I repeat that by this route alone can Chicago and the Northern lines of railroad connection with the East secure permanently the business of Colorado or attract that of New Mexico from its more southerly channels.

Nor are these all the advantages offered in this region. On this line near the base of the mountains are found the most extensive beds of excellent bituminous coal, from which Denver City and the surrounding country have been supplied with a large part of their fuel for several years. And in the same vicinity are extensive beds of excellent iron ore, from which iron of a good quality has been manufactured in a small way the past year.

The exploring party, under Lieut. Berthoud, that passed over this route from Denver City to Salt Lake in 1861, reported it to be well timbered the entire distance, and near the west line of Colorado Territory they found extensive beds of valuable coal, a specimen of which, largely composed of resin, I have in my office at home. Thus it is seen that this route fully meets the indications of my fifth, sixth, and seventh propositions.

The advantages of passing the great cordillera of the Rocky Mountain chain by means of a tunnel, that shall penetrate it one or two thousand feet below its summit, cannot be too forcibly impressed upon your minds. As the summit, whether broad or narrow, and whether at a greater or less elevation, collects the greater part of the snows that fall in its vicinity, it is found that when it is high and narow it stands as a great bulwark for the protection of the valleys below. Therefore, if you can approach it by those valleys, on either side, and penetrate it by a tunnel, even at a higher attitude, you the most effectually avoid the snows that are liable to obstruct the road, while by any pass that would give a surface transit across the range, the snows will inevitably accumulate on the track to the extent of insuperable obstruction in the Winter. On the route proposed the line would rise rapidly to the tunnel and descend on the other side by protected valleys and through the remainder of the route, have less altitude than by any other route if our information in regard to it is correct. The continuance of the line for a long distance on a high altitude by any other route yet explored is inevitable. The arrangement of the valleys of the Grand, White, and Uintah rivers, so as to give low connecting valleys extending in an east and west line from the Middle Parke to Provo City, is a natural indication of a railroad route quite equal to the engineering of the Buffalo claimed by Col. Benton for the South Pass.

This route therefore fully meets the indications of my 8th proposition.

The comparative expense of the construction of the road by this, with any other, can only be settled by the calculations of the engineer, after careful surveys are made. But it is plain that the expense of construction is not the paramount consideration. A cheap line, without sufficient business to pay, would compare but poorly as an investment with a more expensive one that shall be laid where its teeming traffic and travel would yield a large interest upon the money expended in its construction.

Your road, if located as I have indicated, and completed to the base of the mountains in Colorado, I have no doubt would at once pay as large an interest on the cost of its construction as any other line of equal length in the United States, for it would at once carry the entire trade and travel across the plains for New Mexico, Colorado, and Idaho Territories on the east, and of Arizona, Utah, and Nevada Territories, and the Pacific country on the west, and which would all be very largely increased by the greater facilities thus offered for the overland route.

Aside from this question of pecuniary advantages to your company, the early construction of the line that far has the promptings of an exalted patriotism. It would open the facilities for the development more rapidly within our country at the time of her greatest need of the most extensive as well as the richest mineral country yet found on the surface of the earth. The country from the eastern base of the Rocky Mountains to the Pacific Ocean, and from the line of British Columbia on the north to Mexico on the south, say a thousand miles by a thousand miles in extent, is all mountanious, and explorations are rapidly demonstrating that throughout this vast country silver and gold mines of fabulous richness, and immense beds of copper, lead and iron ore are to be found. Any enterprise that has the influence to facilitate their rapid development for the relief of our country at this time, as your road would certainly do, should be regarded by every loyal citizen of the United States with sentiments of patriotic gratitude. The resources of the nation being the wealth of its citizens, of course whatever rapidly enriches the latter fills the coffers of the former.

And as the mineral country cannot be largely productive of the means of subsistence, the facilities your road will offer for their transportation will jointly produce an enormous increase of the mining interests, and proportionally of the traffic on the road.

BILLS ON LONDON,

At Sight, or Sixty Days' Sight, on the

ALLIANCE BANK

Of LONDON and LIVERPOOL, Limited.

CAPITAL, THREE MILLION POUNDS STERLING,

For Sale in Sums to Suit Purchasers, by

L. P. MORTON & CO.,

35 WALL STREET.

GOVERNMENT SECURITIES, GOLD, STOCKS AND BONDS, Bought and Sold on Commission.

OFFICE OF THE ILLINOIS CENTRAL R. R. Co.,
New York, January 5, 1864.

Resolved, That the holders and owners of all shares of the stock of this Company, and of all obligations of the Company or provisional certificates authorizing the entry of shares thereof, upon which ninety dollars per share has not been paid, be required to complete the payment of ninety dollars per share thereon prior to or upon the twentieth day of February next, at the office of the Treasurer of this Company, in the City of New York, and that in default of such payment the shares will be sold at public auction, pursuant to Section four of the Charter of the Company.

By order of the Board,

613 L. A. CATLIN, Secretary.

OFFICE OF THE NORTH SHORE RAILROAD Co.,
FLUSHING, January 12, 1864.

PROPOSALS FOR EXECUTING THE GRADUATION, bridging, masonry and track laying upon the North Shore Railroad, will be received until 12 noon, the 31st January, 1864. Plans and profiles may be seen and schedules, specifications and blank bids obtained, by application at this office. All proposals must be directed to the Engineer of the North Shore Railroad Company, Flushing. By order

213 THOS. B. MORRIS, Engineer.

THOMAS TURTON & SONS,

SUCCESSORS TO

WM. GREAVES & SONS,

Sheaf and Spring Works, SHEFFIELD.

STEEL AND FILE WAREHOUSE,

83 JOHN STREET, NEW YORK.

STEEL for Tools, Taps, Punches, Dies, Piston Rods, Crank Pins, Springs, Shafting, Connecting Rods, Spindles, etc.

Files marked "Wm Greaves & Sons," and "T. Turton," of Superior quality.

Wm. Greaves & Sons' Superior Edge Tools.

Agent, **WM. FINDLAY,**

SCHAFFER & BUDENBERG,

ENGINEERS AND MANUFACTURERS OF

Patent Steam & Vacuum Gauges,

REVOLUTION COUNTERS, INDICATORS, &c,

Works at Buckau-Magdeburg, Prussia.

Branches: 92 George St., Manchester; 202 Hope St., Glasgow; 6 Rue de Choiseul, Paris; and

61 CEDAR STREET, NEW YORK.

About 50,000 of these Gauges have been manufactured and sold. The rapidly increasing demand for them demonstrates their superiority over all others hitherto known.

Chicago & Great Eastern Railway Company,

FIRST MORTGAGE BONDS,

FOR $2,000,000.

SUBSCRIPTION BOOKS OPENED WITH

Messrs. SCHUCHARDT & GEBHARD,

BANKERS,

No. 21 NASSAU ST., NEW YORK.

THE CHICAGO AND GREAT EASTERN RAILWAY COMPANY now offer for sale ONE MILLION ONE HUNDRED THOUSAND DOLLARS of their FIRST MORTGAGE BONDS, in sums of One Thousand Dollars each, maturing in thirty years, bearing interest at the rate of seven per cent. per annum, payable in the City of New York on the first days of April and October in each year.

These Bonds are secured by a First and only Mortgage on the property, income and franchises of the Railway Company, executed to Frederick Schuchardt and Henry Morgan of the City of New York, Trustees.

The remaining Nine Hundred Thousand Dollars of the Bonds are set apart and remain in the hands of the said Trustees, for the purpose of being exchanged for the indebtedness of the Chicago and Cincinnati Railroad Company, running from La Crosse to Logansport; this effected, the $2,000,000 will form a First and only Mortgage on a line of road 110 miles in length, extending from Chicago to Logansport, where it connects with the Cincinnati and Chicago Air-Line Railroad, forming the shortest line by 40 miles between Chicago and Cincinnati, and by 36 miles the shortest line between Louisville and Chicago.

It will also open, in connection with Roads now in operation, entirely new and very direct lines from Chicago to New York, Philadelphia, Baltimore, and all Eastern Cities. The distance between Chicago and New York by this route being shorter than by either of the existing lines via Dunkirk or Buffalo.

The road is now under contract, and the most strenuous efforts are being made to have it open for traffic during the summer of 1864.

The interest on the Bonds maturing during the progress of the work has been provided for, and will remain on deposit with the Bankers of the Company, Messrs. SCHUCHARDT & GEBHARD, No. 21 Nassau st., to whom the Company refer for further particulars, and where subscription books for this loan have been opened.

401 W. D. JUDSON, President.

Dec. 23, 1863. No. 37 William st., New York.

CAST STEEL.

MANUFACTURED BY

NAYLOR, VICKERS & CO., SHEFFIELD, ENGLAND.

CAST STEEL TYRES WITHOUT WELD,

Reversible Crossings and Frogs, Disc Wheels, Pistons and Piston Rods without weld, Crank and Straight

AXLES, AND EVERY DESCRIPTION OF STEEL FOR RAILWAY PURPOSES.

STEEL CROSSINGS have been in use more than three years with very little perceptible wear, in places where the ordinary ones had to be replaced every four months. They have been estimated to be good for ten years in the worst places.

THE "VICKERS" TYRES are in constant and extensive use on almost all the Railways in Great Britain, and also on many roads in other parts of Europe. Their chief advantages are:—1. Their Durability: they will outlast any Iron Tyre without being turned, and for this reason are cheaper than Iron Tyres (free of cost). 2. Their Safety: being without a weld they are not liable to break, and Steel is proved to be a stronger and tougher metal than any other. 3. Their Uniformity: they do not wear in flat places nor "laminate." 4. They are not injuriously affected by frost, and are guarantied to stand the severest climate.

STEEL AXLES will be found economical, because they may with safety be made much lighter than those of Iron. They will wear longer and "smoother," and will consume much less oil; nor are they liable to granulate from constant use.

For CIRCULARS, GIVING FULL PARTICULARS AND TESTIMONIALS, PRICES, etc., apply to **NAYLOR & CO.,**

421 Commerce street, Philadelphia; 99 John street, New York; 80 State street, Boston.

RAILROAD IRON.

THE undersigned, agents for the manufacturers, are prepared to contract to deliver best quality **American** or **Welsh Rails**, and of any required weight and pattern.

PERKINS & LIVINGSTON,
54 Exchange Place, NEW YORK.

OFFICE OF THE ILLINOIS CENTRAL R. R. Co., New York, January 5, 1864.

Resolved, That a dividend of FOUR PER CENT., in cash, free of government tax, upon the Stock and Cancelled Bonds scrip of this Company is declared, payable on the first day of February to the registered holders of stock and scrip at the close of business on the 18th inst.

This dividend is in lieu of and in advance of two Coupons in the full-paid stock and by terms of the contract terminates the obligation to pay Interest to the full-paid-share-holders.

Resolved, That the transfer books be closed on the 18th instant, and re-opened on the third day of February.

By order of the Board,

4t2 THOMAS E. WALKER, Treasurer.

PATENT SOLID EMERY WHEELS.

THE New York Emery Wheel Company, after a long series of experiments have so perfected the method of manufacture of their improved wheels as to be able in future to fill promptly all orders for wheels in quantities. Our invention is pronounced by all who have used our improved wheel to be superior in every respect to any method heretofore known for combining emery for cutting, grinding or polishing purposes. Our Emery oil stones are superior to the Arkansas stone. Emery hones, knife sharpeners, etc., constantly on hand. Send for circular and price list. Address JOSIAH BARTLETT. Office No. 61 Beekman st., (up-stairs,) New York.

Patent Vitreous Iron Sheathing for Ships.

Messrs. TILLOTSON & Co., No. 16 Broadway, are introducing a new kind of sheathing for vessels, especially for those iron built, floating docks, wharves, bridges &c. It is a composition of glass, fused upon small plates of iron, to a certain extent flexible, and remaining free from corrosion, or fouling by animal or vegetable substances. For many years past there have been numerous attempts to obtain this protection for submerged bodies. It appears the experiments made with this article both by the British and French naval authorities have proved entire successes, and it is now introduced into this Country by Messrs. Tillotson & Co., 16 Broadway, New York. Our readers will doubtless recollect, that fouling has almost destroyed the speed and usefulness of our iron ships, and that the blockading squadron off Charleston has been seriously damaged in this way. The bottoms of the Monitors lately cleaned, were found to have accumulated tons of oysters while lying at anchor. We happen to know that the Navy Department is experimenting on this subject, and we hope it will give this vitreous sheathing an immediate trial. Private enterprise does not require any hints of this kind.

We invite the attention of Railroad and Steamship Companies, to the advertisement of Messrs. TILLOTSON & Co., in another part of this week's paper. Although but a new concern in the supply business, they have by attention and promptness to orders, placed themselves on a footing with the first class houses in this line. They have also Agencies of English Manufacturers that are very important for Railroad officers to examine into.

A call at their rooms No. 16 Broadway will prove not only agreeable but very interesting.

A Cotton Crisis.--Possible Suspension of Specie Payments.

King Cotton having nearly ruined his devoted subjects in this country, is likely to do mischief abroad, and in a quarter of the world where he has been very scrupulously upheld in his pretensions. In other words, the most serious apprehensions are entertained in England, that a financial crisis is likely to occur there during the present year in consequence of the drain of bullion to obtain cotton from the East.

The course of this trade before the rebellion was something of this kind. The raw material was obtained in this country for a few cents a pound. It was taken to Manchester and spun into various fabrics of fine or coarse texture as the case might be, and returned to this country with often a hundred per cent. profit, according to the nature of the labor bestowed upon it, and readily sold. Thus all the varied productions of the United States, were easily obtained in exchange for our own staple, sent back to us after being manipulated in England and put into goods. The cotton supply in consequence of the war having fallen off in this direction, it has to be obtained from other parts of the world at whatever cost, and Egypt and the East Indies have accordingly been stimulated to an extraordinary production, by the extraordinary price. The Government of England always anxious about its operatives, has favored the policy of keeping up supplies of cotton to furnish employment to these persons, and through them to other classes of workingmen, from the man that holds the plough to the one who navigates the steamer. For nothing could sustain it a single day, if it ceased to have income enough to pay its enormous expenses, and meet its heavy taxation.

This purchase of cotton from the East, both an economic and political necessity has, however, produced an effect not fully foreseen. It is causing an extraordinary outward drain of the precious metals, for the reason that the countries furnishing England these supplies of cotton, will not as we did, take their pay for it in merchandize, and especially of English manufacture. On the contrary they require the hard cash for what they sell, with Oriental greed.

The producers in these countries, want in fact but little of those commodities which civilization and refinement consider necessities. Of the articles which make up the usual assorted cargo from Liverpool to the United States, the East Indian or Egyptian would find very few, of which he had need, or even understood the use. Gold he understands, and precious stones, and a few fabrics suited to his climate, but to all the rest he is quite indifferent. This state of things begins to alarm the British merchants and bankers.

We find in the Messrs. Neill's *Circular* of December 1st, some curious statements on the subject, and serious advice to the speculators in cotton to stop short in their career, if they do not wish "the fabric they have erected to topple down." We quote the following important remarks:

"A full and anxious consideration of the subject has convinced us that prices are now higher than justified by circumstances, and higher than can be maintained throughout the coming year. We will go further, and say that nothing but a considerable abatement of the present speculative mania in cotton for distant arrival, and a consequent reduction of prices, can prevent a financial crisis occurring some time during the year, for the very simple reason that the country has not in an available shape the means of paying the enormous cost of the expected supplies at the present inflated prices. It is quite possible, if not probable, that no severe pressure may be experienced for some time to come, but the longer it is delayed the more intense must it be when it comes, if a timely check be not given to the cotton market. In confirmation of this view it is only necessary to refer to the following statements of the value of the imports of cotton in previous years and their value for the coming year, if present rates be maintained and the quantity be

fairly represented by our estimate of 2,665,000 bales."

The official values of the cotton imports from 1858 to 1862, were as follows:

1858	£30,106,000
1859	34,559,000
1860	35,756,000
1861	38,653,000
1862	31,093,000
For the first eight months of the present year they have been officially valued at	26,862,000
And for the last four months of the year we take them at	23,000,000
Total	£49,862,000
But for 1864, if present rates be maintained, the value would be	£88,656,000

or nearly three times the value of the imports of 1858, which included the American crop. Little or none of those imports required to be paid for in gold, as the United States, and to a great extent, India, took returns in goods. The case must be very different with a large proportion of the now expected supplies, as they come from semi-barbarous countries, where any unusual supply of the precious metals is generally absorbed by hoarding. As the amount given for the ensuing year may appear extravagant, we give our mode of calculation:

	Bales.	lbs.	d.	£
India	1,650,000	of 360 at	21	51,975,000
Egypt	300,000	550	26	17,531,000
America	140,000	440	26	6,673,000
Turkey, Greece.	140,000	300	23	4,025,000
Brazil	190,000	190	26	3,911,000
China	200,000	200	20	3,334,000
Italy, &c.	15,000	440	23	632,000
Other sources.	30,000	200	23	575,000
				£88,656,000

It is true that a portion of this amount will be refunded from re-export, but in the meantime the capital to carry this large trade has to be found in this country, and the evil is exaggerated by the proportionately large capital involved in the manufacture and export of cotton goods to distant countries.

It may aid us to an estimate of the probable effect of such a drain upon the bullion market as these figures imply to compare the value of the expected cotton imports with that of the corn supply of 1847, which led to the monetary convulsion of that year. The latter amounted to 31,000,000*l.* an increase of about 20,000,000*l.* on the imports of the previous year—a very moderate augmentation of the drain compared with that we have now to expect.

We think that a consideration of these figures will convince the most sanguine, that if speculators persist in the determination to pay 90,000,000*l.* for a supply which, as it is already grown and must come forward, they could as readily obtain for 60,000,000*l.* or 70,000,000*l.*, except for over competition among themselves, they will be stopped short some day for want of money, and the speculative fabric they have erected will topple down on their heads. A general determination to hold aloof from speculative transactions till prices have reached a safer level would cause some loss on the moderate stock now held, but it would so reduce the strain upon the money market as to obviate danger from that source, and afford grounds for the anticipation of a profitable instead of a possibly disastrous season."

It will thus be seen that the sum of four hundred and forty odd millions of dollars will be required for the purchase of cotton during the present year, of which upwards of three hundred and thirty millions must be sent to India and Egypt alone, semi-barbarous countries as the *Circular* justly calls them, where they will be "absorbed by hoarding."

Where is this enormous amount to come from? The Bank of England has no such sum. It will take several years of the supplies of California and Australia to make up this sum, while the engagements for cotton must be met within a few months. The danger of a financial crisis, as apprehended by the author of the *Circular* and and other intelligent commercial writers abroad appears to be imminent, and the consequences may be serious and wide-spread. No cotton can be looked for from the United States until the war is over, and the application of labor to our old and new cotton fields is placed upon some new basis. A crisis in England would probably create enormous demands for our Government stocks. So too, a suspension of specie payments there, would knock down exchange, while it might, strange to say, increase the price of gold.

The subject is worthy of the attention of our bankers and statesmen.

Mine Hill and Schuylkill Haven Railroad.

The amount of coal carried over this road the past year has been 1,532,095 tons. The gross tonnage of the road during the same period was 1,555,163—and since the completion of the road 24,171,963 tons. The Schuylkill Haven and Lehigh River and the Schuylkill Haven and Mine Hill Companies being incorporated into one, the contract with the Schuylkill Navigation Company is to be terminated and the consolidated roads are to be leased to the Philadelphia and Reading Railroad Company for nine hundred and ninety-nine years, the latter paying an annual rent equal to 8 per cent. upon a capital representing the entire cost of the consolidated roads. The Board of Directors have declared a semi-annual dividend of four cent. on the capital stock, equal to $2 per share clear of all taxes.

Providence and Worcester Railroad.

The earnings and expenses of this road for the years ending November 30, 1862 and 1863, have been as follows:

Earnings:	1862.	1863.
From passengers	$131,364 08	$159,914 87
" merchandise	183,534 29	213,326 20
" mails	5,018 75	5,267 75
" rents	2,262 49	1,643 21
" express	5,277 00	4,360 33
	$327,456 61	$384,511 86
Expenses, viz:		
Fuel	$18,612 34	$27,576 46
Oil	2,415 63	3,238 69
Maintenance of way	41,546 04	51,321 71
Repairs of cars	14,586 37	12,745 82
" locomotives.	11,729 90	12,962 49
New merchandise cars.	.....	10,392 53
Passenger expenses	21,091 96	22,589 74
Freight "	26,031 27	31,816 13
Miscellaneous	30,086 29	42,773 30
	$166,099 81	$215,366 86
Net earnings	$161,356 80	$169,145 00
Interest and premium on sales of stock	.....	18,176 72
	$161,356 80	$187,321 72
Interest paid	7,416 90	5,688 81
Net income	$153,939 90	$181,632 91

Compared with 1862, the gross earnings show an increase of $57,055 25; with an increase in expenses of $49,267 05—making the increase in net earnings, $7,788 20. The report says:

It will be observed that there has been a large increase in the business of the road the past year; but the business having been done without any advance in rates, while the cost of supplies, labor, and taxes, have greatly increased, the percentage of expenses is larger than in previous years.

The net receipts, however, have enabled the Directors to declare the usual semi-annual dividend of four per cent., and to reduce considerably the bonded debt of the road.

The balance of this debt, now $26,000, will be paid at maturity, in August next, when the road will be free from indebtedness.

During the year, nearly $20,000 have been expended in iron and ties, and over $10,000 in new freight cars, which with the considerable amount expended in repairs, places the road bed and equipment, in good condition.

On account of the unusual press of business, this road, in common with nearly all other railroads, has suffered from the want of sufficient equipment; but there are now being built at the company's workshops, seventy new freight cars, which, with two additional heavy locomotives recently ordered, will, without doubt, relieve it from that difficulty hereafter.

Another great source of trouble and expense during the year just closed, has been the want of sufficient wharf room. This, also, will be remedied the coming season, the company having recently purchased and leased nearly one thousand continuous feet of the best wharf accommodation in the city, which, with the proposed increased facilities for unloading and storing, will, it is believed, give quick dispatch to vessels, and thus relieve the company from one of the greatest annoyances it has had to contend with.

* * * * * * *

It has not yet been determined how these large expenditures shall be met; but as the object is to increase the capacity of the road for doing business, it seems most proper that they should be borne by a further issue of the capital stock. This can well be afforded, when it is recollected that the large floating debt which the company formerly owed, was paid off by withholding dividends for several years, and by issuing bonds, which, having been mainly paid by the surplus earnings, leave the cost of the road far beyond its present capital stock.

The income account of the company for the year ending November 30, 1863, is as follows:

Net income, as above		$181,632 91
Received for 500 shares stock sold, applied to the payment of the bonds of the company		50,000 00
Dividends unpaid Nov. 30, 1863.	$3,460	
Do., Nov. 30, 1862	2,298	
		1,162 00
Materials on hand Nov. 30, 1862		43,083 56
Notes on hand "		6,896 00
Cash on hand "		51,417 27
		$324,191 74
Accounted for as follows:		
Dividends paid January and July, 1863, four per cent. each		$130,000 00
Bonds paid		71,000 00
Land purchased		41 72
Materials on hand Nov. 30, 1863		45,142 19
Notes		6,896 00
Uncollected earnings	$16,728 03	
Cash	97,315 85	
	$114,043 88	
Less due connecting roads, etc	42,932 05	
		71,111 83
		$324,191 74

The equipment of the road consists of 18 locomotives; 14 first class and 4 second class passenger cars; 69 eight wheel and 46 four wheel merchandise cars, 48 eight wheel lumber cars, and 205 four wheel coal cars.

Miles run by passenger trains, 126,710; by freight trains, 79,800; by other trains, 19,951—total miles run, 226,461: an increase over the pre-

vious year of 20,897. Number of passengers carried, 804,010; do., carried one mile, 6,820,420. Tons of freight carried, 188,744; do., carried one mile, 6,396,780. Length of road 43.41 miles Length of single track, 37 miles. Length of double track, 6.41 miles. Length of branches, 1 mile. Aggregate length of sidings, 8½ miles. Weight of rail, 56 to 63 lbs.

GENERAL STATEMENT.

Construction	$1,409,127 35
Cars	128,682 63
Locomotives	84,500 00
Materials on hand	45,142 19
Notes	6,896 00
Cash	71,111 83

Way Travel on the Atlantic and Great Western Railroad.

Way travel is found to be an important item in the receipts of most railroads. With some, it is more profitable than the through travel. In alluding to the value of the Atlantic and Great Western, we have looked chiefly to its termini as the sources of its productiveness, but we have quite overlooked the numerous towns through which it passes, and which will inevitably by their present business, even should it not increase, though we know it is rapidly increasing, add largely to its income. An intelligent friend who has recently passed over this road gives us the following memoranda, made on good authorities and after personal examination.

The Atlantic and Great Western forms a junction with the Erie at Salamanca, and is completed to Gallion, Ohio, and probably will reach Cincinnati in May next. After leaving Salamanca the traveler passes the pleasant and flourishing towns of Randolph, Jamestown, Correy, Meadville and Warren, on the route to Cleveland.

Randolph is an old settlement with about 2,000 inhabitants and is prospering. It has one of the largest Academies in the Western part of the State.

Jamestown is also an old town with about 5,000 inhabitants, situated in a fine farming country, and is famous for being a butter market. The stream which runs through the place as an outlet from Chatauque lake affords extensive water power.

Correy is a new place and has already 2,500 inhabitants. It has been built up since the opening of the road, and has the largest oil works in the United States. It is the point from which large quantities of petroleum are sent to New York, and to which it is brought from the wells.

Meadville has been long settled, and is midway between Salamanca and Cleveland. It is growing very rapidly, and bids fair to rise to great importance. It is one of the most interesting places on the railroad on account of its elegant depot, and its extensive machine shops, all designed and carried out in a novel style after the plans of Mr. Kennard, whose mind has impressed itself durably on every work of his hand.

Warren is an old village with about 2,000 inhabitants, and is also rapidly improving.

Other points will ere long be selected for settlement, to become commercial centres for the growing business of the adjacent country. The road traverses a very fine region, well timbered, with a fertile soil, adapted to farming and raising cattle. Indeed some of the best that now come to our market are from this part of the country. The value of property adjacent to the route has every where appreciated from 10 to 15 per cent. during the last six months, and bids fair to increase more rapidly. The road itself is a marvel of engineering, and the traveler greatly enjoys its spacious and easy cars, and the speed and regularity of their motion.

Mercantile Mutual Insurance Company.

The following statement of the affairs of the company on the 31st of December, 1863, is submitted in accordance with the provisions of the charter:

Premiums not marked off December 31st, 1862		$212,118 80
Do. on policies issued from Dec. 31st, 1862, to December 31st, 1863		1,141,884 79
Total premiums		$1,354,003 59
Premiums marked off as earned Dec. 31st, 1863		$1,163,741 64
Less returns of premiums		85,970 60
Net earned premiums		$1,077,771 04
Paid during the said period:		
Marine and inland losses, (including losses by risk of war and estimate of unadjusted losses	$729,061 46	
Re-insurance, expenses and bad debts, less returns on investments	139,902 19	
Interest paid to stockholders for July dividend, together with interest on stock, payable in January, 1864, and an outstanding scrip, payable in Feb., 1864	76,502 60	
		945,466 25
Earnings to be divided		$132,304 79

The company had, on the 31st of December, 1863, the following

ASSETS:

United States, State, City and other securities	$327,480 00
Loans on stock and other securities	131,190 00
Bond and mortgage	4,000 00
Cash on hand and in bank, including gold coin at market value	99,162 73
Cash in bonds of foreign bankers	81,112 70
Bills receivable and uncollected premiums	625,927 12
Salvages, and sundry claims due the company, and scrip	156,089 28
Interest accrued and not collected	8,345 72
Total assets	$1,432,307 55

The Board of Trustees have resolved to pay an interest of six per cent. on the outstanding certificates of profits, to the holders thereof, or their legal representatives, on and after Monday, the 8th of February next.

They have also declared a dividend of five per cent. to the stockholders, payable in cash, on and after Monday, the 8th of February next.

The Trustees have also declared a dividend of twelve per cent. on the net earned premiums, entitled thereto, for the year ending 31st December, 1863, to be issued in scrip on and after Monday, the 4th of April next.

Trustees.—Joseph Walker, James Freeland, Samuel Willets, Robert L. Taylor, William T. Frost, William Watt, Henry Eyre, Aaron L. Reid, Ellwood Walter, D. Colden Murray, E. Haydock White, N. L. McCready, Daniel T. Willets, L. Edgerton, Cornelius Grinnell, E. E. Morgan, Her. A. Schleicher, William Boyd, Jas. D. Fish, Geo. W. Hennings, Francis Hathaway, Henry R. Kunhardt, John S. Williams, William Nelson, Jr., Charles Dimon, A. Wm. Heyee, Harold Dollner, Paul N. Spofford.

President.—ELLWOOD WALTER.

Vice President.—CHAS. NEWCOMB.

Secretary.—C. J. DESPARD.

Little Schuylkill Railroad.

The annual meeting of the Little Schuylkill Navigation, Railroad and Coal Company was held in Philadelphia on the 11th inst. From the Report of the Managers we learn that on the 1st of April 1863, the entire road, including the rolling stock, together with the East Mahanoy Railroad, was passed into the possession of the Philadelphia and Reading Railroad Company, upon the terms of the agreement of the lease to that company. The rolling stock was appraised at $107,642 39, to be paid for in monthly instalments of $10,000, with interest, after the first payment, of $5,000. There now remains due of this amount $82,764 39. The result of the lease of the two roads is reported equal to expectation. The total amount received from this source being $153,748 50, of which was for guaranteed coal tonnage, $120,999 77; for freight on merchandise, $20,090 21; for passenger trains, $11,122 95; for mail transportation, $970 83; for miscellaneous traffic, $564 74.

The greatest monthly increase under these different heads occurred in the passenger trains, commencing in April with a receipt of $725 48; in May, $806 64; June, $1,055 99; July, $1,391 55; August, $1,496 32; September, $1,684 41; October, $1,732; November, $1,335 53. It is believed that as the coal lands become developed, and if the needful and proper facilities are granted to the miners, such an increase of coal tonnage can be thrown upon the road as to give an amount twice as great as that now guaranteed by the Philadelphia and Reading Railroad Company. The total amount of coal tonnage transported over the road amounts to 392,653 tons, against 243,729 tons the former year, a gain of 148,924 tons. The quantity from the company's mines was 113,509 tons; from othea mines near Tamaqua, 90,964 tons; from the Lehigh region, Lackawanna and McCauley Coal Company's mines, 115,347 tons, and from the East Mahanoy Railroad, 72,833 tons.

The suspended debts of the company have been reduced during the past year, by the receipts of moneys, notes of hand, well secured, credits for material on hand, belonging to the miners, now the property of this company, as well as by $29,020 05 of the reserve fund, amounting to $83,193 45, leaving yet for settlement $51,152 01. The remainder of the reserve fund, $10,979 95, was carried to the credit of profit and loss.

In September last, the first instalment of the debt due C. & A. Morrison, for £15,000, became due, and was promptly paid in exchange on London, amounting to $15,680 07.

During the year the company's property about Tamaqua has been repaired at a considerable cost, so as to make it tenantable. The present year is expected to return to the treasury several thousand dollars of the outlay.

The income from the lease of the East Mahanoy Railroad, for coal tonnage alone, amounts to $101,500 per annum, a sum supposed to pay the interest on the bonded debt of this Company, provide for the payment of six per cent. per annum dividend and taxes on the stock of the East Mahanoy Railroad Company, (which it cannot exceed,) and leave a surplus of more than $10,000 for other purposes.

Duties and Liabilities of Stock Brokers.

The following is the report of a decision recently made at the General Term of the Supreme Court, 2d district, before Chief Justice Brown and associates, which defines the duties and liabilities of stock brokers in dealing with their customers. It is an important one, and worthy of being preserved in our columns:

Isaac D. Brass, *vs.* Francis W. Worth and Loomis L. White.—This action was brought in the Supreme Court, Kings County, by plaintiff, against Worth & White a leading firm of stock brokers, to recover damages for an alleged unauthorized sale of stocks. The facts appear to have been thus: There was an agreement that defendants should buy, hold and carry stocks for the plaintiff, who was to allow interest and commissions, and give a security or margin of 5 per cent. to be kept good. Under this agreement, prior to the 18th of December, 1861, purchases and sales were made, such transactions being all made upon express direction of plaintiff as to kind, quantity and price. Profits arising from these sales were left in the hands of defendants, and defendants gave plaintiff assurances of their readiness and ability to carry his stock without limitation.

When the Mason and Slidell capture disturbed the public mind with fears of a foreign war, stocks declined, reaching the lowest point about the 18th of December, 1861. At that time the defendants held 300 shares of stock, which they had bought and carried for the plaintiff, and as security or margin, plaintiff deposited with them 500 shares of Harlem common stock.

On the 18th of December defendants sold 300 shares at prices below the market rates of the day, and subsequently sold the Harlem stock. Plaintiff was in defendants' office on the 15th and 17th of December, and saw defendant White, on the 18th, but received from them no notice or intimation that more margin was wanted. Plaintiff alleges that the Brokers' Board is a private institution, and none but members paying an initiation fee are admitted; therefore all the sales were secret, and were at such low prices that plaintiff was charged with a loss of $3,000 over and above the proceeds; and defendants set this $3,000 loss up as a counterclaim in their answer. The answer also claims that the margin was not kept good, but had become utterly exhausted, and that by the usages and custom in such cases, they had a right to sell.

The principal points argued by counsel and decided by the Court were:

That the brokers were bound to make demand or give notice if the margin had so declined as to entitle them to further security.

That the brokers could not sell without notice that the sale would be made.

That they could not sell at the Brokers' Board.

That if the sale was illegal and unauthorized, the plaintiff could recover the whole of his margin and the increased value of the 300 shares, or the difference, the stock having gone up in the meantime.

That the brokers had not the right to sell under the usage and custom, as set up in their answer.

That they could not charge the loss arising upon the sale, $3,000, upon the plaintiff, as claimed in the answer.

That the plaintiff was not bound to object or protest against it, on being advised of the sale.

All those points seem to have been decided against the defendants.

The question was also raised whether three hundred shares of stock were held in the nature of a pawn or pledge, and if not, whether the doctrine of demand and notice applied.

The opinion of the Court, by Judge Brown, was long and carefully written, and the defendants were therein regarded rather as special contractors than as mere agents or brokers, and in the matter of demand and notice they are treated as pledges.

The judgment of the court below was affirmed, and the plaintiff recovers the value of his Harlem stock up to the 8th of January, 1863, when it was demanded, and the difference between the cost of three hundred shares and their market price on the 22d of January, 1862.

American Railways.

The New York Central Company are giving up their office for registration of shares in London. We cannot wonder at such a decision, seeing how small a proportion of the stock of the company has at any time been registered here, the maximum reported being only 7,150 out of a total of 240,000 shares. The Michigan Central Registration office, opened in London at the same time as the New York Central, has long been closed. It would thus appear that the best and most marketable form for English holders of American railroad stocks is the form in which they are held by the Americans themselves. The only other American railroad company now having a registration office in London is the Illinois Central, which is believed to be quite as useless as those above named.—*London Star.*

Compensation for Highways used by R. R.

HIGHWAYS CANNOT BE USED FOR RAILROADS WITHOUT COMPENSATION TO THE OWNERS OF THE FEE:

In a late number of the RAILROAD JOURNAL, we gave an account of a decision of the Supreme Court to the effect that a highway could not be used for a horse railroad without compensation to the owner of the fee. That decision was based upon the ruling of the Court of Appeals in the case of Wager *vs.* the Troy Union Railroad Company, of which we will now give a report.

The Troy Union Railroad Company was authorized by an act of the legislature, and an ordinance of the Troy council to lay a railroad upon certain streets of that city. Mr. Wager, owner of land fronting upon one of these streets, sued the Co. for the recovery of the land taken by it for its tracks. Judgment was rendered below for the defendant which was here reversed, the court holding that the plaintiff was entitled to compensation. This judgment was delivered by

SMITH, J. who said: It is an established inference of the common law that the proprietors of land adjoining a public highway are the owners of the fee of said highway; that the rights of the public therein and thereto are no higher or other than those of a mere easement, and that the proprietors on each side presumptively own the soil in fee to the center of the highway. There is no distinction in this respect between the street of a city and highways in the country. (Bissell *vs.* N. Y. C. R. R. 23 N. Y., 61.) The plaintiffs having shown title to the premises described in the complaint established a *prima facie* title to the soil of Sixth street from its east line to the center thereof westwardly subject to the public easement.

The construction of the defendant's railroad and the laying down of the tracks in Sixth street so far as the same was laid or constructed east of the center of said street adjoining the plaintiff's premises, was consequently an encroachment upon his freehold and a trespass, and every use thereof by the defendants a continuing trespass unless they have acquired the right to construct their railroad in such place, under the authority of the legislature or of the common council of Troy.

The non-suit at the circuit and the decision at general term affirming the same, are put upon the ground that the defendants in constructing their railroad in said street were not in the commission of any lawful act, the same being authorized by the acts of the legislature under which the defendants were incorporated and by the common council of Troy.

Under the two acts of 1850 and 1851 the defendants were doubtless authorized to appropriate for the use of their said railroad such streets or parts of streets in Troy as they should deem necessary for the purpose of said corporation subject to the approval of a majority of all the members elected to the common council of Troy.

When lands are required for railroad purposes under the general act of 1850, provision is made in that act for the appointment of commissioners of appraisal to ascertain and appraise the compensation to be made to the owners or persons interested in the real estate proposed to be taken for such purpose, and it is declared that when such lands have been so appraised and compensation made, that all lands so acquired shall be deemed taken for the public use, and all persons who have been made parties to the proceedings shall be divested of all right, estate and interest therein.

It is not pretended that the defendants have acquired any rights in Sixth street under these provisions of the general railroad act, or that the plaintiff's interest in said street has been divested by any proceedings under said act or that any appraisal of their damages for the taking and appropriating said street for railroad purpose has been had or any compensation therefor made or paid. The power of the legislature to authorize the taking of any lands, waters, streams, highways or streets for public purposes on making due compensation is undoubted; and that such appropriation of land for railroad purposes is a legitimate exercise of the right of eminent domain has long been settled in this State and is unquestioned. But these defendants claim the right to construct their railroad in Sixth street without any appraisement of damages or making any compensation to the adjoining owners on said street. This claim is based upon the provisions in the act of June 21, 1851, aforesaid authorizing the defendants to construct their railroad with one or more tracks through the whole or a portion of said city of Troy, and upon the provision of the general railroad act of 1850 which provides that any corporation organized under said act "may construct its roads across, along or upon any stream of water, water course, street, highway, plank road, turnpike or canal, which the route of its road shall intersect or touch." (Sub. 5 § 23 of Railroad act. Laws of 1850, p. 224.

These provisions of the statute doubtless do confer upon the defendants all the power to construct their railroad in the streets of Troy, which, under the Constitution of the United States or of this State, the legislature could confer. The dedi-

cation of the ground covered by Sixth street to the public, the opening and acceptance of the same by the city authorities, and its occupation and long use as a street gave to the public all the rights which could be ordinarily acquired in a public highway except under a specific grant of the fee thereof. This right was, and is a mere easement, a right of passage for travel as highways are customarily used; and the legislature as the organ of a legislative authority of the public has undoubted control over this easement the same as it has on all other public rights, and it could undoubtedly delegate a part of its power over highways to local officers. The Mayor and Common Council possessed a derivative part of this legislative power but its authority could not ascend higher than the source. The acts of the legislature and those of the city of Troy are all legitimate acts of the legislative authority and are valid so far as the power of the legislature could extend. The legislative grant to the defendants of the right to construct their railroad in the streets of Troy is a mere authority, and it must be exercised without violating any private rights; or if any private rights are impair the constitutional compensation must be made. The legislative grant is made and is only sustainable upon this ground. It saved the defendants the liability to indictment for a nuisance for laying their rails in the streets of the City, and exempts them from all other liabilities as respects the public. It could go no farther. It could not take away any private rights without providing for making a just compensation.

The question remains whether the taking and use of a public street or highway for railroad purposes is a new use of the public easement in the street so as to be within the authority or control of the legislature without respect to any private rights in said street. This question this court has distinctly answered in the negative in several cases. The case of Williams *vs.* New York Central Railroad (16 N. Y., 97) is a leading and controlling one on this subject. In that case there was the same appropriation of a street under the legislative authority, and the corporate authorities of the City of Syracuse as in this. In that case it was distinctly held that to occupy a street with railroad tracks and use it for railroad purposes is to charge it with a new easement not within the purposes, intent and legal effect of its dedication as a street or highway to the public. Judge Selden says: "Any one can see that to convert a common highway running over a man's land into a railroad *is to impose an additional burden* upon the land and greatly to impair its value." And he further says that the dedication of land for the use of a highway is not a dedication of it for the use of a railroad company, and that the two uses are essentially different. The same view is reiterated in the case of Carpenter *vs.* The Oswego and Syracuse Railroad Company, (24 N. Y., 655) and in Mahon *vs.* New York Central Railroad Company (id 658).

It is quite apparent that the use by the public of a highway, and the use thereof by a railroad company is essentially different. In the one case every person is at liberty to travel over the highway in any place or part thereof, but he has no exclusive right of occupation of any part thereof except while he is temporarily passing over it. It would be trespass for him to occupy any part of the highway exclusively for any longer period of time than was necessary for that purpose, and the stoppage incident thereto. But a railroad company takes exclusive and permanent possession of a portion of the street or highway. It lays down its rails upon or imbeds them in the soil and thus appropriates a portion of the street to its exclusive use, and for its own particular mode of conveyance. In the one case all persons may travel on the street or highway in their own common modes of conveyance. In the other no one can travel on or over the rails laid down except the railroad company, and with their cars especially adapted to the tracks. In one case the use is general and open alike to all. In the other it is peculiar and exclusive.

It is true that the actual use of the street by the railroad may not be so absolute and constant as to exclude the public also from its use. With a single track and particularly if the cars used upon it were propelled by horse power, the interruption of the public easement in the street might be very trifling, and of no practical consequence to the public at large. But this consideration cannot effect the question of right of property or of the increase of the burden upon the soil. It would present simply a question of degree in respect to the enlargement of the easement and would not affect the principle that the use of a street for the purpose of a railroad imposed upon it is a new burden.

But in this case the increased burden imposed upon the street is very marked and unquestionable and must be a serious interruption to the public easement, and a very great injury to the adjoining owners. The construction of eight tracks in the street with sixteen rails amounts, I should think nearly to a practical appropriation of the whole street for railroad purposes, and to the virtual exclusion therefrom of the public and all other modes of conveyance. If the title to Sixth street were in the City of Troy, as the fee of streets is in the city of New York, the Mayor and Common Council might perhaps have authorized such appropriation of the street without compensation to the adjoining owners; but in the absence of any such proof and assuming the title to be, as is the proof in the adjoining proprietors, the laying down of such tracks in Sixth street was a palpable invasion of the plaintiff's rights. The non-suit in this case was therefore erroneously granted. It was error in the circuit judge to hold as he did that the defendants in building their road in Sixth street, were in the lawful exercise of their legal rights and powers and were not liable to the plaintiffs for damages to their land and property adjacent to the street.

In the first count of the plaintiff's complaint they set out a complete cause of action in ejectment, and claimed to be entitled to recover that portion of the street eastwardly of the center subject to the public easement. The defendants have put down their rails and tracks on the plaintiff's premises and claim to exercise, and are in constant exercise of acts of ownership over a portion thereof exclusively, and claim a right to place and retain their tracks in said street in that portion thereof of which the fee is vested in the plaintiffs. According to the decision of this court in Carpenter *vs.* Oswego and Syracuse Railroad Company, the plaintiffs were entitled to maintain ejectment to recover such part of the said street to remove the rails of the defendants road therefrom.

The second count is trespass. Under this count as every entry of the defendants upon the said street in the exercise of their claim to an exclusive use thereof was a trespass and an unauthorized intrusion upon the plaintiff's premises, the plaintiffs were clearly entitled to recover some damages. What the extent or measure of such damages would be and upon what principle they should be assessed are questions which are not now properly before the court. It is sufficient for us to decide that the plaintiffs were improperly non-suited and that they were entitled to recover under either count of the complaint.

The judgment was therefore reversed and a new trial ordered.

"MANUAL OF ELEMENTARY PROBLEMS IN the linear perspective of form and shadow."—By S. Edward Warren, Civil Engineer.—John Wiley, 535 Broadway.

This is a handsomely printed work in 116 pages, illustrated by diagrams. The human eye is a curiously constructed machine, admirably designed to let in upon the mind the forms of external nature. These always appear in a precise way, and become the subjects of mathematical calculation, and demonstration. To apply these practically, it is necessary to understand the methods by which, what appears to the eye, may be repeated with truth and accuracy on paper. The Chinese ignore this principle, and therefore their pictures are distortions. And so in some degree are the works of our own artists who do not understand it. A great number of works on this subject have appeared from time to time; from the American press, that by the late Surveyor General De Witt, was among the most elaborate, but this Manual is one of the most simple and compendious treatises we have seen, accompanied by original illustrations and explanations. It seems to us it must find its way into the hands of all architects, constructors and painters, who wish to be accurate in their drawings. The author is an esteemed Professor in the celebrated Rensselaer Polytechnic Institute, which has educated the best engineers in this country.

THE NAVY OF THE UNITED STATES.—An exposure of its condition, and the causes of its failure, contained in a speech delivered to a jury in the Supreme Court of the District of Columbia. By E. N. Dickerson, Esq. N. Y., 1864.

This is the title of a well printed pamphlet from the press of Gray & Green, consisting of 80 pages, octavo, being a valuable contribution to science, as well as a work of great public interest. We recently took occasion to make some extracts from the original report of this speech, and gave them place in our columns. It is now published in full with copious notes of much value. We recommend this able production to the attention of marine engine builders, shipwrights and scientific men generally, as a concise treatise on various principles connected with steam propulsion and power; and above all, we hope it will draw the attention of Congress to the necessity of interfering before our steam navy is utterly ruined.

The readers of the Journal are informed that a few copies are for sale at this office, No. 9 Spruce street, at 15 cents each. If sent by mail free, the price will be 20 cents.

American Railroad Journal.

Saturday, January 23, 1864.

Stock Exchange and Money Market.

Large amounts of gold have gone forward the last week, and the price advanced at one time to 159¼. This has stimulated further exports of domestic produce and a rise in the articles. This drain of the precious metals is considered to be a legitimate consequence of our over-trading, and the inflation of our paper currency. To some extent this is doubtless true. Yet there are other causes, some of which are developed in the intercepted correspondence recently given to the public through the daily Press. It appears that some portion of the funds of the Confederates has been used in this city to depress the value of our currency, and there are Bankers who were willing to carry a speculation for that purpose, with the proviso, however, that they were not to be the shippers. They had the prudence to avoid this part of the proposed transaction. We regret to

see that the desire to make money, could lead any respectable people to engage in this attempt to raise the price of gold and exchange, when the idea came from well known disloyal parties. We confess we cannot envy the feelings of those who are willing to add to the inconveniences of the war by depreciating the credit of their country.

It is a remarkable fact however, that all the demand for gold, legitimate or illegitimate, has not impaired our resources in the precious metals. It is ascertained from official sources that there are even now $21,000,000 more gold on deposit in New York, Philadelphia and Boston than there were on 1st of December, 1860, as will be seen from the following statement:

	Dec. 1, 1860.	Jan. 1, 1864.
New York Banks	$18,541,762	$25,161,935
N. Y. Sub-Treasury	3,702,751	13,250,000
Philadelphia Banks	3,333,827	4,158,535
Boston	3,553,000	7,659,000
Totals	$29,131,340	$50,229,470
Increase		$21,098,130

Let those who flatter themselves that our resources of the precious metals are falling off, contemplate these figures. They speak for themselves.

So too the sources of supply have not defaulted under the pressure of the war.

Our total receipts, from Europe, for specie comes here from that quarter of the world, (though many no doubt are ignorant of the fact) and those from California, have been since the 1st December, 1860, as follows:

Received from foreign States direct and through Boston for N. Y. account Jan. 1 1864	$56,626,831
From California (new product)	73,683,524
Total	$130,311,355
Shipments in the same period to foreign countries	113,630,000
Balance in our favor	$16,681,355

Now as much of this California gold is hoarded, it is estimated that the whole amount of the excess is considerably larger. The products of the new gold bearing territories the present year are expected to be unusally great, so that there is no danger of any falling off in the receipts. It will be remembered, also, that this gold is a new product, not taken away from the previously existing circulation, but added to it, so that it impoverishes no one by its change of place or its immediate use. This is a very different thing from its presence being owing to balances of trade, or commercial contrivances, such as bills of exchange and credits created by bankers. On the contrary it is a substantial and permanent addition as so much financial power.

Exchange for the week commencing on Thursday of last week, and ending on the same day the present week, has fluctuated between 169 and 174.

For the week ending the 16th inst. the returns of the Banks in this city show a decrease in loans of $7,018,531, and in their deposits of $4,550,931 while the loss in specie was but $237,738. This shows conclusively that this specie is beyond the reach of the ordinary depositors, and that the amount of the gold exported the last week is $1,985,000 was obtained from other sources than the Banks.

A good deal is being said about the further policy of the Secretary of the Treasury. We accept it as a foregone conclusion that he has set his face against any further inflation of the currency by his department.

If the National Banks are to furnish it, they must do so under the usual limits of the law, and the consequences of not returning to specie payments when the proper time comes. We believe Mr. Chase's policy is approved by all thinking persons. The people of this country prefer taxation, however stringent, to the increase of prices for the necessaries of life. If any one will take the trouble to make the necessary calculation, he will find that the prices of many articles usually consumed by families in moderate circumstances, are nearly double what they were at the commencement of the war. Those who expended for example from $500 to $1000, for groceries and meats during a year, now pay double that sum. These persons would much rather pay $200, a year additional taxes to the Government than $500 or $1000 extra charges to the grocers and victuallers. So that the true course to be taken is to diminish as fast as possible the issue of Government money, which has crowded out almost all other kinds. The value of what remains will approximate to that of gold, and prices will fall. This would be an immediate relief to the poor and middling classes, who have no surplus to spare, to enhance the profits of an unnatural advance in articles of necessity.

We have several times alluded to the propriety of the Governments immediately establishing mints in our gold and silver bearing territories. An appropriation was made by Congress to establish one in Colorado and $75,000 appropriated for the object.

We should like to have a committee of inquiry investigate the subject and ascertain what became of the money, and why the private mint said to have been purchased at its full value has not been put in operation. The miners at present are at the mercy of not too scrupulous assayers and brokers. They should be able at any moment to turn their dust or ores into current coin, instead of having to dispose of them on the best terms they can get. The transportation of the dust or even bars of these metals to the coast is a heavy tax on their earnings. They would willingly pay 5 or 10 per cent. seignorage to the Government for coin on the spot, rather than be the victims of their necessities as they now are. This system of mintage on the spot would realize for the Government large sums annually, and tend to increase the metallic reserves of the country, which even now are not falling off under our very unfavorable circumstances.

In the railway share market the spirit of speculation continues to be very active. Government stocks maintain their firmness, and as the Border States are becoming more stable by their return to the Union, their stocks also become more steady. There can be no doubt of their ultimate value.

The demand for the popular loan continues. The great difficulty in the way of conversion is the want of legal tender currency, for which 12 per cent. interest is now freely paid in this city. It is proposed to withdraw the large denominations of these bills, and substitute those of smaller amount in their place. New England currency is taken at a discount of ¼ per cent., as it cannot be redeemed readily in legal tenders.

The week's exports of domestic produce and miscellaneous goods (exclusive of specie,) from this port have been to the value of $2,871,565, against $3,131,250 same week last year, and $3,231,384 the corresponding week of 1862.

As there is every appearance of the breaking up of the confederacy, evident from the tone of its own press, we must anticipate a considerable reduction of the expenses of our Government in the course of a few months. No doubt the Southern States will have to pay their full share of the cost of the rebellion into the United States Treasury in the shape of taxation as soon as the local Governments are re-organized. This will neither be unjust, nor any hardship to them. They have paid but four millions of taxes into the rebel treasury, and will be so much the better able to pay into the Treasury of the United States. The holders of cotton will be glad enough on realizing the enormous prices on the two millions of bales said to be yet held in safety by them, to part with a proportion of their profits to the general Government, and this is an element of future strength which will tell on the general resources of the nation. The Southern debt will be struck out of existence and trouble nobody after its decease. One of the most important measures before Congress, in our judgment, is the bankrupt act. If this is passed, it will liberate many thousands of enterprising citizens, who will again become producers and add to the general accumulations of the industrious. The Chairman of the committee on this subject in the House, has written to a gentleman of this city, stating that he intends to introduce a short bill, and has requested his correspondent to prepare a draft of one of similar brevity. This we understand will contain very few sections, merely defining the parties who may apply for relief, or may be brought under the act by their creditors, who have exhausted the usual process of law to obtain their demands, without success. This will constitute the main section. The others will relate to the appointments of commissioners of bankruptcy in the various Congressional districts, and the officers of their courts. The modes of proceedure under the act being merely formal, will be defined in a code of practice, to be arranged by the Attorney-General and declared a part of the act. This will simplify the whole business, prevent technical litigation, and save a world of debate on the passage of the bill.

Grand Trunk Railway of Canada.

At a meeting of the directors of this company held in London on the 31st ult., it was announced that the half year's interest accrued to that date on the 1st and 2d preference bonds would be paid on and after the 15th of April, on presentation of the coupons at the company's bankers. The report of the company for the half year ending Dec. 31, 1863, will be placed before the proprietors early in February; and the half yearly meeting will be held in London on the 7th of April. At this meeting the directors will propose that powers be obtained whereby the interest on bonds due on the 1st of January and 1st of July respectively, may become payable immediately after the half yearly meeting at which the accounts are approved, and at which meetings the preference bondholders can vote.

The quotations of this company's stock, etc., in London on the 31st December, were as follows: Stock, 20½@21½; 1st preference bonds, 73@75; do., deferred, 59@61; 2d preference bonds, 65@67; do., deferred, 50@53; 3d preference stock, 48@50; do., deferred, 39@41; 4th preference stock, 27@29; do., deferred, 22@24.

Colonial Securities.

The quotations of Canadian securities in the London Market on the 31st December, were as follows: Government 5 per cents, 92@95; do., 6s, 103@107. On the same day British Columbia 6 per cents stood at 105@107; Cape of Good Hope, do., at 106@108; Ceylon, do., at 110@112 Mauritius, do., at 106@111; Natal, do., 108@110; New Brunswick, do., at 104@106; New South Wales 5 per cents, at 100@100½; New Zealand 6 per cents, at 110@112; Nova Scotia, do., at 105@107; Queensland, do., at 111@113; South Australia, do., at 111@113; Victoria, do., at 107@110½.

☞ The New Bedford Sperm Oil Company, which has recently been reorganized, and succeeds to the reputation of the old Company, which had acquired the confidence of the public during a continuance of fifteen years, now offers, at No. 49 William street, the office of the President, Edwin L. Brady, the very best descriptions of sperm, lard and machine oils, which are guaranteed to be of the best quality. The sperm especially is of the purest quality, and admirably adapted to the use of machinists, and railroad, and steam engineers. Purchasers will do well to call and examine for themselves before purchasing elsewhere.

The Tribune Almanac 1864.

This valuable work which of its class is a standard one, comes to us full of the most useful if not indispensable information. It contains a complete set of astronomical calculations, tide-tables, calendars, lists of the officers of the United States Government, and members of the 38th Congress; wholesale prices in New York for seventeen years (showing curiously enough, that many articles are not now higher in price than they were in 1847,) acts of Congress for the past session, amount of public debt, full political statistics of the States, and much other information equally interesting and important. Single copies 15 cents; one hundred copies $8.00.

Quicksilver Mines of New Almaden.

We have received in pamphlet form, a reprint of an interesting article on the Quicksilver Mines of New Almaden, with illustrations, which originally appeared in *Harper's Magazine*, and is from the pen of W. V. Wells. These mines are not the least of the treasures of California; and the property described in this *brochure* is now becoming immensely valuable to its owners, who have established their title to it after a long litigation.

BENTON'S POLICY OF SELLING AND DEVELoping the Mineral Lands.—By Edgar Conkling.

In this pamphlet are found very conclusive arguments in favor of granting the fee of our mineral lands to actual purchasers at moderate cost, asserting the principle, and supporting it by facts, that no permanent development of our mineral wealth can take place from temporary occupation only. The author also strenuously advocates a Northern as well as Central road.

☞ The Boston *Journal* announces that the stock of the American Steamship Company, in that city, has been all taken up.

Railroad Earnings--Monthly.

The approximate earnings of the Pittsburg, Ft. Wayne and Chicago Railway Company during the month of December ult., compared with the same period of last year, were as follows, viz:

	1863.	1862.
From Freights	$303,239 61	$249,840 76
" passengers	151,201 16	97,630 46
" express matter	2,700 00	7,476 77
" mails	7,825 00	7,825 00
" rent of railway	7,083 34	7,083 34
" miscellaneous.	977 50	1,127 07
Total	$473,026 61	$370,983 40
Increase		$102,043 21
Total for year ending Dec. 31	$5,118,388 86	$3,745,409 42
Increase for 12 months		$1,372,979 44

Increase for December, 24½ per cent.; average increase for year, 36 7-10 per cent.

The traffic receipts of the European and North American Railroad for December, 1862 and 1863, were:

	1863.	1862.
Passengers	$5,791 96	$4,704 43
Freight	5,853 24	5,208 43
Mails and Sundries	476 30	562 62
	$12,121 50	$10,475 48

The earnings of the Chicago and Northwestern Railway in December, 1863, were $153,522
December 1862 90,990

Increase $62,532

The earnings of the Cleveland and Toledo Railroad in December, were $184,389
December, 1862 160,670

Increase $23,719

The earnings of the Norwich and Worcester Railroad in December, 1863 $44,531 93
December, 1862 29,475 53

Increase $15,056 40

The earnings of the Erie Railway in December 1863, were $1,044,214 21
December, 1862 963,859 49

Increase $80,354 72

The earnings of the St. Louis, Alton and Terre Haute Railroad for December, 1863 $143,747 82
December, 1862 129,166 37

Increase $14,581 45

The earnings of the Michigan Central Railroad in Dec., 1863, were $306,186 00
Same period, 1862 258,633 00

Increase $47,553 00

The earnings of the Chicago and Rock Island Railroad in December, 1863, were $192,656 00
December, 1862 135,595 00

Increase $57,061 00

The earnings of the Hudson River Railroad in December, 1863, were $484,550 02
December, 1862 403,571 40

Increase $80,978 62

The earnings of the Michigan Southern and Northern Indiana Railroad in December, 1863, were $341,608 00
December, 1862 279,539 00

Increase $62,069 00

The earnings of the Chicago and Milwaukee Railroad in December, 1863, were $45,428 00
December, 1862 34,847 00

Increase $10,581 00

The earnings of the Marietta and Cincinnati Railroad in December 1863, were $68,863 03
December, 1862 48,543 92

Increase $20,319 11

The earnings of the Galena and Chicago Union Railroad in December, 1863, were $217,633 00
December, 1862 143,532 00

Increase $74,101 00

Railroad Earnings--Weekly.

The traffic of the Great Western Railroad for the week ending January 15, 1864, was as follows:

Passengers $18,790 62
Freight and live stock 30,857 46
Mails and sundries 2,282 28
Total $51,930 36
Corresponding week of 1863 62,414 94

Decrease $10,484 58

The earnings of the Grand Trunk Railway for the week ending January 9th, 1864, were:

Passengers $23,264 38
Freight and live stock 54,570 51
Mails and sundries 3,800 00
Total $81,634 89
Corresponding week, 1863 80,483 25

Increase $1,151 64

The earnings of the Chicago and Rock Island Railroad for the 2d week in January, 1864, were $40,691 00
Do., 1863 34,332 00

Increase $6,359 00

The earnings of the Cleveland and Toledo Railroad for the 2d week of January, 1864, were $35,046 00
Same week, 1863 35,204 00

Decrease $158 08

The earnings of the Galena and Chicago Union Railroad for the 2d week in Jan., 1864, have been $27,024 00
Corresponding weeks of previous year. 32,013 00

Decrease $9,989 00

The earnings of the Michigan Southern and Northern Indiana Railroad for the 2d week of Jan., 1863, were $49,078 00
Carresponding week of previous year 56,827 00

Decrease $7,749 00

The earnings of the Milwaukee and Prairie du Chien Railroad for the 1st week in Jan., 1864, were $11,796 00
Corresponding week of previous year 12,218 58

Decrease $422,20

☞ It is stated on the authority of Mr. J. W. Tyler, a gentleman just returned from England, that a line of telegraph will be constructed from St. Paul to Fort Gary, and thence across the Hudson's Bay territory to the Pacific, and that negotions in progress, will result in the actual construction of a railroad before long, from St. Paul northwards to Fort Gary, and steps will be taken to continue the line across to the Pacific.

He also reports that the construction of a telegraph across Siberia to the north of the Amoor River was a matter not only decided upon, but in active progress. This information he derived from the Director General of the telegraph system of Russia.

United States Mint.

The following statement showing the amounts of coinage at the U. S. Mint, Philadelphia, during the year 1863, will be read with interest:

Gold.	Pieces.	Value.
Double Eagles	140,070	$2,801,400
Eagles	1,248	12,480
Half Eagles	2,472	12,360
Two-and-a-half-Eagles	30	75
Three Dollars	5,039	15,117
Dollars	6,250	6,250
Total	155,109	$2,847,682
Silver.		
Dollars	27,660	$27,660 00
Half Dollars	516,460	258,230 00
Quarter Dollars	16,460	41,615 00
Dimes	14,460	1,446 00
Half Dimes	18,460	923 00
Three Cents	21,460	643 80
Total	714,960	$330,517 80
Cents	54,360,000	$543,600 00
recapitulation.		
Gold	155,109	$3,847,682 00
Silver	714,960	330,517 80
Cents	54,360,000	543,600 00
Total	55,230,069	$3,721,799 80

Philadelphia, Wilmington and Baltimore Railroad.

The earnings of this road for the year ending October 31, 1863, were:

From passengers $1,834,133 75
" freight and express 619,562 08
" rents 15,022 05
" mails, etc. 71,530 44
Total $2,540,248 32
Add earnings of New Castle and Frenchtown line 34,009 81
Total both lines $2,574,258 13
The expenditures of both lines, including loss on Delaware R. R., were 1,531,991 71
Leaving $1,042,266 42
Deduct two dividends of 5 per cent. each 690,077 32
Balance $352,189 10

The aggregate gain in receipts over 1862 has been $323,395 58. Sixteen and a half miles of double and additional track have been laid during the year, at a cost of $234,978 39. Four new locomotives have been built; two mail and baggage cars; 65 eight-wheel house; 70 platform and gondola cars; 26 market cars; 25 timber trucks, and 25 gravel cars. The locomotives ran during the year 675,865 miles, of which 345,960 miles were by coal burning locomotives, and 55,902 by wood burners. The cost, per mile, including all expenditures, was $2 11 2-10; cost, including only operating expenses, $1 41 5-10. Earnings per mile run with trains earning money, excluding gravel and repair trains, $3 83 3-16 Ratio of all expenditures to earnings, 59½ per cent. Ratio of operating expenses to earnings 38 per cent.

The following gentlemen have been elected directors of this company for the ensuing year:

President.—S. M. Felton.

Directors.—Samuel M. Felton, Moncure Robinson, W. L. Savage, John A. Duncan, Jesse Lane, Jos. Bringhurst, F. A. Curtis, J. C. Groome, J. J. Cohen, Jr., Thomas Kelso, C. O'Donnell, Enoch Pratt, Thomas Donaldson, Nathaniel Thayer, and C. F. Pond.

Secretary and Treasurer.—Alfred Horner.

Philadelphia and Liverpool Steamship Line.

A meeting of gentlemen connected with the financial, commercial and manufacturing interests of Philadelphia was held at the office of the Pennsylvania Railroad Company on the 14th inst., for the purpose of considering and adopting measures for the establishment and maintenance of a steamship line between Philadelphia and Liverpool, in connection with the Pennsylvania Railroad Company. From an account given in the Philadelphia papers of the proceedings of the meeting, we learn that a company has already been organized for this purpose under a very satisfactory charter from the Pennsylvania Legislature, and with the following very efficient board of directors: John C. Cresson, President; M. W. Baldwin, J. Edgar Thomson, Thomas A. Scott, S. Morris Waln, A. Whitney, Wistar Morris, Robert Morris, G. H. Stuart, G. L. Bushby, W. G. Moorhead, and Charles Macalester. It was proposed at the meeting to raise the sum of $500,000 as a basis by subscriptions to the capital stock of the company, which amount it was thought would be sufficient to charter steamships for immediate service, and keep them for two or three years, until the profits of the line and additional subscriptions would enable the company to build steamships of their own sufficient for a semi-monthly line. Propositions from the Pennsylvania Railroad Company were read and adopted at the meeting, the substance of which is as follows:

The steamers to be first class, of about 3,000 tons register, and 400 English horse power, and to be run semi-monthly for a period of years. Capital not to be less than $2,000,000. The vessels to be ready for service March 1, 1865. In the meantime steamers of not less than 1,500 tons register, to be placed on the line not later than March 1, 1864, and continue until other vessels are ready—say not less than a monthly line. The Pennsylvania Railroad Company at their terminus to give free wharfage and suitable storage and shed room for coal and cargo. The steamship Company to be charged rates on freight and passenger traffic carried by them 20 per cent. less than the rates charged on similar traffic between Pittsburg and New York, and to be allowed a commission of 15 per cent. on all emigrant passenger fares accruing to the railroad company for such travel, delivered by the steamship Company to the railroad company, on joint ticket, to all points West, as per their tariff. Coal to be delivered at 20 per cent. reduction.

If the net earnings of the steamship company shall not yield six per cent. to the proprietors, then the railroad company will pay towards any deficiency an amount not exceeding six per cent. upon the capital invested during a term of not exceeding ten years. The steamship company to keep their steamships fully insured, and insure all property and all risks incident to the business of the company that can be protected by insurance. Every year an account to be stated. If there has been a loss at the end of each two years that loss to be paid by the railroad company to the amount above stated. All items of actual ordinary repairs to keep the property in good condition shall be charged to current expenses. In stating annual accounts there shall be included seven per cent. on the actual cash capital invested in steam vessels for this line—this annual charge to apply only on the capital as reduced annually by this allowance to cover uninsurable repairs, depreciation of property and all other risks or losses incident to the property of the steamship company. The rates of transportation by the steamship company shall not exceed rates charged to and from New York and Liverpool; the steamship company to convey all freight and passenger traffic passing over the Pennsylvania Railroad at their minimum rates of transportation, and to issue through tickets and joint bills of lading from such points in Great Britain at which their steamers may touch, to such points in the West, Southwest and Northwest, in the United States, as may be designated by the railroad company.

The steamship company to transport persons and property from Philadelphia to Liverpool and such other points in Great Britain at which the steamers may touch, upon through tickets and bills of lading issued by duly authorized agents of the railroad company. The steamship company shall enter into no contract or arrangement for joint tickets and through bills of lading with any other railroad without previous consent of the Pennsylvania Railroad Company.

A resolution was adopted, accepting the proposition submitted by the Pennsylvania Railroad Company, and it was also resolved that a committee of ten be appointed to solicit subscriptions, the committee to report on the 26th of January, 1864. The following gentlemen were appointed upon this committee: W. G. Moorhead, chairman J. G. Fell, A. J. Derbyshire, G. A. Stuart, E. A. Souder, A. S. Roberts, M. W. Baldwin, S. Morris Waln, J. C. Cresson, and J. E. Caldwell. It was decided to open a subscription paper at the meeting, and $101,000 was subscribed by A. Whitney & Sons, M. W. Baldwin, George H. Stuart, Jay Cooke & Co., Chas. Macalester, A. J. Derbyshire, H. C. Wood, A. J. Buckner, Frederick Fraley, John C. Cresson, E. A. Souder, W. P. Cresson, and others. The meeting then adjeurned to meet on the 26th of January.

Allegheny County Bonds.

Mr. Justice Grier, of the United States Circuit Court, for the Western District of Pennsylvania, has just filed an important opinion to the effect that the Cleveland and Pittsburg Railroad Company are liable to pay the coupons of the Allegheny County Railroad bonds, guarantied by that Company. An action of debt was brought in the Circuit Court of the United States against the Railroad Company on their guarantee, and the case was argued by John C. Knox, Esq., of Philadelphia, for the plaintiff, and by Messrs. Otis and Loomis for the defendants. Mr. Justice Grier says, in his opinion, that the Railroad Company had full power to make the contract of guarantee. That it was a guarantee to pay the interest of the bond punctually to the bearer of the bond at the time and place specified. That the bonds passed to bearer by mere delivery, and no assignment was required. That it was not necessary to sue the country or pursue it to insolvency, in order to recover against the Railroad Company, nor was any demand or notice necessary. This opinion fully establishes the legal liability of the Company on its guarantee. The amount of bonds guarantied was $150,000, of which $25,000 has been converted. Each $1000 bond in March next will have fourteen coupons overdue, making the bond represent, in principal and interest, $1,420. The coupons also bear interest, so that under this decision, they become a desirable investment.

Lehigh Valley Railroad.

This road is 46 miles long, running through the Lehigh valley from Easton to Mauch Chunk. Its capital stock is $2,297,250; funded debt, $1,465,000, and its scrip stock $355,145. The business of the year is thus set down:

RECEIPTS.

Coal transportation	$1,075,545
Passenger transportation	118,449
Freight transportation	176,081
	$1,370,085

EXPENSES.

Coal transportation	$459,266	
Passenger "	60,004	
Freight "	69,829	
		589,099
Leaving the net receipts for the year		$780,976
Balance of profits Nov. 29, 1862		351,613
		$1,132,589

Against which has been charged—

Dividend Jan. 9, 1863, 2½ per ct.	$59,207
Dividend April 15, 1863, "	59,207
Dividend July 15, 1863, "	59,207
Dividend Oct. 15, 1863, "	59,207
Six months' interest on $1,465,000 bonds, May 1	43,950
Six months' interest on $1,465,000 bonds, November 1	43,950
	324,730
Balance of profits, Nov. 30, 1863	$807,859

From this balance of $807,859, the Company have just declared a quarterly dividend of 2½ per cent. in cash, and a stock dividend of ten per cent., amounting together to $358,481, and leaving a net balance of $449,378.

Mariposa Company.

From the report, recently published, we learn that the amount of capital fixed and limited by this company is $10,000,000, divided into 100,000 shares of $100 each, all of which has been issued as full stock in payment for the Mariposa Estate, situate in the County of Mariposa and State of California, consisting of land, mines, mills, fixtures and personal property appertaining thereto, necessary for the business of the Company, and valued at that sum subject to existing mortgages amounting to $2,500,000, and which was purchased by the Company at such its fair valuation.

The debts and liabilities consist of:

The Brummagim and other claims, payment of the greater part of which has been tendered in United States legal-tender notes, amounting as nearly as can be ascertained to $390,668.

Floating debt, as per last returns of our manager in California, not supposed, now, to vary materially from this amount, but impossible to ascertain the exact amount with entire accuracy $63,000.

First mortgage bonds of the Company (secured by mortgages for the same amount subject to which estate was purchased by the Company), a portion of the proceeds of which remains in the hands of the Company, $1,475,000.

Debt of Worcester.

The debt of the city of Worcester is thus stated: City debt proper $96,380 07; war debt, $118,436 61—total, $214,816 68. Of this amount, $41,137 for State aid is due from the State, and will be paid next year, leaving the actual debt of the city about $174,000, or $6,000 less than on the first of January, 1863.

Boston, Hartford and Erie Railroad.

This road was chartered by the Connecticut Legislature in 1863, with especial privileges—with the right to buy, sell or lease any road of any corporation, in whole or part, and to construct any road or roads needful to complete the line to Waterbury, Conn., from thence to Fishkill, on the Hudson river. The authorized capital is $15,000,000. $8,500,000 has been paid in, and cash enough is now in the treasury to complete the road to Waterbury. The road starts at the foot of Summer street, Boston, and runs to Blackstone, Willimantic, Hartford, Waterbury and Danbury, to Brewster's. Here the road joins the Harlem for New York, or pushes on to Fishkill to unite with the Erie road for the west. The corporation has organized by a choice of a Board of Directors embracing men of wealth, standing, and position in the cities of New York, Hartford, Boston, and other cities on the route. A contract has been made with the Harlem road to connect with the Boston, Erie, and New York, and the laying of a double track has been commenced on the Harlem, to be ready for use when the Boston line reaches Brewster's.

But two links are needed to complete the entire road. One from Putnam, Conn., to Willimantic, twenty-four miles. One from Waterbury, Conn., to the Harlem railroad, thirty-eight miles. Seventy-five continuous miles of this road, to Boston will be completed early in June next. It is claimed that this road is twelve miles nearer Hartford from Boston than any other. It is under one corporation, and the directors and stockholders are one. It runs through the most populous districts in New England. Its pathway is studded with great manufactories. Eleven railroads intersect it from Boston to Hartford. When completed there will be a continuous road from Summer street, Boston, to the Hudson river; to Buffalo, Cleveland and St. Louis. From this place cargoes can be taken, and without change of cars, landed in Boston, and without cartage be put on board the largest ships, which can lay safely at the Boston termination of the road and receive their freight.—*Cor. Boston Journal.*

A British Railway from the Atlantic to the Pacific.

The Rev. R. C. L. Brown has advocated the construction of such a railway in a prize essay. He thus describes the route and its water connections: "There is steam communication to the head of Lake Superior; thence to the Red River Settlement a road could be made without much difficulty. From the Red River to Edmonton the way lies up the valley of the great Saskatchewan River, navigable for 700 miles. This is described as a splendid and extensive valley, capable of supporting a large agricultural population. At Edmonton the difficulties begin. Thence to Jasper House in the Rocky Mountains, 400 miles, the country is swampy and bad. There is a coal field here, and the same appear on the surface, at some places on fire. Here the party from which this information is obtained (the party of Canadians who entered British Columbia by this route last autumn) built their nightly camp fires of coal. The gorge through which this road enters British Columbia is the New Caledonia or Jasper Pass. It is described as a natural roadway through the mountains, which rise on either side like a wall, to a height of many thousand feet. From Jasper House to Tete Jaune Cache, at the head of the Fraser, the country around is rugged and mountainous; yet there is a valley through which a road or railway could be carried. From Tete Jaune Cache the road would probably take a direct course for Cariboo, by one of three valleys, as yet unexplored, which appear to connect the latter with the head waters of the Fraser. From Cariboo the line would be taken to the mouth of Quesnelle River, where it would join the great highways from the lower Fraser, and (should be ultimately constructed) from Bentinck Arm or any other seaport on the north-west coast. The whole distance between the heads of navigation—namely, from Lake Superior to Bentinck Arm, by this line is about 2,200 miles. It is preferable to the route by St. Paul's, Minnesota, because the whole course lies through British territory; and the Jasper Pass road is more free from Indian molestation than the more southerly passes.

☞ Mr. James W. Low has in press and is about publishing his Railway Directory for 1864. This year his work is got up with great care and correctness, and he has combined the Telepraph Companies with it, which as they are now forming a very important item in the enterprises of the day will prove interesting to the Railway public. The book when ready will be sent as usual to the Railroad officers.

Albany and Boston Railroad.

A bill has been introduced into the Assembly of this State, which provides that the Albany and Boston Railroad Company, in lieu of the payment of the subscription to the capital stock of said company in money as now required by law, may purchase the Rutland and Washington and Troy and Rutland Railroads, and issue stocks and bonds therefor, and vests the franchises and privileges of said roads in the Albany and Boston Railroad; but the stock so to be issued shall not exceed in amount the sum specified in the articles of association of the latter road.

Department of Agriculture.

We have received from the Commissioner of the Department of Agriculture, a copy of his monthly report for November, hereafter to be published monthly. We think if these reports were published quarterly they would be more useful than they are now. Our seasons, are not monthly nor by-monthly, and the differences between one month and another are not of financial or commercial importance.

The Inter-colonial Railroad.

The question of the construction of this road is now under very earnest discussion in the British provinces. The hesitation of Canada to unite with New Brunswick and Nova Scotia in the prosecution of the projected work, is creating some feeling with the latter, who now seem to look to a connection with the railway system of Maine as the only alternative left to them. The Morning *News* of Halifax after alluding to these difficulties says:

If, as we fully expect, Canada allows matters to stand as they are at present; or if she should make a proposition on any basis different from that which she has ignored, we have then no choice but to extend our present line of railway to the American frontier. There is one question, not an unimportant one either, to be considered in connection with this matter—will the Americans meet us at the frontier? To this we think a satisfactory answer can be given. It is a fact, known to many, that an effort is being made by the people of the State of Maine to push on their road to New Brunswick with a view of connecting with the St. Andrew's Line. There appears to be little reason to doubt that the work will be proceeded with. This effort of Maine should be an additional incentive to proceed Westward. The distance from the frontier to the place where it is proposed to form a junction with the St. Andrews line is only five miles. With this piece of road built, and the St. Andrews road unconnected with St. John, the up-river trade will undoubtedly be drawn towards Bangor. We would, of course, be the sufferers. In point of distance St. John has an advantage over Bangor. From Bangor to Woodstock, by the route proposed by the people of Maine, is 165 miles; from St. John to Woodstock *via* Douglas Valley is 125 miles, being 40 miles in favor of St. John—quite an item in railroad travel. We think there can be very little doubt as to the paying qualities of a line Westward, and as to the great benefit which it will be to our present line of road. The length of road to be built would be about 80 miles; the cost of construction has been variously estimated—by some at £640,000, by others at £750,000, and by others again at £880,000. We think, however, that the experience we have already gained in railroad building would enable us to construct the road for £700,000. Deducting the estimated net profits of the road from the interest on the outlay, and the amount to be made up from the Treasury would be a very moderate item, quite within our means. This is entirely apart from the increased revenue, and consequent decreased liability, on our present road which would result from the construction of the Extension. Several schemes for extension Westward have already been talked about, and among the rest one which provides for the construction of a branch line to Fredericton in such a way as to form, if needed, a portion of the road to connect with Canada. The location of the road in this way would be free from the objection urged against lines passing through St. John and extending Westward, of being too close to the American frontier.

Debt of Georgia.

The total indebtedness of the State of Georgia at the commencement of the present year was $14,149,410. The additions which have recently been added by the Legislature will make her liabilities in 1864 as follows:—

Total debt in 1863.....	$14,149,410
Added by Legislature.....	13,500,000
Total.....	$27,649,410

This is ninety-four dollars for every white male inhabitant of the State.

Boston and Fitchburg Railroad.

The gross income of this road for the year ending November 30, 1863, was $732,262 31; and the expenses $404,219 10—leaving the net earnings $328,043 21. Notwithstanding augmented expenses, the net receipts are $73,896 in advance of those of 1862, and they are also the largest gross as well as net earnings of any former year. After paying liabilities and the January dividend, there is a surplus of $138,209 51. About $68,000 invested in fuel, iron, lumber, &c., and $7,391 in real estate, are not taken into account in the above statement of the surplus on hand.

By a Legislative act of 1862, the corporation was authorized to extend its railroad from its then terminus east of Warren avenue, in Charlestown, to the bounds of the navy yard in that city. Subsequently by orders from Washington, the railroad was extended into the navy yard, so that munitions can now be delivered by continuous railroad from any of the New England States, the State of New York and the West, into the great naval depot of the United States in the East. Furthermore, by this extension about all the deep water in Charlestown can also be reached by the railroad, which, with the spacious wharves for vessels of the largest burthen that line the shore at this locality, will enable shippers to transfer merchandise direct from cars to the ship.

The cost of this extension was included in the annual expenses of the road, and also the outlay for a very material increase of the freight accommodations of the road. The President expresses the opinion that judicious economy will require quite an expenditure for the next year or two, in the way of renewing and enlarging buildings, and

also in increasing and adjusting track accommodation, in order to facilitate, expedite and economise work at the Charlestown premises, as the original buildings now thereat were not designed for an amount of business like that which reached there the last fall, being altogether inadequate to the purpose.

The road has divided seven per cent. for the year out of about ten per cent. actually earned.

East Mahanoy Railroad.

The following gentlemen have been elected directors of this company for the ensuing year:

President—A. J. DERBYSHIRE.

Directors—J. Pemberton Hutchinson, Thomas A. Biddle, J. N. Stone, H. Duhring, C. W. Trotter, A. E. Borne, James Milliken, D. C. Wharton, E. H. Trotter, John J. Thompson, George M. Troutman, Samuel J. Reeves.

Treasurer & Secretary—THOMAS HART.

The total cost of this road to the present time has been $380,415, upon which an interest of 6 per cent. per annum has been paid by the Little Schuylkill Navigation Railroad and Coal Company until the first day of April last, and on the first day of July a dividend of 1½ per cent. for three months was declared clear of State tax, payable on demand.

☞ The Cincinnati Mercantile Library Association numbers 2,066 members. The whole numbers of volumes catalogued is 21,834.

CENTRAL PACIFIC RAILROAD COMPANY OF CALIFORNIA.—The coupons due Jan. 1, 1864, on the Mortgage Bonds of this Company, will be paid on and after the 1st proximo, in gold coin, less Government tax, at the office of EUGENE KELLY & CO., No. 36 Wall street. 1md21.

GOVERNMENT SECURITIES, GOLD, STOCKS AND BONDS, Bought and Sold on Commission.

OFFICE OF THE ILLINOIS CENTRAL R. R. Co.,
New York, January 5, 1864.

Resolved, That the holders and owners of all shares of the stock of this Company, and of all obligations of the Company or provisional certificates authorizing the entry of shares thereof, upon which ninety dollars per share has not been paid, be required to complete the payment of ninety dollars per share thereon prior to or upon the twentieth day of February next, at the office of the Treasurer of this Company, in the City of New York, and that in default of such payment the shares will be sold at public auction, pursuant to Section four of the Charter of the Company.

By order of the Board.

613 L. A. CATLIN, Secretary.

OFFICE OF THE NORTH SHORE RAILROAD Co.,
FLUSHING, January 12, 1864.

PROPOSALS FOR EXECUTING THE GRADUATION, bridging, masonry and track laying upon the North Shore Railroad, will be received until 12 noon, the 31st January, 1864. Plans and profiles may be seen and schedules, specifications and blank bids obtained, by application at this office. All proposals must be directed to the Engineer of the North Shore Railroad Company, Flushing. By order

213 THOS. B. MORRIS, Engineer.

Chicago & Great Eastern Railway Company,

FIRST MORTGAGE BONDS,

FOR $2,000,000.

SUBSCRIPTION BOOKS OPENED WITH

Messrs. SCHUCHARDT & GEBHARD,

BANKERS,

No. 21 NASSAU ST., NEW YORK.

THE CHICAGO AND GREAT EASTERN RAILWAY COMPANY now offer for sale ONE MILLION ONE HUNDRED THOUSAND DOLLARS of their FIRST MORTGAGE BONDS, in sums of One Thousand Dollars each, maturing in thirty years, bearing interest at the rate of seven per cent. per annum, payable in the City of New York on the first days of April and October in each year.

These Bonds are secured by a First and only Mortgage on the property, income and franchises of the Railway Company, executed to Frederick Schuchardt and Henry Morgan of the City of New York, Trustees.

The remaining Nine Hundred Thousand Dollars of the Bonds are set apart and remain in the hands of the said Trustees, for the purpose of being exchanged for the indebtedness of the Chicago and Cincinnati Railroad Company, running from La Crosse to Logansport; this effected, the $2,000,000 will form a First and only Mortgage on a line of road 110 miles in length, extending from Chicago to Logansport, where it connects with the Cincinnati and Chicago Air-Line Railroad, forming the shortest line by 40 miles between Chicago and Cincinnati, and by 36 miles the shortest line between Louisville and Chicago.

It will also open, in connection with Roads now in operation, entirely new and very direct lines from Chicago to New York, Philadelphia, Baltimore, and all Eastern Cities. The distance between Chicago and New York by this route being shorter than by either of the existing lines via Dunkirk or Buffalo.

The road is now under contract, and the most strenuous efforts are being made to have it open for traffic during the summer of 1864.

The interest on the Bonds maturing during the progress of the work has been provided for, and will remain on deposit with the Bankers of the Company, Messrs. SCHUCHARDT & GEBHARD, No. 21 Nassau st., to whom the Company refer for further particulars, and where subscription books for this loan have been opened.

Dec. 23, 1863. No. 37 William st., New York

CAST STEEL.

MANUFACTURED BY

NAYLOR, VICKERS & CO., SHEFFIELD, ENGLAND.

CAST STEEL TYRES WITHOUT WELD,

Reversible Crossings and Frogs, Disc Wheels, Pistons and Piston Rods without weld, Crank and Straight

AXLES, AND EVERY DESCRIPTION OF STEEL FOR RAILWAY PURPOSES.

STEEL CROSSINGS have been in use more than three years with very little perceptible wear, in places where the ordinary ones had to be replaced every four months. They have been estimated to be good for ten years in the worst places.

THE "VICKERS" TYRES are in constant and extensive use on almost all the Railways in Great Britain, and also on many roads in other parts of Europe. Their chief advantages are:—1. Their Durability: they will outlast any Iron Tyre without being turned, and for this reason are cheaper than Iron Tyres (free of cost). 2. Their Safety: being without a weld they are not liable to break, and Steel is proved to be a stronger and tougher metal than any other. 3. Their Uniformity: they do not wear in flat places nor "laminate." 4. They are not injuriously affected by frost, and are guarantied to stand the severest climate.

STEEL AXLES will be found economical, because they may with safety be made much lighter than those of Iron. They will wear longer and "smoother," and will consume much less oil; nor are they liable to granulate from constant use.

For CIRCULARS, GIVING FULL PARTICULARS AND TESTIMONIALS, PRICES, etc., apply to **NAYLOR & CO.,**

New York, Saturday, January 30, 1864.

Working Steam Expansively.—Our Steam Navy.

There is no one subject which this JOURNAL includes within its sphere of observation or comment, of more importance than Navigation; for though at first sight it would appear as if railroad transportation was more particularly within our province of inquiry, yet they are both closely allied in purpose and results, and both owe their perfection to the use of steam: on land in the locomotive, on the ocean with the screw, or paddle.

When the prosperity of our Country in peace, and its security and glory in time of war, depend so much upon fast steamers, well handled and in full activity, certainly the consideration of their essentials for success, may be taken up by us with great propriety. And it so happens, particularly as at this very moment, the Country is startled with inquiries coming thick and fast upon us as to what really is the effective condition of our Navy. It is well known that the head of the Department has come, neither by education, experience, study nor intellectual superiority, to his most responsible position. And it unluckily has been the practice with former administrations to appoint political friends to this Department without regard to their real fitness for the place. Mr. Welles, of all those who have filled it, seems to have been least familiar with the details which constitute its principal elements of usefulness and success. Of course he was compelled to trust himself, blindly perhaps, to the direction of others; and consequently, if his administration were even brilliant, he was entitled to whatever credit he could obtain only by reflection and at second hand. If it shall appear that he had placed himself in the hands of men who knew little more than himself, the Country has suffered wrongfully, and has a right to complain. We all perceive that an enormous National debt owes much of its proportions to the cost of our Navy, and that one hundred and forty millions of dollars additional are proposed to be added to its previous expenditures. It is also a fact that four steamers of the Confederates have done enormous mischief on the Ocean to our commerce, and have escaped capture; and though we have in all six hundred vessels in our Navy, we have not been able to establish a perfect blockade, though one sufficiently vigorous to bring it within inter-national law, or effectually to close the ports of Mobile and Wilmington. New Orleans, Metamoras, and Savannah are no longer ports accessible to blockade runners, chiefly because our land forces have there established themselves. The Navy it is true has made many captures, whenever the enemy came within reach of its guns; but when he has chosen to keep out of our way, he has escaped without much difficulty. The captures made, amount to more than a thousand in number; but it will be found after all, that the Army has done its full share of this work. Those captured in the Mississippi and its tributaries, as well as in the rivers emptying into the Atlantic, have been often the result of the expeditionary movements of our own land forces.

With regard to the action of our steamers on the ocean, it is certain that hundreds of times our cruisers have been within a few hours' steaming of the Alabama and Florida, have been in fact in port with one or the other of them frequently, and yet they have not succeeded in destroying them The people of this Country wish to know the reason. The owners of our commercial steamers have long professed to know it. Our Chambers of Commerce have again and again given their opinions on the subject, the Press has been nearly unanimous in its verdict, and yet the system which created all this anxiety has apparently been beyond the reach of practical reform. It is indeed one of the chief faults of our Country that men in power are, for the time being, dead to the feeling of their responsibility to their constituents. At least, however, one fearless man has compelled even the Department of the Navy to come down from its quarter deck to repel boarders. A hand to hand trial is going on, committees are appointed in Congress to investigate our naval affairs, the appropriations asked for are reduced about forty millions, and the Secretary has actually proposed a race between one of his best appointed steamers, the Eutaw, constructed after his own preferences, and any vessel in the commercial service, of private origin; and the challenge has been accepted by the owners of the *Kin Kong*. We see a dilemma for the Secretary, however, of no pleasing character; for if there be faster vessels in our Navy than there are out of it, then why have they not been employed to hunt up and destroy the rebel cruisers. If it shall turn out that these pet steamers of the department can be easily beaten by ordinary commercial craft, then it would appear to be a consequence, that the system of the Secretary has been at fault, that his chief Engineers are not to be relied upon, and that the Naval assistants of the Secretary are not much wiser than himself.

The material point at issue appears to be whether the engines of our Government vessels are constructed upon correct principles, and whether what is termed the application of the expansive power of steam has been properly estimated or ignored in their construction. It is understood that Mr. Isherwood, to whom the country is indebted for the discovery that there is no gain in the expansion, is "the power behind the throne greater than the throne itself." He therefore builds his engines with nominally low pressure and condensing engines, but in fact high pressure; and to get speed, uses enormous boilers, large quantities of fuel, and massive machinery. It is alleged that his vessels can neither carry coal, armament, or crew enough without overload-

ing them, and actually destroying their buoyancy so much, as to neutralize their theoretical speed. This is the point which is to be settled by the proposed experimental race from Norfolk to New York.

We may here allude to some of the anxioms which are adopted in all elementary works of authority on steam. We quote from BOURNE a simple statement, and he is one of the latest and best writers with a practical purpose. "The efficacy of a given quantity of steam is more than doubled by expanding the steam four times." It is admitted that the efficacy of the stroke is made nearly one half less, but this is overcome by a most philosophical arrangement, viz: by making the cylinder larger and the piston to move faster in the proportion in which the expansion is carried out. To realize the largest amount of benefit the cylinder should be enclosed in a steam jacket, and effectually protected from refrigeration. In practice the greatest success has followed the adoption of the principle, and Mr. Dickerson, who has a very clear and logical mind, has given one explanation in relation to it which seems to have been overlooked in most of the treatises we have studied. A full head or pressure of steam in the cylinder requires more time to condense, puts the air pump to greater stress to supply and remove the condensed water, it meets with a back pressure from the condenser to a considerable amount, which reduces the effective moving power in the engine applied to the vessel. But we will let Mr. Dickerson speak for himself. In one of the notes attached to his pamphlet, which we have already quoted from largely, he says:

"Now a steam engine is like a water wheel in another particular—it is troubled by *back water*, that is, by back pressure steam, or steam which is in the condenser, and which resists the piston in its motion through the cylinder—just as the back water in a tail race piles up on a water wheel and resists its motion, if too much water is poured over the wheel. And there is a point where an increase of steam in the cylinder, or of water on the wheel, will cease to produce power, and only cost steam or water for nothing. In a steam engine as generally organized—that is, with the usual condensing capacity, or tail race (to carry out the illustration,) that point is about half stroke, beyond which steam gives no power, and is wasted.

"A few figures and the accompanying diagram will make this plain. Suppose an engine to be running with a boiler pressure of forty pounds to the inch—that is, twenty-five pounds above the atmosphere; and suppose the back or condenser pressure to be five pounds, which Isherwood assumes in his tables, and which is correct enough for full stroke engines, although too much for expansion; and suppose that engine to be run, first, with the cut-off closing at half stroke, and then with the steam valve open to the end of the stroke, so as to give full pressure to the piston all the way to the end. Now that engine will use just *twice as much steam* and fuel in the latter case as the former, and do no more work. To show that, a comparison must be made between the powers produced in the two cases. In the first case—that of half stroke—the piston will be pushed down half way, with the pressure of forty pounds to the inch, and then no more steam is taken; but the steam then in the cylinder will still drive the piston to the end of the stroke with a diminishing pressure, whose average will be twenty-eight pounds to the inch during the second half of the stroke; and consequently the average of the whole stroke will be thirty-four pounds to the inch; or the effect will be the same as if the piston had a pressure of thirty-four pounds to the inch, from end to end. But when the exhaust valve opens to let out the steam into the condenser, its pressure is only twenty pounds to the inch, and its temperature has fallen in the proper ratio; so that it is condensed rapidly and got out of the way of the returning piston—just as the water which falls out of the water wheel into an open tail race, runs off with little resistance to the wheel.

In all the replies to Mr. Dickerson, which his opinions have called forth, we have seen no attempt to confute these propositions, and we do not think they can be confuted. And if not, then the Secretary of the Navy is to blame for his pertinacity in adhering to his *high pressure condensing* engines, if we may be allowed such an expression. Again: The expansive power of the steam gained, is *pro tanto* an absolute gain "without any expenditure of steam or fuel whatever." This is the economical view of the principle, which has been ignored by the Navy Department.

We look forward to the coming race with interest from public motives only. It is time we came to some conclusion as to the proper construction of our steamers and their engines. Our countrymen are not behind any people in the world in invention, or mechanical ingenuity. Our country is the home of the practical arts. From our shores all the best saving labor machines in the world have gone forth. Our tools for manufacturing them are the most curious and perfect. It is hardly possible to name a useful article made o wood or metal which is not of American origin, or improved upon by American skill. In ship building, in the construction of steam engines, whether for land or ocean service we have no superiors. Even now our new traction engines are travelling all over the roads of the island of Jamaica. Our mechanics in steam, like the steam they operate in, expand as they work into engineers and artists, just as our common soldiers in the army become the best historians of the scenes in which they are actors. Of no other similar classes of men in any other part of the world can this be said. Let us then have the best steam navy in the world, and let us regard those persons with esteem, and reward them with honor, who at this very crisis of our naval progress step in and tell us of our mistakes. We have hitherto built the fastest sailing vessels and steamers. The Russians and Italians come here for their finest ships, and is it not disgraceful to us, that our own navy should prove the slowest in the world, and that out of six hundred vessels of war, we cannot find any fast enough to overtake the freebooters who have driven our commerce from the ocean.

Finances of San Francisco.

The following statement of the indebtedness of the City and County of San Francisco for the fiscal year 1862–63, is from the report of the Treasurer:

Issued.	Payable.	Annual rates.	Ann. sink. fund.	In circulation.
1851	1871	10 per cent.	$50,000	$1,352,600
1854	1865	7 "	5,000	42,000
1854	1866	10 "	16,666	178,500
1855	1875	6 "	In 1865	829,000
1858	1888	6 "	In 1867	1,138,500
1860	1870	10 "	5,000	59,500
1861	1870	10 "	2,500	20,000
1862	1877	7 "	In 1866	150,000
1863	1878	7 "	.....	90,000
Total				$3,355,100

Authority also exists for further issues (under an act of the Legislature passed April 23, 1863,) viz: to the

Western Pacific R. R. Co., 7 per cents	$400,000
Central Pacific R. R. Co., 7 per cents	600,000

Including the above, and also the city slip settlement bonds, the debt will be as follows:

Present indebtedness	$3,355,100
San Francisco and San Jose R. R. bonds (issued)	60,000
City Slip settlement bonds	960,000
Pacific and Central Railroad bonds	1,000,000
Total	$5,375,100

Add to this the balance of judgment debts, less amount provided for by city slip settlement, say $300,000, and the total indebtedness of the city authorized and in abeyance, at the end of the fiscal year ensuing, will exceed $5,500,000.

It is to be remembered, however, that the city holds the stock of the San Francisco and San Jose Railroad Company for the $300,000 subscribed, and that the subscription to the Pacific Railroad Companies was authorized to be made upon similar terms, and as the work progresses.

Schuylkill Navigation Company.

The report of the business of the year 1863 shows that the total tonnage amounted to 1,104,925, of which 884,377 tons was anthracite coal. The income of the Company amounted to $921,756 76. The total expenses were $765,173 05. Balance carried to the credit of the profit and loss account, $156,583 71, making the total credits to that account $229,048 69. The charge against the same is $57,667 97; balance to the credit of the account, Dec. 25, 1863, $171,380 72. Deducting from this balance the amount which is receivable in the preferred stock of the Union Canal Company, $16,308 59, there will remain the sum of $155,072 13. This sum, however, is liable to increase or diminution on the final settlement of the lateral railroad accounts, and of the account with the Philadelphia and Reading Railroad Company, under the arrangements and agreements hereafter referred to. But it is believed that the final settlement of these accounts will leave such a balance as will justify a dividend of four per cent. on the preferred stock of the Company, and a sufficient margin for any losses, expenses or contingencies incident to the business of the year not yet ascertained or presented.

The report of the Improvement Bonds of 1870, shows a balance outstanding Dec. 25th, 1863, of $461,000. The account of the Trustees of the Loan for the year 1863, is as follows:

Balance of cash on hand Dec. 25th 1862	$7,909 00
Renewal for allowances of five per cent. a ton on coal	44,227 80
	$52,226 80

The payments during the same period, $48,680 97. The total payments on the boat and coal loan of 1855, amounted to $57,875 11. Amount paid on the boat and car trust of 1863, was $48,414 44.

The cost of the property held by the trustees stood, Dec. 25th, 1962, at $233,650 14; boat notes issued in 1863, for new boats, $245,863; payments in cash for cars and boats, $26,027 31, making a total of $505,540 45; amounts paid by boatmen during 1863, $64,348 21; balance of property held by trustees Dec. 25th, 1863, $441,192 24; the amount of the boat notes outstanding Dec. 25th, 1863, $263,263, and the payment of these notes and of the amount advanced by the Company for

the account, viz., $177,929 24, making in all the sum of $441,192 24, will be discharged by the proceeds of the sale of the rail and car loan of 1863 to the Mine Hill and Schuylkill Haven Railroad Co. The balance of the contingent fund, Dec. 25th, 1863, amounted to $137,336 21, of which $94,658 33 has been invested. Balance not invested, and used by the Company as a temporary loan during the year $42,677 88.

The navigation was opened for use on the 7th day of March, and business was not interrupted by any accident during the whole year. The report states that the Company has doubtless suffered in tonnage from the want of boats and cars. The scarcity of labor and the delays in unloading the boats, have also tended to limit the working power of the company. The company it stated, needs an increase of steam tugs on the Delaware and Schuylkill and tugs of small capacity for use on some of the large slack water pools.

The number of boats engaged in the anthracite coal trade on the line in the year 1863 averaged about 550. The company contracted for about 162 barges, of which 122 have been delivered; of these 112 are of the largest class, carrying about 180 tons each and 13 are of the burthern of 120 to 140 tons. The remainder of those contracted for will be delivered during the winter, and new contracts for about 120 more, to be built and delivered in 1864, have been made. The report further states that, under existing circumstances, the company can probably so modify and increase the tolls on other articles than coal as to provide for a considerable part of any additional charges, thus sharing with those who furnish the tonnage and who are now receiving large prices, a part of their increased gains.

In January last negotiations were opened between the Philadelphia and Reading Railroad Company, the Mine Hill and Schuylkill Haven Railroad Company and the Schuylkill Navigation Company, have for their object a more perfect union and harmony of action between said Companies, for the protection and development of the coal trade of Schuylkill county, and securing its transportation to the great markets of consumption by the works of the Schuylkill Navigation and Philadelphia and Reading Railroad Companies.

To this end, it became necessary, first, to suspend the construction of the Schuylkill Haven and Lehigh River Railroad; second, to purchase or hold on permanent lease, the Mine Hill and Schuylkill Haven Railroad, and third, to provide for such reasonable division of the coal tonnage between the Navigation and Railroad Company as would afford proper compensation for the capital invested in the two works, and for the great advantages they afford to both producers and consumers of anthracite coal.

After a throrough examination of the whole subject, and numerous and earnest consultations to arrive at a right basis of settlement, it was finally agreed to.

First. That the existing agreement between the Schuylkill Navigation Company and the Mine Hill and Schuylkill Haven Railroad Company should be cancelled and terminated.

Second. That the Schuylkill Haven and Lehigh River Railroad Company should be consolidated with and be merged into the Mine Hill and Schuylkill Haven Railroad Company, and the work on the former road be suspended and the contract for it be cancelled.

Third. That a lease of the consolidated Mine Hill and Schuylkill Haven Railroad for 999 years should be made to the Philadelphia and Reading Railroad Company at a rent equal to 8 per cent. per annum, on a capital of $3,700 000.

Fourth. That the Schuylkill Navigation Company should agree to receive part of the money (to wit, $600,000) paid in as capital stock of the Schuylkill Haven and Lehigh River Railroad Company, and give in exchange for it $800,000 of the six per cent. boat and car loan of the year 1863, which would make the payment to the Mine Hill Company by the Navigation Company the same rate per annum as that given by the Philadelphia and Reading Company in the arrangement.

Fifth. That an agreement should be made between the Schuylkill Navigation Company and the Philadelphia and Reading Railroad Company, under which

1st. On all the railroads and their branches and extensions owned, leased or worked by the said Railroad Company and connecting with the works of the said Navigation Company at Port Carbon, Mount Carbon, Schuylkill Haven and Port Clinton, the cars belonging to said Navigation Company shall have the same facilities of access, laden or unladen, to and from all the mines reached by said railroad, and be transported at the same rates of toll and freight thereon as for the time being may be charged on cars belonging to said Philadelphia and Reading Railroad Company or any other person or party. So that in all respects and during the whole term of each of the leases or agreements relating to said roads, the coal trade thereon shall be on precisely an equal footing in proportion to the transportation offered for both of said Companies.

2d. That equal charges for toll and transportation of coal to way ponts and tide-water on the Delaware and Schuylkill rivers shall be adopted and charged by each of said companies and that if either shall desire or intend to make drawbacks or allowances on coal to be shipped or forwarded from tide-water of the Delaware or Schuylkill rivers, notices of such desire or intention to make such brawbacks or allowances shall be given to the other party before any arrangement or agreement for making the same has been offered or agreed upon.

3. That accounts of the income and expenses of each of the railroads so owned, leased or worked by said Railroad Company, shall be kept and stated annually, and if at the rates charged thereon for toll and transportation, there shall be either excess or deficiency of net revenue for the payments to be made by said Railroad Company by way of rent, such excess or deficiency shall be shared between the Navigation Company and the Railroad Company in proportion to the tonnage brought on their respective lines from said railroads in each year.

4. In case under these arrangements the coal tonnage intended to be divided between such companies shall not for the period between the first day of April and the fifteenth day of December in each year, be distributed in the ratio of 55 per cent. to the railroad and 45 per cent. to the canal, then the party carrying more than its share shall pay the other 25 cents per ton of its excess. But the arrangement for the computation of such per centages of the trade is to be suspended if between the first of April and the fifteenth of December in any year the line of either company is not in working order, for such time as said line may be out of use; and it is also to be suspended for any year in which the quantity of coal carried under the agreement by the Navigation Company shall reach 1,750,000 tons, but up to that tonnage it is to be in full force on both parties.

5. The accounts under these arrangements are to be made out annually; and settlements and payments made on the first day of March in each year.

These arrangements date from the first day of May, 1863, and the first settlement will be made on the first day of March, 1864.

The total coal business of the two companies for the ten years ending December 1, 1862, was 30,218,888 tons, of which the railway carried 18,654,237 tons, or about 61 per cent., and the canal 11,564,651 tons, or about 39 per cent., but the railway tonnage is for twelve and the canal for nine months in each year, and the proportion of 55 per cent. while the canal is in use are fairly established by the results of ten years' actual working.

The following resolutions attached to the report of the President, were adopted:

Resolved, That the Board of Managers be, and they are hereby authorized to cancel and terminate the agreement made the 31st day of December, 1861, between this Company and the Mine Hill and Schuylkill Haven Railroad Company.

Resolved, That the basis of the arrangement between this Company and the Philadelphia and Reading Railroad Company, referred to in the report of the Board of Managers, presented this day, be, and the same is hereby approved of; and that they be and are hereby authorized to perfect the same and to assume the obligations thereof in the name and on behalf of this Company in such formal contract or agreement as may be made therefor.

Resolved, That the Board of Managers be, and they are hereby authorized to borrow, for the purpose of purchasing barge, coal-cars, steam tugboats, and animals, or other motive power for using the same, such sum, not, however, exceeding one million of dollars, in the whole, as they may deem necessary. The certificates for such loan to be issued in such form, for such amounts, payable at such times, and transferable in such manner as the managers may designate. And the same loan to bear such rate of interest and to be negotiated on such terms and conditions as said managers may deem best for the interests of the Company.

Resolved, That the Board of Managers be and they are hereby authorized to make changes in the agreement between this Company and the Union Canal Company or to make a new agreement with that Company, if in their judgment such changes or new agreement will be beneficial to this Company.

The following preamble and resolutions, were unanimously adopted:

Whereas, it appears from the annual report of the managers, this day presented to the stockholders, that during the last year an agreement has been entered into with the Philadelphia and Reading Railroad Company, which it is believed will greatly increase the prosperity of this, as well as other carrying companies, and,

Whereas, the negotiation of the details of the agreement has been the result of much patient labor which devolved chiefly upon our President, Frederick Fraley, who has given much time in completing this highly important arrangement. Therefore,

Resolved, That the thanks of the stockholders be and they are hereby cordially tendered to our President, for this renewed evidence of the zeal and fidelity with which he has guarded our interests.

Resolved, That more substantially to testify our appreciation of the value of the services thus rendered, the board of managers be and they are hereby authorized to transfer to Frederick Fraley two hundred shares of the preferred stock of this Company, now standing in the name of F. Fraley, President, in trust for the Company.

Finances of Utah Territory.

From the Auditor's Report it appears that the assessed valuation of the taxable property of the Territory, is $5,048 200. From the Treasury at the commencement of the fiscal year ending October 31st, 1863, $5,439 68. That there was received into the Treasury during the fiscal year, $32,845 12. That there was disbursed during the fiscal

year $11,485 37. Leaving in the Treasury at the close of the fiscal year, October 31st, 1863, $26,799 48.

A Great Law Case—$1,500,000 Involved.

Our Canadian friends are having another season of the celebrated case of the Commercial Bank of Canada *vs.* The Great Western Railway. It was before the Conadian Court of Appeals at Toronto on Tuesday and Wednesday last. It possesses no little interest, and we give a brief history thereof: The Bank claims of the Railroad Company the sum of $1,500,000, advanced to C. J. Brydges, Managing Director G. W. R., and Thomas Reynolds, Finance Director G. W. R., on account of the Detroit and Milwaukee Railroad. It seems that after the Great Western Company undertook the completion of the Detroit and Milwaukee road, the large sum of money claimed in the suit was advanced by the Commercial Bank to Messrs. Brydges and Reynolds, both being officers of each Company. The Bank allege that the money was advanced to the Great Western, and on the failure of the Detroit and Milwaukee, demanded the return of their loan from that Company. The latter, however, asserted that the advances were made to the Detroit and Milwaukee, and not to the Great Western Company, and denied all the responsibility. The Bank commenced a suit fixing the sum claimed at $1,500,000, and the case was first tried at the Kingston (C. W.) Assizes, in May, 1862, and resulted in a verdict for the Bank. In August, 1862, the Great Western obtained from the Court of Queen's Bench a rule *nisi* calling upon the plaintiffs to show why a nonsuit should be entered, on account of the misdirection of the Judge, and the reception of improper evidence. The case was argued before the Court of Queen's Bench and in December a decision was given again in favor of the Bank. The Great Western took an appeal, which came before the Court of Appeals at Toronto on Tuesday and Wednesday as stated. On the bench were President M'Lean of the Court of Appeals; Chief Justice Draper, of the Queen's Bench; Chief Justice Richards, of the Common Pleas; Chancellor Vankoughnet, Vice-Chancellor Eston, and Hon. Justices Wilson and Morrison, being the chief judicial dignitaries of the province. The case was argued for two days, and the Court reserved its judgment. It is probable that the final decision will not be given until the March term of the Court—*Rochester Democrat Jan.* 8.

Population of Chicago.

The following is an official statement of the population of Chicago:

1830	70	1848	20,023
1840	4,853	1849	23,047
1843	7,580	1850	29,963
1844	10,864	1852	38,734
1845	12,088	1853	60,625
1846	14,169	1860	110,973
1847	16,859	1862	138,835

Pittsburg, Ft. Wayne and Chicago Railway.

The following statement will show the result of the business of this company during the eleven months ending November 30, 1863, viz:

Earnings for eleven months		$4,645,292 15
Excess of joint earnings received by Clev. & Pitts. R. R. Co. per contract		67,620 89
		$4,712,913 04
Less for interest on bds.	$709,258 78	
" expenses, viz:		
For improvements, &c.	1,274,433 37	
For transportation	2,759.163 06	
		4,742,855 21
Deficit		$29,942 17
Add deficit for year ending Dec. 31, 1862		183,671 11
Total		213,613 28

Receipts of Grain at Tide Water.

The following tables show the receipts of grain, and flour converted into grain, at tide-water, by the Erie and Champlain Canals, from 1849 to 1863:

	Grain, bu.
1849	11,986,690
1850	11,585,619
1851	16,762,718
1852	19,583,875
1853	19,316,019
1854	23,796,038
1855	21,618,904
1856	30,700,225
1857	16,142,810
1858	23,686,374
1859	18,049,798
1860	41,122,100
1861	62,275,951
1862	74,811,877
1863	66,713,000

Grain Trade of Chicago.

The following statement will show the total receipts of flour and grain at Chicago for three years:

	1861.	1862.	1863.
Wheat, bush	17,539,000	13,728,116	11,180,344
Corn, bush	26,543,238	29,449,328	26,460,508
Oats, bush	1,888,258	4,188,722	9,189,525
Rye, bush	479,065	1,038,825	889,760
Barley, bush	417,129	872,053	1,098,346
Total	46,862,634	49,227,044	48,708,483
Add flour into wheat	7,220,865	8,331,953	7,371,420
Total	54,093,219	57,558,999	56,079,903

The total shipments of flour and grain from Chicago for three years have been as follows:

	1861.	1862.	1863.
Wheat, bush	15,788,885	13,808,898	9,341,881
Corn, bush	24,186,382	20,452,610	24,444,147
Oats, bush	1,655,384	8,112,366	7,574,994
Rye, bush	422,492	871,776	835,183
Barley, bush	185,266	532,135	668,785
Total	42,237,926	47,777,865	42,864,850
Add flour into wheat	7,125,445	8,690,245	7,683,455
Total	49,363,381	56,477,110	50,548,345

TOTAL IMPORTS.

The foreign imports at New York in December for three years, have been as follows:

For consumption	$4,342,756	$6,831,073	$10,498,576
Warehoused	2,346,487	6,212,725	5,676,955
Free goods	2,574,248	1,950,504	834,074
Total merchandise	$9,263,391	$12,994,302	$17,009,605
Specie	353,530	78,316	116,493
Total imports	$9,616,921	$13,072,618	$17,126,098
Withdrawals		1,282,908	3,744,294

Subjoined is a summary of the importations at New York for the calendar year:

Dry goods	$43,036,100	$56,120,700	$67,254,500
General merchandise	81,978,400	117,151,200	119,949,900
Total merchandise	$125,614,500	$173,271,900	$187,204,400
Specie	37,088,400	1,390,300	1,476,900
Total imports	$162,702,900	$174,662,200	$188,081,300
Warehoused	41,072,200	45,486,400	60,146,400
Withdrawals	39,717,000	41,568,700	51,851,200

The imports of dry goods for 1863, compare as follows with the return of previous years:

	1861.	1862.	1863.
Manufactures of wool	$16,720,931	25,718,502	29,703,956
" cotton	7,192,524	8,501,512	7,913,957
" silk	13,334,411	11,568,807	15,534,469
" flax	3,510,803	7,666,946	10,381,059
Miscellaneous dry goods	1,808,520	2,665,370	3,731,106
Total imports	$43,656,689	56,121,227	67,274,547

The total imports of dry goods, for each month have been as follows:

	1860	1861.	1862.	1863.
January	$11,770,005	10,956,857	2,965,952	5,269,181
February	13,880,693	6,782,936	5,344,514	5,0 7,857
March	9,022,403	5,836,076	6,471,901	9,204,581
April	4,805,743	2,767,645	3,293,498	4,384,007
May	5,581,593	2,480,823	2,944,483	3,612,511
June	5,535,042	1,205,382	3,535,102	2,901,420
July	12,707,218	1,476,887	5,628,014	4,713,365
August	14,989,044	9,586,933	8,707,710	8,316,878
September	6,740,185	2,102,064	6,185,193	5,892,712
October	5,327,907	1,971,541	8,165,798	6,509,783
November	5,797,556	2,506,926	3,710,357	6,071,208
December	7,709,721	2,004,219	3,466,405	5,371,011
Total	$103,927,100	43,636,689	56,121,227	67,274,547

The aggregates of the dry goods importations at New York compare as follows with those of the preceding eleven years:

	Invoiced value.		Invoiced value.
1849	$44,435,571	1855	$94,974,042
1850	60,105,375	1856	93,362,893
1851	62,846,731	1857	99,534,129
1852	61,654,144	1858	60,154,509
1853	93,704,211	1859	113,152,624
1854	80,842,926		

The total imports and exports for the last four years were as follows:

Year ending June 30.	Total Imports.	Total Exports.
1860	$362,166,254	$400,122,296

American Railroad Journal.

Saturday, January 30, 1864.

Stock Exchange and Money Market.

The steamers on Wednesday took out only a moderate amount of specie, but a large one in Government securities. Just as soon as the capitalists of Europe, particularly on the continent, settle down to the opinion that the Union is not only not destroyed, but is to be consolidated on a basis not likely ever again to be disturbed by an unnatural and dangerous element, their investments in American securities will be on the largest scale. First, because at present prices as measured in gold, they are the cheapest in the whole world, and next, because there will be less danger to them in the future, than may be expected from the shifting political arrangements of the European powers, always jealous of each other, all having an exclusive policy for the preservation and enriching of dynasties and families. With them, public debts, taxation, and commercial interests are

merely the convenient instruments to perpetuate power in the hands of a few at the expense of the many. In Europe there is no particular purpose in Government but this. All its policy at this moment turns upon the private interests of four or five persons, as for example, the Emperor of France, the Emperor of Austria, the King of Prussia, the King of Denmark and some of the petty princes who claim by divine right the smaller inheritances of duchies and principalities. Now it is impossible that any system can be permanently prosperous and peaceful where such influences involve millions of subjects in war, without their consent, and large expenditures of money, and this taken from populations already poor by former as well as present exactions. There is not one of the principal countries in Europe which really has any surplus moneys in its treasury, or is ever likely to pay off its national debt as we twice have done. On the contrary, we are yet in our infancy, have never known till now what taxation really is, possess a growing vigor and strength, have continental power and resources, gold and silver in measureless quantities, and the most energetic, industrious and daring population in the world, enjoying the greatest contentment. The engagements of such a nation as ours must stand in the front rank of securities, and nothing remains but to conclude the war, and they will stand at the head of the stock lists in any commercial mart of the world. The conviction of their value will increase with our successes, of which the nations whether they like it or not, will have to be the witnesses. We therefore look to such a demand for our national securities as will raise their price, and by-and-by shift amounts of specie from the old to the new world in sufficient quantities to make our currency equivalent to gold.

Besides all this, we must not forget that the Money Market of London and Paris continues in an unusual state of disturbance. The Bank of England is again losing its bullion reserves, and the Bank of France is compelled to issue fifty franc bills to mitigate the pressure upon its metallic resources.

The latest arrivals bring us the news of an increased stringency in money in the principal European capitals. The drain of specie to the East is enormous, and as we think we showed in the last number of the JOURNAL, on English authority, cannot be easily met. There are no four hundred millions of dollars within the control of the cotton speculators, to liquidate and pay their Indian and Egyptian contracts. All that can be spared even for Brazil, which is a creditor country of England at this moment, taxes the financial ability of the English houses in that trade, and what they export in specie there does not come back.

Then again the affair of the Duchies grows more serious, and it is the opinion of the leading foreign journals that a war is at hand, which by its combinations will end in a general one. As Europe thus plunges once more into bloodshed and expenditure for the support of dynastic interests, we are emerging from our trials with unabated strength and resolution. To say that this will not bear upon the question of our national stability and credit, is to ignore every principle which actuates the business conduct and calculations of men.

The relations of gold to our currency are the only embarrassing ones with which we have really to deal. It may be pertinaciously insisted by the London *Times*, for the sake of depreciating our industrial strength, that we have lost half a million of our brave men in the field, but the officially stated fact is, that the whole number killed in battle is less than 30,000, and if we add to those permanently disabled by wounds, a hundred thousand more, we must remember that the foreign immigration the past year has more than made up those losses, and a still larger number of our native born have emerged from youth to manhood, and stepped forward to take their place among the industrious and producing classes.

We have as it were taken a bond of fate to indemnify us for all our losses, personal, pecuniary and political, and must come out of this contest, as no other nation ever did from any of their own.

Gold has risen and fallen the last week, and as a commodity, will fluctuate with the supply and demand. No doubt the agents of the foreign bankers have instructions to send abroad every dollar they can raise, and we believe they are stretching their credit to do so. This is the only country from which gold can be readily and promptly obtained by foreign merchants and bankers, or where the surplus, and often useless products of other countries, and even the refuse of their mills can be disposed of for cash. The readiness to buy on our part is an indication of the plentifulness of money, the enlarging tastes and wants of our people, natural to a condition of unprecedented prosperity, and the prevailing desire of all classes to enjoy their money's worth, and make the most of life.

It has been rumored that Mr. Chase has proposed a plan of permitting importers to pay their duties in currency, to be taken by the Treasurer at its market equivalent for gold. So that the Treasury will be in fact a seller of gold, fixing the price to the importers at the daily rates. This is a proposition which it was our chance to suggest to Mr. Chase nearly a year ago. The effect, however, is not fully determinable, for while it would lessen the street demand for the article, it would also leave a smaller sum to manage in the hands of the combination which now keeps up the price, and make it more easy to be handled, to the disadvantage of buyers for exportation. To this it may be replied, that the Secretary of the Treasury having the largest quantity on hand, and thus the power to undersell the street, could break down the prices at its pleasure, and having broken them down, could repurchase for the purpose of providing for its interest at rates even lower than those at which it commuted with the duty paying importers. There is not a particle of doubt, that if the associated banks in this city chose to do so, they could at any time by suddenly putting five or ten millions of gold on the street, break down the price and buy in again at rates to ensure a large profit. If this plan was once adopted, no outside combination could possibly maintain itself in keeping up the present prices. Money continues to be dear, and balances are carried by the stock operators at often as high a rate as 1 per cent. a month. All this we think a favorable symptom of a return to an equalization of our currency to specie.

We have previously noticed the singular fact, that the banks have held more specie than legal tenders, so that the inflation is in this instance purely a theoretical one. It is also worthy of notice that the price currents of provisions, and many staple articles in the Western cities are not more than a half, or two-thirds, of what we pay for them here. This is particularly true of the great Western City of Cincinnati, and it is evident therefore, the currency has not been inflated much there, as the prices quoted are in some cases no greater than they were when gold was the standard.

The Share Market has been feverish, yet the general tendency in railways is upward. The leading roads are doing so well and their condition appears to be so stable, that the public confidence in their future appears to be unabated. Thus we see whatever may be the temporary decline in the price in the street, there generally comes a rally which takes them back again to their previous rates. It is understood that the one year legal tender notes are shortly to make their appearance. They are to bear 5 per cent. interest, payable at the end of the year. These notes are to be paid out directly on the disbursements of the Government, because the small denominations of greenbacks are very difficult to be had. The new National bank notes without reference to their locality, are also being paid out by the Government when obtainable in small denominations. The condition of the Treasury is strong, its balances here being $27,000,000 in currency, and $15,000,000 in gold.

The demand for money is active. Exchange for the Wednesday steamer was 171–'72, which is relatively lower than gold at 157, 158, thus showing that there are parties here who will sell exchange whether at a profit or not, doubtless the result of instructions from abroad. Our exports for the last week ending on Tuesday were $2,753,-412 against $4,235,591 the same week last year, and $2,009,767 same week in 1862.

Our readers will find an interesting table in this week's issue, giving the details of our commerce with Brazil, from 1821 to 1861.

It appears that in 1850, the most favorable year for us, we exported to that country in values, $6,-280,255, and imported $21,214,803. There is no doubt that with steam communication we could largely increase our exports, since there has arisen an unusual demand in Brazil for our manufactures of the metals, agricultural implements and machines, owing to the rapid extension of the area and improvement of its cotton, sugar, and coffee lands. The present ruler of Brazil is very anxious to have closer commercial relations with the United States than ever, since his difficulties with England. All we have to do is to place four of our fastest wooden navy steamers on the route between New York and Rio, and the current of correspondence and trade would set in our favor. It is useless, however, to recommend any such measures to a Congress absorbed in political squabbles.

We are pleased to announce that the whole amount of the five hundred millions of 5-20's has been taken up, almost entirely by the people of this country, and indeed a surplus was subscribed which could not be supplied, to the extent of sixteen millions of dollars. They are quoted at

103⅝, a proof of popular confidence worthy of notice, and very suggestive of our financial strength. It is not yet determined by the State of Pennsylvania, whether the interest due on its public debt on the 1st of February shall be paid in gold or currency. Our own State has discriminated in similar cases by paying foreign holders in coin. We think it would be a wise policy in our sister State to follow this example. The loss of the premium to be paid, is nothing in comparison with the importance of sustaining its credit abroad, as it will afford another proof of the good faith which the North at least, has hitherto preserved with our foreign creditors.

The Connecticut war loan of $2.000,000, has been awarded at 101 for the whole amount to M. Kochum & Co. Portions of the subscription were made at better rates, and some dissatisfaction is naturally expressed at the award.

The banks of this city which have hitherto refused to pay the State tax on their capitals, under the claim of exemption by a law of Congress, which released from taxation the capital of those invested in United States stocks, have been compelled to pay up under a compulsory process issued by our tax commissioners, supported by a recent law of our State Legislature and a decision of the Supreme Court. The payment has, however, been made under protest, to await the decision of the Court of Appeals where the question yet remains for a final decision.

A bill has been introduced into the House of Assembly, authorizing a consolidation of the Harlem and Central Railroads, and it is said on the suggestion of the former only. We have frequently pointed out the immense advantage this would be to both companies, as it will give them a continuous and great trunk line, and no doubt be a profitable arrangement for both.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Illinois War Loan, 99@100¼; Brooklyn City 6s Water Loan, 106½; McGregor Western 1st mort., 91@93; Illinois coupon 6s, 1879, 100½; North Carolina 6s, 50; Kentucky 6s, 100; N. Y. City 6s, 1887, 108; Atlantic and Great Western 1st mort., (Ohio div.,) 94; N. Y. Central 6s, 1887, 103; Peninsular R. R. 1st mort., 80; Wyoming Valley Coal, ex. div., 82; Bucks Co. Lead, 1½; Quartz Hill Mining, 9@10½; Copake Iron Mines, 11¼@12½; Merchants' Bank, 106; National Bank, 104; Bank of Commerce, 101¼; American Exchange Bank, 108¼; St. Nicholas Bank, 101½; Mechanics' Bank, 111½; City Bank, 145; Mechanics Banking Ass., 100; Market Bank, 102; Chatham Bank, 102; Importers and Traders' Bank, 100½; Hanover Bank, 98; Continental Bank, 100¾; Park Bank, 125; New Haven and Hartford R. R., 200.

Philadelphia.—Elmira Chattle 5s, 75½; Cleveland and Mahoning 7s, 100½; Chester Valley, 51½; Huntington and Broad Top, 30; do., scrip, 75; Camden and Amboy mort. 6s, 105; 10th and 11th streets, R. R., 50; 13th and 15th streets, 34; 17th and 19th streets, 11¾; West Philadelphia R. R., 70½; Girard College, 26½; Ridge Avenue, 20½; Allegheny Co. coupon 5s, 72; Fulton Coal, 4⅝; Penn. Mining, 9; Union Canal, 3¾; Locust Mountain, 34; New Creek, 1⅛; Big Mountain, 7¾; Green Mountain, 6¾; N. Y. and Mid. Coal Fields, 9½; Shamokin Valley, 40; Hazleton Coal, 68; Bank of North America, 154; Mechanics' Bank, 27; Consolidated Bank, 32⅛; Girard Bank, 46; Northern Liberty Bank, 68; First National Bank, 110; City Bank, 52½; Reliance Insurance, 60; Del. Mut Ins., 82. The latest quotations are: City 6s, 101@101⅛; do., new, 104@104½; State 5s, 95@95⅛; Reading, 57⅝@57¾; do., 6s, 1870, 105@106; do., 1886, 115@116; Camden and Amboy, 158@160; Pennsylvania R. R., 72⅛@72⅜; do., 1st mort., 107⅛@108; do., 2d mort., 105½@106; Little Schuylkill R. R., 47@48; Morris Canal, 62½@70; do., pref., 132@132¼; bonds, 104½@105; do., 2d mort., 100½@102; Susquehanna Canal, 17⅞@18; do., 6s, 62@62½; Sch. Nav., 19¾@20; do., pref., 34@34½; do., 6s, 1882, 86½@87; Union Canal pref., 4⅜@5; do., bonds, 28@28¼; Delaware Div. Canal, 36@37; do., bonds, 94@97; Elmira and Williamsport, 37@38; do., pref., 51@53; do., 7s, 1873, 104@106; Beaver Meadow, 80@80⅛; Harrisburg, 72@72⅜; Long Island R. R., 42¼@43; Lehigh Coal and Navigation, 60@60¼; do., scrip, 49@49¾; North Pennsylvania, 29½@29¾; do., 6s, 93¾@94; do., 10s, 120@121; Philadelphia and Erie, 36¾@37; do., 6s, 102½@103; Minehill, 60@60½; Catawissa, 23¾@24; do., pref., 42¼@42½; Lehigh Valley, 92¾@93½; do., bonds, 103½@104½; Fifth and Sixth streets, (horse.) 58@60; do., 7s, 105@106; Second and Third, 78½@79½; Race and Vine, 20@22; West Philadelphia, 70@71½; Spruce and Pine, 13@13¾; Green and Coates, 44; Chestnut and Walnut, 59@60; Arch, 31½@33; Thirteenth and Fifteenth, 32@34; Seventeenth and Nineteenth, 11¾@12; Girard College, 26½@27; Tenth and Eleventh, 49½50; Norristown, 56¾@57; Lombard and South, 17⅛; Ridge Avenue, 20@21.

Boston.—Michigan Central 8s, 1869, 121; Vermont Central 1st mort., 87½; Conn. and Pass. River R. R. bonds, 1876, 99¾; Northern (Ogdensburg) 1st mort., 97¼; do., 2d mort., 23; Rutland 1st mort., 66; do., 3d mort., 4; Troy and Greenbush guar. 7s, 53½; Cape Cod Br. R. Chicago and Rock Island Railroad.

The recent advance in the market value of the securities of this road, instead of being due to speculation, only keeps pace with their real value. There is no road in the country in position to share so largely in the wonderful development of our resources which is now taking place. Within three years the whole aspect of the west has been changed by the gold discoveries in the interior of the continent. A great State, far excelling California in mineral wealth, is growing up upon the eastern slope of the Rocky Mountains. Colorado the past year produced $18,000,000 in gold. The yield the present year will be $25,000,000. Idaho, lying to the north, will produce at least on half as much. Not including Nevada, the yield from these newly discovered gold fields, the present year, will equal nearly $40,000,000. These fields bear the same geographical relation to the western states, that those of California and Nevada do to the Pacific Ocean. The former are peopled and fed directly from the west. A vast commerce has already developed itself, the value of which in both directions, the present year, will be more than $50,000,000. The emigration to them will number 50,000 souls. Every year will enormously swell these aggregates. The new traffic created already exceeds the capacity of any one *line of railroad.*

Such being the fact, about which there is no difference of opinion, there is every reason why the lines of railroad upon which this traffic is to fall should increase immensely in value. For the

great line from the Missouri to the Pacific Ocean, Congress has made the most liberal provisions, and the work upon it is being vigorously pushed at each end. The complement of this line from the Missouri to Chicago, is the Mississippi and Missouri, and the Rock Island roads. This link is already filled from Lake Michigan to the central portion of Iowa. Within the coming year, it will be complete to Omaha, the point which has been established by the President of the United States as the eastern terminus of the Pacific Railroad.

The Rock Island will then be the most productive link in the great Continental line. It has entered into permanent arrangements with the Mississippi and Missouri Railroad which secures to it all the traffic of the former. It is this connection which has, the present year, so largely increased the earnings of the Rock Island road.

Such is the present and prospective position of this work. It earned last year 27 per cent upon its capital. For the present year it is earning at the rate of $2,200,000 on a capital of $5,600,000 in stock, and $1,379,000 in Bonds, making an aggregate of $7,000,000. This may be reduced to $620,000 by cash assets in the hands of the company. It will earn the present year about $1,100,000 net $1,000,000 of which will be applicable to the stock.

It will earn a much larger sum the coming year. Already it has become a great highway to the Rocky Mountains. Every month will increase this traffic. If it was a productive work upon its local business, what must it become with the vast increase in store for it? Its securities, with its present earnings, ought to be worth as much as the Cleveland, Columbus and Cincinnati. With the future before it, their value certainly cannot be excelled by that of any railroad in this or any other country. By any proper standard they are still low, and the public will so regard them, so soon as their real merit is understood.

The Reservoir Mercury Gauge.

In another part of the JOURNAL will be found an advertisement of a mercurial gauge for stationary, marine and locomotive engines, invented and patented by P. S. Justice, the result of his own convictions that some such gauge had become a necessity, as well as of long and careful study. One of the very first and most important questions to be solved by the practical engineer in charge of a steam Engine is, what is the actual pressure of the steam in his boiler; for on the knowledge of this fact depends the safety of those he is driving along, whether in the railway train, or in the steamer, and of those who may be employed about him in the factory or machine shop.

It is also a necessity in the skillful management of his engine, because there is also an intimate relation between the pressure in the boiler, and the effective working power of his engine. To ascertain this with certainty is the object of the steam gauge. The most common form has been that of the siphon tube, bent like the letter U, the mercury being pressed down in the leg communicating with the boiler, and causing it to rise in the other, in which a rod floats and indicates the height on a graduated brass scale, showing the difference of the level between the two legs; an inch of rise in each being equivalent to two inches, or a pound of pressure.

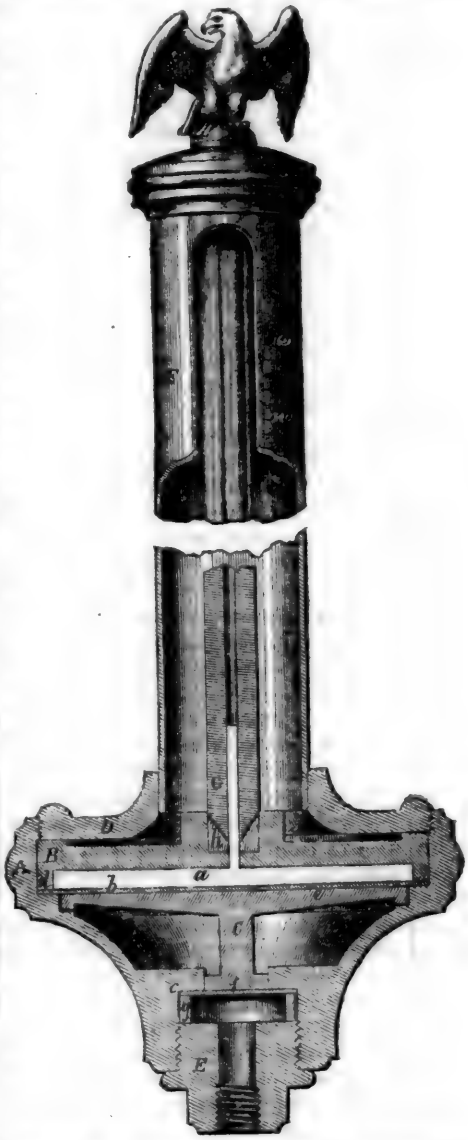
Bourdon's gauge or Ashcraft's as it is called in England is on the principle of a coiled elliptical metal tube bent as a ring which contracts or expands its circumference according to the pressure, its end being pointed and acting as an index. Another invented by Mr. Shank obtains the amount of pressure by the compression of a bulb. There are also gauges which are elastic springs and of various forms. Still there was room for a better one than any of these, and it is claimed for Mr. Justice that he has hit upon the right one. Before describing it in detail, we may remark, that the principle is that of introducing mercury into a small flat cylindrical chamber, whose area is large in proportion to the diameter of the column of mercury which rests upon it, the rise or fall of which is seen on an adjoining scale connected with it. The movement of the plunger which fits in this chamber drives the mercury up its tube, and such are the relative proportions of the surface of the mercury in the chamber to the thread which is forced up the tube by the plunger, that the scale is a very extended one, the smallest rise in the chamber is multiplied in a large ratio in the tube, and a very small quantity of the mercury is sufficient for the purpose. These gauges are said to be very accurate and successfully used on the locomotives of the Erie and Reading Railroads, and several steamers, while in many factories and machine shops they are very much preferred to all other kinds. Our readers by looking at the following cut and reading the description will readily form an opinion of this new pressure guage. The cut represents a vertical section, and presents square lines and curves to the eye, which in the guage itself are parts of cylinders, and circles, and are more readily understood.

A is a brass cup containing the iron disc B, which is recessed on its lower side to form the mercury chamber *a*."

C, is a double-headed piston or plunger, with its upper and larger head covered by gum diaphragm *b*, and receiving the pressure of the mercury in chamber *a*, and into which it passes when the pressure is applied on the head of the piston *f*."

D, is a cap screwing into the cup A, and impinging on an iron disc or mercury chamber B, and the gum diaphragm *b*, thus being a perfectly tight joint at its point of contact *d*, and preventing any escape of mercury into the lower part of the cup A.

E, is a jam-nut with an orifice (for the steam) which presses against a perforated button or ring *g*, which in turn impinges on gum diaphragm *e*, making an air and steam tight joint at point of contact.



f, is the lower and smaller head of the piston, which receives the steam pressure, and in its upward motion forces the mercury in chamber *a*, through the small perforated aperture in the centre of disc B, immediately over which is the glass tube G, into which it rises to the point indicated by the register.

h, is a gum ring or cushion to receive the conical end of the glass tube G, which is firmly pressed upon it by screwing on the top cap of the brass tube F.

Having personally inspected this guage we recommend it to the attention of managers of Railroads, Manufactories, Blast Furnaces and Machine shops, as possessing the following advantages:

1st. It is the *only practical Gauge* for Locomotives, Stationary or Marine Engines, which is not liable to register falsely by constant use; being *always true*, under any conditions of temperature existing between the Tropics and the Poles, and having great compactness in form.

2d. It is a *plain mercury column* (open to the atmosphere) operated upon by the movement of a double headed piston or plunger beneath it; the lower or small head of the piston (with an area varying from one-tenth to one-hundredth part of the area of the upper head) receives the steam pressure; whilst the upper or larger head of the piston receives the mercurial pressure as shown in the annexed cut; this arrangement permits the

use of short columns of mercury in registering high pressures.

3. Having *no Metal Springs, Tubes nor Corrugated plates* to *corrode, granulate* or *break*, it is not liable to any of the accidents which constantly attend other guages employing these uncertain and perishable mediums; the only part liable to breakage being the glass tube, which however is securely cased in brass and can be duplicated to any extent (at a slight cost) without affecting the registery or accuracy of the gauge.

4. Should any part of this gauge be broken by

accident, or by being tampered with, the mercury immediately sinks into the reservoir and thus indicates that it has ceased to register; whilst with all other gauges employing Springs, Tubes or Corrugated Plates, the registry may be *apparently* truthful for months after they have *really* ceased to be correct; thus the Engineer is often thrown off his guard at the time when he has most need of a monitor to warn him of his danger.

These Guages are manufactured solely by Philip S. Justice, by whom the fullest information will at all times be readily furnished at his offices, 42 Cliff street, New York, and 14 North Fifth street, Philadelphia.

The Knickerbocker Life Insurance Co.

We present to our readers in this issue, the card of the Knickerbocker Life Insurance Company of New York. This institution is now in the front rank of American life corporations, and for safety, reliability, and the most liberal treatment of policy holders, its reputation is beyond reproach. The steady growth, and permanent prosperity evinced in its yearly statements warrant us in saying, that the confidence manifested by the public has been fully merited. The management are from among our best and most successful business men, and are well-known in the community for their honorable dealings and unimpeachable integrity. Life insurance is of itself a great benevolent scheme, and as a system deserves unlimited support. The only question is as to companies, and we can heartily commend to our readers the Knickerbocker, as one in which they can have implicit confidence. The office is at 161 Broadway.

Negotiability of Railroad Bonds.

There ought not to be any question that the bonds of railroad or other corporations, payable to a specified person, or his assigns, are subject to the same rules as bills of exchange or promissory notes, in respect to their negotiability free from any claims of the corporation against the person named in the bond.

But the Supreme Court of Maine having lately decided that bonds are not thus negotiable, we are glad to notice a recent case in the New York Court of Appeals, (Brainerd against the New York and Harlem Railroad Company,) in which a contrary decision was made. In this case, several bonds had been made under seal, payable to G. L. Schuyler or his assigns, and transferred by his assignment in blank.

The Harlem Railroad Company sought to set off their claims against Schuyler in this action, and not being allowed to do so, appealed. The following opinion was delivered by

Denis, Ch. J, who, after disposing of some questions of fact, said:

The questions of law which the appeal presents, are whether the instruments are commercial paper so as to be negotiable, and whether they were legally negotiated by delivery under the blank assignment.

These might have been very grave questions in this State a few years ago. But they have been settled against the defendant in this state by a series of decisions which it is impossible at this day to depart from.

In The State of Illinois *vs.* Delafield, (8 Paige, 527,) and the same case on appeal in the Court for the Correction of Errors, (2 Hill, 159,) it was held that the bonds of the State of Illinois executed under the seal of that State, were negotiable securities in such a sense as that a purchaser would acquire a title superior to that of the party to whom they were originally issued, and an injunction against transferring them was granted by the Court of Chancery, and sustained by that Court and the Court of Errors on that precise ground. These cases were referred to with approval in this Court in The Mechanics' Bank of New York *vs.* The New York and New Haven Railroad Company, (3 Kern., 599, 626.) The Bank of Rome *vs.* the Village of Rome, was an action brought on certain bonds issued under the defendants' corporate seal, and they were held to be negotiable; and a defence sought to be set up against the plaintiff who was a *bona fide* holder was excluded, though it would have been available against the original party, (19 N. Y., 20.) The instruments in question in the cases cited were not it is true the bonds of a railroad corporation, but they were under the corporate seal of the maker. No distinction can be made between such corporations and those which are created for governmental or municipal purposes. The point of objection when it is sought to bring such securities within the law of commercial paper is, that being under seal they are deeds, and commercial instruments are simple contracts. But when such obligations are issued to secure the payment of money upon time, and contain on their face an expression showing that they are expected to pass from one person to another, and thus to perform the office of bills and notes, or of money, as the words "bearer," or "assigns," or "the holder," or like the courts of this country with a single exception, and those of this State without any exception, have concurred in attaching to them the attributes of commercial paper. The case of White *vs.* the Vermont and Massachusetts R. R. Co. (21 How. U. S., 575,) was an action to recover on a bond issued by a railroad corporation, the payee's or obligee's name being left blank. It was held that the instrument was negotiable, and that the plaintiff to whom it had been transferred might insert his own name in the blank. The exceptional case which has been alluded to is Diamond *vs.* Lawrence County, (37 Penn. 351.) The Court held that a bond like the one before us, except that it was payable to bearer, was not negotiable; but the learned judge who delivered the opinion of the Court admitted in express terms, that all the courts, American and English were against him. Whether this admission was not too broad as respects some of the English tribunals may be questioned; but as we feel bound to follow the judgment of the courts of this State, it will not be useful to criticise the cases which have been adjudged elsewhere.

Having come to the conclusion that the instruments are negotiable paper in the nature of promissory notes, it follows inevitably that the blank assignment signed by the payee was a sufficient transfer of them, and that the plaintiff was entitled to insert his own name in the blank, (Van Duzer *vs.* Howe, 21 N. Y. 531; Edwards on Bills, 275;) and also that the defendant could not be allowed a set off against the payee without establishing that the plaintiff was not a *bona fide* holder. The result is that the judgment of the Supreme Court must be affirmed.

All the judges concurred in this opinion.

Commerce of Brazil.

The following is a Statement of the Commerce of the United States of America with the Empire of Brazil from 1821 to 1861:

	Exports from the U. S.			Imp'ts into
	Domestic.	Foreign.	Total.	United S'ts.
1821.	$885,348	$496,412	$1,381.760	$605,126
1822.	1,317,411	246,518	1,463,929	1,486,567
1823.	1,062.209	279,181	1.341,290	1,214,810
1824.	1,699.754	602.150	2.301,904	2,076,119
1825.	1,641.296	752.458	2,393,754	2.166,707
1826.	1,597,344	602.005	2,200.349	2,166,678
1827.	1,486.433	377,378	1.863.808	2.060,971
1828.	1,505,779	482,936	1,988,715	3,097,752
1029.	1,510,260	419,667	1,929,927	2.585,467
1830.	1,600,999	242,239	1,843,238	2,491,460
1831.	1,652.193	423,902	2,076,095	2,275,829
1832.	1,232.077	822,717	2.054,794	3,890,815

Atlantic and Great Western Railway.

At a meeting of the stockholders of the Atlantic and Great Western Railway of Pennsylvania, held at their office in Meadville, on the 11th inst., the following directors were chosen:

Wm. Reynolds, President; Gaylord Church, Jas. J. Shryock, Marvin Kent, John Dick, T. W. Kennard, John McFarland, O. Hastings, G. A. Bittenbanner, J. H. R. Rose, C. E. Blakesley, A. W. Mumford, Samuel Wann.

At a subsequent meeting of the Board, T. W. Kennard was appointed Vice President, and Wm. Thorp, Secretary and Treasurer.

Oil Creek Railroad.

At the annual mesting of the stockholders of this company held at Warren, Pa., on the 11th inst., the following directors were chosen:

President, I. Struthers; Directors, Orris Hall B. J. Wells, Boon Mead, Myron Waters, James H. Eddy, C. C. Wetmore, J. S. Alden, L. Olney, Jr., E. Cowan, G. V. N. Yeates, and H. A. Kent, Secretary and Treasurer, John F. McPherson.

The business on the 27 miles from Corry to Titusville for the 14 months ending December 31st, 1863, is represented as follows:

There was carried over the road since November 1st, 1862, 430,684 bbls. oil, 459,424 empty bbls., 22,727 tons of merchandise, and other

freights, and 59,987 passengers. Total receipts, including mail, telegraph and express business, $384,705 18.

A dividend of 25 per cent was declared to Jan. 1st., 1864.

Banks of the United States.

Railroad Earnings--Weekly.

The earnin6s of the Chicago and Northwestern Railroad for the second week in January, 1864, were $21,316 95
Corresponding week in 1863..... 14,390 83

Increase..... 6,926 12

The earnings of the Galena and Chicago Union Railroad for the 3d week in Jan., 1864, have been $42,716 59
Corresponding week of previous year. 31,379 76

Increase $11,336 83

The earnings of the Michigan Southern and Northern Indiana Railroad for the 3d week of Jan., 1864, were..... $60,088 00
Carresponding week of previous year.. 50,704 00

Increase..... $9,384 00

The earnings of the Chicago and Rock Island Railroad for the 3d week in January, 1864, were $60,042 00
Do., 1863..... 37,512 00

Increase..... $22,530 00

The earnings of the Michigan Central Railroad for the 3d week in Jan., 1864 were.... $67,540 00
Corresponding week of previous year.. 63,574 00

Increase..... 3,966 00

The earnings of the Cleveland and Toledo Railroad for the 3d week of January, 1864, were $30,481 00
Same week, 1863 ..... 29,834 00

Decrease..... $647 00

The earnings of the Grand Trunk Railway for the week ending January 16th, 1864, were:

Passengers	$21,990 88
Freight and live stock	62,030 81
Mails and sundries	3,800 00
Total	$87,821 69
Corresponding week, 1863	96,857 53
Decrease	$9,035 84

The earnings of the Marietta and Cincinnati Railroad for the 3d week in January, 1864, have been $32,135 24
Corresponding week in 1863..... 20,715 53

Southern Wisconsin Railroad.

The extension of this road from Monroe to Dunleith on the Mississippi river, opposite Dubuque, is receiving considerable attention from the people of Milwaukee. It is said that the extension would bring an enormous amount of business to the line. There are two charters for an extension; one authorizing the construction of the road through Shullsburg, New Diggings, Beetown, &c., and the other through Calamine, Platteville, &c. It is claimed that the distance from Monroe to Dunleith, by the Shullsburg route, is 58 1-2 miles, while it is about 87 miles by the Platteville route. This is an argument for the former, as it is desirable to build railroads, now-a-days, on as near an air-line as possible, if the topography of the country will admit of it. This is said to be favorable by the Shullsburg route.

The Milwaukee *Wisconsin* urges the project with force and earnestness. It says:

These railroad connections are the short sections between the old La Crosse road, near Sparta, to a point opposite Winona, and that between Monroe and Dunleith, opposite Dubuque. Both of these being built, it would give direct railroad communication with the very heart of Minnesota and Iowa, two of the most fertile and promising States in the Northwest.

It particularly urges, for the following reasons, the extension of the South Western railroad from Monroe to Dubuque:

There are gentlemen who desire to perfect arrangements, for the proposed extension, *via* Shullsburg, New Diggings, &c. The distance is only 58 ½ miles, which it is necessary to build the road, and the country is favorable for its construction, while the people along the route are ready to do everything in their power, by way of co-operation.

After it is built, the Milwaukee and Prairie du Chien Railway company stand ready to lease and stock it, paying eight per cent upon the cost of construction. With this short section constructed, the connection would be formed with the Dubuque and Pacific railroad, which extends from Dubuque westward, which is already in operation a distance of one hundred miles; and which will eventually form connection at Sioux City, with the great Pacific Railway extending across the continent.

The shipments from the mining regions in the southwestern part of the State have heretofore gone by the Illinois Central, and to show the extent of the trade which exists in those regions, we present the following statement, prepared by citizens of Lafayette county, men of standing, whose authority is beyond question:

Shipments Eastward from the several stations on the Illinois Central Railroad from Galena to Warren, inclusive, and including shipments from Galena by river, in 1862, and estimated value thereof, viz.:

Wheat 363,250 bush. at 85 cts. per bu.	$308,762 50
Oats 1,007,768 " 50 " "	503,880 00
Flour 40,371 bbls at 4.50 per bbl..	182,669 00
	$995,311 50
Returns of the shipments from all of the points included in the above statement, in 1863, could not be procured, but buyers and shippers agree in the opinion that the shipments in 1863 exceeded those in 1862, from 50 to 100 per cent. Therefore add 50 per cent to the above amount for increase in 1863	497,665 75
Making total estimated value of those articles shipped in 1863	$1,492,967 25
To which add lead 17,000,000 lbs at 8 cents per lb	1,360,000 00
	$3,752,967 25

To which is still to be added, the value of the bacon, lard, butter, eggs, cattle, and a portion of 12,123,210 lbs. of miscellaneous articles shipped from Galena—making a grand total value of pro duce of fully *four millions of dollars.*

We notice also that the Chamber of Commerce of Milwaukee (a most energetic and practical body) has passed the following resolution on the subject:

Resolved.—That a committee of five be appointed by the President, to collect and report facts in relation to the feasibility of the construction of a Railroad from Monroe to Dubuque, and the amount of business which it would transact, together with any other information which they may think proper relating to the subject; and that they invite the several committees of the citizens of La Fayette and Grant counties now in the city, and also Mr. B. H. Edgerton who has recently made surveys of said Railroad to appear before them, and present such facts as they think proper.

The following gentlemen were appointed as the committee indicated in the resolution: Messrs. H. T. Thompson, Jackson Hadley, E. H. Brodhead, Geo. W. Allen, J. A. Dutcher.

The Hoosac Tunnel.

The Governor of Massachusetts, in his recent annual message, makes the following statements in relation to this great work:

The enterprise of constructing the Hoosac Tunnel is in vigorous progress, under the management of its able and experienced Commissioners. The construction of the road lying east of the mountain, of which the eastern terminus is in Greenfield, is not yet resumed. Certain questions of title, springing from what is called "The Smith Mortgage," seemed to render it improper that the Governor and Council should assume that responsibility in advance of judicial determination. The Attorney General of the Commonwealth was charged with instituting proceedings to bring these questions before the Supreme Judicial Court for adjudication, and I am advised by him that measures are in progress to accomplish that end.

A report has been made by the Commissioners to the Governor and Council, bringing down to the close of the last calendar year an account of their doings and expenditures. This document, with various legal opinions in writing, and the record of the proceedings of the Governor and Council in relation to the railroad and the tunnel, may all be important for consultation, should the Legislature find occasion to consider any matter pertaining to the enterprise, or should any new legislation be invoked concerning it. I think that a Committee of the Legislature ought annually to

examine the progress of the work, the reports made to the Executive Department, and the contracts authorized, so as to understand the general economy of the management. But I do not think that either economy or efficiency requires, or is even consistent with, annually publishing the precise measures planned by the Commissioners. To do so would sometimes be fatal or injurious to their success.

Warrants have been ordered, during the past year, for the payment of $21,993 40 in liquidation of land damages, and $153,006 51 in liquidation of claims against H. Haupt & Company for materials, service and labor, which were presented before the Commissioners and allowed by them under the Act of 1862. These amounts represented indebtedness incurred under the former management, all of which, except the land damage claims, ought to have been paid out of means afforded by the scrip of the Commonwealth heretofore issued. These payments are therefore in the nature of a second payment for the same thing.

The progress during the year 1863, is rather in preparation than in construction. But a large force—of about 350 men—is now employed, and the work is fully begun.

The payments from the Treasury on account of the tunnel, for expenditures incident to the business of the last year, and to meet expenses of the year 1862, are $53,503 06. Of this sum, $40,000 were placed in the hands of the Commissioners for disbursement, pursuant to the statute of 1863.

The expenditure the tunnel will require during the current year is estimated by the Commissioners at $300,000.

The original tunnel loan provided for was $2,600,000. Its unissued balance being $1,211,000, was by the Act of 1863, chap. 214, appropriated to the execution of the work under the new system of direct State supervision, originating in the Legislature of 1862. To the payments during the past year, already mentioned, there is to be added the interest paid on scrip. The scrip issued in 1863 was $209,000.

613 L. A. CATLIN, Secretary.

Chicago & Great Eastern Railway Company,
FIRST MORTGAGE BONDS,
FOR $2,000,000.

SUBSCRIPTION BOOKS OPENED WITH
Messrs. SCHUCHARDT & GEBHARD,
BANKERS,
No. 21 NASSAU ST., NEW YORK.

THE CHICAGO AND GREAT EASTERN RAILWAY COMPANY now offer for sale ONE MILLION ONE HUNDRED THOUSAND DOLLARS of their FIRST MORTGAGE BONDS, in sums of One Thousand Dollars each, maturing in thirty years, bearing interest at the rate of seven per cent. per annum, payable in the City of New York on the first days of April and October in each year.

These Bonds are secured by a First and only Mortgage on the property, income and franchises of the Railway Company, executed to Frederick Schuchardt and Henry Morgan of the City of New York, Trustees.

The remaining Nine Hundred Thousand Dollars of the Bonds are set apart and remain in the hands of the said Trustees, for the purpose of being exchanged for the indebtedness of the Chicago and Cincinnati Railroad Company, running from La Crosse to Logansport; this effected, the $2,000,000 will form a First and only Mortgage on a line of road 110 miles in length, extending from Chicago to Logansport, where it connects with the Cincinnati and Chicago Air-Line Railroad, forming the shortest line by 40 miles between Chicago and Cincinnati, and by 36 miles the shortest line between Louisville and Chicago.

It will also open, in connection with Roads now in operation, entirely new and very direct lines from Chicago to New York, Philadelphia, Baltimore, and all Eastern Cities. The distance between Chicago and New York by this route being shorter than by either of the existing lines via Dunkirk or Buffalo.

The road is now under contract, and the most strenuous efforts are being made to have it open for traffic during the summer of 1864.

The interest on the Bonds maturing during the progress of the work has been provided for, and will remain on deposit with the Bankers of the Company, Messrs. SCHUCHARDT & GEBHARD, No. 21 Nassau st., to whom the Company refer for further particulars, and where subscription books for this loan have been opened.

4t1 W. D. JUDSON, President.
Dec. 23, 1863, No. 37 William st., New York

CAST STEEL.

MANUFACTURED BY

NAYLOR, VICKERS & CO., SHEFFIELD, ENGLAND.

CAST STEEL TYRES WITHOUT WELD,

Reversible Crossings and Frogs, Disc Wheels, Pistons and Piston Rods without weld, Crank and Straight

AXLES, AND EVERY DESCRIPTION OF STEEL FOR RAILWAY PURPOSES.

STEEL CROSSINGS have been in use more than three years with very little perceptible wear, in places where the ordinary ones had to be replaced every four months. They have been estimated to be good for ten years in the worst places.

THE "VICKERS" TYRES are in constant and extensive use on almost all the Railways in Great Britain, and also on many roads in other parts of Europe. Their chief advantages are:—1. Their Durability: they will outlast any Iron Tyre without being turned, and for this reason are cheaper than Iron Tyres (free of cost). 2. Their Safety: being without a weld they are not liable to break, and Steel is proved to be a stronger and tougher metal than any other. 3. Their Uniformity: they do not wear in flat places nor "laminate." 4. They are not injuriously affected by frost, and are guarantied to stand the severest climate.

STEEL AXLES will be found economical, because they may with safety be made much lighter than those of Iron. They will wear longer and "smoother," and will consume much less oil; nor are they liable to granulate from constant use.

For CIRCULARS, GIVING FULL PARTICULARS AND TESTIMONIALS, PRICES, etc., apply to **NAYLOR & CO.,**

421 Commerce street, Philadelphia; 99 John street, New York; 80 State street, Boston.

BROWNE'S METALLIC WEATHER STRIPS AND Window Bands.

TOTALLY exclude rain, wind and dust from, and stop the rattling of doors and windows of every description, without interfering with the free use of the same at all times. They save one-half the fuel in winter. For Circular, with references, address the PATENT METALLIC WEATHER STRIP CO., **644 Broadway, corner of Bleecker st.** Local Agents wanted everywhere.

SCHAFFER & BUDENBERG,

ENGINEERS AND MANUFACTURERS OF

Patent Steam & Vacuum Gauges,

REVOLUTION COUNTERS, INDICATORS, &c,

Works at Buckau-Magdeburg, Prussia.

Branches: 92 George St., Manchester; 202 Hope St., Glasgow; 6 Rue de Choiseul, Paris; and

61 CEDAR STREET, NEW YORK.

About 50,000 of these Gauges have been manufactured and sold. The rapidly increasing demand for them demonstrates their superiority over all others hitherto known.

CENTRAL PACIFIC RAILROAD COMPANY OF CALIFORNIA.—The coupons due Jan. 1, 1864, on the Mortgage Bonds of this Company, will be paid on and after the 1st proximo, in gold coin, less Government tax, at the office of EUGENE KELLY & CO., No. 36 Wall street. 1md21.

OFFICE OF THE ILLINOIS CENTRAL R. R. Co., New York, January 5, 1864.

Resolved, That a dividend of FOUR PER CENT., in cash, free of government tax, upon the Stock and Cancelled Bonds scrip of this Company is declared, payable on the first day of February to the registered holders of stock and scrip at the close of business on the 18th inst.

This dividend is in lieu of and in advance of two Coupons in the full-paid stock and by terms of the contract terminates the obligation to pay Interest to the full-paid-share-holders.

Resolved, That the transfer books be closed on the 18th instant, and re-opened on the third day of February.

By order of the Board.

412 THOMAS E. WALKER, Treasurer.

PATENT SOLID EMERY WHEELS.

THE New York Emery Wheel Company, after a long series of experiments have so perfected the method of manufacture of their improved wheels as to be able in future to fill promptly all orders for wheels in quantities. Our invention is pronounced by all who have used our improved wheel to be superior in every respect to any method heretofore known for combining emery for cutting, grinding or polishing purposes. Our Emery oil stones are superior to the Arkansas stone. Emery hones, knife sharpeners, etc., constantly on hand. Send for circular and price list. Address JOSIAH BARTLETT. **Office No. 51 Beekman st., (up-stairs,) New York.**

NEW ENGLAND

MUTUAL LIFE INSURANCE CO.

CASH ACCUMULATION.....$2,930,000
CLEAR SURPLUS.....1,250,000

WILLARD PHILLIPS, Pres. B. F. STEVENS, Sec.

DIRECTORS.

Education of Engineers.—Polytechnics.

When our canal policy was inaugurated on a scale commensurate with the extent, resources and wants of this country by that truly great man De Witt Clinton, whose memory as a statesman, man of letters, legislator, naturalist and scholar, will survive that of the whole crowd of officials, who

"Narrow their mind,
And to party give up what was meant for mankind,"

we were almost without the talent and experience equal to the execution of his designs. It is a fact that the ordinary surveyors of the country, men accustomed only to the simplest problems of trigonometry, and the protracting of field maps, were the only persons who were found competent for the ordinary surveys of the lines of the canals; and the steeples of country churches had much to do with those actually adopted for want of more scientific points of approach or departure. So with our railways. It was a long time before we had engineers who knew how to lay down rails, or overcome grades except by inclined planes and stationary power. Difficulties of location have long since vanished before our natural quickness of parts, power of observation and skill in design, and thus the country has become the very home of the inventive and practical arts; the hum of machinery, the thunders of the train, the smoke of the foundries, and the buzzing of wheels are universal, making it one great home of industry.

The disadvantages under which our pioneer engineers and mechanics labored when first employed on important, public and private works were great and embarrassing. Instruments and tools were of the simplest descriptions, tabulated works were scarce, mathematical treatises obscure, because written in unpractical periods, and such a thing as engineering was unheard of as a part of our regular public education, except so far as it was applicable to the art of war.

Besides the National institution at West Point, we know of no other except, perhaps, Captain Partridges' somewhat celebrated academy, where forty years ago the kind of education alluded to could have been obtained, and this was chiefly designed as preparatory to service in the army.

In the year, 1824, however, there lived a man who was in advance of his time in many branches of philosophy, as applicable to the practical purposes of life. It was Professor Amos Eaton, an enthusiastic geologist and botanist, of much study and experience, who, looking at the vast material around him which nature offered to research, began to open the volumes of our natural history and impart its valuable lessons. Numerous text books proceeded from his pen, and he was everywhere looked up to as authority, and obtained crowds of followers in the paths he pointed out, in the style of a modern peripatetic.

It was his good fortune to obtain the friendship of the late Stephen Van Rensselaer of Albany, known in that city and everywhere in this State by the honorary distinction of Patroon, one of the few names of privilege which survived the extinction of the Dutch regime in this country. This venerable man, rich in his inheritances, was richer in the endowments of integrity, simplicity of manners, benevolence, honor, public spirit, and Christian principle. To him Professor Eaton turned for patronage and obtained it. If we are not mistaken, one of his first and most useful efforts with the aid of Mr. Van Rensselaer, was a geological and agricultural survey of the County of Albany. This gave an impulse to the consideration and culture of soils, and led finally to the great State explorations afterwards perfected, and described in the elaborate and beautiful volumes of natural history, published at the expense of the State of New York.

The institute known as a school of theoretical and practical science, better, however, by that of the Rensselaer Polytechnic Institute, was the result of the enterprise of Professor Eaton and the generosity of Mr. Van Rensselaer. It was founded by them in 1824, and incorporated in 1826, and from its first graduating class came forth Ebenezer Emmons, one of our most distinguished geologists and naturalists, who afterwards was a Professor of Williams' College, (still distinguished by its regard for the natural sciences,) and State geologist of North Carolina, where he recently died amidst the conflict of arms of which he was an unwilling spectator. The classes succeeding those of which Mr. Emmons was a member, sent forth successively numbers of highly educated men, who have been of the most essential advantage to their countrymen, and have nearly without exception risen to wealth and eminence in their respective professions. Between three and four hundred students have graduated from this institution, and the catalogue contains the names of some of the most distinguished men in this country as well as abroad. The name of Hall is intimately connected with the subjects of geology and palaeontology; another of the same name occupies at Kings' College, in London, the distinguished place of Professor of Hindostani and Hindu law.

Nearly a hundred more have risen to the highest grades of their possession, as chiefs of railways, professors in colleges, principals of other institutions, directors of manufacturing companies, and constructors and superintendents of public works, not only in the United States, but in the West Indies and South America.

We know of but few institutions in this country which can produce such a record of its alumni, none more brilliant, excepting, perhaps, the West Point Academy.

Entertaining these opinions of the Rensselaer Polytechnic Institute, we come then to the point we wish to make by the present article, suggested

to us suddenly by the perusal of an excellent work on perspective, an emanation from the pen of a professor in this institution, in charge of the subjects of theoretical and practical mechanics, of which work we have expressed our opinion in a previous number. It is to urge upon the readers of this JOURNAL, especially those whose occupations are of the class which come directly under the supervision of Mr. Drowne's department, that this is an institution where their sons may be thoroughly educated in their own pursuits. We should suppose, moreover, that those young men who intend to follow the avocations of engineers, machinists, railroad contractors, manufacturers of metals, architects, metallurgists, miners and chemists would not fail of pursuing their studies at this institute, as the very best of its kind in the United States.

It is this class of persons to whom our future is to owe most of its industrial success, by the direction of scientific labor to renumerating materiel. Our classical institutions are doing their share to refine the public taste, and increase the love of literature; to furnish advocates, clergymen, poets, editors and authors, but they are not all that the times demand. We have a great country to develope, great resources to bring forth, great internal improvements to expand, great manufacturing powers to set in motion, illimitable products to create and dispose of, and a population pressing its millions forward, generation by generation, whose future will be prosperous in the degree that the practical arts of life are made easy of acquisition.

The Rensselaer Institute is at work just in a most opportune moment, while we are in the transition state from a disturbing war to a permanent peace, and a future of increasing activity. The young men it turns out are a valuable addition to the brains, the practical mind of the country. No sentimentalism keeps them from the solid purposes of their lives. They will do all their duty ably, wherever they are called. We hope that the kind words which are thus hastily spoken, entirely unpremeditated, may induce those of our readers who are preparing to educate their sons in the best practical manner, to consider whether the Rensselaer Institute does not offer very superior advantages.

We had intended to have mentioned the various branches of studies taught at the institution, but we have no further space for the present to give to the subject.

We can only say that the studies rise from the simplest to the most elaborate; the plainest to the most subtle; the most practical to the most profound. The student who graduates at this school with honor, must come out of it, a most finished mathematician, naturalist, philosopher, engineer, draughtsman, mechanic, astronomer and linguist, and have become acquainted with the best authors and highest authorities in these branches of education at the present day.

Pittsburg and Steubenville Railroad.

The Philadelphia *News* of January 21st, says: "We notice that the Pittsburg and Steubenville Railroad, with its rights, privileges and franchises, is to be sold under the mortgages given for the security of the bondholders. The Pennsylvania Railroad Company is largely interested in the road, and will probably become its purchaser. It is an important link in the line of communication between our city and the West, and should be carefully looked after by Philadelphia interests."

Connecticut River Railroad.

The earnings of this road for the years ending November 30, 1862 and 1863 have been as follows:

	1862.	1863.
From passengers	$139,330 91	$178,265 77
" freights	117,053 13	154,102 69
" mails	6,082 49	6,125 40
" express	3,582 29	3,600 00
" rents	2,103 33	2,100 33
Totals	$268,152 15	$344,194 19
Expenses, viz:		
Repairs of road	$39,066 99	$44,507 66
" locomotives.	6,392 03	7,648 61
" cars	11,684 23	14,781 41
" bridges.	1,447 40	19,631 85
" buildings.	6,128 81	6,514 18
" tools, etc.	880 88	792 59
Running trains	32,372 67	38,986 52
Station expenses	20,463 18	21,514 14
General "	5,187 63	5,893 65
Stationery, etc	1,247 87	1,888 61

Water works		2,268 68
Micellaneous.	5,674 61	4,693 31
Totals	$134,297 86	$170,577 36
Net earnings	$133,854 29	$173,616 83
Surplus previous year.	53,046 88	59,819 21
	$186,901 17	$233,436 04
Against which are charged:		
Interest	$15,280 17	$14,223 13
Payment to S. F.	8,000 00	8,000 00
Reserved Fund.		5,000 00
New Repair Shops	8,335 79	
Gov. tax on passengers.		5,608 36
Dividend of February	47,733 00	49,209 28
" August.	47,733 00	49,209 28
Total surplus	59,819 21	102,185 99
	$186,901 17	$233,436 04

Compared with 1862, the gross earnings of 1863 show an increase of $76,042 04; with an increase in expenses $36,279 50—making the increase in net earnings $39,762 54.

The marked event of the year in the company's experience was the total destruction by fire, on the 18th of July last, of the large bridge over the Deerfield river near Greenfield. This bridge was 770 feet long, and from 35 to 85 feet high. Six weeks and three days were occupied in the re-construction of this bridge; during which time the business of the road was seriously retarded. The direct loss by the fire was about $13,000 beyond the insurance, which was $14,500. The entire cost of this new structure is included in the current expense account.

Since the close of the last fiscal year of this company, the managers of the Connecticut river line of roads have united in establishing night trains with sleeping cars attached, between Springfield and Rouse's Point on Lake Champlain, so arranged as to leave Springfield for the North at 6.30 p. m., and arrive there from the North at 6.40 a. m., thus affording increased expedition, comfort and economy to travel between New York and large portions of New Hampshire, Vermont and Canada.

The company have appropriated $5,000 of the income of the past year to be expended in raising the grade of the road along the margin of the Connecticut river, above Hoyoke, in order to guard more effectually against injury to the track by freshets, which appear to be steadily increasing in magnitude as the country on the upper waters of the river changes from forest to cleared land.

The report of the commissioners of the sinking fund shows its present value to be $25,300. The annual payment to this fund is $8,000 from the income account. The bonds of the company, amounting to $25,000 do not mature till 1878, a period so far distant that the sinking fund will in the mean time have increased to a sum amply sufficient to redeem them.

The company have 12 locomotives.

Miles run by engines:	1862.	1863.
With passenger trains.	98,087	101,334
With freight and other trains.	71,931	67,017

The office of the company is at Springfield, Mass. The officers and directors are:

President—DANIEL L. HARRIS.

Directors—I. Sargent, I. M. Spelman, E. A. Dana, C. W. Chapin, John Chase, J. H. Butler, H. W. Clapp, Roland Mather.

Treasurer—SETH HUNT.

Superintendent—W. B. BRINSMADL.

Master Mechanic—JOHN MULLIGAN.

Union Pacific Railroad.

We stated some time ago, on the authority of the contractors of the Union Pacific Railroad that the portion of that line between Kansas City, Missouri and Lawrence, Kansas, would be in actual operation by the 1st of January. We learn from Kansas City that this expectation has not been fulfilled. The cause is one which no human ingenuity and labor could have overcome. The rigorous weather of the latter part of December arrested the contractors in the midst of their work, and deprived them of the means for its further prosecution. A portion of the iron for the road was on the steamer Majors when she was frozen in and prevented from reaching Kansas City, and the remainder, together with the locomotives and cars for the road, is at St. Joseph, whence it cannot be carried to Kansas City, on account of the suspension of navigation. Nevertheless the contractors are not idle. The getting out of the ties and telegraph poles, the building of bridges and culverts is being rapidly prose-

cuted. They are advertising for ties for the second section of forty miles. As soon as the winter breaks up, the grading for the second forty miles will be immediately and vigorously entered upon; while the first forty miles will speedily be finished and put in operation; and it is confidently expected that before the close of the present year the road will be constructed to Fort Riley.—*St. Louis Union.*

Pittsburg and Connellsville Railroad.

We have been favored with a copy of the Eleventh Annual Report of this company. From this we learn that the earnings of the road during the fiscal year ending October 31, 1863, were:

From passengers	$100,626 31
" freights	110,436 43
" U. S. mails	3,650 00
" shop work, etc.	874 75
	$215,587 49

The total expenses were:

Mainten'ce of motive power,	$40,672 12	
Conducting transportation.	24,541 40	
Maintenance of way	31,586 39	
Maintenance of cars	13,431 63	
		110,231 54
Net earnings		$105,355 95

The gross earnings of the road for the fiscal year ending October 31, 1862, were $129,917 84; the expenses $78,538 79; and the net earnings $51,379 05—showing an increase in earnings of $85,669 65; in expenses, of $31,692 75; and in net earnings, of $53,976 90. The net earnings of the past year are 48.4 per cent. of the gross earning (not including the general expenses.) The net earnings of 1862 were 38.72 per cent. of the gross earnings (exclusive of the general expenses.)

The total gross revenue, as stated above, was $215,587 49; of which $138,903 43 were earned by the 49 miles of road between Connellsville and the Brinton Junction with the Pennsylvania Railroad; $60,923 06 by the 10.6 miles of the Turtle Creek Division; and $15,761 by the 12½ miles of the Fayette Co. Railroad, leased by this company. The current expenses of maintenance, working and administration, during the same period have been $120,358 60—leaving $95,228 89 as the net revenue of the year. In 1862 the current expenses of maintenance, working and administration were $90,480 57—leaving $39,437 24 as the net revenue for that year; showing an improvement of $55,791 65.

The proportion of the earnings of 1863 due to the Turtle Creek Division is $60,923 06; the proportion of expenses, $25,517 16—leaving net earnings $35,405 90, and which, after paying the coupons on the $400,000 of first mortgage bonds issued for its construction, leaves $11,405 90 net over all.

The revenue of the Turtle Creek Division, in the two years stands as $33,207 to $60,923—an increase of $27,716, or 84 per cent.; and on the Fayette County Railroad as $10,353 to $15,761—an increase of $5,408, or 52 per cent. These figures fully confirm the conclusions derived from those of last year's report, and show the soundness of the policy which dictated the extension of the road into Pittsburg, and the leasing of the branch to Uniontown.

The whole number of passengers carried during the past year, irrespective of distance, was 262,841, against 143,510 the previous year—showing an increase of 119,331, or 83 per cent. The freight transported all distances was 143,722 tons (of 2,000 lbs.,) against 85,763 tons in 1862—an increase of 58,029 tons, or 68 per cent.

The average distance travelled by passengers has been 12.7 miles, equivalent to 46,342 over the whole road of 72 miles, or 3,336,631 carried one mile. Of the whole number carried, 144,261 travelled in an eastern, and 118,580 in a western direction. The freight was transported an average distance of 10¼ miles—equivalent to 60,575 tons over the whole road, or 4,361,392 tons one mile. Of the freight carried, 14,228 tons passed eastward towards Connellsville, and 129,564 tons westward, or toward Pittsburg.

In 1862, the average distance traveled by passengers was 13.2 miles—equivalent to 26,300 over the whole road, or 1,894,222 one mile. The freight was carried an average distance of 31 miles—equivalent to 36,872 tons over the whole road, or 2,654,802 tons one mile.

The work done in 1863 in passengers, is hence 1¾ times, and in freight about 1⅔ times as great as in 1862.

It will be observed that 9⅓ tons moved westward, in 1863, to each ton moving eastward—a very striking inequality, and one which shows the peculiar character of the present business of the road, consisting chiefly of coal, coke, ore, stone, lumber, and other heavy articles, returning principally light manufactured goods.

The company have 11 locomotives, which have run 209,746 miles; 10 passenger cars, 20 house, 13 gondola, 15 coke, and 10 dumping cars.

The total expenditures on construction account during the year on road-bed, buildings, rolling stock, right of way and real estate, have been $43,713 95, of which $43,214 52 occurred on the western, and $499 43 on the eastern division of the road; the latter on account of Sand Patch Tunnel property, on which but $500 now remains due.

The total expenditure on construction account since the organization of the company in 1846, to the end of the past fiscal year has been $2,188,820 18; of which amount $221,168 79 have been expended upon the eastern, and $1,967,651 39 on the western division, of which last $127,712 64 belong to the Turtle Creek Division.

The floating debt of the company at the close of the past fiscal year, as will appear by the annexed statement was $82,530 04, being $27,887 15 less than at the termination of the preceding year. To meet this indebtedness, the company have assets (exclusive of $53,000 of McKeesport Borough bonds,) partly pledged to creditors, and partly in hand, to the amount of $32,982 09—leaving but $49,547 95; and deducting the amount still due on account of the temporary loan of the sinking fund made to the company last year by the City of Baltimore, the real unliquidated floating debt will be only $41,097 95. From this debt the improving revenue of the company will readily relieve it within the ensuing year, should it not be necessary to contract new obligations to too large an extent for new track, new buildings and new rolling stock, to accommodate the new business which presses upon the present limited facilities of the company, their only present means of enlarging which must be furnished by their revenue.

The collections for the year from defaulting stockholders, were $4,251 06.

The company has continued to remit to the Register of the City of Baltimore the weekly instalments by which the sinking fund of the million loan from that city is to be replaced as agreed upon. The company has now paid back $8,550 of that fund; the balance, amounting to $8,450, will be liquidated by November, 1864.

Superintendent.—WM. B. STOUT, Pittsburg.

The Anthracite Territory and the Tonnage of its Outlets.

From the anthracite districts of Pennsylvania the arteries to market traverse the valleys which lead to or towards tide water. Thus the main artery is the Schuylkill Valley, down which pass a railroad and a canal; another artery is the Lehigh Valley, down which pass a railroad and a canal; still another artery is the Susquehanna Valley, down which pass a railroad and a canal. From the Lackawanna, up the valley, two outlets (now three outlets in 1864,) cross the Moosic mountain, towards the New York market. From the Wyoming Valley a canal meanders up the North Branch valley and connects with the canals of Western New York. From the forks of the Susquehanna a railroad and a canal lead up the West Branch valley, the rail line being a carrier of coal *via* Williamsport to Elmira. The coal tonnage forwarded from the anthracite districts *via* the different outlet valleys, compares in this wise:

	1863. Tons.	1862. Tons.
Down the Schuylkill Valley.	3,703 964	3,061,542
Down the Lehigh Valley	1,895,113	1,278,801
Up the Lackawanna Valley.	2,713,271	2,343,640
Down the Susquehanna Valley *via* the Penn. Canal & the N. C. R. R.	882,568	797,136
Up North Branch of Susquehanna river	77,472	64,357
Up West Branch of Susquehanna river (estimated)	100,000	90,000
Total	9,322,388	7,635,476
Increase	1,686,912	

Columbian (Marine) Insurance Company.

The following is a statement of the affairs of this company for the sixth fiscal year ending December 31, 1863:

Premiums on unexpired risks Dec. 31, 1862	$249,998 17	
Premiums rec'ved from that date to Dec. 31, 1863	3,002,258 59	
Total amount of premiums		$3,252,256 76
Premiums marked off, as earned during the year, (less return premiums,) and interest received on investments		$2,362,842 02
Losses paid during the year	$1,021,150 50	
Reinsurances, exp'ses, State and Govern'm't taxes	204,628 19	
		1,225,778 69
Excess of earned premiums, over losses, &c.	$1,137,063 33	
Add undivided balance of Dec. 31, 1862	117 68	
		1,137,181 01
Reserve for estimate claims unadjusted and other contingencies		441,206 49

In accordance with the provisions of the charter of the company, the Board of Directors have resolved to apply the profits of the year as follows:

Profits to be divided	$695,974 52	
Cash dividend to dealers holding certificates of return, on premiums earned during the year and paid, payable on and after Feb. 10, '64.	269,614 80	
		426,359 72
Deduct dividend already paid to stockholders, being accrued interest, (free of Government tax,) on cash capital		57,895 20
		$368,164 52
Deduct interest on scrip issue of '62, payable (free of Government tax,) on and after March 10, 1864, being 6 per cent. on amount of such issue		1,747 20
		$366,717 32
Of this residue thirty per cent. will be paid in cash to stockholders on and after March 10, 1864, (free of Government tax,) as follows: On old stock 12 per cent., and on new stock 10 per cent		100,000 00
		$256,717 32
There will also be a scrip dividend, payable (free of Government tax,) on and after June 1, 1864, on the cash capital, as follows: On old stock 7 per cent., and on new stock 5 per cent., making the total dividend for the year paid to stockholders equal to 26 per cent.		
Payable in cash on and after March 10, 1864, (free of Government tax,) to makers of Security Notes, being 4 per cent. on amount of such notes		1,313 50
		$255,403 82
Payable in scrip, (free of Government tax,) on and after June 1, 1864, to dealers on earned premiums on risks terminating without loss, (estimated at $1,700,000,) 15 per cent		255,000 00
Undivided balance		$403 82

The company have the following assets:

United States, New York City and other stocks	$330,375 00
Accrued interest, gold at market value, salvages and other securities	714,992 61
Cash in banks and loans on demand	651,517 81
Bills receivable, and premium notes.	1,413,670 94
Scrip of insurance companies, balances due from agents, and sundry claims due the company	30,371 44
Total amount of assets	$3,140,930 80

To the President and Board of Directors of the Columbian Insurance Company:

We hereby certify that we compared the above statement with the Balance Sheet of the company, and the Balance Sheet with its books, and found them to conform.

We have also examined the cash bank balance, securities, bills receivable and other assets, and found them to conform accurately with the above statement made by the company.

EDWARD ROWE,
JOSEPH MORRISON,
ALBERT G. LEE,
DAN'L W. TELLER,
} Committee.

JAN. 29, 1864.

On and after 1st February, 1864, dealers with this company will be allowed the option (to be signified at the time of application for insurance) of receiving in lieu of scrip, at the end of each year, returns in cash, (guaranteed by certificate) of premiums paid and earned during the year, whether loss accrues or not, upon all new risks under the New York form of policy, as follows:

1st. Upon all voyage risks upon cargo, a return of twenty-five per cent.

2d. Upon voyage risks upon freight, a return of twenty per cent.

3d. Upon time risks upon freight, and upon voyage and time risks upon hulls, a return of ten per cent.

Such privilege, however, being confined to persons and firms, the aggregate of whose premiums upon such policies earned and paid during the year, shall amount to the sum of one hundred dollars.

Directors.—Edward Rowe, Daniel W. Lord, George Miln, John Atkinson, Thos. A. C. Cochrane, Wm. H. Halsey, Thos. Barron, Roland G. Mitchell, Albert G. Lee, Geo. P. Deshon, O. L. Nims, M. F. Merick, Wm. B. Ogden, John Armstrong, B. C. Morris, Andrew J. Rich, Daniel W. Teller, John D. Bates, Jr., Charles Hickox, Robert Bowne, Lawrence Myers, S. N. Derrick, Moses Merick, David J. Ely, Joseph Morrison, Wm. H. Popham, B. C. Morris, Jr., Ezra Nye, Henry J. Cammann, Thomas Lord, Robert S. Holt, J. B. Griffin.

President.—B. C. MORRIS.

Vice President.—THOS. LORD.

WM. W. WHITNEY, second Vice President and Secretary.

Philadelphia and Erie Railroad.

There are, as we learn, but about twenty-five miles of the road to be constructed to complete the line from this city to Erie, and this would be done within a few weeks if the weather would permit of the prosecution of the work. The local trade on this road, alone, when it shall have been completed, a year, will without doubt pay the interest on its entire bonded debt; and the connections which will be made with the great West, at Erie, over the Lake Shore road, will make it one of the best through routes in the country. The superiority of its grades over those of the Pennsylvania Railroad will bring it into active competition with that line; and notwithstanding the fact that it is now and will continue to be managed by the Central Company, it must, very soon after its completion, pay dividends equal to those paid by it. We shall hail the completion of this great road as one of the most important public improvements of the country, and as destined to prove more advantageous to our city than even its most sanguine friends could have anticipated. —*Philad. News.*

Liabilities of Intermediate Carriers.

FORWARDER, WHEN LIABLE AS CARRIER.—PUBLIC POLICY.—PRESUMPTIONS AGAINST CARRIERS.

The difference between the liability of a carrier and that of a mere forwarder is so great that it is not surprising that a strenuous effort should be made by parties in charge of goods to assume the latter character. A recent case in the highest court of this state is of considerable interest in this respect, as showing what slight circumstances will suffice to charge a forwarder with the responsibility of a common carrier.

In the case referred to (Ladue against Griffith) the plaintiffs were the owners of some leather, which, in June, 1851, they shipped from Detroit on a vessel bound for Buffalo, accompanied by a document in the form of a bill of lading. This paper specified the property and stated the charges of the forwarding agent at Detroit at $1, that the lake freight was $1.04 and that it was to go from Buffalo to East Albany at 30 cents per 100 lbs. It was addressed in the margin thus:

"Leander Warren Leicester Mass., *via* Clappville Depot. To be delivered at East Albany; care J. M. Griffith & Co., [the defendants] Buffalo." It did not appear to be signed by the master or by any one except H. N. Strong the forwarder at Detroit.

The defendants' place of business was at Buffalo where they were engaged in transportation on the Erie canal from that city to Troy and Albany. They were also forwarders and warehousemen, and they were accustomed to receive daily from the west property consigned to them in the same manner as the leather in question, and to ship the same to its destination at the east by their canal line or by other boats on the canal whichever left first. On the arrival of the vessel from Detroit on the first day of July the leather was taken to the defendants' storehouse, and they made an indorsement on the bill of lading as follows: "Received and paid charges, John M. Griffith & Co." It remained in the storehouse until it was destroyed by an accidental fire on the 4th of July following.

The defendants insisted that as to this property they were storehouse keepers, and forwarders, and not common carriers, and such was the judgment of the court below. The plaintiffs appealed and Smith J. now delivered the opinion of the court as follows: When the property in question was delivered on board the steamboat at Detroit marked and consigned to Leander Warner, Leicester, Massachusetts, it was so delivered for transportation to that place.

It was known to the shipper doubtless that the steamboat Hudson could carry it no farther than Buffalo; and it was therefore consigned to the care of the defendants at that place who were carriers on the Erie canal, to be carried or forwarded by them by canal in the regular course of business to Albany, and then to deliver the same at East Albany at the railroad depot, to be further transported by the Western Railroad Company *via*

lappville depot to Leicester Massachusetts. The direction upon the bill of lading consigning the leather to the care of the defendants at Buffalo, made it the duty of the master of the steamboat to deliver it to them, and gave them the right to receive it from him; and thus secured to the defendants the profits incident to the transhipment, storage and carriage of the property until its transportation by canal was completed, and the property delivered at the railroad depot at East Albany.

No right or duty in respect to such property was conferred by the owner upon any person after its delivery on board the steamer at Detroit except that of carriage, and such as was incident to its transportation until its delivery to the consignee at Leicester Massachusetts. The proprietors of the steamboat Hudson received it as carriers, and so did the defendants, subject respectively to all the duties and responsibilities of common carriers.

These goods were placed by the defendants in their warehouse for their own convenience, and for the purpose of being carried, and when goods are so stored the carrier is responsible for their safe keeping (Angell on Carriers § 131 p. 130, and § 144, Story on Railroads 536.)

The owner of this property had no occasion to have the same placed in a warehouse at Buffalo for any purpose except such as pertained to its safe keeping during its transportation. It was not intended to be stored in warehouses at Buffalo for any purpose. It might doubtless have been transferred immediately from the steamboat to some canal boat at Buffalo; but if the defendants chose for any purpose to put it in their warehouse it was to subserve their interests, and was at their own risk. The claim of the defendants to escape responsibility for the loss of these goods, upon the ground that they were simply warehousemen, and received them in that capacity we think entirely untenable.

When a person is both carrier and warehouseman, it is well settled that if the deposit of goods in the warehouse is a mere accessory to the carriage, and not subject to any particular order of the owner, or if they are deposited for the purpose of being carried further, the responsibility of the party having them in charge is that of a carrier (Angell, § 133 and Blossom *vs.* Griffin, 3 Kernan 569, 572.) But when goods are deposited in a warehouse subject to the further order of the owner the case is otherwise. In such case as Judge Buller said Garsede *vs* The Proprietors of the Trent and Mersey Navigation Company (4 Term 581, "The keeping of the goods in the warehouse is not for the convenience of the carrier but of the owner of the goods. In such case the rights and responsibilities of warehousemen would attach to the person having the goods in store." But this rule cannot apply to any person have the charge or custody of the goods while they are *in transitu*. While the goods are in the process of transportation from the place of their receipt to the place of their destination, it will never do in this country in my opinion to subject them in the hands of any carrier or by his act or order to the responsibilities of a mere warehouseman.

The carrier at common law is an insurer of the goods against all accidents and perils except such as result from the act of God or a public enemy. A warehouseman is only responsible for ordinary care, and is merely responsible for loss or injury resulting from his own default or negligence. Millions of property in value in this country is in the constant possession of carriers engaged in transporting it from one place to another. In this particular it may truly be said, that men cast their bread upon the waters expecting to see it again at a distant point after many days. Goods are shipped and delivered to carriers by land at the seaboard, or in the interior of the country for transportation to distant points, with a simple direction indorsed of the name of the owner or consignee and the place of delivery. It would never do to hold that at any intermediate point such goods at the option of a carrier might be stored in a warehouse, and the carrier relieved thereby of his proper responsibility.

If the defendants had owned the steamboat in which these goods were shipped at Detroit no one would pretend I think that they could store them at Buffalo in a warehouse at the risk of the owner for their own convenience. I conceive the responsibility of the defendants in respect to these goods after they came in their possession precisely the same so far as related to their storage at Buffalo as though they had been carriers for the whole distance from Detroit to Leicester Massachusetts. Where there are several successive carriers who are engaged in the transportation of goods from the place of their reception to the place of their destination, the liability of each carrier will commence with the reception of the goods, and will continue until they are delivered according to the usage of the business to the next carrier in the line of the transit. (Vanhouten *vs.* St. John 6 Hill 158.) When a carrier deposits property in his own warehouse at some intermediate place in the course of his own route, or at the end of the route where it is his duty to deliver it to the owner, his duty as carrier is not completed, and he will remain liable as carrier for any loss for which common carriers are ordinarily responsible. (Story on Baibments § 447, 536: Forward *vs.* Pittard, 1 Term R., 27; Hyde *vs.* Trent Navigation Company 5 id., 380.) The defendants I think are responsible as carriers of the property in question upon the same principle. It was received and stored by them in their capacity or character as carriers as much as if they had received it at Detroit.

I think the judgment of the court below should be reversed, and a new trial granted with costs to abide the event.

Montreal and Vermont Junction Railway.

The annual meeting of the stockholders of this company was held at Philipsburg on the 20th ult. The President made a statement of the progress and present condition of the road, from which it appeared that during the past year the road has been located, the contract let, and the work vigorously prosecuted. The grading has been completed from the line to its points of junction with the Stanstead, Shefford and Chambly Railway, with the exception of less than half a mile. Two miles of track has been laid; 500 tons of iron have been distributed along the line; 500 tons more have been purchased, and are now in New York ready to be shipped, on the opening of navigation in the Spring. The balance of the iron, 1,000 tons, has been purchased in England, and will arrive early in the Spring, in season to be laid as fast as needed. The President congratulated the stockholders on the progress that had been made thus far. There is every prospect that the road will be completed during the month of July next. The stockholders elected the following gentlemen as Directors: The Hon. Messrs. Moore, Smith, Foster, Clarke, Arainard, Des Riveres and Hatch. The stockholders also voted to increase their capital stock $75,000 and to issue the bonds of the company for $200,000. At a meeting of the Directors, held on the adjournment of the stockholders' meeting, Hon. P. H. Moore was elected President; Hon. J. G. Smith, Vice President; and J. C. Baker, Esq., Treasurer and Secretary. The Managing Directors of last year were continued in office, viz.:—The Hon. Messrs. Foster, Clarke and Smith.

East Pennsylvania Railroad.

From the report of this company for the year ending November 30, 1863, we learn that the receipts during that time were:

From passengers, inc. State and U. S. troops	$89,294 92	
From freight and munitions of war	150,300 38	
From Hope's express	2,502 64	
From U. S. Mail	1,800 00	
		$248,897 94

EXPENDITURES.

Transp. of passengers and freight, motive power, &c.	$91,399 23	
Construction, renewal, land damages, &c.	71,312 49	
Interest on mortgage debt	41,888 00	
		$204,599 72
Balance		$39,298 22
In year 1862 the gross income was		$180,428 45
Expenditures		166,392 49
Balance		$14,0 5 96
Entire cost of road, equipm't, depots, telegraph, land damages, &c., up to Nov. 30th, 1863		$1,292,631 50

The company have a mortgage debt of $598,400, bearing seven per cent. interest, payable semi-annually on the first of March and first of September. The terms of the mortgage require the sum of $15,000 to be applied annually as a sinking fund for the liquidation of the same. The necessities of the company, however, have been such, that this fund has been appropriated to the payment of debts, the purchase of rolling stock, and making indispensable improvements. So long as the fund is thus applied and not taken out and put into the pockets of the stockholders, the bondholders can have no cause of complaint.

The capital stock of the company is $700,000. Suits for land damages, still pending in the Courts of Berks, Schuylkill and Lehigh counties, together with other unsettled matters, will probably amount to $60,000.

Shops for the repair of engines and cars are much needed, and it is the intention of the company to commence the erection of the same in the spring.

It will be observed there is quite an increase of business as compared with the previous year, but it is not what it should be, or would be, if the route were fully and fairly opened to the trade which naturally belongs to the road.

President.—Edward M. Clymer.

Directors.—Edward K. Al Burtis, Charles H. Hunter, William H. Clymer, Edward Brooke, Horatio Trexler, Isaac Ely, George E. Clymer, George R. Frill.

American Railroad Journal.

Saturday, February 6, 1864.

Stock Exchange and Money Market.

Just at this moment, questions of finance like those of the war appear to be quiescent. Our armies repose in winter quarters, the operators in gold are at a loss what to do next. If it was possible to fore-cast coming events with any certainty we should witness enormous speculations. Fortunately for us, we see somethings as in a glass darkly, or we might be stunned by the blaze of excitement.

Perhaps at this moment inquiry tends most earnestly towards the subjection of inflation, and whether our paper currency is to be increased directly or indirectly, by any of the coming measures of the Treasury department. We believe we have fairly expressed the views of Mr. Chase, when we have said that he does not intend to put afloat any more legal tenders payable on demand. What ever of this character is yet to be adopted, will therefore take the form of securities on time, draw-

ing interest. It is found, large as are the amounts already issued of the first named class, there is yet an admitted and a very serious scarcity of small denominations, so much so, that the assistant Treasurer in this city has to go about begging the banks to exchange with him small notes for large, in order that our soldiers may be paid off conveniently. A call for seven millions has resulted in his obtaining but one. Probably some amounts of the small 5 per cent legal tenders may be disposed of as currency, as it is well known that a large majority of our troops save their pay for the benefit of their families. There is no doubt that the war has been of material advantage to thousands of poor families, whose circumstances have been much improved by the liberal bounties and pay. It is certain that applications for assistance are much less frequent in this and other cities than they have ever been before, so that war is not without its advantages, though it moistens many an eye, and rends many a heart.

It is a curious circumstance that the redundancy of paper money has but little affected the rate of interest among active business men. There is no want of takers at 7 per cent. and much higher rates can be obtained by those familiar with the street, where one per cent a month is no way unusual. The money paid out by the Government through its thousand channels, appears to glide away without much difficulty, and to run off into quiet nooks and corners without making much of a ripple. No doubt it is, in a majority of cases acting as capital for further gains, and is by no means lost to the country as we shall see.

As far as we can understand from official statements, the Treasury is unembarrassed as to resources, though sadly in want of small change. It is only an unforeseen procrastination of the war, and its obstinate mismanagement on our part which can occasion any anxiety. It is the hope of embarrassments from this cause that just now the Confederates chiefly rely upon. They admit their system of finance is a failure and their currency worthless. They console themselves therefore, with the idea that ours is in the same category. Their problem is, both parties ruined, they can hold out the longest after that. There is considerable difference, however, between our financial arrangements and those of Mr. Memminger. We happen to be able to have paid our interest regularly in gold, and have enough on hand at all times to discount our interest if necessary, six months in advance. We have some flourishing ports, and some active commerce that rebellion cannot show. Our stocks are taken largely abroad, and our people pay their taxes with cheerfulness. Above all our material prosperity is rapidly on the increase, and everywhere we see its indelible marks. It is therefore a piece of self stultification on the part of the Southern press, to compare their position with that of the North. The North have received and made good use of twelve hundred millions of money from the Government, and are able and willing to pay some of it back. And as between national debt and disunion, and the overthrow of our Government, we believe there is not the slightest hesitation on the part of the people of the North to submit to any debt, and any amount of taxation rather than surrender in this struggle to the men who have caused us our undeserved misfortune. A dissolution of the Union once a possible act, would be the final destruction of all our material interests. A group of miserable confederacies, ever at war with each other, compelled to act as Nations without any solid basis of nationality, would be but a bundle of faggots ready to blaze, consume and expire. This is perfectly well understood by all reflecting persons. Everything of principle and of property hangs on the result. United we stand, divided we fall.

There are some other circumstances connected with our financial affairs at this moment, that are worth considering.

We notice by the last arrivals that the rate of interest is going up again in England, and that a large French loan has been popularly obtained by the Emperor, while the Bank of France is now being drained of its gold. We also perceive that the affair of the Duchies is growing more serious, and that the hostile forces are within striking distance of each other. All this indicates war, as strongly as war can be indicated. The temper of Denmark may also be judged from the fact that it has opened its ports to the free import of a certain class of provisions, on which soldiers feed, and which by the by is a direct invitation to our shippers, to make the most of a new market for their prime and mess. We do not see very well how this European crisis is to be passed without the usual consequences. The pebble may be tost into the German ocean first, but the wave rings expand rapidly, and reach to a great distance.

There are numerous suspended political interests in Europe, which only wait their opportunity to come forth into fearful activity. Even an approach to a general war will most probably lead to a suspension of specie payments abroad. There will then be no object in our exporting gold, if it is to be paid for there in a depreciated currency no better than our own. Our national products, will be a better remittance, or at least produce as much in the form of paper. This equalization of our own and foreign currency, would remove a principal difficulty in our resuming our specie payments. Such at least is the opinion of many persons who have speculated on the probability of such an event. Yet no one can now determine this question; time must show.

The world moves, and in politics as in science we are continually advancing beyond the old formulas, and are startled at our success. The pressing financial difficulty of the hour, is the want of small bills as currency to pay small debts. The Treasury can get all the millions it requires, but is sadly in want of very small sums.

The following circular has been issued from the Treasury Department in Washington to all the national banks which have been designated permanent depositories and to the various Assistant Treasurers:—

Under instructions from the Secretary of the Treasury, you are authorized to receive subscriptions for the two years five per cent Treasury notes, which are made a legal tender for their face value by the act of March 3, 1863. Such subscriptions may be received from national banks, other corporations, firms and individuals, in sums of fifty dollars or its multiple, and placed to the credit of the Treasurer of the United States. Certificates in duplicate should be issued therefor, the duplicate handed to the party making the deposit. Upon receipt of the original certificates at this office, the required amount of Treasury notes will be issued, bearing interest from date of deposit, complying, as far as practicable, with the wishes of depositors. Such notes will be forwarded to subscribers in accordance with instructions to be sent with the certificate.

The business at the office of the Assistant Treasurer on Tuesday last, for the close of the week was:—

Amount on hand	$37,548,387
Received from customs	405,000
Received from other sources	3,562,825
Total	$41,527,212
Payments	4,478,263
Balance	$37,047,949

The Stock Exchange has faltered a little, a free demand continuing for some of the shares, and a falling off in others. It seems to be the opinion that further loans will be necessary to a considerable extent, before the war will be closed, and this must be so far an inflation, even if no more legal tenders are issued. An attempt is being made in Congress to meet this financial question by the following resolution introduced by Mr. Freeman Clarke:

Resolved, that in order to secure beyond a contingency, the permanent payment of the interest on the public debt, and to prevent an undue increase of the debt, and to restrict within proper limits the aggregate paper circulation of the country, the Committee of Ways and Means are hereby instructed to inquire into the expediency of increasing the duties on foreign imports, upon articles of luxury of a class, as far as practicable, not manufactured or produced in this country, so as in their opinion to produce a revenue of $120,000,000 per annum; also into the expediency of increasing the internal revenue tax upon the articles of luxury and upon such articles of domestic manufacture, as come into competition with foreign articles upon which the import duties are not advanced, so as, in the opinion of the committee, to produce a revenue of $230,000,000; also into the expediency of restricting the bank circulation of the country, State and national, to $300,000,000; also into the expediency of authorizing the issue of bonds to the amount of $200,000,000, the whole or any portion thereof to be disposed of at the discretion of the Secretary of the Treasury, when, in his judgment, he may deem it expedient and proper to use the proceeds for the redemption of government legal tender notes, and report at an early day, by bill or otherwise.

The effect of this proposition remains yet to be considered. No one will object to the principle of taxation laid down in the resolution. The excessive importations just now are known to be owing to the taste for costly fabrics and luxuries, indulged in by a class suddenly made rich by speculations and contracts, and who give unbounded license to their new born tastes.

We call the attention of our readers to the advertisement of Mr. Wm. H. Marston, Banker and Broker, who in addition to the usual business of an exclusive commission house allows interest on special deposits, subject to draft at sight by the depositors.

Gold stands at 157¾, and lingers there. Exchange for the Boston steamer of Wednesday closed at 172.

The earnings of the Railroads continue large and further accommodation for the increasing traffic seems to be necessary. The Erie seeks to increase its capital with a view of funding the 1st mortgage loan, falling due in 1868 for $3,000,000, and the general extension of the double track to meet the influx of business by the way of the Atlantic and Great Western. A bill for this purpose has been introduced into the Legislature.

The week's exports of domestic produce and miscellaneous goods (exclusive of specie) from this port, have been to the value of $3,171,842, against $3,881,973 same week last year, and $1,-976,876 the corresponding week of 1862.

The interest on the Pennsylvania State debt which fell due on the 1st inst was promptly paid at the equivalent of silver dollars, or $150 in currency, which is said to have given entire satisfaction.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

North Pennsylvania Railroad.

The Philadelphia *Ledger*, of 2d inst., says: "We are informed from the company that the cash receipts for December, the first fiscal month of the year, are about $10,000 more than in the corresponding month of 1862, and that the excess in January over corresponding time last year will nearly or quite equal that of December. This rate of increase throughout the year gives $120,-000 increase, which, added to the $60,000 received last year over and above interests and expenses, would give an aggregate of $180,000, which is just six per cent. on the stock. Some of our heaviest capitalists became stockholders in the North Pennsylvania shortly before its last annual election of officers, and we understand that it is not only their purpose to extend and improve the connections of the road northward, but to increase its rolling stock with a view to a more active participation in the coal trade to tide water."

Atlantic and Great Western Railway.

This road is now completed to Galion, and an excursion party passed over the line from Galion to Akron, a distance of 81 miles, on the 16th ult. The completion of this link is a valuable addition to the line, placing it as it does in connection with the Pittsburgh, Fort Wayne and Chicago Railroad at Mansfield, and with the Cleveland, Columbus and Cincinnati and Bellefontaine Line, at Galion. The newly completed portion of the road passes through the flourishing towns of Mansfield, Ashland, West Salem, Bridgepoit, and Wadsworth, and through a country noted for its richness and agricultural productiveness.

From Galion to Dayton the road is in a very advanced condition, and were the weather at all favorable the line could be completed within a month or six weeks. It will undoubtedly be in running order by May. From Galion to Springfield, a distance of eighty-three miles, the road is fully graded and the track is being laid westward from two points, Galion and Marion. About ten miles of the iron is already laid, and the remainder is either delivered on the line or on the way. The whole of the cross ties are along the line between Galion and Dayton.

Wyoming Valley Canal Company.

We understand that this company is now ready to exchange its bonds for the bonds of the "*Wyoming Canal Company.*" The new company represents the same property as the old company, and makes the new issue of bonds under the requirements of an act of the Legislature, which reconstructs the company as the stockholders and bondholders jointly desired. The stockholders have, in pursuance of the provisions of the act under which they now exist, paid off and cancelled $102,-000 of their bonded debt, reducing the amount to $750,000, and have paid all the indebtedness of the old company, there being now no charges to which the company is liable but the yearly interest on the bonds, $750,000, at six per cent., amounting to $45,000, and the ordinary expenses of the company, estimated at about $30,000. The receipts from tolls the last year were something over $180,000, subject to certain drawbacks on

that portion of the trade passing to tidewater, and not yet ascertained. The capital of the company is $600,000, having been increased $100,000 by an issue of stock to the stockholders at par of $50, to provide the means of extinguishing the bonds of the old company—$102,000—and all other indebtedness. The dividends made the last year were, viz. In September 6 per cent., and in December 4 per cent. The company now holds a considerable amount of their bonds in reserve, available either for future dividend or as investment. The bonds are secured by a new and only mortgage on the property and franchise of the company, the bonds bearing 6 per cent. interest, payable on the 15th of January and July yearly, and having fourteen years to run. The half-yearly interest of the entire annual interest of the bonds is $22,500, which is less than the average monthly receipts from tolls during the working season of the year, say about eight months—so that it would appear that the receipts of three months will provide for the interest and expenses for the year, leaving the receipts of the remaining four or five months to go to the stockholders, making the bonds as sure as any such investment can can well be. As the company is authorized to increase its stock for the purpose of extinguishing its bonds, it is not unlikely that a measure so advantageous to both parties will, from time to time, be adopted, so that the bonds will become steadily more valuable.

A PRACTICAL TREATISE ON MECHANICAL Engineering, comprising Metallurgy, Moulding, Casting, Forging, Tools, Workshop Machinery, Mechanical Manipulation, Manufacture of the Steam Engine, &c. By FRANCIS CAMPIN, C. E., with additions and notes by JOHN BOURNE, J. La Nicca and George Ede, illustrated by one hundred and twenty-nine plates and wood engravings. HENRY CAREY BAIRD, Publisher, Philadelphia, 1864.

It is impossible to do justice to this valuable and timely work in a brief notice. It is one of the best if not the very best we have met, among the many practically scientific works with which the modern press is teeming. Every subject is carefully treated and explained, and the worker in metals and machines has at command full explanations to guide him in his progress from the simplest process of casting, up to the most difficult and delicate combinations of the perfect steam engine.

Finances of New Jersey.

From the Annual Message of the Governor we learn that the receipts of the Treasury during the fiscal year (eleven months) ending November 30, 1863, amounted to $254,345. Add to this the balance on hand January 1st, 1863, and we have a total of $346,430. The disbursements were $241,775, leaving an unexpended balance Nov. 30th, of $104,654. At the close of the year the State debt was $131,500. From this take the cash on hand, and there remains the sum of $29,845—showing a reduction of the indebtedness of the State, in eleven months, of the sum of forty-six thousand five hundred and seventy-five dollars and thirty-three cents. During the present month the sum of one hundred thousand dollars of the tax levied in 1863 will be paid on State account, which will not only liquidate the debt, but will leave a balance in the Treasury, after the payment of all indebtedness, to the credit of the State account proper, amounting to the sum of *seventy-thousand one hundred and fifty-four dollars*. The receipts of the fiscal year ending November 30, 1864 (not including the present month above referred to), are estimated at about $200,000, which sum will probably exceed the expenses, so that there will be in the Treasury at the end of the fiscal year, after paying all indebtedness, a large sum, unless the estimated receipts should be greatly diminished or unusual and extraordinary legislative appropriations be made. It will not therefore be necessary to raise during the present year any money for the State fund by taxation. Independent of the indebtedness mentioned above the war debt, which may or may not be assumed by the Federal Government, amounts to $997,083.

Life Insurance Companies.

In an extra of the *New England Insurance Gazette* we find, in advance of the State Commissioners' report, an abstract of the returns of twenty-four companies, doing a life business in Massachusetts. Of these, 5 are Massachusetts companies, 12 are New York, 1 New Jersey, 3 Connecticut, 1 Maine, 1 Vermont, and 1 Wisconsin.

We copy the returns of a few of the largest companies, giving the number and amount of their policies outstanding on the 1st Nov. last, together with the amount of assets on hand and the number and amount of death losses during the year.

	Policies.	Amount.	Assets.	No. d'ths.	Am't.
N. England Mt'al	6,802	$20,509,549	$2,970,792	94	$242,700
Mass. Mutual	3,297	7,168,880	645,981	25	48,300
Mutual Life, New York	14,039	49,410,137	9,935,280	142	518,197
Mutual Benefit, New Jersey	10,233	34,165,424	5,062,682	100	317,100
New York Life	9,580	25,052,494	2,566,923	111	300,950
Connecticut	15,061	38,920,795	5,628,056	167	373,840
Manhattan, N. Y.	4,902	16,534,869	1,537,948	35	104,652

The following table shows the amount of premiums and interest received by each of the above companies during the year, which readers can compare with the losses:

	Premiums.	Interest.
New England Mutual	$630,530	147,429
Mass. Mutual	226,070	35,788
Mutual Life, New York	1,389,775	513,668
Mutual Benefit, New Jersey	1,115,364	296,078
New York Life	965,592	144,580
Connecticut	1,248,894	424,754
Manhattan, New York	543,489	85,734

The expenses of managing the companies, in addition to the losses by deaths, are considerable, and arise mostly, we suppose, from commissions, discounts and collecting expenses. These expenses were, in the New England, $72,283; Mass. Mutual, $33,081; Mutual Life, New York, $189,300; Mutual Benefit, N. J., $137,516; New York Life, $194,344; Connecticut, $149,227; Manhattan, $81,001.

The year appears to have been a very successful one for these companies, and they all seem to be in an excellent condition.

The *Gazette* has an elaborately calculated tabular statement of the cash plan and the note plan, which shows that the note policy holder, aged 30, enjoys an annual advantage over the cash policy holder, for the first twelve years only, after which the annual advantage is every year increasingly in favor of the cash policy holder.

Milwaukee and Western Railroad.

The Portage *Register* says that "besides the extension of the Milwaukee and Western road from Columbus to Portage, the contract has been let for the construction of the east end of the road from where it now joins the Milwaukee and Prairie du Chien road at the Watertown depot, forming a connection and making a union depot with the Milwaukee and Chicago road. Mr. McDonnell, of Madison, is the contractor on the east end, and the whole road from the Lake Shore depot to Portage is expected to be in operation by the 1st of June."

☞ The Providence *Journal* states that Col. George E. Church, has completed a survey of the proposed railroad route between Fall River and New Bedford. He finds the route entirely practicable, and two miles shorter than has heretofore been supposed, the distance from tide water to tide water being only sixteen and one half miles.

Col. Church has received from an English Company an offer of the position of Resident Engineer of the Rosario and Cordova Railroad—the longest railroad in South America.

☞ It appears from a half yearly report of its condition, that the employees of the Grand Trunk Railway of Canada have a literary and scientific institute, and that they have a library of 1,707 volumes, and receive 41 newspapers and periodicals.

☞ The Rockland *Gazette* urges with much force the building of a railroad from that city to the Kennebec. The point on the river which it suggests is Richmond.

Coal Trade for 1863.

The Pottsville *Miners' Journal* of the 23d inst., says:

We furnish our readers with our Annual Statistics of the Coal Trade. They are all official except from one point, and show an increase in the production for the year unexampled in the history of the trade.

After separating the coal which passed over the different railroads, we find that the whole production of coal was as follows:

Years.	Anthracite.	Semi. & Bitu.	Total.
In 1863....	9,420,135	2,166,995	11,587,120
1862....	7,640,905	1,359,716	8,000,621
Increase ...	1,779,230	807,269	2,586,499

Giving the enormous increase of 2,586,499 tons, which is more than one-fourth of the whole consumption of last year. At the commencement of the business for the year no one anticipated such an increase, particularly when prices ruled so high, but it is only another evidence of the great prosperity of the North, notwithstanding the great Rebellion, and the extent to which the manufacturing industry of the country is pushed to supply the wants of the Government and the people. The following table exhibits the progress of the trade from the commencement in 1820 to 1861, a period of 41 years:

	Anthracite.	Semi-Anth. and Bit.
From 1820 to 1830	359,190	273,668
From 1830 to 1840	5,261,197	954,166
From 1840 to 1850	19,873,429	1,744,460
From 1850 to 1860	57,190,990	9,467,468
From 1860 to 1861	32,604,729	6,371,510
	114,789,535	18,811,172

As regards the future state of the trade, we have only room to remark that there will be abundant colliery capacity to supply all the coal the market will require, even if the increase should run up a million of tons the present year;

but we doubt whether there will be facilities to transport such an increase to market. The prices this year will depend upon the ability of the miners, &c., to maintain the present rate of wages, and the charges adopted by the different carrying companies. So far there has been no reduction in wages in the coal regions, and the future rates will depend altogether on the supply and demand when the Spring trade opens.

Railroad Earnings--Monthly.

The earnings of the Rome, Watertown and Ogdensburgh Railroad for December, 1862 and 1863, was as follows:

	1862.	1863.
Earnings	$44,120 50	$59,906 62
Expenses	26,387 83	32,645 12
Net earnings	$17,732 67	$27,261 50
Increase in December, 1863		$9,528 53

The earnings of the Indianapolis and Cincinnati Railroad in December, 1863, were:

From passengers	$25,551 53
" freight	37,073 06
" mail	925 00
" express	500 00
Total	$64,049 59

The business of the Philadelphia and Reading Railroad Company for the month of December, 1862 and 1863, has been as follows:

	1863.	1862.
Received from coal	$388,644 18	$357,966 33
Do. merchandise.	67,211 06	52,714 69
Do. travel, etc...	70,154 00	44,145 27
Total	$526,009 24	$454,826 29
Transportat'n, roadway, dumpage, renewal fund, and all charges.	274,682 16	196,462 62
Net profit for the month.	$251,327 08	$258,363 67

Railroad Earnings--Weekly.

The traffic of the Great Western Railroad for the week ending January 22, 1864, was as follows:

Passengers	$18,811 11
Freight and live stock	37,404 67
Mails and sundries	2,579 56
Total	$59,795 34
Corresponding week of 1863	64,095 70
Decrease	$ 4,300 36

The earnings of the Grand Trunk Railway for the week ending January 22, 1864, were:

Passengers	$21,584 07
Freight and live stock	66,393 70
Mails and sundries	3,800 00
Total	$91,777 77
Corresponding week, 1863	94,153 73
Decrease	$2,375 96

The earnings of the Marietta and Cincinnati Railroad for the 3d week in January, 1864, have been:

1864	$9,773
1863	5,733
Increase	$4,040

The earnings of the Chicago and Northwestern Railroad for the third week in January, 1864, were:

Passengers	$8,662 37
Freight	16,640 80
Mail	508 33
Express	352 92
Total	$26,164 42
Same period last year	13,849 58
Increase (90 per cent)	$12,314 84

The earnings of the Milwaukee and Prairie du Chien Railroad for the week ending Jan 21, 1864, were $28,028 70
Corresponding week of previous year.. 20,757 72

Increase $7,270 98

The earnings of the Toledo and Wabash Railroad Company for the week ending Jan. 21, were:

	1863.	1864.
Passengers	$4,547 80	$7,390 90
Freight	13,222 06	13,606 94
Total	$17,768 96	$20,997 84
Increase		$3,228 88

The earnings of the Montreal and Champlain Railroad for the week ending Jan. 23, 1864, were:

Passengers	$1,086 59
Mails	252 00
Freight anc Live Stock	1,884 35
Ferries	147 11
Total	$3,370 05
Corresponding week, 1863	3,095 36
Increase	$274 69

The earnings of the Chicago and Alton Railroad Company for the week ending Jan. 23d, 1864, were $34,285 37
Corresponding week of previous year.. 23,704 53

Increase 1864 $10,580 84

Review of the British Copper and Iron Trade for 1863.

Copper.—At the commencement of the year the price of copper was precisely the same as at present, but was then dull of sale, and at the latter end of January could be bought at £2 under fixed prices. Foreign also was greatly neglected. On February 3 a decline of £9 per ton took place, which was a much greater reduction than had been expected, and created a considerable stir in the market in consequence. It also caused a great demand to spring up, and the manufacturers filled their books with orders. Foreign also considerably improved. This decline produced a very good effect upon the market, and orders at length became so great that the smelters refused to take any more. The natural consequence of this state of things was that a rise was fully expected; but from various causes it did not take effect. At the latter end of February the market became very still and remained so during the following month, and in April second-hand parcels could be obtained a trifle under fixed prices. In June the market again became firmer, and on the 26th of the same month the smelters announced an advance of £3 per ton, making the prices to be for sheet and sheathing, £99; tough cake and tile, £92; and best selected, £95. Soon after this a rise in the value of ores caused the market to stiffen considerably, and the smelters began to refuse orders at the fixed rates, which caused a farther rise to be anticipated; and on July 27, another advance, of £3 per ton, was announced, making prices to be—manufactured, £102; tough cake and tile, £95; and best selected, £98. This rise, however, was not warranted by any increase in the demand, which was then moderate, but was made solely on account of the short supply of ores. During the next month the market again became flat, and sellers were found under fixed prices. In September, in consequence of favorable advices from Bombay, there arose considerable activity in the market, and second-hand parcels were eagerly caught up. Smelters became very firm in their prices, and buyers could not operate under fixed rates. This state of things continued during the following month, and a rise became fully expected; and on October 12 the smelters announced an advance of £3 per ton, and fixed prices became £105 for manufactured, £101 for best selected, and £98 for tough cake and tile. This advance not appearing to satisfy the smelters, and a very favorable state of affairs continuing, another rise was expected; this, however, was prevented by the advance in the Bank rate of discount. In November the standard of ores declined £3 per ton, and smelters waited to see what effect the war produced on the market by the advance in the Bank rate, being desirous, if possible, of putting up the price. The market, however, became much duller, and buyers would not give out their orders at full rates. In the next month, December, the market again improved, and none could be obtained under fixed rates. Very large transactions in Chili took place, amounting to 600 or 700 tons, and this gave the smelters an opportunity of doing what they had been waiting for, and on December 17 they announced an advance of £5 per ton, making the prices—for manufactured, £110; for tough cake and tile, £103; and for best selected, £106. This advance would have been made before but was prevented by the advances in the Bank rate. Very large orders about this time arrived from America, and the market became very firm at the advance, and a further rise was fully expected. This state of things still continues, and there is now no doubt that before long another advance will be announced. * * * *

Iron.—At the commencement of the year the price of bar iron in London was low, being £6 10s. per ton, and at the latter end of January a decline of 2s. 6d. per ton occurred. This state of things continued during the following month, and in April bars declined to £6 5s. per ton in London, and in May to £6 per ton. The state of the iron trade was by no means flourishing, and the manufacturers became very short of orders. In June, however, in consequence of the puddlers' strike, the supply could hardly keep pace with the demand, and prices became very much firmer. In Staffordshire the makers advanced their prices in July 5s. per ton; and in August merchant bars advanced to £6 12s. 6d., and out of stock in London to £6 15s. Very great difficulty was now caused by the puddlers' strike, and on August 19 the ironmasters of South Staffordshire held a special meeting, when it was resolved that finished iron should be advanced 10s. per ton, and puddlers' wages raised 1s. At the latter end of the same month merchant bars in stock in London rose to £7 per ton—and now a tide of prosperity appeared to set in for the iron trade, which has continued to flow on uninterruptedly until the present time. In September there were very large orders given out for rails at advanced rates, and on the 7th of that month a further advance in Staffordshire iron of 10s. per ton took place; and also of Welsh bars in London of 10s. per ton. The intelligence from all quarters now became most cheering, and on the 17th of the same month a meeting of Welsh ironmasters was called to consider the question of wages, at which it was decided to advance the wages of the men in November, not exceeding 10 per cent. At the latter end of this month the market increased in excitement. A preliminary meeting was held at Birmingham, at which it was stated that the advance of 10s. per ton was not sufficient to overcome the difficulties with the men, and it was, therefore, resolved to advance the price of bars 20s. per ton, and all other kinds in proportion; it was also resolved to raise puddlers' wages 1s. per ton. The Welsh ironmasters also determined not to sell under £7 at the works. Notwithstanding these advances, however, the demand still continued very good. On the 7th of October the quarterly meeting of the South Staffordshire and East Worcestershire ironmasters commenced at Wolverhampton; the general feeling indicated that the state of the iron trade was most satisfactory, and that the recent advance of 20s. would be maintained. The result of the quarterly meeting was to confirm confidence in the permanence of the advanced prices. The price of English iron in stock in London also advanced to £8 per ton; at the works to £7 per ton, and free on board in London to £7 15s. per ton. In the month of November, the demand still continuing remarkably good, the Staffordshire makers became full of orders, and, notwithstanding the advance in the Bank rate, the market remained quite unaffected. About this time a good steady demand set in from America, and large

railway orders came to hand. English iron in stock in London was advanced to £8 10s. per ton. Further advance in Bank rate still produced no effect upon the market, and the demand still continuing, the Staffordshire makers advanced their price 5s. per ton, and English iron was also put up another 10s. per ton. A great proof of the improvement in the iron trade of South Wales was found in the fact that all the works which had come to a standstill during the depressed times of the last four years are now either in work or preparing to commence operations, and this satisfactory state of things is brought about by the advance in the price of iron, and the prospects for the future. At the commencement of December a further advance in Staffordshire iron became fully expected at the next quarterly meeting, and makers would only take orders subject to quarter-day's prices. The workmen in South Staffordshire also again began to be unsettled, and demanded higher wages. As the month advanced the iron trade still showed itself in a most flourishing condition, and an advance of 30s. at quarter-day became fully expected. Orders were only taken subject to quarter-day's prices, though some houses agreed to take orders at 25s. advance on present rates. Buyers were now in difficulty on account of the state of the market, not knowing how to operate. On the 24th of December an advance of 10s. per ton in Welsh bars was announced. The preliminary meeting of the Staffordshire ironmasters was held on the 31st of December, at which it was resolved to advance the price of iron 20s. per ton, and an announcement has been received that English iron, free on board in London, is advanced to £8 10s. per ton. Swedish iron, during the commencement of the year, remained generally quiet at £11 10s., but in April the market became very dull; arrivals came in very slowly, and though holders were desirous of securing higher rates, buyers could only be found with difficulty. In August the market somewhat improved, and a good business was done at £11 10s. In the following month advices arrived from Sweden that no assortments were to be obtained, and there appeared every probability that prices would go higher; but no advance took place until October, when a good demand springing up the price rose to £12 10s. per ton. In the next month the demand still continued, and considerable shipments were made at the above prices. At the commencement of December, however, the market gave way to £12, but shortly rallied to £12 5s., and an improved demand arising the price rose to £12 5s. and £12 10s. per ton. Scotch pig-iron has, as usual, fluctuated considerably during the year, but has lately steadily advanced to its present price. In January the price generally was about 58s. 6d. cash, but in February the stock in Scotland increased about 35,000 tons, being then upwards of 740,000 tons, and the price advanced to 64s. 3d. The prospects of the trade now became brighter; but in the following month the price fell to 60s. 6d. From this time a slow but steady advance took place until in August the price stood at 54s. 6d. cash, and 54s. 9d. one month. In September, a strike occurring among some of the miners, the price rose to 55s. 6d., and a large business was done; the improvement still continued and 58s. 6d. cash, and 59s. one month was paid. In October 61s. 6d. was reached, and during the month the market became greatly excited, rising to 63s. 3d., and declining to 62s. 3d., a very large business being done at irregular prices. The tendency of the market, however, was downward, and 60s. 8d. was accepted; the next week it rose to 61s. 3d. and 61s. 9d., at which a very large business was done for speculation. The Bank advance now told upon the market, and falling and rising became the order of the day; it settled, however, at 61s. 6d., but the anticipation of the second rise in the Bank rate caused the market to become flat, and a decline occurred to 60s. 6d.; a reaction, however, soon took place, and 60s. 10½d. was secured. In November great fluctuations occurred the market first rising, then falling, and afterwards rising again; but eventually settled at 61s., and successively rose to 62s., 65s. 6d., and 66s. 9d. After the further advance in the Bank rate, however, the market fell to 64s. 1½d., and then to 63s. 9d. In December, however, a considerable improvement commenced, which has steadily continued, prices varying from 64s., 64s. 10½d., and 65s., and a large business was done at advanced prices, 65s. 6d. cash, and 67s. 3d. three months, being paid. In consequence of the improved aspect of monetary affairs the market was greatly stimulated, and a large speculative demand arose, and prices advanced fully 1s. per ton, the market remaining steady, at 66s. 6d. cash, 67s. one month, and 68s. three months. During the past week there has been considerable excitement in the market, and prices have gradually advanced, and the last advices from Glasgow state that the price has reached 70s. three months, but gave way during the day, and closed at 67s. 3d. cash, and 69s. three months.—*London Mining Journal, January 2.*

TRURAN ON IRON.

D. APPLETON & CO., 443 & 445 BROADWAY,

HAVE JUST PUBLISHED

THE IRON MANUFACTURE

OF GREAT BRITAIN

Theoretically and Practically Considered:

Including Descriptive Details of the Ores, Fuels, and Fluxes employed; the Preliminary Operation of Calcination; the Blast, Refining, and Puddling Furnaces; Engines and Machinery; and the Various Processes in Union, etc., etc. By W. TRURAN, C. E., formerly Engineer at the Dowlais Iron Works, under the late Sir John Guest Bart.

SECOND EDITION,

Revised from the manuscripts of the late Mr. TRURAN, by J. ARTHUR PHILLIPS, Author of "A Manual of Metallurgy," "Records of Mining," etc., and WM. H. DORMAN.

One Vol. Imperial 8vo, containing 84 Plates. Price $10.

New York Fire-Brick Manufactory,

Branch Works at Kreischerville, Staten Island.

B. KREISCHER,

OFFICE 58 GOERICK ST.,

Corner of Delancy Street, - - - NEW YORK.

FIRE BRICKS OF ALL SHAPES AND SIZES.

Fire Mortar, Clay and Sand.

Practical Mechanical Engineering.

This well printed Octavo from the press of Henry Carey Baird, of Philadelphia, has contents worthy of its typography; it is a pleasing work to handle, and a valuable one to study. We alluded to it briefly in last week's JOURNAL, but it deserves more than a passing notice. Besides the original matter of the author Mr. Campin, an English writer, it contains observations on the construction of steam boilers, furnaces for smoke prevention and explosions by Robert Armstrong, annotated by Mr. Bourne; rules for calculating the change of wheels for screws on a turning lathe and for a wheel cutting machine by Mr. La Nicca; and on the management of steel, including forging, hardening, tempering, annealing, shrinking, expansion and case hardening by Mr. Ede, all important processes in the creation and stability of machines in metal.

To these are added a large number of steel and wood engravings, which explain the text, and guide the student in his researches.

Notwithstanding the multiplicity of modern works on science and practical engineering, there is nevertheless felt to be a deficiency in their arrangement to make them immediately useful, and book learning in the shops therefore has not been so much extended or so popular. To remedy this the author evidently attempted the construction of a treatise which should combine "practical method, portability, and conciseness, and comprise all the general operations connected with mechanical engineering. He proceeds along methodically therefore in the present work from the beginning, and gives the natural condition of the minerals from which the metals of commerce are derived, and the methods of their manufacture, to the final combinations of the materials in the most perfect shape.

In the first chapter, the metallurgy of iron, copper, lead, tin, and zinc is considered; the nature and localities of the various metalliferous ores being described, and also the practical methods most usually employed for the reduction of metals to the conditions in which they occur in commerce; the apparatus required, and the principles upon which their action depends, and the mode of working them being also included.

Then follows a description of the various processes of forging and of the instruments used by smiths. After which the construction of patterns, the methods of forming moulds of various kinds, and of casting metals, are discussed.

The form and action of the cutting-tools of the engineer have been carefully detailed, a thorough knowledge of the requirements which must be satisfied, in order to secure their correct action, being most important, though a proper appreciation of the forms of the principal machine tools is scarcely less necessary; wherefore some sound examples of turning-lathes, shaping, slotting, drilling, planing, and other machines, have been illustrated and described. As a sequel to the foregoing descriptions, an account of workshop manipulation is given, so far as it admits of description.

The physical basis of the steam-engine is next considered, the more refined methods of analysis being avoided, so as to retain a strictly practical character. Dr. Joule's equivalent for the calculation of the amount of work to be obtained from a given quantity of heat is inserted, forming, as it does, a convenient means for the *expression* of quantities of heat. But it is derived from experiments upon the amount of heat generated by friction of liquids; and, therefore, the author does not feel justified in considering its application to thermo-motive engines demonstrated, the facts extant being insufficient for this purpose. Stimer's and Isherwood's experiments on the practical utility of using steam expansively have also been discussed at some length.

In the chapter on the Principles of Mechanical Construction, an attempt has been made so to generalize the theory of the action of levers, hydrostatic presses, &c., as to replace by a simple calculation, easily remembered and applied, the numerous rules and formulæ which have hitherto been so abundantly supplied for levers, divided into various orders, and for other machinery, and which, being generally given without any notice of the reasoning upon which they are based, cannot be remembered, and frequently serve but to confuse the reader. The laws of falling bodies of rotatory motion, &c., are also explained.

The general forms of steam-engines, and principles of steam-boilers, and qualifications of various kinds of engines are briefly treated, followed by lengthy accounts of the form and manufacture of each principal element of the steam-engine, after which the form, action, and manufacture of various kinds of pumps and valves are treated.

Practical formulæ for the length of boilers, descriptions of various kinds of boilers, and of the modes of constructing them, also accounts of the paddle-wheel, screw, and hydraulic propellers, with miscellaneous remarks upon some of the applications of steam-power, have also received due attention; and particular stress is laid upon the necessity of having reliable experiments upon steam-engines, and attention is drawn to the inferiority of modern engines in point of economy. It is indeed a fact much to be regretted, that notwithstanding the researches of scientific men, and the labors of practical engineers, no improvements have been made in the economy of the steam-engines since 1845. The remainder of the work is occupied by descriptions of examples of pumping rotative, marine, locomotive, traction, and

steam fire-engines, concluding with a Glossary of the technical terms used throughout the work.

As in the account of the metallurgy of iron notice has been taken of the effects of various foreign ingredients with which the iron of commerce is always more or less contaminated, it has been thought advisable to add an Appendix containing the various methods of analyzing chemically the various ores of iron and specimens of iron, so as to enable those who may feel disposed to examine for themselves such samples as may come under their notice.

The examples of the machinery illustrated have been carefully selected, and every means taken to secure correctness of the Plates.

It will thus be seen how naturally by induction the student is led on from one step to another, and how readily he may perfect himself in the processes he desires to master. The glossary is a useful addition to the work giving precise ideas of technical terms most in use by machinists. We could have wished it had been more extended. We notice for example the omission of the word "slot," though a slotting machine is particularly described at page 57. We do not find it even in Weale's excellent and useful work on rudimentary Terms, which is perhaps the best of its kind.

We hope this brief review of Mr. Baird's American edition of Campin, will lead to its general use. The Mechanics and Engineers of this country have a large and original field before them. Just as they are intelligent and practical, will they advance themselves and enrich their Country. We have heavy national responsibilities to meet, perhaps in advance of the hands to provide for them for years to come; but by the use of steam, our natural hydraulic power, and the invention of labor-saving machinery, there will be no difficulty in performing the work of hundreds of millions of men with ease and profit. Let then this class of persons understand how much they can do, if they will, and how materially they may assist in making their country the most powerful, and the most desirable one on the face of the globe.

Huntingdon and Broad Top Mountain Railroad and Coal Company.

The receipts and expenses of this company for the years 1862 and 1863 have been as follows:

Receipts:	1863.	1862.
From freights on coal	$181,566 65	$171,764 08
From merchandise and other freights	16,681 45	12,333 70
From passengers	17,354 64	10,955 59
From rent of mines and houses	8,869 04	11,193 52
From mail and express,	2,106 66	1,894 92
From miscellan's items,	678 45	13,265 75
	$227,256 89	$221,407 56
Expenses, viz:		
For motive power	$46,835 91	$30,870 10
For mainten'nce of way	49,092 39	71,755 80
For mainten'nce of cars	5,564 30	5,095 51
For conducting transportation	27,171 93	24,391 33
For mainten'ce of mines	860 63	2,080 32
For expenses of office at Philadelphia, including salaries, rent, stationery, printing, &c	5,761 22	5,574 16
	$135,286 41	$148,767 22
Net earnings	$91,970 48	$72,640 34

Railroad Legislation in Iowa.

A bill has been introduced into the Iowa Legislatnre proposing to take away the land grants of of all the railroads in that State, except that of the Keokuk, Fort Des Moines and Minnesota Railroad Company, and the passage of the bill is being very strongly urged by interested parties. The companies embraced in the bill are the Burlington and Missouri River, the Mississippi and Missouri, the Cedar Rapids and Missouri River, and the Dubuque and Sioux City. The ostensible reason is, that the companies have failed to complete the required number of miles within the time specified in the grant. The real object is, to force the railroad companies to relinquish their claims to certain lands lying in the Des Moines Valley, which are also claimed by the old Des Moines Navigation Company and its assigns, the Keokuk, Fort Des Moines and Minnesota Railroad Company.

New Jersey Railroad and Transp. Co.

The following is an abstract of the report of this company for the year ending December 31, 1863:

RECEIPTS.

From passengers		$956,688 56
From freight		161,530 86
From U. S. mail, rents, express, freight and other sources		168,380 70
		$1,286,600 12

EXPENSES.

Maintaining railroad, bridges and buildings	$109,885 92	
Repairs of locomotives, cars and machinery	88,721 46	
Fuel—cost and labor in preparing	107,915 90	
Operating the road and transporting passengers and freight	273,194 64	
Office expenses, salaries and contingencies	11,967 82	
		591,685 74
		$694,914 38

Disbursed as follows, viz:

Interest on bonds	$41,050 00
Transit duty on passengers and freight	28,913 60
State tax on capital	21,989 00
Government tax	40,020 13
Dividends in cash, Aug. and Feb.	439,775 00
Profit and loss, to surplus earnings	123,166 65
	$694,914 38

The number of passengers transported over the road during the year was as follows:

Over the whole line of the road	583,918½
Between Jersey City and Newark	1,495,387½
" " Elizabeth	324,626½
" " Rahway	79,330½
" " N. Brunswick	108,985½
All intermediate places	396,929
Total—not including commuters and free passengers	2,989,177½

The number of miles run by passenger, freight and other trains was 567,936.

The number of tons of goods, wares and merchandise transported over the road during the year was as follows:

Over the whole line of the road	28,333½
Between Jersey City and Newark	56,144
" " Elizabeth	5,634
" " Rahway	4,610
" " N. Brunswick	19,958½
All intermediate places	57,438
Total	167,118

GENERAL STATEMENT.

Capital stock		$4,397,800 00
Funded debt, including $485,000 the cost of the property and privileges purchased of the Jersey Associates		642,500 00
Profit and loss, being surplus earnings represented by permanent improvements, and the property and cash stated below.	$523,183 42	
Less amount paid for relaying road with new rails and other improvements	43,796 34	
		479,387 08
Dividend 1st Jan., payable 1st Feb., 1863		219,887 50
		$5,739,574 58
Cost of railroad and equipments:		
For graduation and masonry, bridges, superstructures, iron, passenger and freight stations, buildings and fixtures, engine and car houses, workshops, machinery and fixtures, engineering, land and land damages		$3,640,516 65
Locomotives, tenders and snow plows		223,343 00
Cars—passenger, freight & baggage		225,170 00
Property, viz:		
Bridge, ferry, turnpike, and other stocks, real estates, ferry boats, privileges and fixtures, (including the property and privileges purchased of the Jersey associates for $485,000)		1,461,305 92
Cash in bank, cash items, and balances due		189,239 01
		$5,739,574 58

President.—ALFRED L. DENNIS.
Treasurer.—H. J. SOUTHMAYD.
Sec'y and Gen'l Sup't.—F. WOLCOTT JACKSON.

The New Brunswick Railway Extension.

The people of the province of New Brunswick having apparently given up all expectation of a railway connection with Halifax by the intercolonial route, are now looking to the United States, in the hope of increasing their commerce in that direction. It is therefore proposed to extend the European and North American Railroad westward, by the way of Douglass Valley, so as to accomplish this object. The plan of Mr. Burpee appears to have attracted the attention not only of the Press, but the St. John's Chamber of Commerce. The connection to be made is between Bangor and St. Johns. Arrangements have been made, it appears, for carrying out the work as far as Maine is concerned; the portion of the road as far as Milford is to be completed the present year, and a survey is to be made in the direction of Mattawamkeag and the New Brunswick frontier. The precise route, Mr. B. says, has not been specifically stated, but the one chiefly discussed in Bangor, passes from Bangor up the Penobscot as far as Mattawamkeag, thence nearly east to the Oromocto Lakes in New Brunswick, where it joins the Douglass Valley route as surveyed, and follows it to St. John. Mr. B. estimates the distance as follows:

From Bangor to Mattawamkeag	55 miles.
Mattawamkeag to N. Brunswick frontier.	50 "
N. Brunswick frontier to St. Andrews line	5 "
St. Andrews line to St. John	75 "
Total	185 miles.

According to Mr. B.'s estimate the Branch to Fredericton from Hartt's Mills will be 20 miles.

This will leave in all 205 miles to be completed, 105 in the State of Maine, and 80 miles of Trunk, and 20 of Branch in New Brunswick. The estimated distances by the proposed road would be as follows:

From St. John to Woodstock and Houlton..125 m.
From Bangor to Woodstock and Houlton..165 "
From St. John to Fredericton..... 62 "

The proposed or through line is, Mr. B. says, only a few miles longer than the shore line as surveyed under Morton. He says, too, that it can be built with less curvature and easier grades, and it will cost less; (at least $6,000 per mile,) it goes through lands and forests of the best quality, it gives the shortest possible lines to both Fredericton and Woodstock, and is the only one likely to secure State aid in Maine; and it is the only line, in connection with western extension, to which the people of a great proportion of the Province will be willing to give their countenance and support. With regard to the cost of construction, he says:

"To make all the proposed connections, we have seen that 100 miles of railway will be required. The first 25 miles west from St. John will no doubt prove expensive, but the remainder, from a personal knowledge of the country the line will traverse, I can safely affirm, will be easily constructed. There will be very few bridges, and none of them expensive, very little rock cutting, if any, beyond the first 25 miles. No terminal stations at the West, and but small additions to our present buildings, &c., at this end, and but very little for land damages. Knowing these facts, and using the experience we have already gained, we should build and equip the road as good for all practical purposes as our present line, for $30,000 per mile, but to meet all possible contingencies, add $2,000 per mile more. We will then require a capital of $3,200,000, the annual interest on which at 6 per cent. will be $192,000, of which by our estimate, after deducting 50 per cent of receipts, we have provided $185,500. By this we see that we only require from other sources $6,500 a year, which with any other falling off or additional expense that may arise, will be more than made up to the Province by the increased traffic that it must bring to the present road, if not from the increase in business for the next four years."

After very minute calculations as to the traffic on the line, Mr. Burpee sums up the probable earnings as follows:

Through Passenger Traffic to U. States..	$100,224
" " " to Woodstock	30,000
" " " to Frederict'n	39,125
Mails and Sundries.....	15,000
Through Freight to the U. States.....	75,200
" " to Woodstock.....	30,517
" " to Fredericton.....	21,125
Way Passenger and Freight Traffic.....	60,000
	$371,191

The commercial importance of St. John's is illustrated by the following figures:

The total value of imports into New Brunswick for the year 1862, was...	$6,200,000
Of these there were from the U. States..	3,000,000
And into the city of St. John.....	4,148,000
Total value of exports same year was..	3,856,538
Of which there was from the city of St. John.....	2,438,000

"From these figures we see that nearly five-sixths of the whole trade of New Brunswick is through St. John, so that what benefits St. John must benefit the whole Province. Now what is it that supports this trade and brings it to St. John? Is it not the vast resources of the upper St. John river, which are now poured down its valley to our city?"

We therefore perceive from the foregoing statements, that the proposed extension is a project which has indisputable merit, will be followed by success, and give a large accession to the trade between the United States and the Eastern Provinces.

Philadelphia and Erie Railroad.

The annual meeting of this company was held in Philadelphia on the 8th inst. From the report of the managers which was presented, we learn that at the eastern end the track has been laid to the town of St. Mary's and at the western end as far as Wilcox, leaving but 24 miles of track to be laid to complete the entire line of road, 288 miles in length. On these 24 miles there yet remains to be done of grading a portion of five different sections, making in all less than 40,000 cubic yards, and on change of grade and strengthening banks, about 50,000 yards, a large portion of which may be done with gravel trains after the track is completed and in running order. The masonry of the bridges of the unfinished portion is ready for the superstructures which are all framed, and can be raised at an early day in the spring. With the present force on the line all the grading can easily be prepared to receive the track during the next three months, and cars can be run in the early part of June next.

The managers have been disappointed in their intention of completing their road from Sunbury to the harbor of Erie, because of the difficulty of procuring laborers, and the still greater one of inducing them to remain in the comparatively undeveloped sections of the country. During the year 1,563 men were sent upon the line of the road by the contractor, at a cost of over $13,000. This number of laborers could have completed the road had they remained, but a large portion left after working a few days, and some actually deserted before reaching their destination. Notwithstanding many perplexing circumstances, however, a greater number of miles of track have been brought into use during the past than the previous season.

The business on the finished portion of the road has been conducted during the past year in the most satisfactory manner; the receipts having exceeded those of the preceding year $284,250. The following statement exhibits the receipts for the past four years:

1860	$269,418	1862	$443,419
1861	350,439	1863	727,669

The balance of the floating debt, contracted prior to February 1, 1862, amounted to $118,876, which has since been reduced to $32,896. This amount will be paid by the company as soon as the claims are presented.

The yield of the oil wells in northwestern Pennsylvania still continues, and such additional connections are contemplated as will secure to the road a large share of that important traffic. For the accommodation of the Lake business, the Company are now constructing an extensive pier in the harbor of Erie, upon which will be erected a commodious warehouse and grain elevator. Arrangements have also been made jointly with the Lakeshore Railroad Company for the erection of a new and capacious passenger station house at Erie, and the work of preparing materials for the structure has already commenced.

The following gentlemen were elected a board of managers to serve for the ensuing year, viz: Messrs. William G. Moorehead, Ellis Lewis, Henry Duhring, D. K. Jackman, C. B. Wright, Edward F. Gay, J. D. Whetham, P. Metcalf, S. G. Thompson, W. A. Galbraith.

Northern (Ogdensburg) Railroad.

At a meeting of the holders of the Second Mortgage bonds of this company, held in Boston on the 4th inst., George M. Barnard, Esq., was chosen Chairman, and Isaac D. Farnsworth, Esq., Secretary.

After the reading of the call for the meeting by the Secretary, Mr. J. C. Pratt stated that it had been called without any authoritative name being appended to the notice, but, notwithstanding, it seemed desirable that the holders of second bonds should meet and confer together upon matters upon which it was there interest to act. The Ogdensburg Railroad had become really the property of the second mortgage bondholders, and, therefore, it would seem that the object for which Trustees were appointed, had ceased. If the second mortgage bondholders are really the owners of the road, then it was quite time for them to take hold of the management of the road, to protect their own interests. There was no desire on his own part, or on the part of any one else, by any action which might be taken by the meeting, to reflect in any manner upon the management of the Trustees, but their doings were not definitely known, as they made no report to the bondholders.

The only indebtedness of the road is the first mortgage bonds, but the earnings of the road are increasing, and now pay the interest on the first bonds. He had no donbt that the Trustees had acted in good faith, but it was thought that such board was no longer needed, and that it was best for the second mortgage bondholders to manage their own property for themselves, inasmuch as under the present arrangement no one is responsible to meet the first bonds when they mature in 1869, and unless some action is taken, the second bond holders are likely to lose all their property in the road. This alone he considered an important reason why they should choose a President and Directors, or have some sort of an organization.

Mr. Pratt concluded his remarks by offering two propositions: first, that the meeting proceed to elect an Executive Committee of five bondholders, which shall have full powers to take any and all measures they may deem necessary to promote the interests of the bondholders; and second, authorizing the chairman to appoint a committee of three to retire, and nominate a list of five bondholders to serve as such Executive Committee. He expressed the hope that the bondholders would have the co-operation of the Trustees in adopting this measure.

Mr. J. S. Farlow stated that by the report from the State Engineer's department of New York for the last year it appeared that the road had earned $73,000 more than enough to pay the interest on the first bonds, and this year the earnings had been $108,000 over the sum necessary to pay the interest on those bonds, and that $42,000 of this amount had been expended for iron and other materials. He also stated that although the stock had been held at a very low figure at one period the road was now earning seven per cent. on stock at $50, and he had been told the produce raised on the line of the road last fall for transportation was sufficient to employ the road through the winter without any other freight. He hoped such line of action would be opened at this meeting as would put the second bondholders in possession of the road within a very short time.

At the conclusion of Mr. Farlow's remarks, the Chairman put the question on the adoption of the propositions offered by Mr. Pratt, and the same were adopted without a dissenting voice, and

Messrs. E. H. Ashcroft, H. A. Church and Arthur Williams were appointed the committee to retire and nominate an Executive Committee.

While the nominating committee were absent, remarks in favor of the proprosition made by Mr. Pratt were made by two or three other gentlemen, and, in accordance with the suggestion of one of hem, gentlemen present affixed their signatures to a certificate stating the amounts of bonds held by each signer.

Mr. Eldridge, one of the Trustees, made a few remarks, and concluded by stating that he had no doubt they would join, and most cheerfully and cordially co-operate with the second bondholders in any legal measure which may advance their lawful rights and interests.

The nominating committee came in, and reported as their nominations for Executive Committee, Messrs. John C. Pratt, Jacob W. Pierce, John S. Farlow, Isaac S. Farnsworth and H. H. Boody. The report was accepted, and the meeting confirmed the nominations.

The Chairman stated that the signatures to the certificate of amount of bonds held, represented $1,200,000.

After voting the Executive Committee power to fill any vacancies which may occur in their number, and to call meetings of bondholders whenever they may deem it expedient, the meeting dissolved.

New York State Banks.

The following summary gives the aggregate Resources and Liabilities of the Banks of the State of New York, as exhibited by their reports of their condition, on the morning of Saturday, December 26, 1863:—

RESOURCES.

Loans and discounts		$193,781,315
Overdrafts	$592 and	642,708
Due from banks		21,712,285
Due from directors	$7,053,713	
Due from brokers	10,976,763	
Real estate	6,500 and	8,627,977
Specie		26,685,669
Cash items		59,645,949
Stocks, promissory and United States 7 30 notes and indebtedness certificates	$705,700 and	102,346,931
Bonds and mortgages	82,000 and	5,473,517
Bills of solvent banks and United St'ts demand notes		25,239,319
Bills of suspended banks	$65	302
Loss and expense account		1,480,437
Add for cents		903
		$445,638,312

LIABILITIES.

Capital	$109,535,785
Circulation	36,934,255
Profits	21,269,188
Due banks	43,124,671
Due individuals and corporations other than banks and depositors	3,307,015
Due Treasurer of the State of New York	5,388,155
Due depositors on demand	222,645,314
Amount due not included in either of the above heads	3,433,424
Add for cents	510
	$445,638,312

The Waupaca Railroad.

We are informed that our neighboring village of Waupaca, now impatiently awaiting railroad facilities, has signified its willingness to issue town bonds to the amount of $8,000 for the completion of the road to that place, provided the Chicago and Northwestern Railroad Co., will take them and complete the road in a shorter time than had been agreed upon by this Company. The proposition will doubtless be accepted; and in the spring the work will be pushed along vigorously until completed, which will be about the 1st of July.—*Stanton (Wis.) Times.*

Tonnage of the Competing Anthracite Lines.

Subjoined is a statement of the coal tonnage of the six competing lines, from 1856 (when the Lehigh Valley Railroad and the South Division of the Delaware, Lackawanna and Western Railroad were opened,) to 1863, both inclusive, showing the quantity of anthracite moved on each line towards the General Market, and the total from each of the three regions for each year with the percentage of the whole carried by the two Schuylkill Lines.

About the middle of December the Pennsylvania Coal Company began to forward coal by rail over the Erie Railroad to the Hudson River; so that henceforth there will be *seven* independent Anthracite Trunk Lines, leading out from the Mining Region to the general market on the Delaware, the Hudson, and farther East.

1863	854,556	2,819,408	3,703,964	699,538	1,105,555	1,805,118	1,490,105	1,223,160	2,713,271	8,312,348	45 "

Of the 8,312,348 tons of Anthracite carried by the six competing lines from the three regions, a railroad and a canal from each, the percentage is divided thus:

Carried by the two Schuylkill lines	45	per ct.
" " Lehigh lines	22¼	"
" " Lackawanna lines	32¼	"

With the developments in progress in the Mahanoy Coal Basin, and with the projected direct connection from the head of the Schuylkill Valley to the south end of the Wyoming Coal Basin completed, the two Schuylkill lines will unquestionably carry 50 per cent. of the Anthracite supply to the great seaboard market.

Principles Regulating the Liability of a Master for Injuries Suffered by his Servants.

The general principles of law applicable to cases where a servant suffers injury caused by the unskilfulness or negligence of another servant, for which the employer is not responsible, are stated at considerable length in the late case of Wright *vs.* The New York Central Railroad Company, decided in the Court of Appeals, December, 1862. The facts of the particular case are not necessary to an understanding of the doctrines here laid down.

The opinion of the Court was delivered by ALLEN J., who said:

Certain principles touching the liability of the master to the servant for injuries sustained by the latter in the course of his employment, have by the decisions in this State and several of the sister States as well as in England, become so well settled that they need only to be stated. They cannot be disturbed neither can their authority be disregarded.

1. A master is not responsible to those in his employ for injuries resulting from the negligence, carelessness, or misconduct of a fellow servant engaged in the same general business. (Farwell *vs.* The Boston and Worcester Railroad Corp., 4 Met., 49; Brown *vs.* Manvell, 6 Hill, 592; Coon *vs.* Syracuse and Utica Railroad Company, 1 Seld., 492; Sherman *vs.* Rochester and Syracuse Railroad Company, 17 N. Y., 153; Russell *vs.* Hudson River Railroad Co., id., 134; Boldt *vs.* The New York Central Railroad Company, 18 id., 432; Hayes *vs.* The Western Railroad Corp., 3 Cush., 270; Albro *vs.* The Agawam Canal Company, 6 Cush., 75; Ray *vs.* The Boston and Worcester Railroad Corp., 9 id., 112; Gillshanon *vs.* The

Stony Brook Railroad Corp., 10 id., 228; Hutchinson *vs.* The York &c., Railway Company, 5 Exch. R., 343.)

2. The rule exempting the master is the same, although the grades of the servants or employers are different; and the person injured is inferior in rank, and subject to the directions and general control of him by whose act the injury is caused. (Hayes *vs.* The Western Railroad Corp., *supra*; Albro *vs.* The Agawam Canal Company, *supra*; Wyman *vs.* Jay, 5 Exch., 352.)

3. Neither is it necessary in order to bring a case within the general rule of exemption, that the servants, the one that suffers and the one that causes the injury, should be at the time engaged in the same operation or particular work. It is enough that they are in the employment of the same master, engaged in the same common enterprise, both employed to perform duties and services, tending to accomplish the same general purposes, as in maintaining and operating a railroad, operating a factory, working a mine, or erecting a building. (Boldt *vs.* New York Central Railroad Company; Coon *vs.* Syracuse and Utica Railroad Company; Farwell *vs.* Boston and Worcester Railroad Company; Albro *vs.* The Agawam Canal Co.; Gillshanon *vs.* Stony Brook Railroad Corp.,; Wyman *vs.* Jay; Hutchinson *vs.* York and Newcastle Branch Railway Company, *supra.*) The question is whether they are under the same general control. (Abraham *vs.* Reynolds, 5 Hurl. & Norm., 142.)

4. The master is liable to his servant for any injury happening to him from the misconduct or personal negligence of the master; and this negligence may consist in the employment of unfit and incompetent servants and agents, or in the furnishing for the work to be done, or for the use of the servant machinery or other implements and facilities improper and unsafe for the purposes to which they are to be applied. (Priestly *vs.* Fowler, 3 M. & W., 1; Hayden *vs.* Smithville Manufacturing Company, 29 Conn., 548; Roberts *vs.* Smith, 2 Hen. & Munf., 213; Williams *vs.* Clough, 3 id., 257; Griffiths *vs.* Godson, id., 648; Wyman *vs.* Jay, *supra*; Owens *vs.* Holland, Ellis, Blackb. & Ell., 102; Kegan *vs.* W. R. R. Corp., 4 Seld., 175; Patterson *vs.* Wallace, 28 L. & E., 48; Marshall *vs.* Stewart, 33 id., 1.)

The employer does not undertake with each or any of his employees for the skill and competency of the other employees engaged in and about the same service, or for the sufficiency and safety of the materials and implements furnished for the work, or for the convenience or comfort of the laborer, since neglect and want of due care in the selection and employment of the agent or servant through whose want of skill or competency an injury is caused to a fellow servant must be shown in order to charge the master; and if the injury arises from a defect or insufficiency in the machinery or implements furnished to the servant by the master, knowledge of the defect or insufficiency must be brought home to the master, or proof given that he was ignorant of the same through his own negligence and want of proper care; in other words it must be shown that he either knew or ought to have known the defects which caused the injury. Personal negligence is the gist of the action. (Hayden *vs* Smithville Manufacturing Company; Roberts *vs.* Smith; Wyman *vs.* Jay; Keegan *vs.* Western Railroad Corporation; Owens *vs.* Holland, *supra.*) It is not enough that the foreman and general superintendent of the work is guilty of negligence causing injury to the subordinates. (Wyman *vs.* Jay, and other cases cited before.)

5. If the servant sustaining an injury through the unskilfulness or insufficiency in numbers, or otherwise of his fellow laborers, or defects in the machinery, or conveniences furnished by his employer, has the same knowledge or means of knowledge of the unskilfulness and deficiencies referred to as his employer, he cannot sustain an action for the injury, but will be held to have voluntarily assumed all the risks of the employment, incurred as they were by the want of skill and incompetency of those employed with him, or the defective machinery used in the work. (Priestly *vs.* Fowler, 3 M. & W., 1; Hayden *vs.* Smithville Manufacturing Company; Griffiths *vs.* Godwin; Williams *vs.* Clough; Keegan *vs.* Western R. R. Corporation; Paterson *vs.* Wallace, *supra*; Skip *vs.* Eastern Counties Railway Company, 24 L. & E., 396; S. C., 9 Exch., 223.)

It is not sufficient to charge the master for injuries to his servant, that others of his employees were unskilful or incompetent, or the machinery &c., unsafe and unfit for the purposes, unless the injury complained of resulted from these causes. If it was occasioned notwithstanding such defects by the negligence of a fellow servant, the master is not responsible. (Hayes *vs.* The Western R. R. Corporation, 3 Cush., 270; Skip *vs.* Eastern Counties Railway Company, *supra.*)

There is nothing in any of the cases to which our attention has been called, or which have come under my observation inconsistent with these propositions which I think are fairly deducible from all the cases. Keegan *vs.* Western Railroad Corporation, in this Court decides nothing but the conceded doctrine, that for personal negligence of the master, which was found by the referee in the absence of any knowledge of such negligence as well as of any negligence on the part of the injured servant, the master would be liable. The case is a very bold case of gross, even culpable negligence, as stated and found by the referee, and scarcely needed the authority of the Court to determine the liability of the defendant. Principles well established, and as old as the common law fixed that. Paterson *vs.* Wallace, *supra*, merely decides that in that case, and under the circumstances there was a question of negligence proper to be submitted to a jury. If it is claimed that the decision goes further, and to the extent of holding the employer liable for any injury which might be permitted by him or his foreman, or principal superintendent, it cannot be sustained without overruling the subsequent decisions at Westminster Hall, as well as in the Courts of this country. Marshall *vs.* Stewart turned upon the point which was mainly considered by Judge Selden in Russell *vs.* Hudson River Railroad Company, *supra*, to wit whether a servant was in the employ of his master, and within the operation of the rule regulating the liability of the master for injuries received by the servant *eundo et redeundo* to and from the place of his labor, and the case is not authority beyond this, and to this extent it is supported by the decision of this Court.

Upon these principles, it was the judgment of the Court, that the plaintiff who was a brakeman on the road of the defendant, and had been injured by the negligence of an engineer who was not shown to be incompetent for his place, ought to be non-suited.

Finances of Wisconsin.

From the report of the State Treasurer for the fiscal year ending September 30, 1863, we learn that—

The balance in the general fund on the 1st day of October, 1862, was	$166,523 04
Total receipts into said fund, including sale of bonds ($50,000,) and tax for State aid ($272,156 16,) amount to	850,376 12
Making a total of	$1,016,899 16
The total disbursements from said fund during the year amount to	810,940 55
Leaving a balance on hand Sept. 30, 1863	$205,958 61

At the close of the last fiscal year there were remaining in the Treasury, unsold, State bonds amounting to $75,400.

Of these, $37,400 were sold at par, payable on delivery, as authorized by Chapter 89, General Laws of 1862. Chapter 157, of the Laws of 1863 directed the Governor, Secretary of State, and State Treasurer to negotiate a loan, or to issue certificates of indebtedness in such amounts as they might deem necessary, for war purposes, as indicated in said chapter, not exceeding, in all, the sum of $350,000.

In accordance with said authority, there have been issued two certificates of indebtedness, amounting to $220,000, and invested in the school fund, as directed by Chapter 100, Laws of 1863.

By authority of said Chapter 157, there is still available for war purposes, when needed, the sum of $130,000.

The last Legislature, "for the purpose of defraying extraordinary expenditures in the enlargement of the capitol," also directed that State bonds to the amount of $50,000 be issued, redeemable April 1st, 1868. Said bonds have been issued and sold at par.

During the past year, $50,000 in State bonds, issued in 1858, have been redeemed, leaving outstanding, in bonds and certificates, $1,720,000, redeemable as follows:

Bonds for	$250,000,	6	per cent., in	1867
"	50,000,	6	" in	1868
"	100,000,	6	" in	1877
"	100,000,	6	" in	1878
"	100,000,	6	" in	1879

"	100,000,	6	" in	1885
"	100,000,	6	" in	1886
"	100,000,	6	" in	1887
"	100,000,	6	" in	1888
Certificate of indebtedness,	$150,000	7	p. c. in.	1893
"	"	70,000	7 "	in. 1894

☞ On Thursday last the elevations were taken from a point just west of the Chautauqua creek, on the line of the Lake Shore road, to the top of the hill on the route to Corry, by T. W. Bristol, of Fredonia, an experienced civil engineer, and who was an engineer on the New York and Erie road. He pronounces the route thus far entirely practical. Further surveys will be made at an early day. The route looked out reaches the top of the hill just east of Bell's Gulf. In the location of the grade, it may vary from this a short distance either east or west. The advantages of the proposed road are too apparent to lead to any great delay in its construction. The grade up the hill will be much lighter than was at first supposed.—*Westfield Republican.*

American Railroad Journal.

Saturday, February 13, 1864.

Stock Exchange and Money Market.

The press is teeming with publications, in various shapes, on the financial questions of the day; each writer attempting to maintain his own opinions, as it seems to us, rather than to arrive at the truth. However honest they may be in their purpose, they appear to be limited in their views by some favorite theory; and it is easy enough to find arguments at any time, by any well-read man, or even any original thinker, in favor of a preconceived opinion. Our Money Market is the puzzle of the hour, and its curious intricacies tax the cleverest and the most painstaking, even those most anxious to be right.

Two pamphlets of more than ordinary merit have recently made their appearance, on the subject of the National Financial System. The one is from the pen of James Gallatin, Esq., the President of the National Bank of this city, an able

and honest writer, and an experienced financier. It is of course written from his own stand-point, and illustrates the dangerous consequences of a reliance on paper money, his fear of a coming collapse, his convictions that there is but one safe method of National financiering, and that Mr. Chase's policy has been a mistaken one in almost every particular. His views are stated with so much earnestness, so much sincerity, and so much force, it is almost impossible not to be affected by his apprehensions. He is of the opinion that the war could have been carried on, and the currency maintained at a specie standard, and that two hundred millions of gold would have been sufficient for the purpose.

But there are others who believe all this an impossibility. Two hundred millions of gold, about the sum deemed sufficient by Mr. Gallatin, would not have lasted the Government six months. Once paid out, there was no practicable method of getting it back again. The banks could not have been relied upon, for they were always liable to suspend in a panic, even in time of peace, and never have held, and never will hold, specie enough to pay their debts upon a sudden call, no matter how valuable their securities appear on their books. When a whole community suddenly rush for a single article, such as coin, and wish to convert all their securities into that shape, it is entirely a deception to expect their wishes can be gratified. The coin of a country bears no proportion to its real means, or its business, or its usual credits; it is nothing more than a universal standard with universal currency, a settler of balances, and an adjuster of commercial indebtedness, especially between Nations. In such a country as ours, where enterprise is the master of the hour, and fearlessness the essence of success, gold never could be made the sole basis of our industrial or commercial transactions. It is altogether too limited and too inconvenient a commodity.

We could not easier have carried on this war, than we could have settled this continent with gold alone.

Mr. Chase could not help himself. Had he borrowed money at 12½ per cent., as was done by the Secretary of the Treasury under Mr. Buchanan's administration, had he trusted to the favor of banks or capitalists, he would soon have found it impossible to get on, except by paying an enormous interest, and sinking half the capital of the funded debt as their inducement. So also the adherence to a gold standard would have inevitably brought the debtor class into the greatest straights, and possibly would have produced a wide spread bankruptcy. With such results staring him in the face, no patriotic financier at the head of the Treasury department could hesitate. It was not contraction which could save the country, but expansion, precisely as it has saved England more than once in its monetary crises. Instead of borrowing paper money of paper issuing banks, or close calculating capitalists checking on banks, the Nation created and used its own. We have thus been able successfully to carry on a tremendous struggle, obtain a sound currency up to this time, the best we ever had; keep the people in activity and cheerfulness, and maintain our various industries in full employment. Any other course it seems to us would have been our ruin.

The other pamphlet, written by A. B. Johnson, Esq., of Utica, is from the pen of a veteran banker, a profound thinker, and a successful man of business. A philosophic spirit pervades all his various productions, and his age and experience have matured his judgment. His work is entitled our "Monetary Condition," and it is full of instruction and interest.

His first proposition is, that "the price of commodities is affected not by any quantity of money, but by the relation which the quantity bears to the uses that exist therefor."

2. Scarcity and abundance of money relate only to its sufficiency or insufficiency for accustomed uses.

3. Uses for money increase and diminish ratably with the supply. This he illustrates in the following manner:

Under our legal tenders and specie suspended bank credits, money is increased in our country beyond all precedent; and at the same time, a large portion of accustomed business has been suspended by the war. Still so urgent is money to create uses for itself, that, under the privation of better employments, money holders are competing with each other, at almost fabulous prices, for railroad and kindred stocks, which, in regular commercial times, were deemed almost worthless; just as sailors on long voyages, when casually deprived of tobacco, chew oakum, if it be the most congruous obtainable substitute. But men are not more gross in their speculations under a plethora of money, than they are fastidious under a great scarcity; and when the time shall arrive that money will shrink into the comparatively small compass of a specie redeemable capacity, and legitimate business shall resume its wonts, under the influence of peace, operators will look back with as much disgust on their present purchases of stocks, as we may suppose the sailors look back, when safely in port, on the oakum they resorted to in their tobacco famine.

4. The quantity man possesses of any article, regulates its use.

5. Suspension of specie payments becomes a necessity when we persist in using more money than specie can supply. Under this head Mr. Johnson makes the following pertinent and admirable remarks:

When specie in any country is insufficient to transact its business, specie must be superseded by some more abundant money, or business must be contracted to the specie capacity. Such a crisis is occasionally produced by the over trading of a community, and governments look thereon with offended majesty; requiring usually a sacrifice of business, as a hecatomb for the unauthorized evil. But the exigencies of our war, have made government itself, the offending party, as a better alternative than taxation, for a necessary supply of money; or than its allurement from accustomed uses by exorbitant premiums. Neither of these methods, would, however, have adequately supplied the money, and both would alike have prostrated business and demolished private fortunes. We may, therefore, be thankful, that after a few expensive trials, (issuing Treasury notes to bear 12 per cent. interest, and selling 6 per cent. 20 year bonds at 5 per cent. discount,) the Government created legal tenders, a money of its own, and as extensible as exigencies might require.

6. Legal tenders are as valuable as the debts they can cancel. This assertion is maintained as follows, in an original and striking manner:

An opinion exists that legal tenders are dependent for value, on their ultimate redemption in coin, as pledged by Congress; but a paper dollar's certain convertibility into coin at the end of fifty years, would give it a present value of only four cents in our State, where interest is seven per cent. the year. Its certain convertibility at the end of ten years, would make the present value not more than fifty cents. The present value of our legal tenders is, their ability to cancel existing debts. This, too, despite of, possibly, an oversight of Congress, in giving no pledge that the legal tender ability of the notes shall remain, till the notes are redeemed. The omission acquires some importance since the law of March, 1863, took from the notes their convertibility into 6 per cent. bonds; though the convertibility was pledged to the notes as unqualifiedly as their legal tender ability. Should, however, the legal tender ability of the notes be rescinded, they would thereby cease from being money, and their further value would much depend on the terms of the rescinding law. The fifty million of Treasury notes created July 17, 1861, were not legal tenders, and were below par value, after even the law of Aug., 1861, assimilated them with coin in the payment of imposts; though on the suspension of specie payments, the notes gradually approximated to the price of coin.

7. Legal tenders are more repletive of money, than irredeemable bank credits.

8. An antagonism exists between legal tenders and irredeemable bank credits.

9. The ability to illimitably replete money with legal tenders, enables Government to borrow at any rate it may desire.

10. Government inflates money, ratably with the smallness of interest it pays on its loans, and *vice versa*.

11. The inclination of a people to repudiate a National debt, is inverse their capacity for self-government.

12. When coins cease being money, they become merchandise, whose daily price will obey the laws of demand and supply. This is illustrated in the following manner:

Whether we say coins appreciate, or paper money depreciates, prices remain unaffected by our phraseology; hence the question is appropriate to only a boy's debating society. A gold dollar will sell to-day, for ten per cent. more than a silver dollar, while both are equivalents as money. Not long since, the price of coins declined 50 per cent., though they were purchased at 23 per cent. premium, with the same paper money that had a few days previously paid for them a premium of 73 per cent. Like wheat, tobacco and cotton, coins vary daily in price, as the quantity sought by purchasers, exceeds or falls short of the quantity seeking a market; hence speculators can increase or diminish prices of coin, if they can control the supply; while legal tenders are innoxious of the rise or fall, except as their abundance facilitates their acquisition, or their scarcity makes acquisition difficult. We are not surprised at this in wheat, &c., and we need not be surprised at it in coins when they become divested of their strait jacket as money, and assume the freedom of merchandise.

Long usage is the sole reason of our identification of money with coin; but nothing is money but what the law makes to be such; hence the legal value of money is separable and distinct from the material of which the money is composed. When our Government, some years since, lessened the material value of our silver small coins, no person who wanted the coins as money, disapproved the deterioration; and no person desires now, the larger coins of gold or silver, in preference to legal tenders, except for some uses other than as money.

We often hear in New York that coins rise or fall in price, as victories incline for or against our arms, and thereby are supposed to hasten or retard peace. Peace will diminish the Government's uses for money, and when they shall need no further loans, no motive will exist for a continuance of legal tenders. Indeed the present emission of interest-bearing two year notes, (self productive instead of productive only by employment as money,) looks much like a preparatory

abandonment of an irredeemable government money; and a shifting on to banks of the whole responsibility of an irredeemable currency. But while the Government may thus easily resume specie as its only money, let no man suppose the change will much aid banks. Even peace will create for them, and the public generally, more new uses for money than those which the war will suspend; while to reduce the whole to a specie capability, will be attainable by only the old process of pressure, bankruptcy and panic, the devastating storm which alone can purify financial disorders.

13. Every kind of money possesses advantages and disadvantages, peculiar to its kind.

14. Finally. A compensating principle pervades the universe.

Our readers will admit that those topics are suggestive, and we will add that they are most ably treated. We should be glad to publish the pamphlet entire, if we had room for it.

The market for the last week has been strong in Government and railway stocks. Money rules at previous rates, and gold has gone up gradually to 159¾.

The exports of specie since the 1st of January to the 6th of February, amounted to the large sum of $6,121,695. On the 1st of January the Sub-Treasury held $13,309,000 in specie, and on the 1st of February $15,663,000 so that in spite of the foreign depletion the Government is constantly gaining in advance of its wants. The regularity and certainty of its payments of interest in gold, give its stocks the value of gold, and though they are held according to variety and tenor at from 104 to 107, there is no reason why they should not advance to a premium equal to the difference between paper and gold. This fact seem to be understood abroad, for it is known that orders to purchase are now large and frequent.

As various estimates have recently been published in regard to the present condition of the National debt, of an evident purpose to weaken the confidence of the public in the financial arrangements of the Treasury, it may be well to correct the error, by the publication of the following official abstract.

The Public Debt of the United States on the 2d of February, 1864, was as follows:

4 per cent Temporary Loan	$1,526,092 07
5 per cent Temporary Loan	30,293,404 34
Temporary Loan Coin	9,547 00
Past Due Treasury Notes	13,100 00
Suspended Requisitions	21,375,060 27
Immediate Liabilities	53,217,203 68
Old Public Debt	67,221,591 80
Three Years Bonds	139,586,450 00
Two Years 6 per cent Bonds	82,600,000 00
United States Notes	450,785,004 60
Fractional Currency	18,246,290 15
Twenty Year Bonds	50,000,000 00
Treasury Note Loan	50,000,000 00
Oregon War Debt	1,016,000 00
5 per cent Treasury Notes	2,074,445 61
Certificates of Indebtedness	137,980,950 00
5-20 Bonds	503,005,178 51
Total	$1,473,225,714 35
Less amount in Treasury	4,033,064 69
Total Debt	$1,469,192,649 66

Of this amount four hundred and sixty eight millions bear no interest, being legal tender and fractional currency. The whole debt on the 1st of June will be about $1,666,992,649, and within a few millions of the original estimate of Mr. Chase. Those alarmists who assert the debt is already more than two thousand millions and will be four thousand millions, are far in advance of the facts, and of course of the truth.

We can not but think very poorly of the motives and conduct of the men who find their chief pleasure, in decrying and running down the resources, and of exaggerating the difficulties of the country.

Our readers will find the reports of the Railroad Share Market carefully corrected, and of a favorable character, the market having been well sustained. Government bonds are firm, those of 1881 registered, selling at 107, 108, 5-20's 104¼, 7-30's 107¾.

Sterling exchange rules at 175 to 175½. Our money and exchange market is likely to be affected to some extent and favorably, if a war should break out in Europe, as is now quite probable.

The Washington Insurance Company have declared a dividend of eight per cent, payable on demand in cash to stockholders. Also, an interest dividend of six per cent. on outstanding scrip, payable 15th inst. Also, a scrip dividend of sixty per cent. on the earned premiums of policies entitled to participate in the profits for the year ending 31st January, 1864. The scrip will be ready for delivery, on and after 15th March proximo.

Yonkers and New York Railroad.--Oneida County Directors.

A new railroad enterprise has just been inaugurated, designed to connect the lower part of Westchester county more closely with the city of New York. The Yonkers and New York Railroad Company has been organized under the General Railroad Act, with a capital of $500,000, and we learn it is likely to commence operations at an early day. The line of this road extends from a point near Harlem bridge along the east side of the Harlem river, touching at Central Bridge, High Bridge, King's Bridge, etc., thence into the valley of the Nepperhan, or Saw Mill River, at Yonkers, and some distance up said valley, to accommodate the local travel in that vicinity. Provision is also made for several lines of street railroads in the village of Yonkers, some of which are to be constructed early in the ensuing spring. The Directors are: Robt. P. Getty, Isaac H. Knoz, Justus Lawrence, Ethan Flak, of Yonkers; Alanson A. Summer, New York; Calvert Comstock and James I. Johnson, Albany; Lewis Lawrence, Utica; John H. Wardwell, Rome; Delos De Wolf, David Mannering, Chas. H. Smyth, Oswego; Nathan Randall, Homer. Robt. P. Getty, has been elected President of the Company, and Elon Comstock, Secretary and Treasurer. The necessary stock has been subscribed for organization, and ten per cent. thereon paid and articles of association filed in the office of Secretary of State. —*Utica Observer.*

Lawrence Coal Mining Company.

This company was formed in 1862. Its property is located on River Hebert, Cumberland, Nova Scotia, at the head of the Bay of Fundy, about 90 miles east of St. John, and covers an area of 640 acres of coal land. Operations were commenced in the Summer of 1862, in opening these mines, building railroad, wharf and houses, and from that time have progressed steadily but quietly in developing their property. They have brought to this market some 15,000 tons of coal, and those that have used it speak in the highest terms of its quality, especially for steam purposes. It is also a fine gas coal, and for grates said to be equal to the Scotch Cannel. At the annual meeting of the company, held the 20th ult. at their office in this city, the Treasurer's report was highly satisfactory to the stockholders, showing affairs to be in a flourishing condition. It is the expectation of the company to mine and send to market from 25 to 30,000 tons the coming year, having made ample arrangements during the autumn and present winter for so doing.

The following named officers were elected for the year ensuing:—Directors, B. Bradley, John Ford, Arthur Pickering, George Hibbard, T. R. Hawley, E. C. Dillingham, John C. Alden. At a subsequent meeting of the Directors, Benj. Bradley, Esq., was chosen President, and J. C. Alden, Treasurer.—*Com. Bulletin.*

Western Maryland Railroad.

The subject of the extension of this road to Hagarstown has again been revived; and, as we learn, attracts more than usual attention from the citizens of Western Maryland and those living along the line. Meetings, having the contemplated extension in view, have been held at Middleburg, four miles from Union Bridge (where the road at present terminates) Double Pipe Creek, Mechanicstown and Emmittsburg. These meetings, it is said, were all largely attended, drawing together the most public spirited, solid men of the regions in which they were held. Among those present at the meetings we notice the names of Capt. Robert Irwin, President, J. B. Boyle, Treasurer, Augustus Shriver, Secretary, and Wm. Fisher, Attorney of the Company; together with several of the directors. A very active interest, evincing a determination to extend material aid toward completing the work was manifested. Committees were appointed to procure subscriptions, and elict an interest in the contemplated extention Resolutions to that end were also adopted at all the meetings. The Baltimore *American*, alluding to this subject, says:

There can be no doubt that the linking together of Baltimore and Hagerstown, including also Western Maryland and the proverbially rich region of country tributary thereto, would be most desirably and permanently advantageous. Had the road been completed, as above referred to, prior to our national troubles, its advantages must have proved almost beyond calculation, as well to the Government in facilitating the transportation of troops, stores, &c., as to Baltimore and to persons all along the line. The Company, too, might have realized an immense revenue.

Camden and Amboy Railroad.

According to the opinion of the Chancellor delivered on the 3d inst., in the case of the Camden and Amboy Railroad against the Delaware Bay Railroad and Camden and Atlantic Railroad, the only exclusive franchise held by the joint companies, is that of the through transportation of freight and passengers between New York and Philadelphia, and refers not to local business. The Chancellor ordered a reference to be made to a master to take an account of passengers and merchandise carried over defendants' roads between New York and Philadelphia, and make a distinct account of soldiers and munitions of war carried over said roads, and that any final order concerning the last accounts should be reserved until the coming of the master's report. An injunction was granted to restrain the use of defendants' roads, in competing in through business with that of the plaintiffs. The case will be carried to the Court of Errors.

Railroad from Janesville to Winona.

The Winona *Republican* says that the survey of the proposed line of railroad from Janesville, Wis., to Winona, is progressing. At last accounts the corps of engineers had extended their survey to a point several miles west of Sparta. They believe that a feasible route can be obtained by crossing the "dividing ridge" from six to ten miles west of that village, and thence in a nearly direct line to Winona. This survey is being carried on in the interest of the Chicago and Northwestern Railway Company.

The Colorado Gold Mines.

It is only within a few years that much has been known about Colorado, and now principally from its gold product, which has run up to millions annually, the product of the ensuing year being estimated at over twenty millions, and with the improvements now brought to bear upon the extraction of gold quartz from the same amount of labor is increasing the yield three or four fold. The attention of New York and Eastern capitalists has been attracted to the mines of Colorado, and heavy amounts have been invested in claims on which to erect corporations. About a million and a half has been invested since September last, and eight or ten new companies started, which if honestly managed, must pay largely, and attract floating operators.

The Excelsior Company, which started in the Spring of 1863, has made considerable headway, and owns a valuable property; at the rates paid for claims now it could be sold so as to net $10 or $15 a share; the management, however, think the results justify developing rather than selling; its market price now is about 7⅛ per share.

The New England Mining Company, just started upon a developed property, under the management in Colorado of Rodney French, well-known here, is now, we understand, being placed in this market at $2½ to $3 per share.

The Colorado Gold Mining Company, of Boston, one of the most prominent and profitable of these companies, which is owned principally by New England capitalists, and which has a large amount of improved machinery in successful operation, is now running a large mill, the building of which with its machinery cost over one hundred thousand dollars while the application of scientific invention is very largely increasing its yield of the precious metal.—*Boston Com. Bulletin.*

Great Western (Ca.) Railway.

It is stated on good authority that the Great Western Railway Company have already purchased the iron for a third rail to be laid from Suspension Bridge to this city, so as to give the road a gauge like the New York Central and Michigan Central. The design is to put this rail down the coming season, and then run freight cars from Chicago to New York without unloading. The cars will be ferried across the river at this city—a practice that is getting to be quite common where ferries connect roads. The great lines south of the lakes are moving to make such connections as will enable them to run freight through without transhipment, and the Great Western and Michigan Central are compelled to do something of the same sort to keep up the race.—*Detroit Free Press.*

Extension of the Mahoning Railroad.

We learn that the Atlantic and Great Western Railway Company have in contemplation the extension of the Cleveland Branch of their road into the Chenango Valley, and connect it with the Erie and Pittsburg road, thereby reaching large fields of coal that now finds its way to Erie, for Western Lake transportation; and also opening the way for iron ore landed at Cleveland to reach the furnaces in that valley, and the return of the products so far as wanted on the lakes.

☞ A good deal of work has been done on the old Steubenville Railroad in Pennsylvania, under the auspices of a new company. The bridge piers have been almost built, and work all along the route on the heavier sections. The Chartiers Valley branch will at no distant day be built. The local coal trade along these two roads ought to insure their completion—independent of their connections with other railroads.

☞ It is desired to secure the construction of a railroad through the Tuscarawas Valley, Ohio. The proposition is to run the road from Akron or Franklin Mills to Canton—thence through or near Sandyville down the Tuscarawas Valley to intersect the Steubenville and Indiana Railroad near Trenton.

Erie and Pittsburg Railroad.

We learn that this work has progressed so far that the cars are now running on it from the junction with the Lake Shore Railroad, at Girard, to the town of Sharon on Shenango Creek, in Hickory Township, Mercer county, close to the Ohio State line, and that in a few days the cars will commence running still further South to Middlesex, in the same county and on the same stream, whose valley it follows. This is about half the distance from the Lake Shore road to the junction with the Pittsburg, Fort Wayne and Chicago Railroad. The remainder of the track is being rapidly laid, and early in the Spring the trains will run from Erie harbor to Pittsburg.

☞ The Buffalo Commercial *Advertiser* says that a new railroad project is on foot and an application is to be made to the Legislature, to authorize towns on the proposed line to issue bonds in its aid. The plan is to use the Albany and Susquehanna road for about thirty-five miles, and then diverge northerly into Otsego county, through Cherry Valley, Springfield and other towns, and through Bridgewater and Sangerfield to Oneida county, and thence through Madison and Onondaga counties to Auburn, in Cayuga county. The projectors also entertain the idea of a further extension to connect near Geneva with the broad gauge line from Buffalo to Albany. It is thought that the Schenectady and Catskill road will be built, and a third rail laid, making a broad gauge line from the intersection of the Susquehanna to Catskill.

Railroad Earnings--Monthly.

The business of the Illinois Central Railroad for the month of January was:

LAND DEPARTMENT.

Acres construction lands sold	16,460.50	for	$187,055 17
Acres Interest Fund Land sold	242.59	"	2,292 59
Acres Free Lands sold	2,782.76	"	30,302 50
Total sales during month of January, 1864:	19,485 85	for	$220,100 26
To which add town lot sales			1,702 30
Total of all			$221,802 56
Cash collected in January			$118,274 67

TRAFFIC DEPARTMENT.

Receipts from passengers	$138,615 83
" freight	164,228 20
" mails	6,358 33
" rent of road	4,000 00
" other sources	5,000 00
Total receipts in month of Jan., 1864	$318,200 36
Total receipts in month of Jan., 1863	299,944 02

The earnings of the Galena and Chicago Union Railroad Company for the month of Janury, 1864, were $138,757 27
Corresponding month of previous year 132,517 62

Increase $6,239 75

The earnings of the Michigan Central Railroad for the month of January, 1864, were $252,435 00
Corresponding month of previous year 242,073 00

Increase $10,362 00

The earnings of the Michigan Southern and Northern Indiana Railroad for the month of January, 1864, were $250,163 00
Corresponding month of previous year 248,784 00

Increase $15,348 00

The earnings of the Hudson River Railroad for the month of January, 1864, were $501,231 39
Corresponding month of previous year 458,953 06

Increase $42,278 33

The earnings of the Chicago and Rock Island Railroad Company for the month of January, 1864, were $155,034 00
Corresponding month of previous year 139,686 00

Increase $15,348 00

The approximate earnings of the Marietta and Cincinnati Railroad Company (as re-organized) for the month of January, 1864, were $56,539 98
Corresponding month of previous year. 38,202 72

Increase $18,337 26

The earnings of the Milwaukee and Priarie du Chien Railroad for the month of January, 1864, were $102,748 00
Corresponding month of previous year 67,129 00

Increase $35,619 00

The earnings of the Cleveland and Pittsburg for the month of January, 1864, were $139,414 00
Corresponding month of previous year 123,808 00

Increase $15,606 00

The earnings of the St. Louis, Alton and Terre Haute Railroad for four months ending December 31, 1862 and 1863, have been as follows:

	1862.	1863.
September	$95,969	$153,469
October	118,887	144,736
November	143,748	129,166
December	149,979	135,616
Total	$508,583	$562,987
Increase, 1863		$54,404

The earnings of the Chicago and Northwestern Railway for the month of January, 1864, were:

From passengers	$35,850 47
" freight	58,752 59
" mail	2,033 33
" express	1,411 67
" miscellaneous	75 00
Total	$98,123 06
Corresponding month of previous year	69,691 19
Increase	$28,431 87

Railroad Earnings--Weekly.

The traffic of the Great Western Railroad for the week ending January 29, 1864, was as follows:

Passengers	$23,692 18
Freight and live stock	41,467 12
Mails and sundries	3,364 92
Total	$68,524 22
Corresponding week of 1863	63,362 64
Increase	$5,161 58

The earnings of the Galena and Chicago Union Railroad for the week ending January 31st, were:

	1863.	1864.
Freight	$32,602 07	$43,762 78
Passengers	7,260 93	11,595 14
Mails, &c	1,733 50	2,980 00
Total	$41,596 50	$58,337 92
Increase 1864		$16,741 42

The earnings of the Chicago and Alton Railroad Company for the week ending Jan., 31st, were:

	1864.	1863.
Passengers	$12,278 50	$11,854 16
Freight	16,044 42	14,662 41
Sundries	1,534 23	1,035 33
Total	$29,857 15	$27,551 90
Increase 1864		$2,305 25

The earnings of the Marietta and Cincinnati Railroad for the 4th week in January, were:

	1864.	1863.
Passengers	$13,147 23	$4,843 00
Freight	10,171 01	11,390 90
Mail, express & telegraph	1,086 50	1,253 29
Total	$24,404 74	$17,487 19

The earnings of the Toledo and Wabash Railroad Company for the 4th week in January, were:

	1863.	1864.
Passengers	$7,315 60	$10,760 60
Freight	22,134 04	23,215 03
Total	$29,449 64	$33,975 63
Increase		$4,525 99

Lake Superior Copper Mines.

Below we give the products of the mines mentioned for the month of December, 1862:

Franklin	67 tons and	210	lbs.
Grand Portage	23 "	3	"
Hancock (Nov. & Dec.)	9 "	725	"
Isle Royale	30 "	—	"
Pewabic	98 "	421	"
Quincy	133 "	1067	"

From the agents' reports of the products of the mines in the Portage Lake District, we condense from the *Mining Gazette* the following comparative table, which will show the products of each mine for the past two years:

	1862.		1863.	
	Tons.	lbs.	Tons.	lbs.
Quincy	1,252	1,493	1,472	1,531
Pewabic	1,025	1,789	1,083	752
Franklin	945	1,194	780	189
Isle Royale	520	1,080	872	920
Grand Portage	—	—	247	883
Hancock	66	846	72	820
Huron	98	874	69	283
Mesnard	33	000	—	—
St. Mary's	—	—	2	000
Totals	3,942	1,266	4,101	878

Showing an increase over last year's product of 158 tons, 1,652 lbs. Notwithstanding the scarcity of laborers, the Quincy, Pewabic and Hancock mines have increased their united products over those of last year 283 tons, 465 lbs. The Grand Portage, which yielded nothing last year, produced this year the handsome return of 247 tons, 883 lbs. The St. Mary's, which is another new mine, sends in barrel work to the amount of two tons. The Mesnard, although it is not printed in the above table, sent three tons and 1,185 lbs. of barrel work to the Portage Lake Smelting Works in October last; the Pontiac mine at the same time sent 1,580 lbs. The united products of the Franklin, Isle Royale and Huron mines have decreased 333 tons, 1,706 lbs.

The purity of the mineral smelted has been increased this year about 3 per cent., making a further increase of 120 tons. This, in connection with the uniform high price of copper, makes the past year the most profitable since the commencement of mining operations in the district.

The amount of ingot copper shipped from the Smelting Works during the season of navigation, 1863, was 3,971,785 lbs.

With the exception of the Quincy yield, all the mineral raised and cleaned in the Portage Lake District, has been refined at the Smelting Works. The Quincy mineral shipped should therefore be added to this, to obtain the actual shipments.

During the season of navigation the Quincy shipped 1,356 tons, 142 lbs.

Supposing this mineral will average 80 per cent purity, and it will probably go a little more, it would yield 2,169,713 lbs. of ingot copper. The amount of ingot yield shipped in 1868, would therefore be—

Smelting Works.....3,971,735 lbs.
Quincy Company.....2,169,713 "

Total.....6,141,448 "

Which if sold at an average price of 30 cents per lb., would net $1,842,434 40.

United States Mint.

The Annual Report of the Director of the United States Mint for the fiscal year ending June 30th, 1868, states that the coinage for this period has been much less than during the preceding year; although for that year it was much below former years. The same causes that contributed to reduce the coinage of 1862, are still in operation; and we cannot hope for any material increase until the Rebellion is crushed, peace restored, and consequent and increasing prosperity gladden our country.

The deposits of foreign coin and bullion were small; the importation of specie having greatly decreased, if not entirely ceased.

The amount of bullion in value received at the Mint and Branches, during the fiscal year, was as follows:

Gold, $23,149,495 41; silver, $1,674,605 90; total deposits, $24,820,101 31. From this must be deducted the rebellion re-deposited, or bars made at one Branch of the Mint and deposited at another for coinage. This deduction being made, the amount will be $23,701,837 31. The coinage for the same period was as follows:—Gold coin, $20,695,852; fine gold bars, $1,949,877 90; silver coins, $1,174,092 80; silver bars, $390,204 42; cents coined, $478,450; total coinage, $24,688,467 12; number of pieces of all denominations of coin, 51,980,575.

The distribution of the bullion received and coined at the Mint and branches, was as follows: At Philadelphia, gold deposits, $3,401,374 55; gold coined, $3,184,892; fine gold bars, $156,039 74; silver deposits and purchases, $386,189 73; silver coined, $358,217 80; silver bars, $6,897 83; cents coined, $478,450. Total deposits of gold and silver, $3,787,564 28; total coinage, $4,184,497 38; number of pieces, 49,108,402.

The Assay office in New York received during the year, $1,812,106 60 in gold bullion and in silver, $325,536 26. Fine gold bars stamped at that office, 1488; value, $1,793,838 16; silver bars, 1916; value, $158,542 91; total value of gold and silver bullion, $2,137,642 82. The Branch Mints in the States now in rebellion, are not in operation, and no reports have been expected or received.

The surprising developments of gold and silver production in the interior of our national territory are alluded to. Idaho is the present California. The deposits from there have included grades of fineness from 798 to 949 thousandths. Not less promising are the mines opening in Washington and Oregon. The Oregon gold is nearly equal to that of California, while that of Washington Territory varies from 650 to 938 thousandths. Enough is now known of these two Territories to warrant the statement that in quantity and quality their product will rival or surpass the product of California. Arizona is yielding both gold and silver, and the quantity is unlimited. The copper coinage has been very large, amounting to 164,011,000 nickels. The profits from the nickel cent pay all the expenses of coinage and distribution. Notwithstanding this, the report recommends that the coin be further depreciated by the omission of all nickel, retaining its present size and devices, being composed of nine per cent. copper, the remainder tin and zinc in suitable proportions.

THE NEW YORK CENTRAL RAILROAD COMPANY,
TREASURER'S OFFICE, ALBANY, Jan. 20, 1863.

TWENTY-FIRST SEMI-ANNUAL DIVIDEND.—The Directors of this Company have declared a Semi-Annual Dividend of Five Per Cent. on the capital stock thereof, free of the United States income tax, payable on the twentieth day of February next.

Dividends in New York, will be paid at the office of DUNCAN, SHERMAN & CO.; in Boston, at the office of J. E. THAYER & BROTHER; in Albany, at the Albany City Bank.

The transfer books will be closed at the close of business on SATURDAY, the 30th day of January inst., and be reopened on the morning of WEDNESDAY, the 24th day of February next. JOHN V. L. PRUYN,
316 Treasurer.

Chicago & Great Eastern Railway Company,

FIRST MORTGAGE BONDS,
FOR $2,000,000.

SUBSCRIPTION BOOKS OPENED WITH
Messrs. SCHUCHARDT & GEBHARD,
BANKERS,
No. 21 NASSAU ST., NEW YORK.

THE CHICAGO AND GREAT EASTERN RAILWAY COMPANY now offer for sale ONE MILLION ONE HUNDRED THOUSAND DOLLARS of their FIRST MORTGAGE BONDS, in sums of One Thousand Dollars each, maturing in thirty years, bearing interest at the rate of seven per cent. per annum, payable in the City of New York on the first days of April and October in each year.

These Bonds are secured by a First and only Mortgage on the property, income and franchises of the Railway Company, executed to Frederick Schuchardt and Henry Morgan of the City of New York, Trustees.

The remaining Nine Hundred Thousand Dollars of the Bonds are set apart and remain in the hands of the said Trustees, for the purpose of being exchanged for the indebtedness of the Chicago and Cincinnati Railroad Company, running from La Crosse to Logansport; this effected, the $2,000,000 will form a First and only Mortgage on a line of road 110 miles in length, extending from Chicago to Logansport, where it connects with the Cincinnati and Chicago Air-Line Railroad, forming the shortest line by 40 miles between Chicago and Cincinnati, and by 36 miles the shortest line between Louisville and Chicago.

It will also open, in connection with Roads now in operation, entirely new and very direct lines from Chicago to New York, Philadelphia, Baltimore, and all Eastern Cities. The distance between Chicago and New York by this route being shorter than by either of the existing lines via Dunkirk or Buffalo.

The road is now under contract, and the most strenuous efforts are being made to have it open for traffic during the summer of 1864.

The interest on the Bonds maturing during the progress of the work has been provided for, and will remain on deposit with the Bankers of the Company, Messrs. SCHUCHARDT & GEBHARD, No. 21 Nassau st., to whom the Company refer for further particulars, and where subscription books for this loan have been opened.

THE PRACTICAL DRAUGHTSMAN—RECENTLY PUBLISHED.

THE PRACTICAL DRAUGHTSMAN'S BOOK OF INDUSTRIAL DESIGN, and Machinist's and Engineer's Drawing Companion; forming a complete course of Mechanical Engineering and Architectural Drawing. From the French of M. Armengaud, the elder, Professor of Design in the Conservatoire of Arts and Industry, Paris, and M. M. Armengaud the younger, and Amouroux, Civil Engineers. Re-written and arranged, with additional matter and plates, selections from and examples of the most useful and generally employed mechanism of the day. By William Johnson, Assoc. Inst. C.E., Editor of "The Practical Mechanic's Journal." Illustrated by fifty folio steel plates and fifty wood-cuts. In one volume, 4to., Price SEVEN DOLLARS and FIFTY CENTS.

Among the contents are:—*Linear Drawings, Definitions and Problems*, Plate I. Applications, Design for inlaid Pavements, Ceilings and Balconies, Plate II. Sweeps, sections and Moldings, Plate III. Elementary Gothic forms and Rosettes, Plate IV. Ovals, Ellipses, Parabolas and Volutes, Plate V. Rules and Practical Data. *On Coloring Sections with Applications.*—Conventional colors, Composition or Mixture of Colors, Plate X. *Continuation of the Study of Projections*—Use of sections—details of machinery, Plate XI. Simple applications—spindles, shafts, couplings, wooden patterns, Plate XII. Method of constructing a wooden model or pattern of a coupling, Elementary applications—rails and chairs for railways, Plate XIII. *Rules and Practical Data*—Strength of material, Resistance to compression or crushing force, Tensional Resistance, Resistance to flexure, Resistance to torsion, Friction of surfaces in contact.

THE INTERSECTION AND DEVELOPMENT OF SURFACES, WITH APPLICATIONS.—*The Intersection of Cylinders and Cones*, Plate XIV. *The Delineation and Development of Helices, Screws, and Serpentines*, Plate XV. Application of the helix—the construction of a staircase, Plate XVI. The Intersection of surfaces—applications to stop-cocks, Plate XVII. *Rules and Practical Data*—Steam, Unity of heat, Heating surface, Calculation of the dimensions of boilers, Dimensions of fire-grates, Chimneys, Safety-valves.

THE STUDY AND CONSTRUCTION OF TOOTHED GEAR.—Involute, cycloid, and epicycloid, Plates XVIII and XIX. Involute, Fig. 1, Plate XVIII. Cycloid, Fig. 2, Plate XVIII. External epicycloid, described by a circle rolling about a fixed circle inside it, Fig. 3. Plate XIX. Internal epicycloid, Fig. 2, Plate XIX. Delineation of a rack and pinion in gear, Fig. 4, Plate XVIII. Gearing of a worm with a worm-wheel, Figs. 5 and 6. Plate XVIII. *Cylindrical or Spur Gearing*, Plate XIX. Practical delineation of a couple of Spur-wheels, Plate XX. *The Delineation and Construction of Wooden Patterns for Toothed Wheels*, Plate XXI. *Rules and Practical Data*—Toothed gearing, Angular and circumferential velocity of wheels, Dimensions of gearing, Thickness of the teeth, Pitch of the teeth, Dimensions of the webb, Number and dimensions of the arms, wooden patterns.

CONTINUATION OF THE STUDY OF TOOTHED GEAR.—Design for a pair of bevel-wheels in gear, Plate XXII. Construction of wooden patterns for a pair of bevel-wheels, Plate XXIII. *Involute and Helical Teeth*, Plate XXIV. *Contrivances for obtaining Differential Movements*—The delineation of eccentrics and cams, Plate XXV. *Rules and Practical Data*—Mechanical work of effect, The simple machines, Centre of gravity, On estimating the power of prime movers, Calculation for the brake, The fall of bodies, Momentum, Central forces.

ELEMENTARY PRINCIPLES OF SHADOWS.—*Shadows of Prisms, Pyramids and Cylinders*, Plate XXVI. *Principles of Shading*, Plate XXVII. *Continuation of the Study of Shadows*, Plate XXVIII. *Tuscan Order*, Plate XXIX. *Rules and Practical Data*—Pumps, Hydrostatic principles, Forcing pumps, Lifting and forcing pumps, The Hydrostatic press, Hydrostatical calculations and data—Discharge of water through different orifices, Gaging of a water-course of uniform section and fall, Velocity of the bottom of water-courses, Calculation of the discharge of water through rectangular orifices of narrow edges, Calculation of the discharge of water through overshot outlets, To determine the width of an overshot outlet, To determine the depth of the outlet, Outlet with a spout or duct.

APPLICATION OF SHADOWS TO TOOTHED GEAR, Plate XXX. *Application of Shadows to Screws*, Plate XXXI. *Application of Shadows to a Boiler and its Furnace*, Plate XXXII. *Shading in Black—Shading in Colors*, Plate XXXIII.

THE CUTTING AND SHAPING OF MASONRY, Plate XXXIV. *Rules and Practical Data*—Hydraulic motors, Undershot water-wheels, with plane floats and a circular channel, Width, Diameter, Velocity, Number and capacity of the buckets, Useful effect of the water-wheel, Overshot water-wheels, Water-wheels with radial floats, Water-wheel with curved buckets, Turbines. *Remarks on Machine Tools.*

THE STUDY OF MACHINERY AND SKETCHING.—Various applications and combinations: *The Sketching of Machinery*, Plates XXXV. and XXXVI. *Drilling Machine; Motive Machines;* Water wheels, Construction and setting up of water wheels, Delineation of water wheels, Design for a water wheel, Sketch of a water wheel; *Overshot Water Wheels. Water Pumps*, Plate XXXVII. *Steam motors;* High-pressure expansive steam engine, Plates XXXVIII., XXXIX. and XL. *Details of Construction; Movements of the Distribution and Expansion Valves; Rules and Practical Data*—Steam engines: Low-pressure condensing engines without expansion valve, Diameter of piston, Velocities, Steam pipes and passages, Air-pump and condenser, Cold-water and feed pumps, High-pressure expansive engines, Medium pressure condensing and expansive steam engine, Conical pendulum or centrifugal governor.

OBLIQUE PROJECTIONS.—Application of rules to the delineation of an oscillating cylinder, Plate XLI.

PARALLEL PERSPECTIVE.—Principles and applications, Plate XLII.

TRUE PERSPECTIVE.—Elementary principles, Plate XLIII. Applications—flour mill driven by belts, Plates XLIV. and XLV. Description of the mill, Representation of the mill in perspective, Notes of recent improvements in flour mills, Schiele's mill, Mullin's "Ring millstone," Barnett's millstone, Hastie's arrangement for driving mills, Currie's improvements in millstones; *Rules and Practical Data*—Work performed by various machines, Flour mills, Saw mills, Veneer-sawing machines, Circular saws.

EXAMPLES OF FINISHED DRAWINGS OF MACHINERY.—Plate A, Balance water-meter; Plate B, Engineer's shaping machine; Plate C D E, Express locomotive engine; Plate F, Wood planing machine; Plate G, Washing machine for piece goods; Plate H, Power loom; Plate I, Duplex steam boiler; Plate J, Direct-acting marine engines.

DRAWING INSTRUMENTS.

Also just published A PRACTICAL TREATISE ON MECHANICAL ENGINEERING; comprising Metallurgy, Molding, Casting, Forging, Tools, Workshop Machinery, Mechanical Manipulation, Manufacture of Steam Engine, &c. With an Appendix on the Analysis of Iron and Iron Ores. By Francis Campin, C. E., President of the Civil and Mechanical Engineers' Society, &c. To which are added Observations on the Construction of Steam Boilers and Remarks upon Furnaces used for Smoke Prevention; with a Chapter on Explosions. By Robert Armstrong, C. E. Revised, with Notes, by John Bourne. Rules for Calculating the Change Wheels for Screws on a Turning Lathe, and for a Wheel-cutting Machine. By J. La Nicca. The Management of Steel, including Forging, Hardening, Tempering, Annealing, Shrinking and Expansion. And the case-hardening of Iron. By George Ede, 8vo. Illustrated with 29 plates of Boilers, Steam Engines, Workshop Machinery, Change Wheels for Screws, &c., and 100 wood engravings. 8vo., Price SIX DOLLARS.

CAST STEEL.

MANUFACTURED BY

NAYLOR, VICKERS & CO., SHEFFIELD, ENGLAND.

CAST STEEL TYRES WITHOUT WELD,

Reversible Crossings and Frogs, Disc Wheels, Pistons and Piston Rods without weld, Crank and Straight

AXLES, AND EVERY DESCRIPTION OF STEEL FOR RAILWAY PURPOSES.

STEEL CROSSINGS have been in use more than three years with very little perceptible wear, in places where the ordinary ones had to be replaced every four months. They have been estimated to be good for ten years in the worst places.

THE "VICKERS" TYRES are in constant and extensive use on almost all the Railways in Great Britain, and also on many roads in other parts of Europe. Their chief advantages are:—1. Their Durability, they will outlast any Iron Tyre without being turned, and for this reason are cheaper than Iron Tyres (free of cost). 2. Their Safety; being without a weld they are not liable to break, and Steel is proved to be a stronger and tougher metal than any other. 3. Their Uniformity they do not wear in flat places nor "laminate." 4. They are not injuriously affected by frost, and are guaranteed to stand the severest climate.

STEEL AXLES will be found economical, because they may with safety be made much lighter than those of Iron. They will wear longer and "smoother," and will consume much less oil; nor are they liable to granulate from constant use.

For CIRCULARS, GIVING FULL PARTICULARS AND TESTIMONIALS, PRICES, etc., apply to **NAYLOR & CO.,**

Resources of the United States.

REPORT OF MR. RUGGLES.

Mr. S. B. Ruggles, of this city, was present at the International Statistical Congress at Berlin, in September last, as the representative of the United States, and took a distinguished part in its proceedings, much to his own honor, and greatly to the advantage of his country. Notwithstanding the debates and reports were principally in the German language, and Mr. Ruggles labored under the disadvantage of not being acquainted with it, he succeeded in making a profound impression on the Congress by his ample exposition of the resources of the United States. Since his return home the result of his mission communicated from Berlin to the Secretary of State, has been transmitted to the Senate and given to the public through the press.

These International Scientific Congresses in Europe have been in fashion for some years past, and the one of September is to meet again in 1865. They are the only outlet of the continental brain, which is forbidden political discussion, and instead of being able to discuss the first principles of Government and society, the rudimentary processes of popular content and prosperity is driven off to the consideration of abstract notions of money, or weights or measures, or scientific difficulties, and in the almost quixotic attempt to obtain "an accurate notion of quantities." Few measures of these European Congresses so directed and limited can ever be of much real advantage to the subject classes abroad. For want of adequate education few can take any interest for example in the theory of the metrical system of weights or measures, founded on a measurement of an arc of a meridian. Indeed not many persons have any notion how such an arc has been measured. Nor are the statistical facts collected at such a Congress likely to be of any material benefit to any classes but the rulers themselves. They doubtless wish to know how large are the productions, and populations, the increase, the earnings and the commercial ability of their subjects; for knowing these they can adroitly govern for war or for peace, increase or diminish their expenditures, enrich themselves and their families, or practise for a time some unpleasant economies.

Statistical information in the United States is on the contrary of immense immediate value to the people themselves. It is a guide to their enterprise, an assurance of success, a rule of action, an aid to emigration, and a foundation for wise, present, and prospective legislation.

We have not seen any particular report of the proceedings of the Congress of Berlin, beyond an occasional reference to it at the time in the continental papers, but we are inclined to the opinion that Mr. Ruggles' report must have entirely overlaid all those which came from such countries and cities as Baden, Bavaria, Denmark, Hanover, Holstein, Hesse Capel, Lubec, and a score of others of equal unimportance topographically and politically considered. Even in comparison with the reports of the Austrian, Russian, French and English representatives, that of Mr. Ruggles, must have been an immense surprise to the honest plodders in the Congress, and we regret with him that his departure from this country was so hurried that he had not time to do himself or his subject the full justice it deserved, and to have astonished them in a still greater degree. The following extracts contains the principal points made by Mr. Ruggles:

PROGRESS OF AMERICAN STATISTICS.

Much important information, though often wanting in classification and arrangement, is embraced in various official papers issued under public authority, both national and State, and also by boards of trade and other voluntary societies whose labors are more or less statistical. Attempts have been made to impart to American statistics more of an analytical and scientific character, by means of official bureaus to be specially organized for the purpose. The State of Ohio, some years since, under the administration of Gov. Chase, the present Secretary of the Treasury of the United States, established a Bureau of Statistics as one of the organs of the State Government, which was committed to the charge of Mr. Mansfield, whose copious and instructive annual reports fully justify the selection; while far away in the remote interior, beyond the great chain of lakes, the infant State of Minnesota, with a single exception the youngest in the American Union, containing, by the census of 1860, but 173,000 inhabitants clustered around the headwaters of the Upper Mississippi, and more than 1,500 miles from the Atlantic, established, almost at the moment of its birth, a Bureau of Statistics. Two of the annual reports of its able Commissioner of Statistics, Mr. Wheelock, are now submitted to the inspection of the International Statistical Congress, as affording reasonable ground of hope that, in due time, America may at least approach in scientific accuracy and philosophical arrangement the more mature and perfect performances of the statisticians of Europe.

The Congress of the United States has not yet established a distinct Bureau of Statistics, although repeatedly recommended and urged to do so; but in taking the census of inhabitants, as required by the National Constitution, at intervals not exceeding ten years, the practice has been gradually introduced of superadding, by special direction of Congress, inquiries more or less extensive in regard to various branches of industry and production, and recently embracing social statistics to a moderate extent.

TERRITORY, POPULATION AND PROGRESS.

The compend of the census of 1860, and other official documents now submitted to the International Statistical Congress, will establish the following cardinal facts in respect to the territory,

population and progress in material wealth of the United States of America:

I. The territorial area of the United States at the peace of 1783, then bounded west by the Mississippi River, was 820,680 square miles, about four times that of France, which is stated to be 207,145 exclusive of Algeria. The purchase from France of Louisiana, in 1804, added to this area 899,680 square miles. Purchases from Spain, and from Mexico, and the Oregon treaty with England, added the further quantity of 1,215,907 square miles; making the total present territory 2,936,166 square miles, or 1,879,146,240 acres.

Of this immense area, possessing a great variety of climate and culture, so large a portion is fertile that it has been steadily absorbed by the rapidly increased population. In May last there remained undisposed of, belonging to the Government of the United States, 964,901,625 acres.

II. The population of the United States, as shown by the census of 1860, was 31,445,080; of which number 26,975,575 were white, and 4,441,766 black, of various degrees of color—of the blacks, 3,953,760 being returned as slaves.

The increase of population since the establishment of the Government has been as follows:

1790	3,929,827,	
1800	5,305,937,	increase 35.02 per cent.
1810	7,239,814,	increase 36.45 per cent.
1820	9,638,191,	increase 33.13 per cent.
1830	12,866,020,	increase 33.49 per cent.
1840	17,069,453,	increase 32.67 per cent.
1850	28,191,876,	increase 35.87 per cent.
1860	31,445,080,	increase 35.59 per cent.

This rate of progress, especially since 1820, is owing in part to immigration from foreign countries.

There arrived in 10 years—

From 1820 to 1830	244,490
From 1830 to 1840	552,000
From 1840 to 1850	1,558,300
From 1850 to 1860	2,707,624
Total	5,062,414

Being a yearly average of 126,560 for the last 40 years, and 270,762 for the last ten years.

The disturbances in the United States caused by the existing insurrection, and commencing in April, 1861, have temporarily and partially checked this current of immigration, but during the present year it is again increasing.

The records of the Commissioners of Emigration of New York show that the arrivals of that port alone have been for

	From Ireland.	From Germany.	Tot., incld'g all other countries.
1861	27,754	27,159	65,529
1862	32,217	27,740	76,306
1863, up to Aug. 20, 7⅔ mos	64,465	18,724	about 98,000

The whole number arriving from foreign countries in the forty years from 1820 to 1860, were 5,062,414.

It is not ascertainable how many have returned to foreign countries, but they probably do not exceed a million.

If the present partial check to immigration should continue, though it is hardly probable, the number of immigrants for the decade ending in 1870 may possibly be reduced from 2,707,624 to 1,500,000

The ascertained average increase of the whole population in the seven decades from 1790 to 1860, which is very nearly 33⅓ per cent, or one-third for each decade, would carry the present numbers (31,445,080).

By the year 1870 to	41,926,750
From which deduct for the possible diminution of immigrants, as above	1,207,624
There would remain	40,719,126

Mr. Kennedy, the experienced Superintendent of the Census, in the Compend published in 1862, at page 7, estimates the population of 1870 at 43,318,432, and of 1880 at 56,450,241.

The rate of progress of the population of the United States has much exceeded that of any of the European nations.

III. The natural and inevitable result of this great increase of population, enjoying an ample supply of fertile land, is seen in a corresponding advance in the material wealth of the people of the United States. In actual practice, the real property is rarely assessed for more than two-thirds of its cash value, while large amounts of personal property, being easily concealed, escape assessment altogether.

The assessed value of that portion of property which is thus actually taxed increased as follows: In 1791 (estimated) $750,000,000; 1816 (estimated) $1,800,000,000; 1850 (official valuation) $7,135,780,228; 1860 (official valuation) $16,159,616,068, showing an increase in the last decade alone of $9,023,835,840.

During the decade ending in 1860 the sum of $413,541,510 was expended within the limits of the interior central group, known as the "food-exporting States," in constructing 11,212 miles of railway to connect them with the seaboard. The traffic receipts from those roads were:

In 1860....$31,835,031 | In 1861....$35,305,509
In 1862....$44,908,405

The saving to the communities themselves in the transportation, for which they thus paid $44,908,405, was at least five times that amount, while the increase in the exports from that portion of the Union greatly animated not only the commerce of the Atlantic States, carrying those exports over their railways to the seaboard, but the manufacturing industry of the Eastern States that exchange the fabrics of their workshops for the food of the interior.

By carefully analyzing the $8,048,825,840 in question, we find that the six manufacturing States of New England received $735,754,244 of the amount; that the middle Atlantic, or carrying and commercial States, from New York to Maryland, inclusive, received $1,834,911,579; and that the food-producing interior itself, embracing the eight great States of Ohio, Indiana, Illinois, Michigan, Wisconsin, Minnesora, Iowa, and Missouri, received $2,810,000,000.

The rapid influx of population into this group of States increased the quantity of the "improved" land, thereby meaning farms more or less cultivated, within their limits, from 26,680,361 acres in 1850 to 51,826,395 in 1860, but leaving a residue yet to be improved of 230,308,293 acres. The area of 25,146,054 acres thus taken in ten years from the prairie and the forest is equal to seven-eighths of the arable area of England, stated by its political economists to be 28,000,000 of acres.

The area embraced in the residue will permit a similar operation to be repeated eight times successively, plainly demonstrating the capacity of this group of States to expand their present population of 8,057,690 to at least 30,000,000, if not 40,000,000, of inhabitants without inconvenience.

The effects of this influx of population in increasing the pecuniary wealth as well as the agricultural products of the States in question are signally manifest in the census. The assessed value of their real and personal property ascended from $1,116,000,000 in 1850 to $3,926,000,000 in 1860, showing a clear increase of $2,810,000,000. We can best measure this rapid and enormous accession of wealth by comparing it with an object which all nations value, the commercial marine. The commercial tonnage of the United States

In 1840 was	2,180,764 tons.
In 1850 was	3,535,454 "
In 1860 was	5,358,808 "

At $50 per ton, which is a full estimate, the whole pecuniary value of the 5,358,808 tons, embracing all our commercial fleets on the oceans and the lakes and the rivers, and numbering nearly thirty thousand vessels, would be but $267,940,000; whereas the increase in the pecuniary value of the States under consideration, in each year of the last decade was $281,000,000. Five years' increase would purchase every commercial vessel in the Christian world.

But the census discloses another very important feature, in respect to these interior States, of far higher interest to the statisticians, and especially to the statesmen of Europe, than any which has yet been noticed, in their vast and rapidly increasing capacity to supply food, both vegetable and animal, cheaply and abundantly, to the increasing millions of the Old World. In the last decade their cereal products increased from 309,950,295 bushels to 558,160,323 bushels, considerably exceeding the whole cereal product of England, and nearly if not quite equal to that of France. In the same period the swine, who play a very important part in consuming the large surplus of Indian corn, increased in number from 8,536,182 to 11,039,352, and the cattle frem 4,373,712 to 7,204,810. Thanks to steam and the railway, the herds of cattle who feed on the meadows of the Upper Mississippi are now carried in four days, through 18 degrees of longitude, to the slaughter-houses on the Atlantic.

It is difficult to furnish any visible or adequate measure for a mass of cereals so enormous as 558,000,000 of bushels. About one-fifth of the whole descends the chain of lakes, on which 1,800 vessels are constantly employed in the season of navigation. About one-seventh of the whole finds its way to the ocean through the Erie Canal, which has already been once enlarged for the purpose of passing vessels of 200 tons, and is now under survey by the State of New York, for a second enlargement, to pass vessels of 500 tons. The vessels now navigating the canal, exceeed 5,000 in number.

The barrels of wheat and flour alone, carried by the canal to the Hudson River, were:

In 1842....1,146,292 | In 1852....3,937,366
In 1862....7,516,397

A similar enlargement is also proposed for the canal connecting Lake Michigan with the Mississippi River. When both the works are completed, a barrel of flour can be carried from St. Louis to New York, nearly half across the continent, for fifty cents, or a ton from the Iron Mountain of Missouri for $5.

IV. The great metalliferous region of the American Union is found between the Missouri River and the Pacific Ocean. This grand division of the Republic embraces a little more than half of its whole continental breadth. Portland, in Maine, is the meridian 70° west from Greenwich; Leavenworth, on the Missouri River, in 95°; and San Francisco, on the Pacific, in 123°. By these continental landmarks the western or metalliferous section is found to embrace 28°, and the eastern division between the Missouri and the Atlantic, at Portland, 25° of our total territorial breadth of 53° of longitude.

It has been the principal work and office of the American people, since the foundation of their Government, to carry the machinery of civilization westward from the Atlantic to the Missouri, the great confluent of the Mississippi. So far as the means of rapid intercommunication are concerned, the work may be said to be accomplished, for a locomotive engine can now run without interruption from Portland to the Missouri, striking it at St. Joseph, just below the fortieth parallel of latitude. In the twenty years preceding 1860, a network of railway, 31,196 miles in length was constructed, having the terminus of the most western link on the Missouri River. The total cost was $1,151,560,829, of which $850,900,681 was expended in the decade between 1850 and 1860.

The Government, feeling the vital, national imance of closely connecting the States of the Atlantic and of the Mississippi with the Pacific with all practicable dispatch, has vigorously exerted its power. On the 1st of July, 1862, nearly fifteen months after the outbreak of the existing insurrection, and notwithstanding the necessity of calling into the field more than half a million of men to enforce the national authority, Congress passed an act for incorporating "The Union Pacific Railway Company," and appropriated $66,000,000 in the bonds of the United States, with large grants

of land, to aid the work, directing it to be commenced at the 100th meridian of longitude, but with four branches extending to the Missouri River. The necessary surveys across the mountain ranges are now in active progress, and the construction of the eastern division leading westward from the mouth of the Kansas River, or the Missouri, has actually commenced. The whole of that division, including that part of the line west of the 100th meridian to the foot of the Rocky Mountains, is on a nearly level plain, and is singularly easy of construction. Its western end will strike the most prominent point of the auriferous regions in the Territory of Colorado, where the annual product of gold, as stated in the official message of the Territorial Governor, is from $5,000,000 to $10,000,000. The gold is there extracted by crushing machines from the quartz, in which it is found extensively distributed, needing only the railway from the Missouri to cheaply carry the necessary miners with their machinery and supplies. The distance to that point will be about 650 miles, which will be passed in 28 hours. When completed, as it easily may be, within the next three years, it will open the way for such an exodus of miners as the country has not seen since the first discoveries in California, to which the American people rushed with such avidity, many of them circumnavigating Cape Horn to reach the scene of attraction.

Meanwhile, a corresponding movement has commenced on the Pacific, in vigorously prosecuting the construction of the railway eastward from the coast at or near San Francisco, which will cross the Sierra Nevada at an elevation of about 7,000 feet, on the eastern line of California, in the 120th parallel of longitude, and there descend into the Territory of Nevada at the silver mines of Washoe.

It is not yet possible to estimate with any accuracy the extent of these deposits of gold and silver, but they are already known to exist at very numerous localities in and between the Rocky Mountains and the Sierra Nevada, and to mention the rich quartz-mining regions in California itself, which continue to pour out their volumes of gold to affect, whether for good or ill, the financial condition of the civilized world. During the last six months gold has been obtained in such quantities, from the sands of the Snake River and other confluents of the Columbia River, as to attract more than 20,000 persons to that remote portion of our metalliferous interior. The products of those streams alone for the present year are estimated at $20,000,000.

From the documents and other evidences now before the International Statistical Congress, it must be apparent that the metalliferous regions of the United States of America are destined, sooner or later, to add materially to the supply of the precious metals, and thereby to affect the currency of the world, especially if taken in connection with the capacity of the auriferous regions of Russia, Australia, and British America, and the possibility of increased activity in the mines of Mexico.

In Mr. Ruggles' dispatch to Mr. Seward, he remarks that the session of the Congress was signalized by the adoption of resolutions, in regard to a uniform system of weights and measures, looking to an eventual change in the weight of the British sovereign, and the United States dollar, by reducing them to multiples of the French Franc. Mr. Ruggles proposed as a proper preliminary to definite action on this subject, that the production of gold and silver should be investigated by a committee for that purpose, and since his return he has pressed this idea upon the Chamber of Commerce in this city.

Those of our readers who wish to familiarize themselves with the metrical system, its advantages and disadvantages, may refer to an article on that subject in a previous number of this JOURNAL.

Calais and Baring Railroad.

The annual meeting of the stockholders of this company was held at Calais, Me., on the 31st of December, 1863. The Directors in their report refer to the prosperous financial condition of the affairs of the company, although they deemed it inexpedient to declare a dividend from the surplus earnings. The reasons for this course are the same which influenced a similar recommendation last year, which call for a close husbanding of the funds to provide for the bonds which mature in a few months. It was recommended that the board be invested with power to make a new mortgage for $100,000 to Trustees and incorporate a clause establishing a sinking fund of 2 per cent. per annum, and that the new bonds be made payable in 15 years with interest semi-annually in Boston.

The connecting business with the Lewy's Island Railroad has been carried on very harmoniously, the trains of both roads running in such a manner as to secure the greatest economy in the current expenses of each, and giving entire satisfaction to those who patronize them. This road will be similarly run next season.

The directors allude to the effort now being made in Bangor to obtain State aid in constructing the European and North American road on the upper route, taking it so far north as to allow no connection with these roads. The Calais and Baring and Lewy's Island Railroads are deeply interested that this road, when built, should be located on the central route; and the directors suggest in this connection that something should be done on the part of this company forthwith to influence proper legislation on the subject. If the central route should be adopted, these two roads would constitute a section of 22 miles of the great through road from St. John to New York, which would place the stock of both in a very improved condition.

The American end of the Salmon Falls bridge was rebuilt during the past year at an expense of $1,400.

The report of the Treasurer, F. K. Swan, Esq., exhibits the usual satisfactory condition of the affairs of the company, and shows what judicious management continues to do for the interests of the road.

We condense from the Treasurer's Report the following:

Earnings for 1863		$25,149 22
Expenses		11,966 30
Net		$13,182 92
Appropriations as follows:		
Coupons 1st mortgage bonds	$6,000 00	
" 2d " "	1,050 00	
Interest on floating debt	191 97	
		7,241 97
Balance		$5,940 95

The number of miles run during the year was 16,887. Through passengers carried, 4,320. Way and through passengers estimated at 11,000.

Funded debt of the company		$112,700 00
Floating debt		2,851 38
		$115,051 38
Available assets		9,406 03
Balance		$105,645 35

The directors were authorized to take all the necessary measures to renew the bonds which expire in July, 1864. F. K. Swan was appointed to act as agent for the company in arranging for the liquidating or retiring the bonds by substituting new bonds for them or otherwise. The Directors were also authorized to employ some person to represent the interests of this company in the matter of the construction of the Princeton and Milford road, before the Legislature.

The following gentlemen were elected officers for the ensuing year, viz:—Jas. S. Cooper, Clerk; Jas. Sargent, Geo. M. Porter, H. N. Hill, J. McAdam, E. A. Barnard, Directors; F. K. Swan, Treasurer. At a subsequent meeting of the directors, Jas. Sargent was elected President, and W. W. Sawyer Superintendent for the coming year.

Lewys Island Railroad.

This road has been managed and run since August, 1861, by Mr. W. W. Sawyer, who during that time has paid interest on the bonds advanced by this city in the construction of the road, and kept the road in good repairs.

The earnings for 1863, are as follows:

From passengers	$2,925 00
" freight	12,094 07
Total	$15,019 07
Expenses for 1863	4,390 11
Net	$10,628 96
Number of through passengers	5,234
" way "	911
Number of miles run	9,038

The condition and prospects of the road have undergone a decided improvement since Mr. Sawyer assumed the management of it. It will probably soon become a part of the line of direct communication with Bangor, which will prove ultimately advantageous to the stockholders.—*St. Croix Herald.*

Hannibal and St. Joseph Railroad.

The receipts of this road for the years ending September 1, 1861, 1862 and 1863, have been as follows:

	1861.	1862.	1863.
Passengers	$295,562 09	$200,678 62	$345,380 33
Freight	382,912 51	255,945 96	558,106 29
Miscellan's	58,855 00	70,299 86	76,106 59

Total 1863	$979,593 21
" 1862	526,924 44
" 1861	737,329 00
	$2,243,847 25
Received for sundry assets	1,644 51
" from U. S. Government	324,969 00
" from stockholders	139 00
Total receipts	$2,570,599 76

The payments, including unpaid accounts of previous years, have been as follows:

For year ending—		
September 1, 1861	$417,300 60	
" 1862	391,544 74	
" 1863	668,625 25	
Payments on account of Missouri River boats	14,150 59	
Sundry construction accounts	15,037 42	
Land departm't expens's	22,551 43	
Interest, discount and exchange paid in Missouri	7,404 30	
		1,536,614 33
Net Balance		$1,033,985 43
Of this there has been remitted to the fiscal agency at Boston		1,006,639 72
Leaving cash and cash assets in Missouri		$27,345 71

Remitted to fiscal agency		$1,006,639 72
Assets on hand Sept. 1, 1860		146,395 08
Received for convertible bonds issued Jan. 10, 1861		10,000 00
		$1,163,034 80

Disposed of as follows:

To pay interest coupons on land bonds Oct. 1, 1860	$170,520 00	
Do. plain bonds, Oct. 1, 1860, and April 1, 1861	770 00	
Do. 2d mort. bonds, Nov. 15, 1860	42,000 00	
Do. State bonds, Jan. 1, 1861 to July 1, 1863, inclusive	540,000 00	
Do. convertible bonds, Jan. 1, 1861	47,600 00	
Floating debt	142,201 23	
Discount, interest and exchange	60,087 81	
		1,003,179 04
Balance		$159,855 76

The Assets of the company, September 1, 1863, were:

In Missouri		$364,568 92
In Boston		159,855 76
		$524,424 68
Liabilities in Missouri	$79,507 85	
Bills payable in Boston	*14,000 00	
		93,607 85
Balance		$430,916 83

* Balance of floating debt—since paid.

The total land sales of the company to October 1, 1863, were 43,182 56 acres, at an average price per acre of $10.11—netting $436,445 99. Town lots sold 114 acres; average price per acre, $79.73; amount received $9,088 90. Total amount of sales, $445,534 89. The report says:

At the close of the fiscal year, ending September 1st, 1861 and 1862, the company's property and business, from well-known causes, was in too uncertain a condition, to render it practicable to make a report at those dates, which would not be quite as likely to mislead, as to enlighten the stockholders. The formal statements required by law, to be presented at the annual meetings, were therefore the only reports made for those years.

The return of peace and good order to the region traversed by the road, has brought the property of the company into a position of safety, and its business into a condition of comparative regularity.

The Directors, therefore, now submit their report, showing the business in detail, for the year ending September 1st, 1863, and in a more aggregate form, for the last three years, including the report of John L. Lathrop, Secretary and Treasurer, and of R. S. Watson, Treasurer of the Fiscal Agency, showing the financial condition of the company.

Also, the report of J. T. K. Hayward, General Superintendent, showing the business and operation of the road; and of Josiah Hunt, Land Agent, showing the condition of the land department.

The effects of the war upon the property of the company having rendered it practically certain, that the interest upon its indebtedness, as it stood two years ago, could not be met from its earnings, a plan of relief was sought, which, while doing injustice to none, would save the property from impending complications, and ruinous embarrassments.

This plan, as presented to the parties in interest, and already almost unanimously adopted by them, is shown in the report of Mr. Watson, to which we beg to refer for its details.

As the relative position of the land and convertible bonds has sometimes been misunderstood, we will here state that the land bonds, so called, are secured by a first mortgage upon the lands; but they and the convertible bonds, are together secured by a first mortgage, after the State lieu, upon the road—in this latter, neither having the advantage over the other.

It will be seen, therefore, that under the plan adopted for re-organizing the securities, there are no bonds remaining against the company, except such as come from the first mortgage as reduced; the bonds of the subsequent mortgage, to their full amount, have been put into preferred stock; and as the new bonds given for the land bonds, can still be used on the old terms for the purchase of lands, they retain all the advantage which the original land bonds had over the convertible bonds, by reason of this first lien upon the lands.

The promptness with which so large a proportion of the parties in interest have adopted it, strongly commends the wisdom and equity of the plan. As the vitality of the old mortgage is still retained for the benefit of all, as originally interested, no advantage will be gained by any parties declining to join in a plan, so generally adopted by their associates.

The capital account for the first of September, stands as follows:—

Missouri State bonds 6 per cent		$3,000,000
New land " 7 "		2,437,750
" mortgage " 7 "		633,600
Plain " 7 "		11,000
Preferred stock, 7 "		4,916,700
Common " 7 "		1,900,000
The following amount of land bonds have been received for land		$222,000
Amount not yet exchanged for the new bonds		$1,295,500
Convertible do.		314,000
2d mortgage do		193,000
Total unexchanged		*$1,802,500

* Since September 1st, more than three quarters of these have been exchanged, and the small balance is being continually reduced by additional exchanges.

When the remaining bonds are exchanged, the capital account will stand as follows:—

Missouri State bonds 6 per cent		$3,000,000
New land " 7 "		3,344,600
" mortgage " 7 "		822,000
Plain " 8 "		11,000
Total indebtedness		$7,177,600
Preferred stock		5,253,836
Common "		1,900,000
Total		$14,331,436

The earnings for the year ending September 1, 1863, have been as follows:—

From freight		$587,627 92
" passengers		330,455 67
" miscellaneous		72,271 92
Military earnings, not included in above		57,211 67
Total		$1,047,567 18

The expenses have been as follows:—

Operating expenses	$610,564 67	
Taxes	16,976 18	
		$627,540 85
Net balance		$420,026 33

The receipts and payments on account of operating, will, of course, for any fixed period, differ somewhat from the earnings and expenses.

The equipment of the road consists of 31 locomotives; 13 first class and 3 second class passenger cars; 3 baggage, 2 sleeping, 3 mail, 126 platform, 276 box, 8 way, 7 boarding, 47 dump, 25 rubble, and 36 hand cars. Miles run by engines with passenger trains, 126,817; with freight trains, 381,835; with other trains, 70,672—total, 579,324. Number of local passengers carried east, 32,001; do., west, 36,739—total, 68,740. Through passengers carried east, 9,990; do., west, 14,194—total, 24,184. Total through and local passengers carried east, 41,991; do., west, 50,932—total passengers, 92,924. Number carried one mile, 9,044,922. Tons of freight carried east, 54,369; do., west, 59,217—total tons, 113,586. Tons carried one mile eastward, 7,428,730; do., westward, 10,402,554—total, 17,831,284.

General Account, Sept. 1, 1863.

Construction expenditures		$6,141,845 70
Engineering		192,614 85
Interest and discount	$6,033,331 63	
Less from earnings	1,051,523 87	
		4,981,807 76
Fencing		6,365 69

Equipment		744,827 15
Telegraph		17,156 44
Depot grounds		56,427 00
" buildings		179,875 11
Right of way		59,612 24
Land department		92,906 19
Sinking fund		24,400 00
Old contractors' accounts		16,288 60
Fiscal agency accounts		159,855 76
		$12,983,740 00
State bonds at 20 years		$1,500,000 00
" " 30 "		1,500,000 00
Plain bonds		11,000 00
Mortgage land bonds		*5,000,000 00
Mortgage convertible bonds		1,370,000 00
Second mortgage bonds		1,200,000 00
Received from stockholders		1,783,025 00
Income bonds		605,715 00
Bills payable in Boston, (since paid)		14,000 00
		$12,983,740 00

* Of these land bonds, $222,000 have been received in payment for land sold, and thus this debt is reduced to $4,778,000.

Milwaukee and Dubuque Railroad via Monroe, Wisconsin.

The people of Milwaukee and the towns and country on the route of the projected road, are thoroughly awake to the importance of the subject. Dubuque must have another road, notwithstanding she is at present unable to build it, though by the aid of other interested capital, it can and will be done. The Milwaukee *Sentinel*, of the 21st inst., has a lengthy article on the subject, giving good and substantial reasons for the immediate prosecution of the work. There is no use in mincing matters; the Illinois Central, without a double track and at least four times its present supply of rolling stock, cannot begin to move the immense bulk of freight eastward now being produced from the fields of Northern and Middle Iowa, all of which is tributary to Dubuque, and will come, and must find an outlet eastward. Let another road be constructed and monopolies in transportation will fall hereabouts, and business will be done at only remunerative rates, instead of those that are purely speculative.—*Dubuque Commercial Reporter.*

Fair Haven and Westville Horse Railroad.

This road is three miles in length. The present capital is $100,000. The cost of the road was $50,000. The equipment consists of 7 cars and 45 horses. Dividends four per cent. every six months. The company owes nothing. The capital will be increased to $150,000 on the 1st of May next, in order to pay for three miles of new road now being built. The company will then have a road six miles long, and 12 cars and 75 horses.

Insurance Companies of the State of New York.

The following is a synopsis of the returns of the Insurance Companies of the State of New York, showing the "Assets," "Net Cash premiums received in 1863," "Losses incurred in 1863," and the "Net surplus after providing for liabilities and re-insurance."

Name of Company:	Total Assets.	Net cash premiums received in 1863.	Losses incurred in 1863.	Net surplus after providing for liabilities and re-insurance.

Philadelphia City Passenger Railroads.

We give below from the Report of the Auditor General of the State of Pennsylvania, the returns from fifteen of the Philadelphia City Passenger Railroad Companies, showing the amount of capital stock authorized, amount paid in, funded and floating debt, receipts, expenses of operating road, dividends, number of passengers carried, etc. The aggregate amount of capital authorized is $7,000,000, of which there has been paid in (exclusive of Thirteenth and Fifteenth streets) $2,475,324. The debt of all (excepting the Girard College, Ridge Avenue and Manayunk, and Seventeenth and Nineteeth streets, which are not given), amounts to $1,163,649. The aggregate receipts were $1,594,842; and the expenses (exclusive of the Girard College road) $1,002,749. The total number of passengers carried by eleven of the roads, was 26,664,510. The total number of persons killed was 12, of which 4 were passengers; injured 20, of which 10 were passengers. The number of horses employed is 2,325; cars upwards of 500.

Girard College—Capital, $500,000; paid, $160,000; receipts, $76,431; dividend, $1 50 per share.

Spruce and Pine—Capital $500,000; paid, $159,312; debt, 15,500; expenses of operating road, $56,648; receipts, $75,005; dividend, 6 per cent; passengers carried $1,857,050.

Germantown—Capital, $500,000; paid, $112,245; debt, $250,000; expenses of operating road, $83,408; receipts, $133,505; passengers carried, 2,600,000.

Fairmount and Arch—Capital $500,000; paid, $200,000: debt, $2,049; expenses of operating road, $45,400; receipts, $63,459; dividend, 7½ per cent.; passengers carried, 1,484,914.

Thirteenth and Fifteenth—Capital, $500,000; debt, $3,000; expense of operating road, $67,176; receipts, $87,604; dividend, $1 75 per share; passengers carried, 1,625,000.

Ridge and Manayunk—Capital, $250,000; paid, $118,000; expense of operating road, $21,569; receipts, $34,549; dividend, $2 10 per share.

Seventeenth and Nineteenth—Capital, $500,000; paid, $120,000; expense of operating road, $22,682; receipts, $28,447; dividend, 2½ per cent.

Philadelphia and Darby—Capital $200,000; paid, $100,000; debt, $17,000; expense of operating road, $19,385; receipts, $24,101; dividend, none; passengers carried, 275,000.

Chestnut and Walnut—Capital, $500,000; paid, $100,000; debt, $135,000; expense of operating road, $53,034; receipts, $104.727; dividend, $4 per share; passengers carried, 2,298,848.

Frankford and Southwark—Capital, $500,000; paid, $490,260; debt, $200,000; expense of operating road, $124.428; receipts, $202.367; dividend, 7 per cent.; passengers carried, 4,000,000.

Race and Vine—Capital, $500,000; paid, $180,000; debt, $172,000; expense of operating road, $65,740; receipts, $72,437; dividend, none; passengers carried, 1,355,600.

West Philadelphia—Capital, $500,000; paid, $189,000; debt, $104,000; expense of operating road, $107,479; receipts, $164,690; dividend, 11 per cent.

Second and Third—Capital, $550,000; paid, $203,757; debt, $172,100; expense of operating road, $182,825; receipts, $279,628; dividend, 10 per cent.; passengers carried, 5,800.000.

Citizen's—Capital, $500,000; paid, $192,750; debt, $6000; expense of operating road, $78,715; receipts, $126,263; dividend, 6½ per cent.; passengers carried, 2,850,000.

Green and Coates—Capital, $500,000; paid, $150,000; debt, $87.000; expense of operating road, $74,069; receipts, $124,539; dividend, $2 90 per share; passengers carried, 2,517,098.

American Railroad Journal.

Saturday, February 20, 1864.

Stock Exchange and Money Market.

The money market is said to be easy, because of an accumulation of means, or in other words capital, as represented by currency beyond the immediate use that can be made of it. Six per cent is mentioned as the rate at which unquestionable borrowers may now obtain what they require; but the great majority of persons wanting money have to pay 7 per cent, and large numbers even more than that. Yet it is a curious fact that legal tenders have been so scarce, that enough of them cannot be obtained by the government to pay off the troops, and recourse is therefore had to the 6 per cent notes as a substitute. The Assistant Treasurer a few days since, exchanged eight millions of these notes for the ordinary legal tenders, and also threw in the interest to get them. This was no more nor less than paying a premium for currency, and is in keeping with a fact we have

noticed on former occasions, that these legal tenders still bear a premium in many parts of the West.

Gold has advanced the present week to 161, in consequence as alleged of the necessities of our importers, and yet the quantity on deposit in the Banks of the City on the 15th of February, was reduced from the week previous but $549,248, and that in the Treasury increased $1,448,508, so that a million of dollars very nearly, must have come from other sources than the Banks. This will appear from the following table:

	Monday, Feb. 15.	Monday, Feb. 8.
In Bank	$23,521,453	$24,070,791
Treasury Office.....	18,562,456	17,113,941
Total	$42,083,909	$41,184,732

It is evident that we have very large resources of gold in this country independent of what the Banks hold, and that but a small portion of their reserve is ever subject to check. It is singular that the advance in the price of gold keeps so much below that of other commodities. While many articles are held at 2 and 300 per cent above their former rates, gold has been slow in its rise, and is now cheaper in proportion, than many other commodities. If it was not wanted to remit for foreign balances, or for payments of duties, the demand would be almost theoretical. It might still be hoarded but it would not be worth much of a premium except to hoarders, and those who believe it is actual wealth and not the exchangeable equivalent of wealth. We have on former occasions expressed the opinion that it was the duty of the Secretary of the Treasury, and for the interest of the Government and the people, to dispose of its surplus gold in open market, as we in common with others believed he had a right to do; certainly under the authority of the law of February 25, 1862, regulating the sinking fund. As some doubt however existed on this subject it seems a bill has been introduced into the Senate giving the Secretary of the Treasury direct authority to dispose of at least twelve millions, a sum which has probably been designated by the Secretary as one for which he has no prospective use, and will not want to meet his interest coming due, in consequence of the continued largeness of his receipts at the Customs. But much depends on the skill with which this power is used. The propriety of using it we do not question. It is well understood that the Government of Great Britain, and its monetary agent the Bank of England are always ready to steady the movements of gold. The present drain to the East has been met by a rise in interest at the Bank four times as great, in other words four hundred per cent more than the rate of former years. Eight and nine per cent have recently been asked at the same Bank where 2 and 2½ was more usually the rate. So the British Government manages its Exchequer bills, and purchases of consols precisely on a like principle, to secure steadiness in the market, and to keep it under its control.

We see no objection then, when the price of gold in this country is especially enhanced by its being demanded for duties, that our Government should throw back on the market its accumulating and unrequired surplus. It should then in our judgment be the policy of Mr. Chase to sell at once a large sum, say four or six millions; this would break down the speculation in the article, and materially assist the importers. We believe if a million a day was put on the street for a week successively, the premium would recede to 20, or 25 per cent, and be held there, so that the Government might if required, replenish its stock of the article at low prices, making a large gain to the Treasury by the operation. This repeated again and again, would make the traffic in gold one of the most undesirable, as well as the most unreliable of all operations; at least the trial should be made and a safer agent to carry out the plan, could not be found than the present Assistant Treasurer, who in his service under several administrations has developed great skill and ability in his administration.

Government stocks continue firm and on the rise, as the probability increases of a termination of the war during the present year, increased by the very decided reaction in North Carolina, the re-establishment of a loyal state government in Arkansas, the enormous amount of desertion from the enemy's ranks, and the voluntary coming over of eminent politicians and officers from the South into our lines, and accepting the terms of the President's amnesty. Government stocks must rise. We are not surprised that the 7 30's are held at a 111, or 5 20's at 107. In the numerous foreign banking houses where this JOURNAL is almost exclusively read, there is discovered a growing tendency to invest in our Government securities, and those which have done so have realised so far very encouraging profits. It is believed by some of our far seeing calculators, that on the return of peace the quotations of these securities will advance 30 to 40 per cent. Stocks which pay their interest in gold regularly, notwithstanding the wants and disbursements of the Government during this expensive war, will most assuredly pay them in peace.

We publish in another part of this JOURNAL copious extracts from the report made by our distinguished fellow citizen S. B. Ruggles, of the result of his mission to the International Statistical Congress held in Berlin in September last. Mr. Ruggles perfectly comprehended the grandeur and resources of the country he represented, and his broad and comprehensive views must have produced some effect on the savans around him, who were earnestly seeking to find out how much of vitality is still left in Europe. But while we are looking at the material, which lies in such magnitude around us, we should not forget it is to be realised in a great degree only by production, manufactures and distribution. This last office belongs to Commerce. The unchecked destruction of our ships on the ocean, by a few rebel steamers has had a most disastrous effect on our foreign trade. If any one will take the trouble to investigate the subject, he will find it not only carried on by foreign ships, to the exclusion of our own, but that it has very much decreased in amount. With France it is nearly extinct.

We have not a line of steam packets left on the Ocean. Correspondence, the essence of commercial activity and enterprise, even on a reduced scale, must pass through foreign mails. Certainty of advices and reports of sales come tardily to us, and long after the merchants of France and England have read and answered their letters. To increase our commerce and our revenue, there is an obvious necessity of establishing lines of mail steamers between our principal ports, as Boston, New York, Philadelphia, Baltimore and New Orleans with the foreign ports with which they trade. So too it is indispensable that San Francisco should be connected with China, Japan and Asiatic Russia. We could in this case have no important competition from England either in this last direction, or in that of Brazil. How is this to be arranged? The Secretary of the Navy has certainly understood the importance of this subject, and wisely proposed in his recent report, to use a portion of the regular Navy as Mail Steamers, and he is entitled to great credit for the suggestion. If we may believe what we see in the Navy Register, if we may trust to the recent public statements of Mr. Donald Kay, an eminent shipwright, we have a number of wooden steamers of war with sufficient speed to answer the purpose. He names several equal to 12 and 13 miles an hour. Shall we lay these vessels up to rot in our navy yards, some of them only recently constructed, or shall we use them for the valuable purpose of mail steamers, keeping these afloat with reduced armaments and crews, and carrying mails, passengers and certain kinds of freight, retaining up at the same time their naval efficiency.

A recent report on this subject by the New York Chamber of Commerce, shows the necessity of immediate action, and we rejoice it has come to the proper conclusion. It may be the wish, and it may be the interest of some capitalists to build private steamers and obtain large subventions from the Government. But to get up a dozen lines, for we want as many, will be the work of twenty years. And the application to Congress for aid, will involve the use of means and appliances which are always unpopular, demoralizing, and to be dreaded. On the contrary, these Government packets would nearly support themselves, keep up the school of the Navy, be an efficient fleet of cruisers protecting as well as contributing to our commerce, and could at any time be withdrawn when private enterprise entered into competition. This is so obviously our policy, we wonder it has not called out the unanimous voice of the Press in its favor. We cannot conceal our astonishment that so plain a proposition, so economical a scheme, and one so sure immediately to revive our foreign trade, has not had advocates everywhere in and out of Congress. In six months' time we could have a dozen lines at work, and correspondence with all parts of the world, ensuring orders for our goods and the interchange of commodities. We do earnestly commend this subject to our friends and readers as a measure of vital importance to the increase of our manufactures, our products, and our revenue. We venture to predict, that instead of our Customs duties standing at 100 millions a year, if this policy we advocate was boldly and promptly carried out, they would in a very few years be doubled. Every man who holds a dollar of the National securities, therefore, should make his voice heard on this subject. We have the vessels and the speed, let the good work be commenced.

The Railway Market has been buoyant. A corner or two has had its effect on several leading stocks, and more it is said are forming. These are points not within our province of remark. What we desire to do is to present from time to time the holders of our sound, large earning stocks, such

facts, statements, abstracts of reports and tables, as that they may know what to hold and what are the values of their property, so that speculation or panic may not induce them to part with what is positively a good investment.

The Government is again receiving deposits at 5 per cent. at the Sub-Treasury, and $700,000 were so deposited on Tuesday by different city banks. The public liking much the two years legal tender paper, the supply here has been exhausted, but a fresh remittance from Washington is daily expected. The balance on hand at the Assistant Treasurer's office on Tuesday was $31,546,546.

The value of the exports of produce and merchandise, exclusive of specie, from this port during the past week was $8,546,180.

Sight bills on London, 175@175½.

The Pennsylvania Railroad Company has declared a stock dividend of thirty per cent. on the shares as they stood on the Stock Ledger of the company, Feb. 15, 1864. The new certificates covering this dividend will bear date May 1, 1864, and will be delivered on and after that date. The new stock will not participate in the accruing cash dividend payable on the 15th of May, but all dividends thereafter will be distributed equally to the old and new stock.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Debt of California.

On the 1st December, 1863, the total debt was $4,839,553 07, which is a reduction of $729,742 69 during the year. The valuation of real and personal property is $174,000,000; the rate of taxation 92 cents on $100. The war debt is now $303,161 58, from which is to be deducted the amount received from the United States Government, $426,866 89, and of the remaining $377,284 69 but $218,468 54 are justly chargeable as State debt.

The State expenditures for the fiscal year were $2,097,268 29, in which amount are included $600,000 previously accrued, and $247,445 41 paid to the United States, as the State's quota of direct tax levied by Congress. The receipts into the State Treasury during the same period were $1,626,278 58.

New Bedford and Taunton Railroad.

The annual meeting of the Stockholders of this company was held at New Bedford on the 1st inst. The earnings of the road from New Bedford to Taunton for the year ending November 30 were $108,848 58; the expenses, including $24,694 40 charged off for depreciation, were $79,942 53; net earnings $28,906 05. The earning of the Fair-

haven Branch for the same period were $46,901 05; expenses, including $17,145 interest on bonds, $44,704 78; net earnings $2,196 26; total net $31,102 32, leaving after the payment of the year's dividends, of 6 per cent, $1,102 32, to be added to the surplus, which is now $64,792 10.

The following gentlemen were unanimously elected directors: Joseph Grinnell, David R. Green, Ward M. Parker, Thomas Mandell, Thomas S. Hathaway and Chas. L. Wood.

Pennsylvania Railroads.

The following statement, prepared from the Report of the Auditor General, will show the unfinished railroads in the State of Pennsylvania, with the number of miles necessary to be constructed before their completion:

	Miles complete.	Miles. incomplete.
Bedford Railroad—Hopewell to Bedford	12⅓	7½
Bald Eagle Valley—Tyrone to Lock Haven	34	17
Bellefonte and Snow Shoe	20⅓	—
Oil Creek—Corry to Franklin	27	27
Erie and Pittsburg—Girard to New Castle	66	14⅓
Hempfield — Washington to Greensboro'	32	44
Philadelphia and Baltimore Central—Philadelphia to Port Deposit	31	19
Mifflin and Centre Company—Lewiston to Milroy	—	12½
Buffalo, Bradford and Pittsburg—Buffalo to Lafayette	12	88
Lehigh and Mahanoy—Broad Mountain Railroad to Shamokin Valley Railroad	22	18
Nanticoke—Wilkesbarre to Nanticoke	5	5
Bethlehem—Bethlehem to Bath	—	12
Reading and Columbia—Columbia to Reading	37	2

The majority of the above roads are being completed as fast as circumstances will permit.

Lead Mines of New York.

The coming spring, it is said, will witness great activity in the lead region of St. Lawrence County. With the completion of the extensive works now in progress at the Rossie Mine, employment will be found for a large number of men, and a force will also be set on the neighboring Indian River property. The Macomb Mine is continuing its regular product, showing good monthly profits, which will probably be presented to the stockholders in tangible shape, before many months. The Clute Mine is opening up a fine outcrop of galena; and between the two latter mines the Oswegatchie is starting into life, with a most excellent promise. Boston capitalists have secured much of the stock of this mine, and if indications are to be trusted, their investment will be a profitable one. The vein is of the best character, heavily charged with ore, and the property situated in the very midst of the lead country. Probably no branch of mining promises more satisfactory results, the present demand for lead being largely in excess of the supply.

Subscriptions for Stock under the General Railroad Act.

ADMISSION OF CORPORATE CHARACTER.—STOCKHOLDERS VALIDITY OF SUBSCRIPTION.—PAYMENT OF TEN PER CENT.

The case of the Black River and Utica Railroad Company recently decided in the Court of Appeals, disposes of a somewhat doubtful and important question raised under the general railroad act. It was an action to recover unpaid calls upon the defendant's subscription to the capital stock of the company. He had signed an agreement reciting the due incorporation of the company under the act, and also averring that the articles of association and affidavits had been properly filed. No money was paid at the time of the subscription; but the defendant subsequently paid forty per cent thereon. The plaintiff recovered judgment from which the defendant appealed.

SMITH, J.—The motion for a non-suit was made upon the single ground, that it was not proved that the plaintiff was a corporation. The subscription book introduced and proved signed by the defendant, distinctly recited and declared the formation and existence of a corporation organized under the general railroad act, "under the corporate name of the Black River and Utica Railroad Company," and that the articles of association, and the necessary affidavits showing due compliance with the law which had been duly filed. This must be sufficient proof of the corporate character of the plaintiff as against the defendant. By his subscription to this paper he recognized the corporate character of the plaintiff and became a stockholder in such corporation. He is estopped by his own acts and admissions from denying thereafter the corporate character of the plaintiff. Judge Thompson in Dutchess Cotton Factory *vs* Davis (14 Johns 245) said of a defendant sued like the defendant in this action upon an installment due upon his subscription to the stock of the company. "The defendant having undertaken to enter into a contract with the plaintiffs in their corporate name he thereby admits them to be duly constituted a body politic, and corporate under such name." The soundness of this rule of evidence has been asserted in numerous cases. Palmer *vs.* Lawrence, 3 Sandf. 370. Steam Navigation Company *vs.* Weed. (17 Barb. 382.) It was questioned in Welland Canal Company, *vs.* Hathaway, (Wend 480.) but that case did not present the point between a corporation and one of its own stockholders. This is a case like that in 14 Johnson (*supra*) of an action by the corporation against a stockholder, upon his subscription to its stock. I such case I think the rule stated by Judge Thompson in the Dutchess Cotton Factory *vs.* Davis, (*supra*) the true one and should apply. The admission in the defendant's subscription of the existence of the corporation, we think should be held conclusive against him in such an action. The motion for a non-suit was therefore properly denied.

The remaining exception discussed arises upon the offer to prove by the defendant, that at the time of his subscription to the stock he paid nothing, although subsequently he paid four hundred dollars in cash on account thereof.

The defendants' subscription not having been made to the articles of association for the purpose of organizing the company or made previous to the filing of such article it was essential, that the ten per cent be paid before it became a valid subscription.

His subscription was under the fourth, and not under the first section of the general railroad act. This section requires the payment of ten per cent. by each subscriber upon the amount subscribed by him at the time of subscribing.

The intent of this section was doubtless, that no subscription should be valid until ten per cent was paid thereon, and not that it should be invalid if a short interval occur between the actual subscription and the payment of the money. The subscription, and the payment of the ten per cent must both concur to make a valid subscription. The subscription one day with payment the next would satisfy the statute, and so would actual payment any period after subscription, with intent to effectuate and complete the subscription. The writing of the name in the subscription book should be deemed but part of the transaction, and provisional or conditional till the ten per cent is paid. But after the payment of the ten per cent, and certainly after the payment of forty per cent on the subscription, the statute requirement on this point must be deemed fully complied with by the defendant. We think this exception not well taken, and that the judgment below should be affirmed.

Judgment accordingly affirmed.

Important Railroad Arrangement.

Our readers will remember a dispatch from our St. Paul correspondent a few days since, stating that the Northwestern Railway had secured the control of the Minnesota Pacific Railway between Winona and St. Paul. It was also added that the section between St. Paul and Hastings was to be completed during the coming Summer, and also that the entire line to St. Paul was to be finished at the earliest day possible. This arrangement is understood to be backed up by any needed amount of English capital, and that we shall have all rail to St. Paul, with bridges at Winona and Hastings at a very early day, there can be no possible doubt. The line is understood to be one of the most favorable in the West. In its entire course to St. Paul it will vary only an unappreciable amount from a direct line.

The early completion of this road is connected with another and more important movement. English capitalists interested in the Canada Grand Trunk Railway, have taken hold of the Pacific Railway running northwest from St. Paul, and we learn that C. J. Brydges, Esq., the Managing Director of the Grand Trunk, has returned from England with all the funds pledged to build that line between St. Paul and Pembina as fast as it shall be found advisable and profitable to do it. Thirty miles above St. Paul are finished and in operation, and from fifty to a hundred more will be added during the coming summer. All the trade of the vast possessions of the new Hudson Bay Company on the rivers and streams that fall into Lake Winnepeg and Hudson's Bay, will pass to and through our city over this line.

But this is not all. The Grand Trunk managers are perfecting arrangements, if indeed they are not already perfected, to build the line between Pembina and the Pacific. This is one of the only two routes across the continent that will sustain a large and highly prosperous population throughout its entire course. The valley of the Saskatchawan is very large and productive, and on both sides of the Rocky Mountains, on the headwaters of this great river and those of the Columbia, there are vast deposits of gold, which are already attracting a large mining population. It is believed by many that this line will be completed across the continent long before our own great Pacific Railway. Our far-seeing fellow citizen, Hon. Wm. B. Ogden, it is understood, declined to

become prominently connected with the line west from Omaha, in order to identify himself with this great work. Backed up as it is by any amount of English capital, and passing a long way through the United States and the British Possessions, it will practically become the road of both countries.

For us to speculate upon the effects which the early opening of a direct railway to St. Paul, to the magnificent valley of the Saskatchawan and the gold fields at the head of it, and so onward to the Pacific, upon the growth and prosperity of Chicago would be entirely useless. Those who have watched the city's progress since 1850 need not be told that this single road, when once completed, will stimulate our growth and our commerce more than all the roads that have been opened during the past history of the city. May we live to see this prediction, as we believe it will be, more than verified.—*Chicago Tribune.*
